The policy

Policy

The policy contract is the wrapper that combines benefits in a single policy.

Multiple insured lives (maximum 20) are allowed on a policy.

Cessions

A cession is the process where all the rights, title and interest in the policy or benefits are transferred to another person or legal entity who then becomes the new owner. The person who transfers the policy is known as the cedent and the person or legal entity to whom the policy is transferred is known as the cessionary.

An absolute or outright cession: The cedent transfers all his rights, entitlements and obligations under the policy contract to the cessionary. No residual rights remain with the cedent. The cessionary will then replace the cedent as the policyholder

A collateral cession: With a collateral cession, the rights ceded to the cessionary may revert to the cedent at some future date, e.g., when the cedent meets their obligations. At the time of the cession, the actual date of the reversion may or may not be known. With a collateral cession, the cedent retains the ownership of the policy.

Momentum may only note outright cessions for the entire policy but may note collateral cessions for the following stand-alone benefits:

- Death Benefit
- Modified Death Benefit
- Education Protector
- Death Income Benefit
- Comprehensive Disability Benefit
- Own Occupation Disability Benefit
- Comprehensive ADW Disability Benefit
- ADW Disability Benefit
- Functional Impairment Benefit
- Complete Critical Illness Benefit
- Complete Enhanced Critical Illness Benefit
- Comprehensive Living Benefit

Acceptance

Cover starts on the day of acceptance unless the policyholder has specified a future starting date.

If by the time of acceptance, the specified starting date is in the past, it is adjusted in accordance with the starting date procedure mentioned below.

Starting date

The starting date of any benefit and policy will always be the first of a month.

The policyholder may choose a starting date in the future if it is not more than a maximum of the current month plus one month into the future.

The policyholder may select one of the following starting date options:

- Automatic starting date
  - The starting date will be the first day of the month following the acceptance of the benefits. Free cover applies to this option.

- Fixed starting date
  - The starting date will be the date the policyholder completes on the application form. Free cover will only apply to this option if Momentum moves the starting date to a later, future starting date, because the processing of the application is delayed.
- Starting date option to be advised
  - If the policyholder is unable to select one of the starting date options mentioned above now, the must inform their Financial Adviser of their preferred starting date option (automatic starting date or fixed starting date). The Financial Adviser will upload the relevant documentation to the Momentum system for processing.

Premium payment date

The policyholder may select the premium payment date upfront.

The payment date may be any day of the month.

The premium is due on the first of the month but we do allow clients to pay their premiums on a later date. Clients can choose a debit date until the 20th to pay the premium for same month. The policy will show will arrears until the debit date. Debits between the 21st and 31st will be in credit on the policy until the 1st of the following month.

Note: There is a two-day buffer built in for new business cases that have a debit order date between the 21st and the 31st. This is to reduce the amount of double debits Momentum will take for these policies in the following month.

Example:

New business policy issued in October with a 1 November starting date:

If the policyholder chose a debit order date for the policy between the 1st and 20th of October and the policy is accepted on any day in October, Momentum will deduct the debit order for November on the correct date.

HOWEVER

If the policyholder chose a debit order date of the 25th, and the policy is accepted on:

- 20 October. The November premium will be deducted on 25 October (in advance for November, prior to starting date).
- 26 October. The November premium will be deducted that same night.
- 29th October. Momentum will double debit the policyholders account in November. (1 x for November and 1 x for December. Note: This scenario falls outside of the two-day buffer).

Cooling-off

The cooling-off period is 31 days from the date on which a policyholder receives his new business (or alteration) contract but is no longer than 60 days after the policy's starting date (or alteration date).

If the policyholder cancels a policy or benefits within the cooling-off period, Momentum will refund any premiums they paid after the cost of any risk cover is deducted. Cooling-off may apply to a stand-alone benefit or the entire policy (at new business stage) or a stand-alone or ancillary benefit in the event of alterations.

Fees

The contract policy fee is R30 per month. The policy fee goes towards covering some of the costs in administering the policy. The policy fee may increase due to increases in administrative expenses.

Premium frequencies

Premiums may be paid monthly or annually.

If the policyholder chooses annual premiums:

- all benefits on the policy must have the same policy anniversary date
- all benefits on the policy must have the same payment frequency.

Annual premiums are subject to a 5% discount.

Annual premiums are not allowed on Complete Income Protector, Temporary Income Protector, Business Overheads Protector and Business Protector (Self-Employed) and Business Protector (Professional).

Payment methods

Only debit order payments are allowed.

The premium payer must give instruction to change debit order details. Momentum cannot accept instruction to change bank details from the policyholder.

Contract premiums

The current minimum contract premium is:

- R200 a month for Myriad policyholders
- R100 a month for Student Package

The minimum contract premium includes all benefit premiums, fees and loadings. This premium is determined after underwriting has taken place.

The premium the policyholder pays may be lower than the contract premium due to premium discounts.

The contractual premium that the policyholder must pay will reduce at the end of the benefit term for an ancillary benefit.

Non-payment of the first premium

If the first premium under a policy is not collected, the insured life will not enjoy cover until all the premiums due are received, provided that the policy has not lapsed.

Role players

Policyholder

The policyholder may be an institution (i.e., a company, close corporation or trust) or a natural person.

The policyholder is the only person who may change the existing benefit/s and add or remove benefits. No changes may be made without the authorisation of the policyholder although the consent of one of the other roleplayers may be required before a change is made.

The policyholder is responsible for the payment of premiums due on the policy.

The policyholder decides who the insured lives and beneficiaries are.

The policyholder(s) own(s) all the benefits provided by the Myriad policy according to the ownership percentages.

There is a minimum of one policyholder and a maximum of 25.

Premium payer

The premium payer may be someone other than the policyholder.

There may only be one premium payer for each policy.

Insured life

An insured life is a person on whose life Momentum bases payment of the claim amount if the claim event occurs.

There is a minimum of one insured life and a maximum of 20.

Beneficiaries

The beneficiary is another party to the contract between the policyholder and the insurer.

The policyholder may nominate or change the beneficiary at his discretion.

The nominated beneficiary does not have to prove an insurable interest.

The rights of a curator of an insolvent estate may restrict the rights of a beneficiary to claim benefits that become payable.

The policyholder may revoke this right before the date the policy benefits become due and payable (i.e. on the death of the insured life).

If the policyholder cedes a policy as collateral security, the beneficiary nomination is automatically suspended and only becomes valid on the cancellation of the cession.

The beneficiary nomination is automatically cancelled if the policyholder cedes a policy as outright security. The cessionary has the right to nominate (a) new beneficiary(-ies).

If a lapsed policy restarts, an unrevoked beneficiary clause will automatically restart.

A beneficiary will benefit only in the event of the death of the insured life.

The policyholder may nominate beneficiaries for the Death Benefit, Modified Death Benefit, Last Survivor Death Benefit, Unnatural Death Benefit, Education Protector, Estate Provider, Death Income Benefit and Funeral Benefit.

Beneficiary for ownership

The policyholder may nominate a person to whom ownership is transferred if the policyholder dies while the policy is still in force. This can happen if the insured life is someone other than the policyholder.

If the policyholder dies, ownership is transferred to the nominated person and the policy will remain in force.

If the policyholder and the insured life are different and the policyholder dies, ownership of the policy is transferred to the deceased's estate if there is no beneficiary for ownership.

A beneficiary of ownership nomination must add up to 100%. Momentum only allows one beneficiary of ownership per policy.

If a policy has multiple owners, multiple beneficiaries of ownership will be allowed, provided that the total percentage split adds up to 100%.

One policyholder cannot appoint a beneficiary of ownership without the consent of the other policyholder. All the policyholders must sign the beneficiary of ownership nomination. This is the case even if there is only one beneficiary of ownership.

Funding

Premium patterns

Level premium pattern

Under the level premium pattern, the policyholder will pay a level premium for a level benefit amount for the benefit term.

Compulsory premium pattern

A compulsory premium pattern offers a cheaper initial premium for a level benefit than the level premium pattern but gets more expensive over time. The policyholder may choose compulsory premium increases of 3% to 10%

A compulsory premium increase of 5% is available on all benefits with a fixed term.

Once a policyholder has chosen this premium pattern, these increases become an obligation under the policy and will automatically occur every year on the benefit anniversary date.

The compulsory increases will not lead to an increase in the benefit amount.

If the policyholder chooses the compulsory premium pattern, they may only add an increasing premium waiver to the benefit.

LifeStage and Aggressive LifeStage premium pattern

The premium will automatically increase every year with a percentage based on the insured life's age at the time of the increase.

The Aggressive LifeStage premium pattern is not available on income protection benefits.

These premium patterns are not available on benefits with a fixed term.

Age	LifeStage	Aggressive LifeStage
<45	5%	10%
45-54	6%	11%
55-64	7%	12%
65-69	5%	10%
70-74	3%	8%
>74	3%	6%

Premium guarantees

Standard premium guarantee option

This option provides a premium guarantee for a fixed term.

Extended premium guarantee option

Policyholders who want more peace of mind may choose the extended premium guarantee. The extended premium guarantee is not available for all benefits.

If a policyholder chooses an extended premium guarantee, the premium they pay is higher than the premium under the standard premium guarantee option.

10-year capped premium guarantee option

The premium during the first ten years of the guarantee term is guaranteed not to increase.

The premium may need to be reviewed at any time after the initial ten-year guarantee term.

The premium will never be higher than the premium as at the end of the guarantee period increased by 15%, plus an additional 15% for every completed five-year period after that. (The 15% limit is over and above all voluntary and compulsory increases).

General rules

Momentum will not increase the contract premium or decrease the benefit amounts during the premium guarantee term.

All benefits funded with a Level, LifeStage, Aggressive LifeStage, or Compulsory premium pattern are priced to provide cover for the benefit term at the disclosed applicable premium level(s). If Momentum's experience differs from what was initially expected, the premium may be adjusted at the end of the premium guarantee term.

The chosen premium guarantee can also influence the premium payable.

The premium guarantee term:

- is the benefit term for term benefits
- is five years for the Education Protector and Modified Death Benefit.
- is ten years for any benefit with a 10-year capped premium guarantee option.
- is calculated by Momentum for whole-life benefits and benefits with a particular (retirement) age if funded with a level or increasing premium pattern.
- is calculated again if any alteration other than a regular premium/ benefit amount increase is made.
- of ancillary benefits will equal the guarantee term of the stand-alone benefit to which they are attached.

Premium Guarantee Term Extender

Momentum will extend the premium guarantee term by one year for every two of any of the following regular increases:

- premium increases of 10% or more
- premium increases in line with the increase in the general increase in the South African Consumer Price Index (CPI)
- benefit amount increases of 5% or more
- benefit amount increases below 5% in combination with any compulsory premium increase
- benefit amount increases (including increases in line with the general increase in the CPI or the Rand Depreciation Index (RDI).

Only one of the above increases is taken into account per year.

The Premium Guarantee Term Extender does not apply to the following:

- 10-year capped premium guarantee option
- benefits with a fixed term
- Complete Income Protector
- Temporary Income Protector
- Functional Protector

- Complete Functional Protector
- Business Overheads Protector
- Business Protector (Self Employed)
- Business Protector (Professional)
- Modified Death Benefit
- Last Survivor Death Benefit
- Funeral Benefit
- Education Protector
- Accidental HIV Benefit.

Increase options

The policyholder may select benefit amount increases or premium increases.

When the benefit amount increases, Momentum will calculate the corresponding increase in the premiums.

When the premium increases Momentum will calculate the corresponding increase in the benefit amount.

Increases automatically apply each year on the benefit anniversary.

Premium increases

Momentum uses the chosen voluntary premium increase to calculate the additional benefit amount that the policyholder may purchase.

Compulsory premium increases will not lead to an increase in the benefit amount.

Voluntary premium increases are not available on LifeStage premium patterns.

The following premium increase options are offered:

- Voluntary premium increases: 3% to 20% with increments of 0.1%.
- Compulsory premium increases: 3% to 10%.
- Increases in line with the general increase in the South African Consumer Price Index (CPI) (limited to a maximum of 15%).

Benefit amount increases

The following benefit amount increase options are offered:

- 3% to 10% with increments of 0.1%.
- In line with the general increase in the South African Consumer Price Index (CPI) (limited to a maximum of 15%).
- The greater of the Rand Depreciation Index (RDI) and the general increase in the South African Consumer Price Index (CPI). The RDI is calculated as the greater of the rand's depreciation against the US dollar or the Euro.

The policyholder may add benefit amount increases to a policy with a Level, LifeStage, Aggressive LifeStage or Compulsory premium pattern.

Certain benefits may have limited benefit amount increase options (refer to details in the Benefits section).

Momentum will not increase the benefit amount if:

- a policyholder has given Momentum notice to cancel future increases
- a policyholder has given Momentum notice to suspend the increases for that year
- any premiums are in arrears.

Momentum will cancel all future increases if no increases are applied for two consecutive years.

For Compulsory, LifeStage or Aggressive LifeStage premium patterns, the premium must increase by the chosen percentage per year. The policyholder may change to a Level premium pattern resulting in a higher premium or a lower benefit amount.

Lapses and reinstatements

Premiums in arrears (Lapse)

A 30-day grace period will apply.

If the arrear premiums are paid before the end of the grace period, no underwriting is required. A written request for the reinstatement of the benefit will be required.

Momentum requires a fully completed application form and all arrear premiums paid if the grace period has expired. Medical underwriting will apply.

Momentum can cancel the policy if the premium is not paid within the 30-day grace period.

CPI increases are included when calculating the outstanding premiums.

The benefit will not lapse if premiums are waived, or if the policyholder does not have to pay premiums for a benefit due to a claim.

Restarting the policy (Reinstatement)

Policies can only be reinstated within 12 months from the lapse date, provided that at least one premium was received prior to the lapse.

A reinstatement without paying back arrear premiums will be allowed for the first reinstatement of a policy.

Subsequent reinstatements (without paying back arrear premiums) will be allowed if at least 12 consecutive premiums were received.

For all other reinstatements, at least one premium must be paid. This premium is considered a commitment premium and not meant for future premiums. (The next premium will still be payable).

Standard underwriting rules will apply.

Momentum will request the outstanding premium(s) to be paid only once a decision has been received from underwriting. The policy will only then be reinstated.

Policies with the Modified Death Benefit do not qualify for the write-off option.

The reinstatement request must be emailed to the Myriad Retention Unit directly at myriadretentionunit@momentum.co.za.

Telephonic reinstatements can be done by calling the Retention Unit on 012 675 3911.

A Reinstatement form (UNDERW070) must be submitted with all reinstatement requests.

Premium reviews

Momentum reserves the right to review the contract benefit premium at the end of the guarantee term to cover the benefit(s) cost until the next review date.

If the policyholder has a 10 year-capped premium guarantee, Momentum will review the contract benefit premium at the end of every 10- years. The premium will never be higher than the premium as at the end of the guarantee period increased by 15%, plus an additional 15% for every completed five-year period after that. (The 15% limit excludes all voluntary and compulsory increases.)

The assumptions Momentum used to calculate the premium are adopted to cover the whole period of the policy and may be reviewed as set out below.

- When Momentum reviews the assumptions, the actual investment returns on premium income are compared with those used to calculate the premium at the start date of the benefit.
- Momentum will review the assumptions relating to expected future claims, investment returns, cost of reinsurance, incidence of taxation and lapse rates.
- Momentum will analyse the claims experience for similar policies and industry claims experience and the impact of future medical advances and practices.
- Momentum will use a fair and reasonable increase or decrease at each review due to any differences relative to previous assumptions.

Any change to the premium will not depend on the policyholder's individual circumstances, for example their health, at the time of the review.

Momentum will inform the policyholder in writing at least 90 days before any change to the premium. Any change is effective from the next relevant policy anniversary date.

Additional features

Immediate Cover

Immediate Cover only starts when Momentum receives the signed application.

Immediate cover is only available on the Death Benefit, Death Income Benefit, Estate Provider and Education Protector.

The amount of the immediate life cover is limited to the lesser of:

- R500 000 or
- The initial death cover the policyholder applied for.

Immediate Cover does not apply to accident, disability, functional impairment or critical illness benefits.

A policyholder must submit valid debit order details to Momentum together with the application form. If the bank refers the debit for the first premium back to Momentum for any reason, the cover will be considered never to have started.

The insured life must be under the age of sixty years at the date of application.

Immediate life cover does not apply to claim events linked to any accidents where the insured life took part in any form of aviation or dangerous activities such as, but not limited to hang-gliding, parachuting motor racing or any other extreme sport. No long-term insurer may ever have declined, deferred or accepted on special terms an application for life cover that the insured life has made.

The insured life may not negotiate for life cover insurance with any other company and may not have done so during the three months before the date they apply for a Momentum policy.

Immediate Cover will not be paid if the cause of death is directly or indirectly related to any condition, disease or injury that existed before the policy application date and of which the insured life reasonably ought to have been aware.

The insured life must complete a declaration of health, and the information disclosed must not pose a substandard risk to Momentum.

Immediate Cover will end if a loading or exclusion applies to the policy application.

All the policy conditions set out in the policy contract will apply to immediate life cover.

Immediate Cover will end on the earliest of:

- a loading or exclusion being applied to the policy application.
- the acceptance of the application.
- the rejection of the application.
- thirty days after the signing of the application.
- the policyholder cancelling the benefit in writing.

Free Cover

Free Cover is available on all stand-alone and ancillary benefits if:

- the policyholder did not specify a future starting date on the policy, or
- the policyholder specified a future starting date on the policy and Momentum moved the start date forward.

Momentum will pay a valid claim if the claim event occurs on or after the date of acceptance of the policy

Homeloan Free Cover

To qualify for the Homeloan Free Cover, the selected starting date may only be up to 3 months from the date of acceptance.

If the policyholder specifies a future starting date on the policy and the policy contains a Homeloan Protector, the full benefit amount, limited to a maximum of R3 million, is paid only under the Homeloan Protector or the Death Benefit to which it is attached.

Instant Cash

This special feature is available on the Death Benefit and Estate Provider Benefit only.

Momentum will pay a proportion of the Death Benefit or Estate Provider Benefit, after the deduction of any debt, within one working day of the submission of the death claim.

The amount paid is subject to current practice at the time of the claim. At present, 10% of the benefit amount, limited to R50 000 per insured life (over all death claims, excluding Estate Provider Benefit), will be paid.

Momentum will pay the balance of the claim amount if the claim is admitted.

Momentum will only make this payment if the insured life dies more than two years after the starting date of the Death Benefit or Estate Provider Benefit.

When restarting the benefit, a new two-year period will apply. If a policyholder increases the benefit amount, a new two-year period will apply for the increased portion from the increase date.

All required documentation must accompany the death claim. Refer to the Claim requirements section of this guide for more information.

Momentum does not acknowledge the validity of the death claim by paying the Instant Cash amount. Momentum will not pay the balance of the amount claimed if the claim is not admitted after assessment. In addition, the Instant Cash amount that was paid out will have to be returned to Momentum.

Momentum will only pay Instant Cash if there is a beneficiary. If no beneficiary is nominated, the full claim amount is paid into the estate when the claim is admitted.

Terminal Illness

Terminal Illness is only available on the Death Benefit.

This feature is not available in the last year of a term benefit.

This special feature is available free of charge and gives policyholders the right to claim the full benefit amount of the Death Benefit if the insured life becomes terminally ill.

A terminal illness is a medical condition that, with reasonable certainty, in the opinion of Momentum's Medical Officer, will result in the death of the insured life within 12 months of the date on which Momentum receives medical evidence to that effect.

Momentum will pay the Terminal Illness amount to the cessionary if the benefit is ceded.

Please note: Terminal illness is NOT available on the following benefits:

- Unnatural Death Benefit
- Last Survivor Death Benefit
- Funeral Benefit
- Education Protector - Death
- Education Protector – Death & Disability
- Education Protector – Death & Impairment

Reinstatement Option

This feature is automatically included on the following stand-alone benefits:

- Complete Critical Illness Benefit
- Complete Enhanced Critical Illness Benefit
- Comprehensive Living Benefit

Buy-and-Sell Future Cover

Buy-and-Sell Future Cover is only available on the Death Benefit.

If a claim is admitted on one of the policies under the Buy-and-Sell agreement, the policyholder has the option to increase the benefit amount on the remaining policies under the agreement by the insured life's share of the claim amount, without any proof of health or insurability.

Requirements for exercising the Buy-and-Sell Future Cover option:

- The original Buy-and-Sell agreement (a new one
- drawn up free of charge by the Momentum Business Solutions team).
- All the individual policies under the Buy-and-Sell agreement must be Myriad policies.
- The option must be exercised on all the policies under the Buy-and-Sell agreement.
- The policyholder does not have to increase the benefit amount by the full amount available to him. However, the percentage of the available amount the benefit amount is increased by must be the same for each of the remaining policies under the Buy-and-Sell arrangement (e.g. 50% of the amount available).
- There must be three or more policies under the Buy-and-Sell agreement before the claim.
- Any specific exclusions and/or loadings on the remaining policies will also apply to the increase in the benefit amount.

Retirement Booster

The Retirement Booster is a risk feature available to policyholders with qualifying Myriad risk benefits linked to a qualifying retirement annuity.

Every year Momentum rewards policyholders with qualifying benefits by allocating a portion of the premium paid for each risk benefit to the Retirement Booster.

Retirement Booster allocations

Allocations are made on the benefit anniversary of each qualifying Myriad benefit.

Momentum will only make these allocations if the policyholder has:

- qualifying Myriad risk benefits that are linked to a qualifying retirement annuity, and
- a qualifying retirement annuity with up-to-date recurring premiums, and
- accepted a qualifying increase on the qualifying Myriad risk benefit during the past policy year.

If the policyholder has more than one qualifying Momentum retirement annuity at the time of each Retirement Booster allocation, the retirement annuity with the longest term to maturity is used to calculate the booster allocation at that time.

Momentum will pay the accumulated Retirement Booster on the maturity date of the retirement annuity with the longest term to maturity. No further allocations is made to the Retirement Booster after the maturity date.

If the maturity date of the qualifying Momentum Retirement Annuity is after the end date of the qualifying Myriad benefit, Momentum will pay the Retirement Booster (without interest) in respect of that benefit, at the end of the Myriad benefit term.

Momentum may review the Retirement Booster allocation percentage at any time.

The Retirement Booster allocation percentage is enhanced from 1.5% to 4.5% for Longevity Protector® and the Permanent Disability Enhancer AND the stand-alone benefits to which they are attached.

Myriad policies with multiple policyholders

- At least one of the policyholders has to be a fund member of a qualifying Momentum retirement annuity. The allocations to and the payment of the Retirement Booster is based on the later maturity date of all the qualifying Momentum retirement annuities of which the policyholders are members. The Retirement Booster payment is split between the policyholders according to their percentage ownership.

Myriad policies with owners other than natural persons

- Sole proprietors who purchase an income protection solution through Momentum's business packages qualify for Retirement Booster allocations on these particular benefits
- Other Myriad policies with owners other than natural persons: benefits on these policies will not qualify for Retirement Booster allocations.

Business assurance policies

- Benefits on these policies will not qualify for Retirement Booster allocations.

Maturity date

The maturity date refers to the end of the initial savings term.

Momentum will pay the accumulated Retirement Booster amount on the earlier of retirement or age 70.

Open ending of the qualifying Momentum retirement annuity

- Momentum will pay the accumulated Retirement Booster value on the original maturity date that the annuity is open-ended, with no further allocations to the Retirement Booster.

Auto-continue of the qualifying Momentum retirement annuity

- Momentum will pay the accumulated Retirement Booster value on the original maturity date before the annuity is auto continued, with no further allocations to the Retirement Booster.

Qualifying Momentum retirement annuity

A recurring premium Investo retirement annuity

Qualifying Myriad benefits

The following Myriad benefits qualify for an allocation to the Retirement Booster:

- Death Benefit
- Unnatural Death Benefit
- Last Survivor Death Benefit
- Funeral Benefit
- Death Income Benefit
- Estate Provider
- ADW Disability Benefit
- Own Occupation Disability Benefit
- Functional Impairment Benefit
- Complete Income Protector
- Permanent Disability Enhancer
- Income Enhancer - Complete Income Protector
- Complete Family Protector – Complete Income Protector
- Group Income Top-up Benefit
- Temporary Income Protector
- Income Enhancer - Temporary Income Protector
- Complete Family Protector - Temporary Income Protector
- Temporary Group Income Top-up Benefit
- Business Overheads Protector
- Business Protector (Self Employed)
- Income Enhancer - Business Protector (Self Employed)
- Complete Family Protector - Business Protector (Self Employed)
- Business Protector (Professional)
- Income Enhancer - Business Protector (Professional)
- Complete Family Protector - Business Protector (Professional)
- Functional Protector
- Complete Functional Protector
- Complete Critical Illness Benefit
- Complete Enhanced Critical Illness Benefit
- Comprehensive Living Benefit
- Homeloan Protector
- Accidental HIV Benefit
- Longevity Protector® - Disability
- Longevity Protector® - Group Income Top Up
- Longevity Protector® - Critical Illness

The following Myriad benefits do not qualify for an allocation to the Retirement Booster:

- Future cover benefits
- Premium waiver benefits
- Education Protector
- Modified Death Benefit
- All Myriad benefits with a fixed term (excluding benefits for which the policyholder selects the age when the benefit should end).
- Contingent Liability Insurance
- Buy-and-sell Insurance
- Keyperson Insurance
- Loan Account Protection
- Business Overheads Cover*

- Income Replacement*
- Share Buyback
- Buy-and-sell Insurance - Alternate

*Except where the policyholder is a sole proprietor or a natural person.

Momentum may review the list of qualifying benefits from time to time.

If the policyholder commutes 100% of their income, under the Permanent Disability Enhancer attached to a Complete Income Protector or Complete Income Protector (Whole Life) no further allocations to the Retirement Booster for the main benefit is made.

Momentum will continue to make allocations to the Retirement Booster if premiums are paid under a premium waiver.

Qualifying increases

The qualifying Myriad benefit must have any of the following regular annual increases to qualify for an allocation to the Retirement Booster: Premium increases of 10% or more.

Premium increases in line with the general increase in the South African Consumer Price Index (CPI).

Benefit amount increases of 5% or more.

Benefit amount increases below 5% in combination with any compulsory premium increase including LifeStage and Aggressive LifeStage premium increases.

Benefit amount increases in line with the general increase in the South African Consumer Price Index (CPI) or the rand depreciation index (RDI).

Momentum may review the list of qualifying increases from time to time.

Annual Retirement Booster allocation calculation

Momentum will calculate the allocations to the Retirement Booster in respect of each qualifying Myriad benefit as follows:

- the sum of the benefit premiums payable for the qualifying Myriad benefit, during the past policy year, multiplied by
- the Retirement Booster allocation percentage, currently 1.5%, multiplied by
- the minimum of the outstanding term of the qualifying Myriad benefit and the outstanding term until the maturity date of your qualifying Momentum retirement annuity. If a policyholder has multiple qualifying retirement annuities the retirement annuity with the longest term is used as the date for the booster allocation.

Death of the policyholder

Momentum will cancel all the accumulated allocations to the Retirement Booster on the death of the fund member.

Momentum will cancel all the accumulated allocations to the Retirement Booster if:

- there are multiple policyholders and the policyholder with the main retirement annuity dies and
- the other policyholders do not have nor decide to take out a qualifying retirement annuity.

Lapse and reinstatement of a Myriad policy

Momentum will not make Retirement Booster allocations after a policy has lapsed unless it is reinstated.

Momentum will reinstate the accumulated Retirement Booster allocations from the lapse date when the policy reinstates.

Momentum will exclude any special debit orders collected during the reinstatement process from the calculation of the Retirement Booster allocation.

Momentum will exclude any premiums written off during the reinstatement process when calculating the Retirement Booster allocation.

The annual Retirement Booster allocations will continue normally from the next policy anniversary.

Alterations to a qualifying Myriad benefit that will affect the Retirement Booster

Cancellation

- Momentum will cancel all the accumulated allocations to the Retirement Booster in respect of a qualifying Myriad benefit cancelled as a result of:
  - a claim, or
  - any event covered in the policy contract, or
  - notification from the policyholder to cancel the policy or benefit.

Premium reduction

- Where an alteration leads to a premium reduction, Momentum will reduce all the accumulated allocations to the Retirement Booster, in respect of that benefit, in the same proportion.

Alterations to a qualifying Momentum retirement annuity that will affect the Retirement Booster

Premium reduction

- If the premium reduces, it will not affect the accumulated Retirement Booster amount.

Paid-up

- If the policyholder stops paying premiums under all the qualifying Momentum retirement annuities, no further allocations are made to the Retirement Booster.
- The Retirement Booster will remain unchanged until the policyholder starts paying premiums again.

Transfer of funds

- If the policyholder transfers all of the qualifying Momentum retirement annuities to another company's retirement annuity fund, Momentum will cancel all the accumulated allocations to the Retirement Booster.
- When the qualifying Momentum Retirement Annuity with the later maturity date is transferred, all future allocations and Retirement Booster payment is based on the remaining Retirement Annuity with the latest maturity date. A 10% penalty is applied to the Retirement Booster value for every year the maturity date is brought forward.
  - All future Retirement Booster allocations and the maturity date is based on the new qualifying Momentum retirement annuity if:
  - If the policyholder transfers all of their qualifying Momentum retirement annuities to another company's retirement annuity fund and
  - takes out a new qualifying Momentum retirement annuity shortly before the transfer

- A 10% penalty will apply to the Retirement Booster value for every year that the maturity date is brought forward if the new qualifying Momentum retirement annuity's term is shorter.

Term extensions (changing the maturity date of the qualifying Momentum retirement annuity)

- If the term of the qualifying Momentum Retirement Annuity with the later maturity date is extended by changing the maturity date to a later maturity date, future Retirement Booster allocations is based on the extended term. Historic booster values accumulated will not be affected.
- The accumulated booster amount is paid on the maturity date of the retirement annuity with the longest term to maturity. No further allocations is made to the Retirement Booster after the maturity date.

Early Retirement/Term reductions

- Momentum will reduce the Retirement Booster by 10% for every full year that the maturity date is brought forward, if the policyholder:
  - retires before the maturity date of the qualifying Momentum Retirement Annuity with the later maturity date (except as a result of disability) or,
  - reduces the term of the qualifying Momentum Retirement Annuity with the later maturity date by changing the maturity date to an earlier maturity date.
- Momentum will pay the balance of the Retirement Booster as a cash lump sum.

Outright cessions

On the outright cession of the policy the Retirement Booster value is cancelled.

LifeReturns®

Please refer to the LifeReturns® guide for details on this feature.

Alterations

Alteration rules

An alteration is any change to insured life's risk rating factor information (change life details) or covers on an existing contract.

The following general business rules apply:

- The policyholder and insured life must both sign the *Myriad consent form* (MYRIAD015), and the policyholder must accept the quote.
- If the policy or benefit is ceded, the cessionary needs to consent if any negative alterations are done.
- Alteration quotes on VIA will either include a short declaration (when applicable) or a confirmation that an application needs to be completed.
- A counteroffer may change the structure of the original request (e.g. increasing a stand-alone benefit with loadings as opposed to increasing an existing benefit with standard rates).
- Alterations cannot be done before the starting date of a new policy.

Note: A signed *Myriad consent form* (MYRIAD015) is required for all alterations

Information on the application form and quote are different

If the information on the application form and the quote are different, the financial adviser must redo the quote before submitting the case to Underwriting.

Any changes to personal information may impact the quoted premiums.

If the quote is more expensive by LESS than R50.00, Momentum will accept the quote and update the case. Refer to the contractual premium to calculate the difference (more or less than R50).

Discounted premiums cannot be guaranteed in most instances. (e.g. Momentum cannot be certain that the BMI used in the quote was correct).

Validity period of the alteration quote and alteration application

The alteration quote and alteration application must not be older than 21 days on the day:

- Momentum receives them
- the alteration application was signed.

Momentum may accept a signed quote that is older than 21 days but not older than three months, provided that the policy did not pass an anniversary date, an insured life's birthday or there were no changes to the policy in the period that the quote was printed, and the date Momentum received it.

Effective date

Alterations are effective from the first of the month following the date on which all requirements were met. If the date is moved to the first of the next month, the insured life is covered for the increased risk from the date all requirements were met.

If the update corresponds to the quote in all respects except the effective alteration date, a new alteration quote is not required. The application form and the alteration quote will state that the effective alteration date will be moved if all requirements are not met on or before the date quoted.

If the update differs from the quote in any way except for the effective alteration date, a new signed alteration quote is required if the premium difference is more than R50.

Alteration replacing existing cover

Momentum require financial advisers to complete a *Replacement Advice Record* (RAR). The alteration with Momentum may be replacing cover at another insurer and should only go in force once that insurer has confirmed that Momentum may proceed.

Alterations will always be applied from the first of the following month.

Free cover will apply between the acceptance date and the starting date of the altered benefits.

Myriad replacement policy

Myriad does not allow replacements of *"like for like"* benefits.

Negative alterations

The following rules apply to negative alterations:

- Momentum will backdate alterations if the policy is in arrears or the debit date has not been reached, unless otherwise stated in writing.
- All alterations require an accepted quote (for positive and negative alterations).
- Email requests for an alteration received from the financial adviser or policyholder will not be processed.
- Skipping of annual increases can be accepted with a written request from the policyholder or an instruction from the email address on record.

Refer to Documents required for alterations for a list of the documents required when an alteration is done.

Alterations that require underwriting

The following alterations will require underwriting:

- The policyholder may increase the benefit premium.
- The policyholder may increase the benefit amount.
- The policyholder may add an ancillary benefit to the contract, subject to the conditions of that benefit at the time.
- The policyholder may add a stand-alone benefit to the contract, subject to the conditions of that benefit at the time.
- The insured life's occupation, income, marital status, education or smoking status may be changed.
- The policyholder may change the premium or benefit amount increase percentage.
- The existing loadings and exclusions may be reviewed.

The following documents are required:

- A fully completed *Myriad Application form* (MYRIAD001E)
- An accepted alteration quote.
- A *Myriad consent form* (MYRIAD015)
- The acceptance of the Myriad consent can be done either through the:
  - SMS acceptance method (electronic acceptance method); OR

- Upload acceptance method, i.e., physically filled in and signed on paper or using the fillable PDF and MSign.

Alterations that do not require underwriting

The following alterations will **not** require underwriting:

- The policyholder may decrease or remove the premium or benefit amount increase percentage.
- The policyholder may decrease the benefit premium.
- The policyholder may decrease the benefit amount.
- The policyholder may cancel an ancillary benefit.
- The policyholder may cancel a stand-alone benefit.
- The policyholder may change the policy's starting date provided this is done within the first month after the current starting date. The new starting date may not be more than two months before or two months after the current starting date.
- The policyholder may exercise a Future Cover option.
- The policyholder may only change the premium frequency on the policy anniversary

The following documents are required:

- An accepted alteration quote.
- A *Myriad consent form* (MYRIAD015)
- The acceptance of the Myriad consent can be done either through the:
  - SMS acceptance method (electronic acceptance method); OR
  - Upload acceptance method, i.e., physically filled in and signed on paper or using the fillable PDF and MSign.
-

Alterations that require a declaration

A declaration will be required for the following alterations:

- Exercise Spare Cover
- Change of the insured life's occupation
- Change of insured life's smoking status (to non-smoker)
- Change from old to new Longevity Protector®

The following documents are required:

- Declaration at the back of the quote
- An accepted alteration quote.
- A *Myriad consent form* (MYRIAD015)
- The acceptance of the Myriad consent can be done either through the:
  - SMS acceptance method (electronic acceptance method); OR
  - Upload acceptance method, i.e., physically filled in and signed on paper or using the fillable PDF and MSign.

Convert to LifeReturns® rules

IThe updated rules will apply to all LifeReturns® migration requests submitted via alterations from 1 November 2025.

Mandatory reassessment screening for the alteration:

All insured lives migrating to LifeReturns® must complete a LifeReturns® reassessment digital screening. (The link will be provided as part of the alterations transaction.)

To qualify for fitness-based premium discounts, insured lives must complete the active fitness assessment. Migration after only completing the initial LifeReturns® screening will no longer be permitted.

Contract premiums must increase by 15% post migration:

- Insured lives will only be able to migrate to LifeReturns® if their total contract
- premium increases by at least 15% compared to the pre-migration contract
- premium. In most cases, this will require adding cover via an alteration (either by adding a new benefit or making an ad hoc increase).
- Insured lives on the long-term-protected discount now subject to full migration
- process:
- Insured lives who had Multiply Premier linked to their Myriad policies on 31
- December 2023, who want to migrate to LifeReturns®, will be required to
- complete the same migration process, including the reassessment screening and premium increase requirements.

Alteration updates

- An alteration can only be finalised by Underwriting once all insured lives on the policy have undergone a reassessment screening. This ensures that their discounts are not lost when an alteration is done.

Commission

General

All commission is paid in Rands.

Commission is calculated in accordance with current legislation on the premium that the policyholder has to pay.

The commission term in respect of the Funeral Benefit for extended family members, is limited to 10 years.

Level of maximum commission taken.

- The financial adviser may choose the level of maximum commission required (between 0% and 100%). The Modified Death Benefit allows a choice of between 0% and 50% commission.
- The financial adviser may not change his level of maximum commission after the benefit is accepted unless an alteration was made.
- Every stand-alone benefit has its own level of maximum commission.
- All financial advisers on a specific stand-alone benefit have the same level of maximum commission.
- Commission is paid at the same level of maximum commission as the stand-alone benefit with the highest level of maximum commission on the policy fee. This rule will also be applied to any stand-alone benefits added to the policy by the policyholder's direct instruction.

Multiple financial advisers

- Different financial advisers may split the commission for a stand-alone benefit.
- The commission split between financial advisers may only be changed if the policyholder makes an alteration to the stand-alone benefit concerned.
- Momentum communicates with only one financial adviser per policy.
- The financial adviser for communication can be changed at any stage at the policyholder request.

Upfront and as-and-when commission

A percentage of the commission is chosen as upfront commission. This percentage may not change during the term of a benefit.

The remaining percentage applies to ongoing commission. The term of the benefit determines the as-and-when commission percentage applicable to a benefit.

The as-and-when commission is paid on the payable premium regardless of whether the premium changed due to an alteration.

The amount of commission taken up front is chosen on an individual product level.

A different percentage can be chosen for each main benefit and all ancillary benefits will follow the same values as the main benefit.

The as-and-when percentage applicable to a benefit is recalculated to take account of the outstanding term on the benefit whenever the payable premium increases.

A lump sum commission payment is made at:

- the start of the policy and
- on the first policy anniversary.

Claw-back for as-and–when commission

If a policy lapses after two premiums have not been received, the As-and-When commission paid on the two premiums will be clawed back.

- All commission paid is clawed back for benefits that lapsed within the first six months of the start date.
- If the benefits are reinstated and the arrear premiums waived, Momentum will not refund the clawed back commission provided the policy lapsed more than six months since its inception.
- If the benefit is reinstated with all arrear premiums paid, Momentum will refund the As-and-When commission which was clawed back.

Claw-back for upfront commission

All upfront commission is clawed back if the benefit lapsed in the first six months since the start date.

A policy which lapses will generate negative commission which can be clawed back from any commission payments received in the past 24 months.

Stand-alone and ancillary benefits

Certain benefits are available as stand-alone as well as ancillary benefits.

Stand-alone

If a stand-alone benefit ends, all ancillary benefits attached to this benefit are cancelled.

Ancillary benefits

The policyholder may only choose one of the following benefits from each category listed below:

- Disability or impairment benefits
- Critical illness benefits
- Future cover benefits
- Living benefits.

The benefit amount may not be more than the stand-alone benefit to which it is attached.

The term of the ancillary benefit may not be longer than the term of the stand-alone benefit.

If the ancillary benefit is attached to a stand-alone benefit with a fixed term, the term of the ancillary benefit may not be shorter than the stand-alone benefit, except if the term of the ancillary benefit is limited to a specific age.

The premium pattern of the ancillary benefit is the same as the premium pattern of the stand-alone benefit.

The guarantee term of the ancillary benefit is the same as the guarantee term of the stand-alone benefit.

If the term of the ancillary benefit is shorter than the stand-alone benefit to which it is attached, the premium for the ancillary benefit will fall away at the end of the term of the ancillary benefit.

The contract benefit premium reduces if an ancillary benefit falls away due to a claim.

A claim on an ancillary benefit will reduce a benefit amount as follows:

- The benefit amount of the ancillary benefit on which there was a claim reduces by the claim amount.
- The benefit amount under any other ancillary benefit attached to the same stand-alone benefit will remain unchanged if the benefit amount of this other ancillary is less than the reduced stand-alone benefit amount.
- The benefit amount of the other ancillary is reduced to the same level as the reduced stand-alone benefit amount if the benefit amount of the other ancillary is greater than the reduced stand-alone benefit amount.
- The benefit amount of the stand-alone benefit reduces by the claim amount on the ancillary benefit.
- A claim on a stand-alone benefit will reduce the benefit amount of all ancillary benefits attached to that stand-alone benefit. The benefit amounts will reduce as follows:
  - The benefit amount of the stand-alone benefit reduces by the claim amount.
  - The benefit amount of any ancillary benefit reduces by the same proportion as the benefit amount of the stand-alone benefit reduces.

- Policyholders may claim for the same event under more than one ancillary benefit that accelerates the benefit amount of the same stand-alone benefit.

Exclusions

Introduction

- It is not the intention of Momentum to rely on an exclusion to avoid payment of claims which, at Momentum's sole discretion, were not caused, accelerated or made more likely by conditions which gave rise to the exclusion or which existed before the start of the risk.

Benefits

Death Benefit; Last Survivor Death Benefit; Premium Waiver - Death; Education Protector - Death; Education Protector - Death and Disability; Education Protector - Death and Impairment, Death Income Benefit, Estate Provider

The following exclusions apply to these benefits and any alterations to them:

- Momentum will not admit a claim if the insured life commits suicide within two years of the starting date of the benefit.
- When restarting the benefit, a new two-year period will apply. If the insured life increases the benefit amount, a new two-year period will apply to the increased portion from the date of the increase.

Funeral Benefit - Underwritten insured lives, Funeral Benefit – Extended family

The following exclusions apply to this benefit and any alterations to it:

- Momentum will not admit a claim if the insured life commits suicide within one year of the starting date of the benefit.
- When restarting the benefit, a new one-year period will apply. If the insured life increases the benefit amount, a new one-year period will apply to the increased portion from the date of the increase.

We will not admit a claim if either of the two insured lives commits suicide within two years of the starting date of the benefit.

Funeral Benefit - Child insured lives

Momentum will not admit a claim if the insured life commits suicide within one year of the starting date of the benefit.

When restarting the benefit, the balance of the one-year period will apply until the first benefit anniversary.

Modified Death Benefit*; Unnatural Death Benefit; Education Protector - Death and Disability; Education Protector - Death and Impairment; Disability& Impairment benefits; Income disability& impairment benefits; Critical illness benefits; Accidental HIV Benefit; Living Benefits; Premium Waiver - Comprehensive Disability; Premium Waiver - Functional Impairment

The claim will not be admitted if it arose, directly or indirectly, as a result of:

- The insured life's wilful participation in riots, terrorist activities or acts of war;
- The insured life's deliberate and intentional inflicting injury to self;
- The insured life's committing a crime of damage to property, stealing from another person or committing a crime against another person in the form of any violence or abuse.

*Only applies to unnatural death within the first three years of the start date of the policy contract.

Maternity or paternity leave which includes the birth procedure is excluded on the following benefits:

- Complete Income Protector
- Group Income Top-up Benefit
- Temporary Income Protector
- Temporary Group Income Top-up Benefit
- Business Overheads Protector
- Business Protectors

The following clause applies to the Modified Death Benefit:

- When restarting the benefit, a new three-year period will apply.

The following clause applies to Complete Family Protector:

- Any claim resulting from any physical defects, illnesses or diseases that the insured life suffered from, was aware of or received medical advice or treatment in the three years before the start date of this benefit is excluded for the first three years of the benefit.
- When restarting the benefit, a new three-year period will apply.

Future Cover Benefit

Specific exclusions relating to the insured life may apply to the benefit issued under the future cover benefits.

Death Benefit

Description

Momentum will pay the benefit amount as a lump sum on the death of the insured life.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

Whole life	Level	LifeStage	Aggressive LifeStage	Compulsory %							
				3	4	5	6	7	8	9	10
Minimum entry age	15	15	40	15	15	15	27	30	32	35	38
Maximum entry age	80	80	80	80							
				65*							

* Applies to benefits with a 10-year capped premium guarantee option

Term (5 – 20 years)	Age next birthday	
	Level	5% Compulsory
Minimum entry age	15	15
Maximum entry age	80	80
Expiry age	85	

Benefit term

The policyholder may choose one of the following benefit terms:

- Whole life
- Term
  - Minimum - 5 years
  - Maximum - 20 years

Benefit limits

Minimum	Maximum
R100 000	None, subject to financial underwriting
	R1 000 000 (Student Package)

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Aggressive LifeStage
- Compulsory

Premium guarantee

The premium guarantee depends on the chosen premium pattern.

Term	Premium pattern	Premium guarantee
Whole life	Level; Compulsory; LifeStage; Aggressive LifeStage	Standard or Extended or 10-year Capped
Term	The premium is guaranteed for the term of the benefit.	
Student Package	Level; Compulsory; LifeStage	Standard

Increase options

The policyholder may choose either voluntary premium or benefit amount increases. Voluntary premium increases are not available on LifeStage premium patterns.

Premium pattern	Premium increases	Benefit amount increases
Level	0%, 3 - 20%, CPI	0%, 3 - 10%, CPI, RDI
LifeStage	Age related increases only	0%, 3 - 10%, CPI, RDI
Aggressive LifeStage	Age related increases only	0%, 3 - 10%, CPI, RDI
Compulsory	3 - 20%	0%, 3 - 10%, CPI, RDI

Additional features

The following additional features are available free of charge:

- Free Cover
- Immediate Cover
- Instant Cash
- Terminal Illness
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Comprehensive Disability Benefit
- Own Occupation Disability Benefit
- Comprehensive ADW Disability Benefit
- ADW Disability Benefit
- Functional Impairment Benefit
- Complete Critical Illness Plus Benefit
- Complete Enhanced Critical Illness Benefit
- Comprehensive Living Benefit
- Homeloan Protector
- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver - Retrenchment
- Future Cover - Homeloan[1]
- Longevity Protector® - Disability [2]

This benefit is only available on the Homeloan Package.

The Longevity Protector® - Disability may only be added to the Death Benefit if a non-tapering disability benefit is included as an ancillary.

Beneficiaries and cessions

The policyholder may nominate beneficiaries.

Collateral cessions are allowed.

Claim event

The death or terminal illness of the insured life.

Claim amount

The claim amount is the full benefit amount.

Any outstanding debt will be deducted from the claim amount.

Instant Cash

Momentum will pay a proportion of the Death Benefit, after the deduction of any debt, within one working day of the submission of the death claim.

The amount paid is subject to current practice at the time of the claim. At present, 10% of the benefit amount, limited to R50 000 per insured life (over all death claims), will be paid.

Momentum will pay the balance of the claim amount if the claim is admitted.

Momentum will only make this payment if the insured life dies more than two years after the starting date of the Death Benefit.

When restarting the benefit, a new two-year period will apply. If a policyholder increases the benefit amount, a new two-year period will apply for the increased portion from the increase date.

All required documentation must accompany the death claim. Refer to the claims requirements section of this guide for more information.

Momentum does not acknowledge the validity of the death claim by paying the Instant Cash amount. Momentum will not pay the balance of the amount claimed if the claim is not admitted after assessment. In addition, the Instant Cash amount that was paid out will have to be returned to Momentum.

Momentum will only pay Instant Cash if there is a beneficiary. If no beneficiary is nominated, the full claim amount is paid into the estate when the claim is admitted.

Terminal Illness

The policyholder can claim the full benefit amount, if the insured life contracts a terminal illness that, in the opinion of Momentum's Medical Officer will with reasonable certainty result in the death of the insured life within 12 months of the date that medical evidence is provided.

This feature is not available in the last year of the benefit term

Momentum will pay the Terminal Illness amount to the cessionary if the benefit is ceded.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Level	0%, 3 - 20%, CPI	0%, 3 - 10%, CPI, RDI
Compulsory	3 - 20%	0%, 3 - 10%, CPI, RDI

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Terminal Illness and Instant Cash do NOT apply to this benefit.

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver - Retrenchment

Beneficiaries and cessions

The policyholder may nominate beneficiaries.

Collateral cessions are allowed.

Claim event

The death of the last survivor of the two insured lives.

Claim amount

The claim amount is the full benefit amount.

Any outstanding debt will be deducted from the claim amount.

Automatic Premium Waiver

On the death of the first insured life, all future premiums for this benefit are waived.

The Premium Waiver will cover the premium that was payable on the death of the first of the two insured lives.

If this benefit is funded by compulsory increasing premiums, the waiver will also cover all future compulsory premium increases.

Voluntary increases will end on the death of the first of the two insured lives.

End of benefit

This benefit ends on the earliest of:

- The death of the last survivor of the two insured lives.
- The death of the first of the two insured lives, if it is caused by any event excluded by this policy.
- The end of the benefit term
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

- LifeReturns®

Terminal Illness and Instant Cash do NOT apply to this benefit.

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver - Retrenchment

Beneficiaries and cessions

The policyholder may nominate beneficiaries.

Collateral cessions are not allowed.

Claim event

The unnatural death of the insured life as a result of bodily injury, caused by an event.

Death must take place within 30 days of the event.

The event must be the primary cause of death.

Claim amount

The claim amount is the full benefit amount.

Any outstanding debt will be deducted from the claim amount.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Level	0%, 3 — 5%, CPI	0%, 3 — 5%, CPI, RDI

Additional features

- Free Cover
- LifeReturns® is NOT available on this benefit.
- Terminal Illness and Instant Cash do NOT apply to this benefit.

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death

- Premium Waiver (increasing or level) – Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver - Retrenchment

These benefits may only be taken on another life (other than the insured life) under the Modified Death Benefit.

The insured lives on these benefits are subject to underwriting.

Beneficiaries and cessions

The policyholder may nominate beneficiaries.

Collateral cessions are allowed.

Claim event

Natural death:

- The death of the insured life due to natural causes.

Unnatural death:

- The unnatural death of the insured life as a result of bodily injury, caused by an event.
- The event must be the primary cause of death.

Claim amount

Death within the first three years from the starting date of this benefit

- On the unnatural death of the insured life, the lump sum benefit amount will be paid.
- On the natural death of the insured life an amount equal to 100% of all the premiums paid for this benefit will be paid (without interest).

Death after the first three years from the starting date of this benefit

- The lump sum benefit amount will be paid.
- When restarting the benefit a new 3-year period will apply.

Any outstanding debt will be deducted from the claim amount.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The payment of the full benefit amount.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Education Protector

Benefits

Momentum offers a choice of three Education Protectors:

- Education Protector – Death
- Education Protector – Death and Disability
- Education Protector – Death and Impairment

Description

Education Protector – Death

Momentum will

- pay the full benefit amount as a lump sum on the death of the insured life OR
- return all premiums paid, at the end of the benefit term.

Education Protector – Death and Disability

Momentum will:

- pay the full benefit amount as a lump sum on the death of the insured life, OR
- pay the full benefit amount as a lump sum if the insured life suffers a disability caused by a bodily injury or illness to such an extent that he is totally and permanently unable to perform the normal duties of his own occupation (up to the policy anniversary before the insured life's 65th birthday), OR
- pay the full benefit amount if the insured life meets the requirements of one of the defined functional impairment claim events with 100% payout (up to the policy anniversary before the insured life's 70th birthday), OR
- return all premiums paid, at the end of the benefit term.

Education Protector – Death and Impairment

Momentum will:

- pay the full benefit amount as a lump sum on the death of the insured life, OR
- pay the full benefit amount as a lump sum if the insured life meets the requirements of one of the defined functional impairment claim events with 100% payout (up to the policy anniversary before the insured life's 70th birthday), OR
- return all premiums paid, at the end of the benefit term.

Special conditions

The policyholder can only link one child to the benefit.

The child must be the biological child or the legally adopted child of the insured life.

Benefits can only be linked to children aged 15 next birthday and younger.

The maximum annual benefit amount linked to any one child on a policy is R120 000.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible subject to age limits and underwriting.

Age limits

Age next birthday		
Minimum entry age of insured life	15	
Maximum entry age of insured life	Education Protector – Death	65
	Education Protector – Death and Disability	55
	Education Protector – Death and Impairment	55

Benefit term

The policyholder selects a child education cease age between 19 and 25.

The term of the benefit is calculated as the difference between the child's education cease age and the child's age next birthday (at the start of the benefit), subject to the following limits:

- Minimum - 10 years.
- Maximum - 24 years.

Benefit limits

Minimum annual benefit amount	Maximum annual benefit amount
R2 000	R120 000

Premium patterns

Level

Premium guarantee

The premium is guaranteed for 5 years.

Increase options

The policyholder may choose benefit amount increases of 0%, 3 - 10%, CPI or RDI.

Additional features

The following additional features are available free of charge:

- Immediate Cover
- Free Cover
- LifeReturns®

Terminal Illness and Instant Cash do NOT apply to this benefit.

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver - Retrenchment

Beneficiaries and cessions

The policyholder may nominate beneficiaries.

Collateral cessions are allowed.

Claim event

Death

The death of the insured life (Applicable to all Education Protectors)

Occupational disability

Occupational disability claims are only applicable to Education Protector – Disability.

An occupational disability is a disability caused by a bodily injury or illness to such an extent that the insured life is totally and permanently unable to perform the normal duties of their own occupation (up to the policy anniversary before the insured life's 65th birthday).

The insured life will not qualify for a claim under the occupational disability criteria if the insured life is not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment, they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

Functional impairment

Functional impairment claims are only applicable to Education Protector – Disability and Education Protector – Functional Impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim amount is based on the severity of a medical impairment that occurs after the starting date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent, and continuous for the foreseeable future.

The insured life will not be required to undergo reasonable optimal treatment if a specialist that Momentum has approved has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with their treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment events.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

Return of premiums

At the end of the benefit term, Momentum will pay the policyholder an amount equal to 100% of all the premiums paid for the Education Protector (without interest) provided that:

- there has been no claim, and
- the benefit is still in force.

Claim amount

A lump-sum payment is calculated as the maximum of:

- the annual benefit amount multiplied by the outstanding term of the benefit (fractions of a year are rounded up to a full year for this calculation), and
- 100% of all the premiums paid for this benefit (without interest).

Any outstanding debt will be deducted from the claim amount.

Waiting period (applicable to disability)

There is no explicit waiting period.

A claim will only be admitted once we have established the permanency of the disability according to our definition.

No claim will be admitted if the insured life dies before permanency is established.

Future Cover Option

The policyholder has the option to increase the annual benefit amount by up to 20% within six months after every fifth benefit anniversary without proof of the insured life's insurability or health, except for a negative HIV test result.

The benefit amount increases applied under this option will be subject to the standard rates and standard terms and conditions applicable to the insured life's age, occupation, education, smoking status and pursuits at the time.

The policyholder may not exercise any of the options under this benefit if a disability or impairment claim for the insured life has been submitted with Momentum or any other life insurance company.

Any specific exclusions and/ or loadings applicable to the benefit will also apply to the increase in the benefit amount.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount (if applicable)
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Funeral Benefit

Description

Momentum will pay the benefit amount as a lump sum on the death of the insured life.

Special conditions

General

The following lives may be added as insured lives (per policy):

- one or two underwritten insured lives
- five children
- eight extended family members.

Momentum does not require any medical underwriting in respect of children and extended family members.

The underwritten insured life will be required to provide a health declaration on behalf of their children and extended family.

Extended family members

Extended family members are the biological parents of an underwritten insured life under the Funeral Benefit, the parents that legally adopted him, his parents- in-law or his biological or legally adopted children.

The extended family members must be permanent residents of the Republic of South Africa.

Children

Children are the biological or legally adopted children of an underwritten insured life under the Funeral Benefit that is a permanent resident of the Republic of South Africa.

A stillbirth benefit is included for all female underwritten insured lives. The benefit is applicable to babies that die after 28 weeks of pregnancy but before delivery.

Momentum will pay up to a maximum of two claims under this benefit.

Expiry of cover for Children

All children covered under the Funeral benefit issued after September 2010 will automatically be converted to an extended family member on the expiry of the child benefit at age 19 next birthday.

All children covered under the Funeral Benefit issued before September 2010 will fall away at the policy anniversary before age 19 next birthday. The policyholder may add the child insured life as an Extended family member through an alteration.

The child insured life that is converted to an extended family member will retain the benefit amount before the conversion.

The premium and cover will change every year in the same way as normal extended family members.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible subject to age limits.

An underwritten insured life is subject to underwriting.

Age limits

	Age next birthday		
	Underwritten insured lives	Children	Extended family
Minimum entry age	15	1	19
Maximum entry age	75	18	65
Maximum expiry age	-	19	-

Benefit term

Whole life

Children are covered to age 19 next birthday.

Benefit limits

	Minimum	Maximum
Underwritten insured life	R20 000	R100 000
Extended family members	R5 000	R20 000
Stillborn	R2 500	R2 500
Children (age 1-6)	R10 000	R10 000
Children (age 7-18)	R20 000	R20 000

The benefit amount must be the same for extended family members. This does not apply to child insured lives who have been converted to extended family members.

Maximum benefit amounts apply per insured life over all funeral benefits with Momentum.

Premium patterns

Level

Extended family members: Momentum will increase the premium on the policy anniversary before the insured life's 31st, 41st, 51st, 61st, 71st and 81st birthdays. These increases are compulsory and will not lead to an increase in the benefit amount.

Premium guarantee

Insured life	Premium guarantee
Underwritten insured life	Premiums are guaranteed for 10 years.
Extended family members	Premiums are not guaranteed. (Momentum may review the premium, if necessary, at any time in addition to the premium increases.)
Children	Premiums are not guaranteed.

Increase options

The policyholder may choose a benefit amount increase of:

- 5%, or
- an increase in line with the general increase in the Consumer Price Index (CPI).

This benefit amount increase applies to all insured lives, except children.

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Terminal Illness and Instant Cash do NOT apply to this benefit.

Ancillary benefits

None

Beneficiaries and cessions

The policyholder may only appoint beneficiaries for the underwritten insured lives. Cessions are allowed.

Claim event

The death of the insured life.

Claim amount

The claim amount is the full benefit amount.

Momentum will pay the claim amount within one working day of the claim event, provided that all the necessary documentation has been received, except when a no-claims period for natural death applies.

Any outstanding debt will be deducted from the claim amount.

No-claims period for natural death

There is no waiting period for the underwritten insured lives.

A no-claims period of six months will apply from the starting date of the benefit for children and extended family members if death is due to natural causes.

If the benefit amount is increased, a new six-month period will apply to the increased portion from the date of the increase.

A no-claims period will not apply if death is due to unnatural causes.

Momentum will apply the balance of the no-claims period when a benefit is reinstated. (i.e. the benefits are reinstated with the remaining periods at the time of the lapse).

A no-claims period will not apply when a child insured life is converted to an extended family member on the expiry of the child benefit at age 19 next birthday.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Death Income Benefit

Description

Momentum will pay a monthly claim amount for a specified period to nominated beneficiaries on the death of the insured life.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

Whole life	Age next birthday										
	Level	LifeStage	Aggressive LifeStage	Compulsory %							
				3	4	5	6	7	8	9	10
Minimum entry age	15	15	40	15	15	15	27	30	32	35	38
Maximum entry age	70	70	70	70							
				65*							

* Applies to benefits with a 10-year capped premium guarantee option

Benefit term

Whole life

Benefit limits

Minimum	Maximum
R2 000	R150 000

The maximum monthly benefit amount is limited to the minimum of the insured life's gross monthly income and the maximum benefit amount.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Aggressive LifeStage
- Compulsory

Premium guarantee

The premium guarantee depends on the chosen premium pattern:

Term	Premium pattern	Premium guarantee
Whole life	Level; Compulsory; LifeStage; Aggressive LifeStage	Standard or Extended or 10-year Capped

Increase options

The policyholder may choose either voluntary premium or benefit amount increases. Voluntary premium increases are not available on LifeStage premium patterns.

Premium pattern	Premium increases	Benefit amount increases
Level	0%, 3 - 10%, CPI	0%, 3 - 7.5%, CPI
LifeStage	Age related increases only	0%, 3 - 7.5%, CPI
Aggressive LifeStage	Age related increases only	0%, 3 - 7.5%, CPI
Compulsory	3 - 20%	0%, 3 - 7.5% CPI

The monthly claim amount will escalate with the prevailing Consumer Price Index (CPI), limited to a maximum of 10% per annum, on the claim anniversary date.

Additional features

The following additional features are available free of charge:

- Immediate Cover
- Free Cover
- Retirement Booster
- LifeReturns®

Terminal Illness and Instant Cash do NOT apply to this benefit.

Ancillary benefits

Not applicable

Beneficiaries and cessions

This benefit cannot be ceded collaterally to an institution. Outright cessions are allowed.

The policyholder:

- must nominate a beneficiary/beneficiaries.
- can appoint multiple beneficiaries
- may not appoint a minor as a beneficiary
- can nominate a Testamentary Trust as the beneficiary

Claim event

The death of the insured life.

Claim amount

The claim amount is the full benefit amount payable monthly over the selected payment period.

The first monthly claim amount is paid within one working day once the claim has been assessed and admitted and any subsequent payments will be made monthly in advance on the 1st of the month.

If a 24-month benefit payment period is selected, the monthly claim amount will escalate with the prevailing Consumer Price Index (CPI), limited to a maximum of 10% per annum, on the claim anniversary date.

Any outstanding debt will be deducted from the claim amount.

If the beneficiary passes away while a claim is being paid, a commutation value (based on the remainder of the monthly claim amount payments still to be made) will be paid to the estate of the beneficiary.

Payment period

Six, 12 or 24 months

The benefit payments will cease after the specified number of monthly payments were made.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Estate Provider Benefit

Description

Momentum will pay the benefit amount as a lump sum on the death of the insured life.

Special conditions

Only one Estate Provider Benefit is allowed per insured life (across all policies).

Momentum Trust Limited will be the beneficiary of the proceeds (except for the proceeds of the Instant Cash payout).

If this benefit is cancelled or lapses, Momentum Trust Limited will offer the insured life the option to convert to a normal will that is kept in safe custody for which an annual fee is payable.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible subject to age limits and underwriting.

Age limits

Whole life	Age next birthday									
	Level	LifeStage	Aggressive LifeStage	Compulsory %						
				3	4	5	6	7	8	9	10
Minimum entry age	18	18	40	18	18	18	27	30	32	35	38
Maximum entry age	80			80							
				65*							

* Applies to benefits with a 10-year capped premium guarantee option

Benefit term

Whole life

Benefit limits

Minimum	Maximum
R300 000	None, subject to financial underwriting

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Aggressive LifeStage
- Compulsory

Premium guarantee

The premium guarantee depends on the chosen premium pattern:

Term	Premium pattern	Premium guarantee
Whole life	Level; Compulsory; LifeStage; Aggressive LifeStage	Standard or Extended or 10-year Capped

Increase options

The policyholder may choose either voluntary premium or benefit amount increases. Voluntary premium increases are not available on LifeStage premium patterns.

Premium pattern	Premium increases	Benefit amount increases
Level	0%, 3 - 20%, CPI	0%, 3 -10%, CPI, RDI
LifeStage	Age related increases only	0%, 3 - 10%, CPI, RDI
Aggressive LifeStage	Age related increases only	0%, 3 - 10%, CPI, RDI
Compulsory	3 - 20%	0%, 3 -10%, CPI, RDI

Additional features

The following additional features are available free of charge:

- Immediate Cover
- Free Cover
- Instant Cash
- Retirement Booster
- LifeReturns®

Terminal Illness does NOT apply to this benefit.

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver - Retrenchment

Beneficiaries and cessions

The policyholder may only appoint a beneficiary for the Instant Cash feature.

Momentum Trust Limited will automatically be the beneficiary of the remainder of the benefit amount excluding the instant cash payout.

The policyholder cannot change Momentum Trust Limited as the beneficiary on this benefit.

Cessions are not allowed.

Instant Cash

The nominated beneficiary (if applicable) will receive a proportion of the benefit amount, currently 10% of the benefit amount, limited to R50 000 per insured life, within one working day of the submission of the death claim. This excludes any payment made under the Instant Cash feature for the Death Benefit. The balance of the claim amount will be paid to the Momentum Trust Limited if the claim is admitted.

If a beneficiary was not nominated, the full claim amount will be paid to Momentum Trust Limited (Momentum Trust), who will use the payout as described in the Executorship and Executor Fee Benefit and the Professional Fee Benefit clauses.

Momentum will only make this payment if the insured life dies more than two years after the starting date of the Death Benefit.

When restarting the benefit, a new two-year period will apply. If a policyholder increases the benefit amount, a new two-year period will apply for the increased portion from the date of the increase.

By paying the Instant Cash amount, Momentum does not acknowledge the validity of the death claim. If a claim is not admitted when it is assessed, the balance of the amount being claimed will not be paid. In addition, the policyholder will have to repay Momentum the Instant Cash amount that was paid to them.

Terminal Illness

Momentum will **not** pay a claim before the death of the insured life if they contract a terminal illness that in the opinion of Momentum's Medical Officer will with reasonable certainty result in their death within 12 months of the date that medical evidence to that effect is provided.

Will and Safe-Custody Benefit

Momentum Trust will draft the policyholder's will and once signed, it will be collected and it will held in safe-custody by Momentum Trust.

The policyholder may review his/her will from time to time.

There is no additional cost for the drafting, collection, safe custody or reviews of the will.

Executorship and Executor Fee Benefit

Momentum Trust must be nominated as the executor of the estate in order to attend to the administration of the estate.

The benefit will cover 100% of the executors' fees on the estate if the maximum gross value of the estate, reflected in the Liquidation and Distribution Account, is less than R10 million.

For estates with a gross value of less than R10 million, Momentum Trust guarantees a discount, as determined from time to time on the fixed Government Regulation fee, for acting as the executor.

If the gross value of the estate exceeds R10 million, Momentum Trust guarantees a 50% discount on the fixed Government Regulation fee for acting as the executor.

No executor fees will be charged on the benefit amount payable from the Estate Provider Benefit to the estate.

The minimum executors fee payable by the estate will be R50 000 (excluding VAT).

Professional Fee Benefit

The Estate Provider Benefit amount paid to Momentum Trust, which is only made after payment of the Instant Cash Benefit to the nominated beneficiary (if applicable), will be used to settle all professional fees incurred during the administration process.

These costs will be paid in the following order:

- The balance of the benefit amount, after the Instant Cash pay-out (if applicable), will be used to pay for executor fees.
- The balance of the benefit amount, after the payment of the executor fees, will be used to settle the following Administration fees:
  - Advice fee payable to the servicing financial planner of R20 000
  - Fees payable to the Master of the High Court of the Republic of South Africa
  - Fees incurred in the conveyance of property from the estate to the beneficiary/ies
  - Fees incurred in transferring any motor vehicles to the beneficiary/ies

- Costs associated with the collection, storage and relicensing of firearms in terms of the Firearms Control Act (No. 60 of 2000)
- Sworn Appraiser's valuation fees
- Trustee fees

Estate Top-up Benefit

If the total value of the claim for attending to the administration of the estate (instant cash, executor fee, professional and financial adviser fees) is less than the Estate Provider benefit amount, Momentum Trust will pay this difference into the estate.

No executor fees will be charged on the benefit amount payable from the Estate Provider Benefit to your estate, only if Momentum Trust is the executor of the estate.

This payment must be used to settle expenses and/or liabilities not covered by the benefit or distributed to the heirs in the event that all expenses or liabilities are settled.

Forfeiture clause

In the event of the death of the insured life, Momentum Trust will receive the benefit amount, as defined in the policy contract, and use the payout as described in the Executorship and Executor Fee Benefit, Professional Fee Benefit and Estate Top-up Benefit clauses.

The estate will only be indemnified against executor fees incurred if:

- Momentum Trust is appointed as the sole executor on the estate and;
- the gross value of the estate as reflected in the liquidation account is below R10 million and
- the minimum cover amount was taken out.

If another person or legal entity is appointed as executor and/or trustee or if this person or legal entity elects not to appoint Momentum Trust to provide the abovementioned services, the appointed executor on the insured life's estate, may institute a claim against the Estate Provider Benefit.

A cancellation fee, which is equal to one and a half times Momentum Trust's minimum executor's fee, as applicable at the time of the claim, will be deducted from the benefit amount.

The remaining portion will be paid into the bank account opened by the executor of the insured life's estate in the name of the estate.

The policyholder will not enjoy the discounts, benefits, and services as described in the Executorship and Executor Fee Benefit, Professional Fee Benefit and Estate Top-up Benefit clauses.

Claim event

The death of the insured life.

Note: Terminal illness is not covered. (Refer to Terminal illness above)

Claim amount

The claim amount is the full benefit amount.

Any outstanding debt will be deducted from the claim amount.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount.

- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claims requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

New business process

The Myriad new business process, as it relates to QuotaM, should be followed to submit the Estate Provider Benefit quotation and application for the life insurance part of the offering.

Once an Estate Provider Benefit has been accepted, The Estate Provider Benefit Wills Consultants will be notified.

An Estate Provider Benefit Wills Consultant will contact the Financial Adviser to enquire if Will drafting is required or whether the adviser prefers to draft the Will.

Upon approval from the financial adviser, the Estate Provider Benefit Wills Consultant will contact the policyholder and start the process of Will drafting (telephonically or electronically). The signed Will is then placed into safe custody.

All queries and Estate Provider Benefit Will application forms can be sent to: epb@momentum.co.za

Momentum Trust Share call number for telephonic queries: 0860 000 0107.

Comprehensive Disability Benefit

Description

Momentum will pay:

- the full benefit amount as a lump sum if the insured life suffers a disability caused by a bodily injury or illness to such an extent that they are totally and permanently unable to perform the normal duties of their own occupation (up to the policy anniversary before the insured life's 65th birthday)
  OR
- a percentage of the benefit amount as a lump sum if the insured life meets the requirements of one of the defined functional impairment claim events

Type of benefit

Stand-alone or ancillary

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

To age 65 or 70		Tapering age	Age next birthday										
			Level	LifeStage	Aggressive Life Stage	Compulsory %							
						3	4	5	6	7	8	9	10
Minimum entry age			15	15	40	15	15	15	27	30	32	35	38
Maximum entry age	Stand-alone	None	60	60	60	60							
		55	55	50	50	50							
		60	55	50	50	50							
		65	55	50	50	50							
	Ancillary	None	60	60	60	60							
		55	55	55	55	55							
		60	55	55	55	55							
		65	55	55	55	55							
Expiry age			65 or 70										

Term (5 – 20 years)	Age next birthday	
	Level	5% Compulsory
Minimum entry age	15	15
Maximum entry age	60	55
Expiry age	65	

Benefit term

The policyholder may choose one of the following benefit terms:

- To age 65
- To age 70

- Term
  - Minimum - 5 years
  - Maximum - 20 years

Benefit limits

Minimum	Maximum
R100 000	R25 000 000

Tapering

The policyholder can choose between tapering or no tapering.

Momentum will reduce the lump-sum benefit amount annually in even amounts by the chosen tapering option, until it reaches zero.

Tapering starts from the benefit anniversary after the insured life's chosen tapering age to the end of the benefit term.

The benefit amount can reduce by:

- 20% a year during the last five years of the benefit term
- 10% a year during the last ten years of the benefit term

Tapering is not available on term benefits.

The last voluntary premium or benefit increase will occur on the benefit anniversary before the insured life's chosen tapering age.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Aggressive LifeStage
- Compulsory

Premium guarantee

The premium guarantee depends on the chosen premium pattern:

Term	Premium pattern	Premium guarantee
To age 65 or 70	Level; Compulsory; Life Stage; Aggressive LifeStage	Standard or Extended
Term	The premium is guaranteed for the term of the benefit.	

Increase options

The policyholder may choose either voluntary premium or benefit amount increases. Voluntary premium increases are not available on LifeStage premium patterns.

The last voluntary increase will take place on the benefit anniversary before the insured life's chosen tapering age.

Premium pattern	Premium increases	Benefit amount increases
Level	0%, 3 – 20%, CPI	0%, 3 —10%, CPI, RDI
LifeStage	Age related increases only	0%, 3 – 10%, CPI, RDI
Aggressive LifeStage	Age related increases only	0%, 3 – 10%, CPI, RDI
Compulsory	3 – 20%	0%, 3 – 10%, CPI, RDI

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver - Retrenchment
- Longevity Protector® - Disability

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Collateral cessions are allowed on the stand-alone benefit.

Claim event

The insured life can qualify for a claim under either:

- Occupational disability or
- Functional impairment

Occupational disability

An occupational disability is a disability caused by a bodily injury or illness to such an extent that the insured life is totally and permanently unable to perform the normal duties of their own occupation (up to the policy anniversary before the insured life's 65th birthday).

The insured life will not qualify for a claim under the occupational disability criteria if the insured life is not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

Functional impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim event is based on a medical impairment that occurs after the start date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment, and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future.

The insured life will not be required to undergo reasonable optimal treatment if a specialist that Momentum has approved has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with their treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

Claim amount

Occupational disability

The claim amount is the full benefit amount.

Functional impairment

The functional impairment claim events are divided into categories.

For certain categories, claim payments are divided into severity levels, depending on the severity of the functional impairment event.

Each level has an associated "percentage payout".

For the first claim, the claim amount is calculated as the percentage payout multiplied by the benefit amount. The benefit amount for this benefit will be reduced by the claim amount.

The claim amount for a subsequent claim in a different category is calculated by multiplying the percentage payout by the reduced benefit amount. This amount is paid, irrespective of the relative severity level of the new claim and the original claim.

A subsequent claim in the same category will only be paid if the claim event is more severe than previous claims in the same category. The claim amount paid is based on the difference between the percentage payout for the new claim and the total percentage paid for that category (the "additional percentage payout"). In this case, the claim amount is calculated as the additional percentage payout multiplied by the benefit amount (only adjusted for claims in other categories).

Related claims: A related claim is where the claim event progressed from a previous claim event. Momentum will treat a claim that is related to any previous claim in a different category as if it is in the same category as the claim it progressed from.

If more than one claim event occurs as a result of the same cause, a claim will be admitted for the claim event resulting in the highest payment.

Momentum will always pay the balance of the benefit amount for claims with a percentage payout of 100%.

General

If tapering is selected, the lump sum benefit amount will be reduced to zero evenly from the benefit anniversary after the insured life's chosen tapering age, to the benefit anniversary before the insured life's chosen expiry age.

Any outstanding debt will be deducted from the claim amount.

If a claim for the full benefit amount is admitted, the benefit will be cancelled and the contract benefit premium reduced.

The benefit premium will not reduce in the event of a partial claim.

Waiting period

There is no explicit waiting period.

A claim will only be admitted once we have established the permanency of the disability according to our definition.

No claim will be admitted if the insured life dies before permanency is established.

Survival period

There is no explicit survival period.

A claim will only be admitted if the insured life meets the requirements of the defined claim event, prior to their death.

No medical test or examination concluded after the insured life’s death will be considered when evaluating a claim.

Conversion option

The policyholder has the option to convert this benefit (stand-alone and ancillary) to a Functional Protector or a Complete Functional Protector.

These benefits pay a monthly claim amount for the remainder of the insured's life if they are permanently impaired (subject to the benefit limits that apply at the time of the conversion).

A claim will not be paid under the Functional Protector or Complete Functional Protector, that was converted from an existing disability or impairment benefit if the claim event occurred before the conversion.

A partial conversion will not be allowed

The policyholder may choose any increase option and premium pattern for the Functional Protector or Complete Functional Protector subject to the new business rules.

When the benefit is converted, the policyholder must add a premium waiver to the Functional Protector or Complete Functional Protector. If this is the same Premium Waiver as the one on the previous policy the only underwriting required will be a declaration of health. The policyholder may select any increase option on the waiver of premium (increasing or level). The new waiver of premium will be subject to new business age and benefit limits.

A new policy contract will be issued for the Functional Protector or Complete Functional Protector on conversion.

The conversion will be an add and remove alteration. If this benefit is added without the removal of the benefit being converted, normal underwriting will apply.

If the benefit being converted is removed or it is within three months of the expiry, special underwriting conditions will apply.

If tapering was not selected:

The monthly income for the benefit issued under this conversion option is limited to 1% of the benefit amount at the time of the conversion.

If tapering was selected:

The monthly income for the benefit issued under this conversion option is limited to 1% of:

- the benefit amount at the time of the conversion if tapering has not started, or
- the benefit amount before the tapering started.

Medical underwriting will be required if:

- any specific exclusion applies to this benefit, or
- a health or occupational loading applies to this benefit.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount.
- Conversion to a Functional Protector or Complete Functional Protector
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Own Occupation Disability Benefit

Description

Momentum will pay the full benefit amount as a lump sum if the insured life:

- suffers a disability caused by a bodily injury or illness to such an extent that they are totally and permanently unable to perform the normal duties of his own occupation.
  OR
- meets the requirements of one of the defined functional impairment claim events with 100% payout.

Type of benefit

Stand-alone or ancillary

Eligible lives

All lives are eligible subject to age limits and underwriting.

Age limits

To age 65		Tapering	Age next birthday										
			Level	LifeStage	Aggressive LifeStage	Compulsory %							
						3	4	5	6	7	8	9	10
Minimum entry age			15	15	40	15	15	15	27	30	32	35	38
Maximum entry age	Stand-alone	None	60	60	60	60							
		55	55	50	50	50							
		60	55	50	50	50							
	Ancillary	None	60	60	60	60							
		55	55	55	55	55							
		60	55	55	55	55							
Expiry age			65										

Term (5 – 20 years)	Age next birthday	
	Level	5% Compulsory
Minimum entry age	15	15
Maximum entry age	55	55
Expiry age	65	

Benefit term

The policyholder may choose one of the following benefit terms:

- To age 65
- Term
  - Minimum - 5 years
  - Maximum - 20 years

Benefit limits

Minimum	Maximum
R100 000	R25 000 000

Tapering

The policyholder can choose between tapering or no tapering.

Momentum will reduce the lump-sum benefit amount annually in even amounts by the chosen tapering option, until it reaches zero.

Tapering starts from the benefit anniversary after the insured life's chosen tapering age to the end of the benefit term.

The benefit amount can reduce by:

- 20% a year during the last five years of the benefit term
- 10% a year during the last ten years of the benefit term.

Tapering is not available on term benefits.

The last voluntary premium or benefit increase will occur on the benefit anniversary before the insured life's chosen tapering age.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Aggressive LifeStage
- Compulsory

Premium guarantee

The premium guarantee depends on the chosen premium pattern:

Term	Premium pattern	Premium guarantee
To age 65	Level; Compulsory; LifeStage, Aggressive LifeStage	Standard or Extended
Term	The premium is guaranteed for the term of the benefit.	

Increase options

The policyholder may choose either voluntary premium or benefit amount increases. Voluntary premium increases are not available on LifeStage premium patterns.

The last voluntary increase will take place on the benefit anniversary before the insured life's chosen tapering age.

Premium pattern	Premium increases	Benefit amount increases
Level	0%, 3 – 20%, CPI	0%, 3 – 10%, CPI, RDI
LifeStage	Age related increases only	0%, 3 – 10%, CPI, RDI
Aggressive LifeStage	Age related increases only	0%, 3 – 10%, CPI, RDI
Compulsory	3 – 20%	0%, 3 – 10%, CPI, RDI

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver - Retrenchment
- Longevity Protector® - Disability

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Collateral cessions are allowed on the stand-alone benefit.

Claim event

The insured life can qualify for a claim under either:

- Occupational disability or
- Functional impairment

Occupational disability

An occupational disability is a disability caused by a bodily injury or illness to such an extent that the insured life is totally and permanently unable to perform the normal duties of their own occupation.

The insured life will not qualify for a claim under the occupational disability criteria if the insured life is not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

Functional impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim event is based on a medical impairment that occurs after the start date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future. The insured life will not be required to undergo reasonable optimal treatment if a specialist, that Momentum has approved, has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with their treatment routine.

- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment, they could reasonably be expected to undergo according to current best practice medical protocols, and which could substantially improve or remove the condition being claimed for.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

Claim amount

The claim amount is the lump sum benefit amount.

If tapering is selected, the lump sum benefit amount will be reduced to zero evenly from the benefit anniversary after the insured life's chosen tapering age, to the benefit anniversary before the insured life's chosen expiry age.

Any outstanding debt will be deducted from the claim amount.

If a claim for the full benefit amount is admitted, the benefit will be cancelled and the contract benefit premium reduced.

Waiting period

There is no explicit waiting period.

A claim will only be admitted once we have established the permanency of the disability according to our definition.

No claim will be admitted if the insured life dies before permanency is established.

Survival period

There is no explicit survival period.

A claim will only be admitted if the insured life meets the requirements of the defined claim events prior to their death.

No medical test or examination concluded after the insured life’s death will be considered when evaluating a claim.

Conversion option

The policyholder has the option to convert this benefit (stand-alone and ancillary) to a Functional Protector or a Complete Functional Protector.

These benefits pay a monthly claim amount for the remainder of the insured's life if they are permanently impaired (subject to the benefit limits that apply at the time of the conversion).

A claim will not be paid under the Functional Protector or Complete Functional Protector that was converted from an existing disability or impairment benefit, if the claim event occurred before the conversion.

A partial conversion will not be allowed

The policyholder may choose any increase option and premium pattern for the Functional Protector or Complete Functional Protector subject to the new business rules.

When the benefit is converted, the policyholder must add a premium waiver to the Functional Protector or Complete Functional Protector. If this is the same Premium Waiver as the one on the previous policy the only underwriting required will be a declaration of health. The policyholder may select any increase option on the waiver of premium (increasing or level). The new waiver of premium will be subject to new business age and benefit limits.

A new policy contract will be issued for the Functional Protector or Complete Functional Protector on conversion.

The conversion will be an add and remove alteration. If this benefit is added without the removal of the benefit being converted, normal underwriting will apply.

If the benefit being converted is removed or it is within three months of the expiry, special underwriting conditions will apply.

If tapering was not selected:

The monthly income for the benefit issued under this conversion option is limited to 1% of the benefit amount at the time of the conversion.

If tapering was selected:

The monthly income for the benefit issued under this conversion option is limited to 1% of:

- the benefit amount at the time of the conversion if tapering has not started, or
- the benefit amount before the tapering started.

Medical underwriting will be required if:

- any specific exclusion applies to this benefit, or
- a health or occupational loading applies to this benefit.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount.
- Conversion to a Functional Protector or Complete Functional Protector
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver - Retrenchment
- Longevity Protector® - Disability

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Collateral cessions are allowed on the stand-alone benefit.

Claim event

The insured life can qualify for a claim under either:

- Activities of Daily Work (ADW) or
- Functional impairment

Activities of Daily Work (ADW)

The insured life is assessed on one of two occupational definition categories. Momentum will base the definition that will be used on the one that most closely matches the insured life's occupation at the time of the claim and the occupation as it is usually performed in the open labour market.

A panel of Momentum specialists will do the assessments.

A panel of accredited medical specialists will determine how many and Activities of Daily Work (ADW) the insured life is able to perform. Each occupational definition category has different tests, and different points are allocated to the various severity/ability levels.

The Activities of Daily Work (ADW) claim event is applicable up to the policy anniversary before the insured life's 65th birthday.

The insured life will not qualify for a claim under the occupational disability criteria if they are not gainfully employed at the time of the claim event. Such a claim will be assessed against the impairment and illness criteria.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and could substantially improve or remove the condition being claimed for.

Functional impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim event is based on a medical impairment that occurs after the start date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future.

The insured life will not be required to undergo reasonable optimal treatment if a specialist, that Momentum has approved, has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with their treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols, and which could substantially improve or remove the condition being claimed for.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life is able to perform.

A claim will be admitted only if the claim event is a permanent condition.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

Claim amount

Activities of Daily Work (ADW)

The claim amount is the full benefit amount.

Functional impairment

The functional impairment claim events are divided into categories. For certain categories, claim payments are divided into severity levels, depending on the severity of the functional impairment event. Each level has an associated "percentage payout".

For the first claim, the claim amount is calculated as the percentage payout multiplied by the benefit amount. The benefit amount for this benefit will be reduced by the claim amount.

The claim amount for a subsequent claim in a different category is calculated by multiplying the percentage payout by the reduced benefit amount. This amount is

paid, irrespective of the relative severity level of the new claim and the original claim.

A subsequent claim in the same category will only be paid if the claim event is more severe than previous claims in the same category. The claim amount paid is based on the difference between the percentage payout for the new claim and the total percentage paid for that category (the "additional percentage payout"). In this case, the claim amount is calculated as the additional percentage payout, multiplied by the benefit amount (only adjusted for claims in other categories).

Related claims: A related claim is where the claim event progressed from a previous claim event. A claim related to any previous claim in a different category is treated as if it is in the same category as that from which the claim progressed.

If more than one claim event occurs as a result of the same cause, a claim will be admitted for the claim event resulting in the highest payment.

Momentum will always pay the balance of the benefit amount for claims with a percentage payout of 100%.

General

If tapering is selected , the lump sum benefit amount will be reduced to zero evenly from the benefit anniversary after the insured life's chosen tapering age, to the benefit anniversary before the insured life's chosen expiry age.

Any outstanding debt will be deducted from the claim amount.

If a claim for the full benefit amount is admitted, the benefit will be cancelled and the contract benefit premium reduced.

The benefit premium will not reduce in the event of a partial claim.

Survival period

There is no explicit survival period.

A claim will only be admitted if the insured life meets the requirements of the defined claim event, prior to their death.

No medical test or examination concluded after the insured life’s death will be considered when evaluating a claim.

Conversion option

The policyholder has the option to convert this benefit (stand-alone and ancillary) to a Functional Protector or a Complete Functional Protector.

These benefits pay a monthly claim amount for the remainder of the insured's life if they are permanently impaired (subject to the benefit limits that apply at the time of the conversion).

A claim will not be paid under the Functional Protector or Complete Functional Protector that was converted from an existing disability or impairment benefit if the claim event occurred before the conversion.

A partial conversion will not be allowed

The policyholder may choose any increase option and premium pattern for the Functional Protector or Complete Functional Protector subject to the new business rules.

When the benefit is converted, the policyholder must add a premium waiver to the Functional Protector or Complete Functional Protector. If this is the same Premium

Waiver as the one on the previous policy the only underwriting required will be a declaration of health. The policyholder may select any increase option on the waiver of premium (increasing or level). The new waiver of premium will be subject to new business age and benefit limits.

A new policy contract will be issued for the Functional Protector or Complete Functional Protector on conversion.

The conversion will be an add and remove alteration. If this benefit is added without the removal of the benefit being converted, normal underwriting will apply.

If the benefit being converted is removed or it is within three months of the expiry, special underwriting conditions will apply.

If tapering was not selected:

The monthly income for the benefit issued under this conversion option is limited to 1% of the benefit amount at the time of the conversion.

If tapering was selected:

The monthly income for the benefit issued under this conversion option is limited to 1% of:

- the benefit amount at the time of the conversion if tapering has not started, or
- the benefit amount before the tapering started.

Medical underwriting will be required if:

- any specific exclusion applies to this benefit, or
- a health or occupational loading applies to this benefit.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount.
- Conversion to a Functional Protector or Complete Functional Protector
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

The insured life will be assessed against one of two categories. The category used will depend on the occupational duties performed by the insured life at the time of a claim and the occupation like it is usually performed in the open labour market. Assessments will be done by our panel of specialists. If the insured life's occupational duties has changed in the six months before the claim event occurred, the insured life will have to achieve a total score of six for the set of tests on both categories (relating to the current occupational duties and the previous occupational duties) for us to admit a claim. Each occupational definition category has different tests and different points are allocated to the various severity/ability levels.

The category that we use will depend on the proportion of time that the insured life normally spends on performing the following duties: Supervisory, Administrative and Other duties. Insured lives that spend more than 75% of their time on supervisory and administrative duties, will be assessed against category 1, and other insured lives against category 2.

The insured life needs to achieve a total score of 6 or more on the following tests before we will consider a claim. Only one item in each of the tests may be selected before the total score is calculated.

Criteria		Score	
		Cat 1	Cat 2
Cognitive impairment	The insured life's cognitive ability is unimpaired, regardless of any irreversible cognitive deterioration or damage that is disease related or as a result of an accident.	0	0
	The insured life medically requires periodic assistance or direct supervision to perform essential work tasks, due to deterioration in or damage to cognitive ability, which is irreversible and is disease related or as a result of an accident, and this we measure by clinical evidence and standardised tests.	4	4
	The insured life medically requires constant assistance to perform essential work tasks, due to deterioration in or damage to cognitive ability, which is irreversible and is disease related or as a result of an accident, and this we measure by clinical evidence and standardised tests.	6	6
Visual	The insured life's visual ability, with the use of assistive devices, is not reduced to the extent that he requires physical assistance from another person.	0	0
	The insured life's visual ability is reduced to the extent that it affects his functional abilities. It is impossible for him/her to function independently in the workplace without physical assistance from another person, even with the use of assistive devices.	4	4
	The insured life is legally blind. Loss of at least 70% visual acuity in both eyes that is a reading of 20/200. An ophthalmologist needs to confirm this.	6	6
Hearing	The insured life's hearing ability, with the use of assistive devices, is not reduced to the extent that he requires assistance from another person.	0	0
	The insured life's hearing ability is reduced to the extent that it affects his functional abilities. His independent functioning without assistance from another person in the workplace is impossible, even with the use of assistive devices.	4	4

Criteria		Score	
		Cat 1	Cat 2
	The insured life is functionally entirely deaf.	6	6
Verbal communication	The insured life's speaking ability, with the use of assistive devices, is not reduced to the extent that he requires assistance.	0	-
	The insured life's speaking ability is reduced to the extent that he requires assistance for verbal communication within the workplace, both from another person and an assistive device.	2	-
	The insured life is entirely unable to communicate verbally within a workplace, despite assistance from another person and an assistive device.	4	-
Transferring	The insured life is able to move independently between essential workstations with, at the most, the help of a walking cane or other assistive device (including a wheelchair).	0	0
	The insured life requires intermittent physical assistance from another person, even with the use of support apparatus and a walking cane or other assistive device (including a wheelchair), in order to move between essential workstations.	2	3
	The insured life requires constant physical assistance from another person for mobility between essential workstations, although the workplace meets the legislative requirements for accessibility.	4	4
Effort tolerance	The insured life is able to meet the full (ie 75% to 100%) effort tolerance and endurance requirements by completing a stress test and by achieving a METs > 7.	0	0
	The insured life is able to meet 40 - 75% of the requirements for effort tolerance and endurance by completing a stress test and by achieving a METs 3 - 7	2	3
	The insured life can meet 40% at most, of the requirements for effort tolerance and endurance by completing a stress test and by achieving a METs < 3.	6	6
Gross and fine motor activities	The insured life can use both upper limbs in a coordinated and dextrous manner in order to perform essential gross and fine motor work activities.	0	-
	The insured life can perform essential gross motor work activities, although in an awkward fashion, but he requires physical assistance from another person to perform fine motor work activities, despite appropriate adaptations and assistive devices.	2	-
	The insured life is unable to perform essential gross and fine motor work activities, despite appropriate adaptations, the use of assistive devices and physical assistance from another person.	4	-
Work posture	The insured life can move through the full range of dynamic work postures, with at most the assistance of a walking cane or any other ambulatory device.	-	0
	The insured life is able to move through a partial range of dynamic work postures but requires physical assistance from another person, in conjunction with a suitable assistive and/or an ambulatory device and requires a prolonged period (as measured by acceptable work study methods).	-	1
	The insured life is totally reliant on physical assistance from another person, despite the use of suitable assistive and/or ambulatory device, to move between all the dynamic work postures.	-	3

Criteria		Score	
		Cat 1	Cat 2
Co-ordination and dexterity (Work tools and equipment include motor vehicles and motor cycles where the use of these is a requirement of the occupation.)	The insured life is able to use work tools and equipment in an efficient, dextrous manner, with, at most, ergonomic adaptations to these work tools and equipment. His/her productivity is not affected.	-	0
	The insured life is able to utilise essential work tools and equipment, but the rate of production is significantly reduced, due to diminished co-ordination and/or dexterity.	-	3
	The insured life is totally unable to utilise any work tools and equipment in order to produce the desired output, due to diminished upper limb co-ordination and dexterity, regardless of the time allowed.	-	6
Muscle power	The insured life is able to pick up a 5kg weight from a table and carry it for 20 metres in either hand.	-	0
	The insured life is unable to pick up a 5kg weight from a table and carry it for 20 metres in either hand but is able to pick up a 1kg weight from a table and carry it for 5 metres in either hand.	-	2
	The insured life is totally unable to pick up a 1kg weight from a table and carry it for 5 metres in either hand.	-	4
Mental Illnesses	The insured life is totally and continuously unable to perform his work activities as a result of a severe mental disorder. The following information must be provided as proof: • History of a psychiatric disorder and monthly consultations with a psychiatrist for at least a period of 2 years prior to the claim AND • Receiving reasonable psychotropic drugs for his mental condition from his consulting psychiatrist for at least 2 years prior to claim AND • Deemed a candidate for ECT therapy and has been continuously institutionalised for at least 14 days by his treating psychiatrist in the year prior to claim. • The information provided by the consulting psychiatrist will be subject to the assessment by the Momentum panel of psychiatrists.	6	6

Definitions	
Assistive device	A tool or prosthesis that aids in functioning
Fine motor work	Refined movement or positioning of extremities.
Good ergonomic principles	Embodying the anatomic, physiologic, and mechanical principles affecting the efficient use of human energy.
Gross motor work	Large or unrefined movement or positioning of limbs.
Work tools	The devices required by the individual to function in the usual working environment.
Work-study methods	Internationally accepted standardised tests, specified at testing stage per occupational category, used to assess the individual.
Work place	The typical workplace for the occupation of the insured life as it is usually performed in the open labour market
Work stations	The typical workstations for the occupation of the insured life as it is usually performed in the open labour market

Definitions	
Work postures/ work tasks/ work activities:	Refers to the specific postures/tasks or activities normally undertaken by the insured life
Institution	A recognised mental care institution
Institutionalised	Admission on a continuous basis at a recognised mental care institution for at least 14 days. Specifically excludes bed rest or sleep therapy treatments.

ADW Disability Benefit

Description

Momentum will pay the full benefit amount as a lump sum if the insured life:

- the full benefit amount as a lump sum if the insured life meets the requirements of the Activities of Daily Work (ADW) claim events (up to the policy anniversary before the insured life's 65th birthday).
  OR
- meets the requirements of one of the defined functional impairment claim events with 100% payout.

Type of benefit

Stand-alone or ancillary

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

To age 65		Tapering	Age next birthday										
			Level	LifeStage	Aggressive LifeStage	Compulsory %							
						3	4	5	6	7	8	9	10
Minimum entry age			15	15	40	15	15	15	27	30	32	35	38
Maximum entry age	Stand-alone	None	60	60	60	60							
		55	55	50	50	50							
		60	55	50	50	50							
	Ancillary	None	60	60	60	60							
		55	55	55	55	55							
		60	60	60	60	60							
Expiry age			65										

Term (5 – 20 years)	Age next birthday	
	Level	5% Compulsory
Minimum entry age	15	15
Maximum entry age	60	55
Expiry age	65	

Benefit term

The policyholder may choose one of the following benefit terms:

- To age 65
- Term
  - Minimum - 5 years
  - Maximum - 20 years

Benefit limits

Minimum	Maximum
R100 000	R25 000 000

Tapering

The policyholder can choose between tapering or no tapering.

Momentum will reduce the lump-sum benefit amount annually in even amounts by the chosen tapering option, until it reaches zero.

Tapering starts from the benefit anniversary after the insured life's chosen tapering age to the end of the benefit term.

The benefit amount can reduce by:

- 20% a year during the last five years of the benefit term
- 10% a year during the last ten years of the benefit term

Tapering is not available on term benefits.

The last voluntary premium or benefit increase will occur on the benefit anniversary before the insured life's chosen tapering age.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Aggressive LifeStage
- Compulsory

Premium guarantee

The premium guarantee depends on the chosen premium pattern:

Term	Premium pattern	Premium guarantee
To age 65	Level; Compulsory; LifeStage; Aggressive LifeStage	Standard or Extended
Term	The premium is guaranteed for the term of the benefit.	

Increase options

The policyholder may choose either voluntary premium or benefit amount increases. Voluntary premium increases are not available on LifeStage premium patterns.

The last voluntary increase will take place on the benefit anniversary before the insured life's chosen tapering age.

Premium pattern	Premium increases	Benefit amount increases
Level	0%, 3 — 20%, CPI	0%, 3 — 10%, CPI, RDI
LifeStage	Age related increases only	0%, 3 — 10%, CPI, RDI
Aggressive LifeStage	Age related increases only	0%, 3 — 10%, CPI, RDI
Compulsory	3 — 20%	0%, 3 — 10%, CPI, RDI

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver - Retrenchment
- Longevity Protector®- Disability

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Collateral cessions are allowed on the stand-alone benefit.

Claim event

The insured life can qualify for a claim under either:

- Activities of Daily Work (ADW) or
- Functional impairment

Activities of Daily Work (ADW)

The insured life is assessed on one of two occupational definition categories. Momentum will base the definition on the one that most closely matches the insured life's occupation at the time of the claim and the occupation as it is usually performed in the open labour market.

A panel of Momentum specialists will do the assessments.

Each occupation definition category has different tests, and different points are allocated to the various severity/ability levels.

The Activities of Daily Work (ADW) claim event is applicable up to the policy anniversary before the insured life's 65th birthday.

The insured life will not qualify for a claim under the occupational disability criteria if they are not gainfully employed at the time of the claim event.. Such a claim will be assessed against the impairment and illness criteria.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment, they could reasonably be expected to undergo according to current best practice medical protocols and could substantially improve or remove the condition being claimed for.

Functional impairment

The claim events are linked to the insured life's ability to perform occupational activities.

The claim event is based on a medical impairment that occurs after the start date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future. The insured life will not be required to undergo reasonable optimal treatment if a specialist that Momentum has approved has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured is expected to comply with their treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols, and which could substantially improve or remove the condition being claimed for.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) and Activities of Daily Work (ADW) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

Claim amount

Momentum will pay the full benefit amount if the insured life meets the requirements of one of the defined claim events.

If tapering is selected, the lump sum benefit amount will be reduced to zero evenly from the benefit anniversary after the insured life's chosen tapering age, to the end of the benefit term.

Any outstanding debt will be deducted from the claim amount.

If a claim for the full benefit amount is admitted, the benefit will be cancelled and the contract benefit premium reduced.

Survival period

There is no explicit survival period.

A claim will only be admitted if the insured life meets the requirements of the defined claim event, prior to their death.

No medical test or examination concluded after the insured life’s death will be considered when evaluating a claim.

Conversion option

The policyholder has the option to convert this benefit (stand-alone and ancillary) to a Functional Protector or a Complete Functional Protector.

These benefits pay a monthly claim amount for the remainder of the insured's life if they are permanently impaired (subject to the benefit limits that apply at the time of the conversion).

A claim will not be paid under the Functional Protector or Complete Functional Protector that was converted from an existing disability or impairment benefit if the claim event occurred before the conversion.

A partial conversion will not be allowed

The policyholder may choose any increase option and premium pattern for the Functional Protector or Complete Functional Protector subject to the new business rules.

When the benefit is converted, the policyholder must add a premium waiver to the Functional Protector or Complete Functional Protector. If this is the same Premium Waiver as the one on the previous policy the only underwriting required will be a declaration of health. The policyholder may select any increase option on the waiver of premium (increasing or level). The new waiver of premium will be subject to new business age and benefit limits.

A new policy contract will be issued for the Functional Protector or Complete Functional Protector on conversion.

The conversion will be an add and remove alteration. If this benefit is added without the removal of the benefit being converted, normal underwriting will apply.

If the benefit being converted is removed or it is within three months of the expiry, special underwriting conditions will apply.

If tapering was not selected:

The monthly income for the benefit issued under this conversion option is limited to 1% of the benefit amount at the time of the conversion.

If tapering was selected:

The monthly income for the benefit issued under this conversion option is limited to 1% of:

- the benefit amount at the time of the conversion if tapering has not started, or
- the benefit amount before the tapering started.

Medical underwriting will be required if:

- any specific exclusion applies to this benefit, or
- a health or occupational loading applies to this benefit.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount.
- Conversion to a Functional Protector or Complete Functional Protector
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

The insured life will be assessed against one of two categories. The category used will depend on the occupational duties performed by the insured life at the time of a claim and the occupation like it is usually performed in the open labour market. Assessments will be done by our panel of specialists. If the insured life's occupational duties have changed in the six months before the claim event occurred, the insured life will have to achieve a total score of six for the set of tests on both categories (relating to the current occupational duties and the previous occupational duties) for us to admit a claim. Each occupational definition category has different tests and different points are allocated to the various severity/ability levels.

The category that we use will depend on the proportion of time that the insured life normally spends on performing the following duties: Supervisory, Administrative and Other duties. Insured lives that spend more than 75% of their time on supervisory and administrative duties, will be assessed against category 1, and other insured lives against category 2.

The insured life needs to achieve a total score of 6 or more on the following tests before we will consider a claim. Only one item in each of the tests may be selected before the total score is calculated.

Criteria		Score	
		Cat 1	Cat 2
Cognitive impairment	The insured life's cognitive ability is unimpaired, regardless of any irreversible cognitive deterioration or damage that is disease-related or as a result of an accident.	0	0
	The insured life medically requires periodic assistance or direct supervision to perform essential work tasks, due to deterioration in or damage to cognitive ability, which is irreversible and is disease-related or as a result of an accident, and this we measure by clinical evidence and standardised tests.	4	4
	The insured life medically requires constant assistance to perform essential work tasks, due to deterioration in or damage to cognitive ability, which is irreversible and is disease-related or as a result of an accident, and this we measure by clinical evidence and standardised tests.	6	6
Visual	The insured life's visual ability, with the use of assistive devices, is not reduced to the extent that he requires physical assistance from another person.	0	0
	The insured life's visual ability is reduced to the extent that it affects his functional abilities. It is impossible for him/her to function independently in the workplace without physical assistance from another person, even with the use of assistive devices.	4	4
	The insured life is legally blind. Loss of at least 70% visual acuity in both eyes that is a reading of 20/200. An ophthalmologist needs to confirm this.	6	6
Hearing	The insured life's hearing ability, with the use of assistive devices, is not reduced to the extent that he requires assistance from another person.	0	0
	The insured life's hearing ability is reduced to the extent that it affects his functional abilities. His independent functioning without assistance from another person in the workplace is impossible, even with the use of assistive devices.	4	4

Criteria		Score	
		Cat 1	Cat 2
	The insured life is functionally entirely deaf.	6	6
Verbal communication	The insured life's speaking ability, with the use of assistive devices, is not reduced to the extent that he requires assistance.	0	-
	The insured life's speaking ability is reduced to the extent that he requires assistance for verbal communication within the workplace, both from another person and an assistive device.	2	-
	The insured life is entirely unable to communicate verbally within a workplace, despite assistance from another person and an assistive device.	4	-
Transferring	The insured life is able to move independently between essential workstations with, at the most, the help of a walking cane or other assistive device (including a wheelchair).	0	0
	The insured life requires intermittent physical assistance from another person, even with the use of support apparatus and a walking cane or other assistive device (including a wheelchair), in order to move between essential workstations.	2	3
	The insured life requires constant physical assistance from another person for mobility between essential workstations, although the workplace meets the legislative requirements for accessibility.	4	4
Effort tolerance	The insured life is able to meet the full (ie 75% to 100%) effort tolerance and endurance requirements by completing a stress test and by achieving a METs > 7.	0	0
	The insured life is able to meet 40 - 75% of the requirements for effort tolerance and endurance by completing a stress test and by achieving a METs 3 - 7	2	3
	The insured life is able to meet 40% at most, of the requirements for effort tolerance and endurance by completing a stress test and by achieving a METs < 3.	6	6
Gross and fine motor activities	The insured life is able to use both upper limbs in a coordinated and dextrous manner in order to perform essential gross and fine motor work activities.	0	-
	The insured life is able to perform essential gross motor work activities, although in an awkward fashion, but he requires physical assistance from another person to perform fine motor work activities, despite appropriate adaptations and assistive devices.	2	-
	The insured life is unable to perform essential gross and fine motor work activities, despite appropriate adaptations, the use of assistive devices and physical assistance from another person.	4	-
Work posture	The insured life is able to move through the full range of dynamic work postures, with at most the assistance of a walking cane or any other ambulatory device.	-	0
	The insured life is able to move through a partial range of dynamic work postures but requires physical assistance from another person, in conjunction with a suitable assistive and/or an ambulatory device, and requires a prolonged period (as measured by acceptable work study methods).	-	1
	The insured life is totally reliant on physical assistance from another person, despite the use of suitable assistive and/or ambulatory device, to move between all the dynamic work postures.	-	3

Criteria		Score	
		Cat 1	Cat 2
Co-ordination and dexterity (Work tools and equipment include motor vehicles and motor cycles where the use of these is a requirement of the occupation.)	The insured life is able to use work tools and equipment in an efficient, dextrous manner, with, at most, ergonomic adaptations to these work tools and equipment. His/her productivity is not affected.	-	0
	The insured life is able to utilise essential work tools and equipment, but the rate of production is significantly reduced, due to diminished co-ordination and/or dexterity.	-	3
	The insured life is totally unable to utilise any work tools and equipment in order to produce the desired output, due to diminished upper limb co-ordination and dexterity, regardless of the time allowed.	-	6
Muscle power	The insured life is able to pick up a 5kg weight from a table and carry it for 20 metres in either hand.	-	0
	The insured life is unable to pick up a 5kg weight from a table and carry it for 20 metres in either hand but is able to pick up a 1kg weight from a table and carry it for 5 metres in either hand.	-	2
	The insured life is totally unable to pick up a 1kg weight from a table and carry it for 5 metres in either hand.	-	4
Mental Illnesses	The insured life is totally and continuously unable to perform his work activities as a result of a severe mental disorder. The following information must be provided as proof: • History of a psychiatric disorder and monthly consultations with a psychiatrist for at least a period of 2 years prior to the claim AND • Receiving reasonable psychotropic drugs for his mental condition from his consulting psychiatrist for at least 2 years prior to claim AND • Deemed a candidate for ECT therapy and has been continuously institutionalised for at least 14 days by his treating psychiatrist in the year prior to claim. • The information provided by the consulting psychiatrist will be subject to the assessment by the Momentum panel of psychiatrists.	6	6

Functional Impairment Benefit

Description

Momentum will pay a percentage of the benefit amount as a lump sum if the insured life meets the requirements of one of the defined functional impairment claim events.

Type of benefit

Stand-alone or ancillary

Eligible lives

All lives are eligible subject to age limits and underwriting.

Age limits

To age 65 or 70		Tapering	Age next birthday										
			Level	LifeStage	Aggressive Life Stage	Compulsory %							
						3	4	5	6	7	8	9	10
Minimum entry age			15	15	40	15	15	15	27	30	32	35	38
Maximum entry age	Stand-alone	None	60	60	60	60							
		55	55	50	50	50							
		60	55	50	50	50							
		65	55	50	50	50							
	Ancillary	None	60	60	60	60							
		55	55	55	55	55							
		60	60	60	60	60							
		65	60	60	60	60							
Expiry age			65 or 70										

Term (5 – 20 years)	Age next birthday	
	Level	5% Compulsory
Minimum entry age	15	15
Maximum entry age	60	55
Expiry age	65	

Benefit term

The policyholder may choose one of the following benefit terms:

- To age 65
- To age 70
- Term
  - Minimum - 5 years
  - Maximum - 20 years

Benefit limits

Minimum	Maximum
R100 000	R25 000 000
	R1 000 000 (Student Package)

Tapering

The policyholder can choose between tapering or no tapering.

Momentum will reduce the lump-sum benefit amount annually in even amounts by the chosen tapering option, until it reaches zero.

Tapering starts from the benefit anniversary after the insured life's chosen tapering age to the end of the benefit term.

The benefit amount can reduce by:

- 20% a year during the last five years of the benefit term
- 10% a year during the last ten years of the benefit term.

Tapering is not available on term benefits.

The last voluntary premium or benefit increase will occur on the benefit anniversary before the insured life's chosen tapering age.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Aggressive LifeStage
- Compulsory

Premium guarantee

The premium guarantee depends on the chosen premium pattern:

Term	Premium pattern	Premium guarantee
To age 65 or 70	Level; Compulsory; LifeStage; Aggressive LifeStage	Standard or Extended
Student Package	Level; Compulsory; LifeStage	Standard
Term	The premium is guaranteed for the term of the benefit.	

Increase options

The policyholder may choose either voluntary premium or benefit amount increases. Voluntary premium increases are not available on LifeStage premium patterns.

The last voluntary increase will take place on the benefit anniversary before the insured life's chosen tapering age.

Premium pattern	Premium increases	Benefit amount increases
Level	0%, 3 — 20%, CPI	0%, 3 — 10%, CPI, RDI
LifeStage	Age related increases only	0%, 3 — 10%, CPI, RDI
Aggressive LifeStage	Age related increases only	0%, 3 — 10%, CPI, RDI
Compulsory	3 — 20%	0%, 3 — 10%, CPI, RDI

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver - Retrenchment

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Collateral cessions are allowed on the stand-alone benefit.

Claim event

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim event is based on the severity of a medical impairment that occurs after the starting date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment, and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future. The insured life will not be required to undergo reasonable optimal treatment if a specialist that Momentum has approved has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with their treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment, they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

Claim amount

The functional impairment claim events are divided into categories.

For certain categories, claim payments are divided into severity levels, depending on the severity of the functional impairment event.

Each level has an associated "percentage payout".

For the first claim made under the benefit, the claim amount is calculated as the percentage payout multiplied by the benefit amount. The benefit amount for this benefit will be reduced by the claim amount.

The claim amount for a subsequent claim in a different category is calculated by multiplying the percentage payout by the reduced benefit amount. This amount is paid, irrespective of the relative severity level of the new claim and the original claim.

A subsequent claim in the same category will only be paid if the claim event is more severe than previous claims in the same category. The claim amount that will be paid is based on the difference between the percentage payout for the new claim and the total percentage paid for that category (the "additional percentage payout"). In this case, the claim amount is calculated as the additional percentage payout, multiplied by the benefit amount (only adjusted for claims in other categories).

Related claims: A related claim is where the claim event progressed from a previous claim event. Momentum will treat a claim that is related to any previous claim in a different category as if it is in the same category as the claim it progressed from.

If more than one claim event occurs as a result of the same cause, a claim will be admitted for the claim event resulting in the highest payment.

Momentum will always pay the balance of the benefit amount for claims with a percentage payout of 100%.If tapering is selected, the lump sum benefit amount will be reduced to zero evenly from the benefit anniversary after the insured life's chosen tapering age, to the benefit anniversary before the insured life's chosen expiry age.

Any outstanding debt will be deducted from the claim amount.

If a claim for the full benefit amount is admitted, the benefit will be cancelled and the contract benefit premium reduced. The benefit premium will not reduce in the event of a partial claim.

Survival period

There is no explicit survival period.

A claim will only be admitted if the insured life meets the requirements of the defined claim event, prior to their death.

No medical test or examination concluded after the insured life’s death will be considered when evaluating a claim.

Conversion option

The policyholder has the option to convert this benefit (stand-alone and ancillary) to a Functional Protector or a Complete Functional Protector.

These benefits pay a monthly claim amount for the remainder of the insured's life if they are permanently impaired (subject to the benefit limits that apply at the time of the conversion).

A claim will not be paid under the Functional Protector or Complete Functional Protector, that was converted from an existing disability or impairment benefit if the claim event occurred before the conversion.

A partial conversion will not be allowed

The policyholder may choose any increase option and premium pattern for the Functional Protector or Complete Functional Protector subject to the new business rules.

When the benefit is converted, the policyholder must add a premium waiver to the Functional Protector or Complete Functional Protector. If this is the same Premium Waiver as the one on the previous policy the only underwriting required will be a declaration of health. The policyholder may select any increase option on the waiver of premium (increasing or level). The new waiver of premium will be subject to new business age and benefit limits.

A new policy contract will be issued for the Functional Protector or Complete Functional Protector on conversion.

The conversion will be an add and remove alteration. If this benefit is added without the removal of the benefit being converted, normal underwriting will apply.

If the benefit being converted is removed or it is within three months of the expiry, special underwriting conditions will apply.

If tapering was not selected:

The monthly income for the benefit issued under this conversion option is limited to 1% of the benefit amount at the time of the conversion.

If tapering was selected:

The monthly income for the benefit issued under this conversion option is limited to 1% of:

- the benefit amount at the time of the conversion if tapering has not started, or
- the benefit amount before the tapering started.

Medical underwriting will be required if:

- any specific exclusion applies to this benefit, or
- a health or occupational loading applies to this benefit.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount.
- Conversion to a Functional Protector or Complete Functional Protector
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Student Package conversion option

Refer to individual Packages for special conversion options offered as part of the Student Package.

Complete Income Protector

*This section is relevant to all benefit terms except whole life. Refer to the next benefit section for information on a Complete Income Protector with a whole of life term.

Description

Momentum will pay a monthly claim amount if:

- the insured life is temporarily or permanently disabled as a result of a bodily injury or illness to such an extent that they are continuously unable to perform the main duties of their own occupation on a total or partial basis
- OR
- the insured life meets the requirements of one of the defined impairment or illness claim events.

Special conditions

The claim amount is paid monthly in arrears.

The policyholder and the insured life must be the same person if a natural person owns the benefit.

Only one Complete Income Protector is allowed per policy.

Annual premiums are not allowed on the Complete Income Protector.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible subject to age limits and underwriting.

Age limits

Minimum entry age 15 next birthday

Chosen expiry age (next birthday)	Maximum entry age (next birthday)			
	Level	LifeStage	5% Compulsory	6% or 7% Compulsory
To age 55	50	50	50	50
To age 60	55	55	55	55
To age 65	60	55	55	55
To age 70	60	55	55	55

Benefit term

The policyholder may choose one of the following benefit terms:

- To the chosen expiry age
- Term – Minimum 5 years

Note: The policyholder may not claim under the benefit after the policy anniversary immediately preceding the insured life's chosen benefit term.

Benefit limits

Minimum per month	Maximum per month
R2 000	R150 000
	R200 000 (professionals)

The monthly benefit amount is limited to 100% of the insured life's net monthly income.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Compulsory (5%, 6% or 7%)

Premium guarantee

Momentum will calculate the premium guarantee term.

Increase options

Premium pattern	Premium increases	Benefit amount increases
Level	None	0%, 5%, 7.5%, CPI
LifeStage	Age related increases only	0%, 5%, 7.5%, CPI
Compulsory (5%, 6%, 7%)	None	0%, 5%, 7.5%, CPI

If the policyholder chose to have voluntary benefit amount increases:

- the monthly pre-claim benefit amount will increase on every benefit anniversary date, and
- the monthly post-claim benefit amount will increase on the claim anniversary date, at the chosen benefit increase percentage limited to a maximum of the general increase in the CPI.

If the policyholder selected the CPI increase option, then pre-claim increases will be limited to 15% per year and post-claim increases will be limited to 10% per year.

Claim Increase Booster for young professionals

In addition to the above increase, the monthly post-claim benefit amount will increase by an additional percentage for professional occupations (as defined by Momentum). This additional increase will be based on the insured life's age next birthday on the claim anniversary.

Age next birthday	Percentage increase
26 and younger	15%
27	12%
28	9%
29	6%
30	3%
31 and older	0%

Once the insured life turns 31 next birthday, only the monthly post-claim benefit amount increase will apply.

The insured life must have selected a benefit amount increase to qualify for the Claim Increase Booster.

The post-claim benefit amount increase is calculated as:

- Minimum (benefit amount increase and CPI) plus
- Additional increase percentage as shown in the table above

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Income Enhancer – Complete Income Protector
- Complete Family Protector– Complete Income Protector
- Permanent Disability Enhancer (can only be added if no Longevity Protector® - Income Protector is attached to the Complete Income Protector)

Note: The Longevity Protector® - Income Protector is closed to new business but is still available on an existing Complete Income Protector if the benefit amount is less than or equal to 75% of the net income).

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Cessions are not allowed.

Claim event

The insured life can qualify for a claim under either:

- occupational disability or
- impairment or illness.

Occupational disability

An occupational disability is a temporary or permanent disability caused by a bodily injury or an illness to such an extent that the insured life is continuously unable to perform the main duties of his own occupation on a total or partial basis.

A claim amount will only be paid if the insured life is unable to perform at least 25% of the main duties of his own occupation. The claim amount payment will end once the insured life has recovered to the extent that he can perform more than 75% of the main duties of his own occupation.

The claim amount will be calculated according to the loss of income or the severity of disability criteria.

The insured life will not qualify for a claim under the occupational disability criteria if the insured life is not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Impairment or illness

The insured life can qualify for a claim under:

- functional impairment or
- critical illness or
- fracture and hospitalisation

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment or illness claim events.

If the insured life still qualifies for a functional impairment claim after a critical illness, fracture, or hospitalisation claim has been paid, Momentum will continue to pay the defined payment for the balance of the payment period.

Functional impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim amount is based on the severity of a medical impairment that occurs after the starting date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA)) and resulting in the specified functional restrictions defined below.

The insured life will not be able to claim under functional impairment after the chosen expiry age.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent, and continuous for the foreseeable future.

The insured life will not be required to undergo reasonable optimal treatment if a specialist, that Momentum has approved, has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with his treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment events.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

Critical illness

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined critical illnesses claim events.

Momentum will not pay for a subsequent critical illness claim event while the insured life is receiving a critical illness claim amount payment.

Refer to Appendix 2 and Appendix 3 in the technical guide for the critical illness claim events.

Fracture and hospitalisation

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined fracture and hospitalisation claim events.

Momentum will pay for the event with the longest payment period if the insured life qualifies for a payment under more than one of the defined fracture or hospitalisation claim events.

Momentum will not pay for a subsequent claim event for fracture or hospitalisation that occurs while the insured life is receiving a fracture and hospitalisation claim amount payment.

Refer to Appendix 6 in the technical guide for fracture and hospitalisation claim events.

Claim amount

Momentum will use the following assessment criteria to determine the monthly claim amount and will use the criteria resulting in the highest claim amount:

- Loss of income
- Severity of disability
- Severity of impairment or illness

Loss of income

Momentum will pay the actual loss of income up to the maximum of the benefit amount.

Actual loss of income is calculated as the difference between the insured life's pre-disability net income and any income that the insured life earns during the disability.

Net income refers to gross income less income tax payable on this income (determined by applying the relevant year of assessment's income tax tables).

Severity of disability

The claim amount will be between 25% and 100% of the benefit amount, depending on the extent to which the insured life is unable to perform the main duties of his own occupation.

The severity of disability assessment criteria, including the Partial Claim Upgrade, will only apply during the first year after the claim event. For professional occupations, these criteria will apply for the first two years after the claim event.

Partial Claim Upgrade

- If the full benefit amount has been paid for a continuous period of three months, the insured life will qualify for a Partial Claim upgrade.
- Momentum will continue to pay the full benefit amount after the three months, provided that the insured life is partially disabled
- The full benefit amount will only be paid while the severity of disability assessment criteria applies (the first year after the claim event or the first two years after the claim event for professionals).

Severity of impairment or illness

Momentum will pay a percentage of the benefit amount for a specified payment period if the insured life meets any of the requirements for functional impairment, critical illness or fracture and hospitalisation claim events.

Refer to Appendix 6 in the technical guide for payout levels and payment periods for severity of impairment and illness claim events.

General

The claim amount is paid monthly in arrears.

The daily claim amount will be calculated as 1/30 of the monthly benefit amount.

A proportionate payment will be made in respect of any part of a month should the insured life be rehabilitated before the payment date. Following rehabilitation, the insured life will retain his cover.

Any outstanding debt will be deducted from the claim amount.

Premium waiver during a claim

The premium will be waived for this benefit while a claim is being paid.

No proportionate premiums can be paid; therefore, premiums are waived from the next financial month after the expiry of the waiting period.

If the claim amount is less than the full benefit amount, the whole premium will still be waived.

For a seven-day or 14-day waiting period, premiums will be waived after the insured life has been continuously disabled for more than 28 days.

If Momentum collected premiums for a period not applicable for premium payment, it will be refunded to the policyholder as an advance on the policy. This (advance) amount will be deducted from the next premium payment.

If this benefit is the only benefit on the policy, the policy fee will be waived while a claim is being paid.

Definition of income

Income is defined as one of the following:

Gross Taxable Income	The total sum of all taxable income payable or benefits receivable on account of the insured life's employment, or any services rendered by the insured life.
Cost to Company Income	This equals Gross Taxable Income plus: • the value of any fringe benefits (as provided for in the Income Tax Act) awarded to the employee, • retirement fund contributions made by the life insured's employer,

	• the cost of any other benefits paid for by the insured life's employer, and • any dividends received by the life insured due to shareholding or member's interest held in the employer (where the employer is a company or close corporation).
Gross Professional Income (professionals only)	For professionals that charge a fee for services, this equals the sum of the professional fees and the revenue less cost of sales from trading activities, after deducting business overheads expenses.

Net income refers to gross income less income tax payable on this income (determined by applying the relevant year of assessment's income tax tables).

Momentum will use the income definition that results in the highest net income when calculating loss of income or benefit reductions.

Pre-disability net income will be increased by inflation from the date of the claim event to the date on which the loss of income is calculated.

Benefit reductions

The claim amount will be reduced if:

- The benefit amount exceeds 100% of the insured life's pre-disability net income or
- The policyholder is receiving a disability income from another insurance policy contract as a result of the insured life's disability

Benefit amount exceeds 100% of the pre-disability net income

The benefit amount will be reduced to ensure that it does not exceed 100% of the insured life's pre-disability net income.

Income from other income disability policy contracts

The claim amount will be reduced to ensure that the total of the claim amount payment and the income from the other policy contract does not exceed 100% of the insured life's pre-disability net income.

General

Pre-disability net income will be calculated as the insured life's net income (as defined under Definition of income) averaged over the period of 12 months immediately preceding the date of the disability.

Any Functional Protector or Complete Functional Protector claim amount paid to the policyholder will not be considered in the benefit reduction calculations.

Payments for lump sum disability benefits are specifically excluded from the benefit reduction calculation.

Removal of annual claim increases

If a claim arises as a direct or indirect result of any of the following conditions, the insured life will not qualify for any annual benefit claim increases for a period of up to five years following the first claim anniversary:

- Any mental illness or psychiatric disorder which includes but is not limited to depression, dysthymia, post-traumatic stress disorder, and somatic symptom disorders
- Chronic pain syndrome (or any synonym thereof)
- Chronic fatigue syndrome (or any synonym thereof)
- Fibromyalgia
- Back or neck pain
- Any orthopaedic condition which is based on pain, discomfort, loss of sensation, loss of range of motion, or any combination thereof
- Any decline in cognitive functioning which does not meet the requirements for Activities of Daily Living (ADL's) stipulated under the functional impairment definitions;
- Any injury, illness, complication, or treatment complications that arise as a result of any of the conditions listed above.

The removal of annual claim increases will not apply if:

- The insured life is receiving an income of less than 75% of his pre-disability net income (adjusted for inflation)
- The insured life qualifies for a claim amount payment under one of the 100% functional impairment events.

Waiting period

The policyholder may choose one of the following waiting periods:

- Seven days (only applicable to self-employed individuals)
- 14 days
- One month
- Three months
- Six months
- 12 months
- 24 months.

Premiums are payable during the waiting period.

If the insured life dies within the waiting period, a disability claim will not be paid.

The first monthly claim amount payment will be made only after the insured life has been disabled for the waiting period that he chose.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

Claim amount payments for functional impairment, critical illness or fracture, and hospitalisation will only be made after the waiting period has expired.

Seven-day waiting period

The premium due under this benefit will be waived after the insured life has been continuously disabled for more than 28 days.

The claim amount payments will be made every seven days after the waiting period has expired.

Claim payments will be made monthly in arrears after the insured life has been continuously disabled for 28 days.

The insured life may qualify for a retrospective payment from day one of benefits after the seven-day waiting period in respect of disability. The first payment will be made seven days after the claim event occurred.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

To qualify for a retrospective payment, the insured life must be disabled for more than seven days and the insured life's disability must NOT be as a result of one of the following:

- Cosmetic surgery
- Influenza*
- Upper or lower respiratory tract infections including SARS Cov-2/Covid-19/Coronavirus*
- Bronchitis*
- Mental or psychiatric disorders*
- Gastric influenza*
- Gastritis*
- Constipation*
- Diarrhea*
- Headaches*
- Migraines*
- Stress-related disorders
- Chronic fatigue syndrome
- Laryngitis, sinusitis, and pharyngitis
- Abortions
- Surgical procedures for infertility
- Back injury
- Fibromyalgia

*These conditions will be covered if they require hospitalisation for longer than 24 hours. No retrospective payments will be made where the insured life was hospitalised for less than 24 hours.

14-day waiting period

After the insured life has been continuously disabled for 28 days, claim payments will be made monthly in arrears.

The claim amount payments will be made every seven days after the waiting period has expired.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

Momentum will waive the premiums due under this benefit, after the insured life has been continuously disabled for more than 28 days. Following rehabilitation, the insured life will retain their cover (at the premium rates applicable at that time).

There are no retrospective payments under the 14-day waiting period.

Off period

An "off period" of three months applies.

This means that if the insured life is rehabilitated and claims again for the same cause within three months, the waiting period will be waived.

Seven-day and 14-day waiting period

The "off period" will only apply after the policyholder has been continuously disabled for more than 28 days.

Income tax

If the benefit is owned by a natural person, the premiums are not tax-deductible.

The claim amount payable in terms of this benefit will be tax-free.

Annual Income Commutation Option

The policyholder has the option to convert up to one year's monthly claim amount payments for this benefit and have it paid out as a lump sum if the insured life:

- is totally unable to perform the normal duties of his own occupation or
- satisfies the requirements for a 100% functional impairment claim event.

The commutation feature may only be accessed after permanency has been established, but not before the second claim anniversary.

Every year on the claim anniversary, from the second claim anniversary onwards, the policyholder will have the option to convert either 0%, 25%, 50%, 75%, or 100% of one year's monthly claim amount payments for this benefit to a lump sum payment.

Momentum will notify the policyholder as soon as permanency has been established, of the option to convert. This feature must be exercised not later than two months before the subsequent claim anniversary.

Conversion of the full monthly payment

If the policyholder chooses to convert 100% of one year's monthly claim amount payments, it will be paid in the form of a single lump-sum amount.

This payment will be made on the next available payment date, following the subsequent claim anniversary.

Conversion of a portion of the monthly payment

If the policyholder chooses a lump sum conversion percentage that is less than 100%, the first payment following the subsequent claim anniversary will consist of one year's monthly accumulated claim payments that are calculated using the chosen percentage.

The monthly payments following the lump sum payment will also be calculated using the chosen conversion percentage.

The first payment will be made on the next available payment date, following the subsequent claim anniversary.

The current commutation factor is 11.5 for the lump sum calculations.

Guaranteed insurability

Momentum will allow the policyholder to increase the benefit amount without any medical underwriting after the benefit anniversary if the insured life's income increases at a rate that exceeds the maximum voluntary benefit amount increase percentage.

The total annual increase (annual voluntary benefit amount increase plus the guaranteed insurability increase) will be limited to twice the inflation rate used for increases by Momentum at that point, capped to 20%.

This additional benefit amount increase may not be exercised if any of the following apply:

- the insured life is over the age of 55
- voluntary benefit amount increases were not selected
- the insured life is already disabled or was disabled during the 12 months preceding the date of the benefit amount increase
- a health loading applies to the insured life

Momentum must receive a written request to increase the benefit amount within one month after the benefit anniversary.

Conversion Option

The policyholder has the option to convert this benefit to one of the following benefits:

- Functional Protector or
- Complete Functional Protector

The Complete Functional Protector will be the default option for the conversion from a Complete Income Protector at the expiry of the Complete Income Protector.

These benefits pay a monthly claim amount for the remainder of the insured's life if he is permanently impaired.

The benefit amount being converted is subject to the maximum benefit limit for the chosen benefit at the time of the conversion.

Medical underwriting will be required if:

- any specific exclusion applies to this benefit, or
- a health or occupational loading applies to this benefit.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- If the insured life met the requirements for a Permanent Disability Enhancer claim and the policyholder chose to convert the full regular income to a lump sum.
- Conversion to a Functional Protector or Complete Functional Protector
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Factors affecting monthly benefit payments

The benefit payments end if:

- the insured life no longer qualifies for a claim amount payment
- the benefit ends
- the insured life is not receiving or is refusing the medical treatment he/she could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

Ongoing assessment events

Once a claim has been admitted and Momentum has started paying the monthly claim amount, the insured life's health will be assessed from time to time. If the

insured life fails to undergo the reassessment within three months of Momentum's notification, the claim payments may be cancelled.

These assessments will determine whether the insured life still qualifies for a claim and has been receiving such medical treatment as is appropriate for his condition. The benefit payments will end if the insured life no longer qualifies for a claim and the applicable premium must be paid.

Momentum will cover the cost of the reassessment by a doctor chosen by Momentum.

The ongoing assessment may be waived for the impairment or illness claim events.

Following rehabilitation, the monthly benefit amount will start at the level of the last benefit payment and will increase on every benefit anniversary.

Complete Income Protector (Whole Life)

Description

Momentum will pay a monthly claim amount if:

- the insured life is temporarily or permanently disabled as a result of a bodily injury or illness to such an extent that they are continuously unable to perform the main duties of their own occupation on a total or partial basis
  OR
- the insured life meets the requirements of one of the defined impairment or illness claim events.

Automatic cover change at age 70

On the benefit anniversary preceding the insured life's 70th birthday, the benefit amount and claim definitions will automatically change as follows:

- The claim definitions will change to functional impairment cover.
- The benefit amount will be reduced to 50% of the benefit amount that applied immediately before the cover change.

Special conditions

The claim amount is paid monthly in arrears.

The policyholder and the insured life must be the same person if a natural person owns the benefit.

Only one Complete Income Protector is allowed per policy.

Annual premiums are not allowed on the Complete Income Protector.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible subject to age limits and underwriting.

Age limits

Minimum entry age 15 next birthday

Chosen expiry age (next birthday)	Maximum entry age (next birthday			
	Level	LifeStage	5% Compulsory	6% or 7% Compulsory
Whole life	60	55	55	55

Benefit term

The policyholder may choose one of the following benefit terms:

- To the chosen expiry age
- Term – Minimum 5 years

Note: The policyholder may not claim under the benefit after the policy anniversary immediately preceding the insured life's chosen benefit term.

Benefit limits

Minimum per month	Maximum per month
R2 000	R150 000
	R200 000 (professionals)

The monthly benefit amount is limited to 100% of the insured life's net monthly income.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Compulsory (5%, 6% or 7%)

Premium guarantee

Momentum will calculate the premium guarantee term.

Increase options

Premium pattern	Premium increases	Benefit amount increases
Level	None	0%, 5%, 7.5% and CPI
LifeStage	Age related increases only	0%, 5%, 7.5% and CPI
Compulsory (5%, 6%, 7%)	None	0%, 5%, 7.5% and CPI

If the policyholder chose to have voluntary benefit amount increases:

- the monthly pre-claim benefit amount will increase on every benefit anniversary date, and
- the monthly post-claim benefit amount will increase on the claim anniversary date, at the chosen benefit increase percentage limited to a maximum of the general increase in the CPI.

If the policyholder selected the CPI increase option then, pre-claim increases will be limited to 15% per year and post-claim increases will be limited to 10% per year.

Claim Increase Booster for young professionals

In addition to the above increase, the monthly post-claim benefit amount will increase by an additional percentage for professional occupations (as defined by Momentum). This additional increase will be based on the insured life's age next birthday on the claim anniversary.

Age next birthday	Percentage increase
26 and younger	15%
27	12%
28	9%
29	6%
30	3%
31 and older	0%

Once the insured life turns 31 next birthday, only the monthly post-claim benefit amount increase will apply.

The insured life must have selected a benefit amount increase to qualify for the Claim Increase Booster.

The post-claim benefit amount increase is calculated as:

- Minimum (benefit amount increase and CPI) plus
- Additional increase percentage as shown in the table above

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Income Enhancer – Complete Income Protector
- Complete Family Protector– Complete Income Protector
- Permanent Disability Enhancer

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Cessions are not allowed.

Claim event (before age 70)

Applicable before the benefit anniversary preceding the insured life's 70th birthday

The insured life can qualify for a claim under either:

- occupational disability or
- impairment or illness.

Occupational disability

An occupational disability is a temporary or permanent disability caused by a bodily injury or an illness to such an extent that the insured life is continuously unable to perform the main duties of his own occupation on a total or partial basis.

A claim amount will only be paid if the insured life is unable to perform at least 25% of the main duties of his own occupation. The claim amount payment will end once the insured life has recovered to the extent that he can perform more than 75% of the main duties of his own occupation.

The claim amount will be calculated according to the loss of income or the severity of disability criteria.

The insured life will not qualify for a claim under the occupational disability criteria if the insured life is not gainfully employed at the time of the claim event occurring. Any claim will be assessed against the impairment and illness criteria.

Impairment or illness

The insured life can qualify for a claim under:

- functional impairment or
- critical illness or
- fracture and hospitalisation

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment or illness claim events.

If the insured life still qualifies for a functional impairment claim after a critical illness, fracture, or hospitalisation claim has been paid, Momentum will continue to pay the defined payment for the balance of the payment period.

Functional impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim amount is based on the severity of a medical impairment that occurs after the starting date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent, and continuous for the foreseeable future.

The insured life will not be required to undergo reasonable optimal treatment if a specialist, that Momentum has approved, has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at the claim stage. The insured life is expected to comply with his treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment events.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

Critical illness

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined critical illnesses claim events.

A critical illness claim amount payment is only applicable to benefits with a seven-day, 14-day, one-month, or three-month waiting period.

Momentum will not pay for a subsequent critical illness claim event while the insured life is receiving a critical illness claim amount payment.

Refer to Appendix 2 and Appendix 3 in the technical guide for the critical illness claim events.

Fracture and hospitalisation

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined fracture and hospitalisation claim events.

A fracture and hospitalisation claim amount payment is only applicable to benefits with a seven-day, 14-day, or one-month waiting period.

Momentum will pay for the event with the longest payment period if the insured life qualifies for a payment under more than one of the defined fracture or hospitalisation claim events.

Momentum will not pay for a subsequent claim event for fracture or hospitalisation that occurs while the insured life is receiving a fracture and hospitalisation claim amount payment.

Refer to Appendix 6 in the technical guide for fracture and hospitalisation claim events.

Claim event (after age 70)

Applicable after the benefit anniversary preceding the insured life's 70th birthday

The same functional impairment claim events that apply before age 70 will continue to apply, but with the following exceptions:

- The insured life will not be able to submit a claim for any of the 25% functional impairment events if that event occurs after the benefit anniversary immediately preceding the insured life's 70th birthday. These events no longer apply.
- All claim events in the following categories will not qualify for a claim payment after the stipulated benefit anniversary, even in instances where the insured life qualified for a claim before the benefit anniversary (preceding the insured life's 70th birthday):
  - Hearing
  - Speech
  - Facial disorders and/or disfigurement
  - Cranial nerve VII (facial nerve)
  - Peripheral venous disease
- If the insured life met the requirements for a 25% functional impairment severity before the stipulated benefit anniversary (other than for hearing) and received a payout/series of payouts and still qualifies for a payout after undergoing a reassessment at the benefit anniversary preceding the insured life's 70th birthday, Momentum will continue the payment until death.
- Claim events for own occupation disability, fractures and hospitalization, and critical illness will no longer apply after the benefit anniversary preceding the insured life's 70th birthday.

Claim amount (before age 70)

Applicable to claim events that occur before the benefit anniversary preceding the insured life's 70th birthday

The monthly claim amount will be the higher of the claim amount calculated according to the following assessment criteria:

- Loss of income
- Severity of disability
- Severity of impairment or illness

Loss of income

Momentum will pay the actual loss of income up to the maximum of the benefit amount.

Actual loss of income is calculated as the difference between the insured life's pre-disability net income and any income that the insured life earns during the disability.

Net income refers to gross income less income tax payable on this income (determined by applying the relevant year of assessment's income tax tables).

Severity of disability

The claim amount will be between 25% and 100% of the benefit amount, depending on the extent to which the insured life is unable to perform the main duties of his own occupation.

The severity of disability assessment criteria, including the Partial Claim Upgrade, will only apply during the first year after the claim event. For professional occupations, these criteria will apply for the first two years after the claim event.

Partial Claim Upgrade

- If the full benefit amount has been paid for a continuous period of three months, the insured life will qualify for a Partial Claim Upgrade.
- Momentum will continue to pay the full benefit amount after the three months, provided that the insured life is partially disabled
- The full benefit amount will only be paid while the severity of disability assessment criteria applies (the first year after the claim event or the first two years after the claim event for professionals).

Severity of impairment or illness

Momentum will pay a percentage of the benefit amount for a specified payment period if the insured life meets any of the requirements for functional impairment, critical illness or fracture, and hospitalisation claim events.

Refer to Appendix 6 in the technical guide for payout levels and payment periods for severity of impairment and illness claim events.

Claim events under the following categories will only qualify for a claim payment until the benefit anniversary immediately preceding the insured life's 70th birthday:

- Hearing
- Speech
- Facial disorders and/or disfigurement
- Cranial nerve VII (facial nerve)
- Peripheral venous disease

General

The claim amount is paid monthly in arrears.

The daily claim amount will be calculated as 1/30 of the monthly benefit amount.

A proportionate payment will be made in respect of any part of a month should the insured life be rehabilitated before the payment date. Following rehabilitation, the insured life will retain his cover.

Any outstanding debt will be deducted from the claim amount.

Premium waiver during a claim

The premium will be waived for this benefit while a claim is being paid.

No proportionate premiums can be paid; therefore premiums are waived from the next financial month after the expiry of the waiting period.

If the claim amount is less than the full benefit amount, the whole premium will still be waived.

For a seven-day or 14-day waiting period, premiums will be waived after the insured life has been continuously disabled for more than 28 days.

If Momentum collected premiums for a period not applicable for premium payment, it will be refunded to the policyholder as an advance on the policy. This (advance) amount will be deducted from the next premium payment.

If this benefit is the only benefit on the policy, the policy fee will be waived while a claim is being paid.

Claim amount (after age 70)

Applicable to claim events after the benefit anniversary preceding the insured life's 70th birthday

The benefit amount will be reduced by 50% on the benefit anniversary immediately preceding the insured life's 70th birthday.

Claim payments after this date will be based on the reduced benefit amount. This also applies to claim payments in respect of claim events occurring before the benefit anniversary immediately preceding the insured life's 70th birthday.

The claim amount for claim events that occur after the benefit anniversary immediately preceding the insured life's 70th birthday will be based on the severity level.

Functional impairment		
Severity level	Payment percentage	Payment period
50%	50%	Until death
75%	75%	Until death
100%	100%	Until death

Definition of income

Income is defined as one of the following:

Gross Taxable Income	The total sum of all taxable income payable or benefits receivable on account of the insured life's employment, or any services rendered by the insured life.
Cost to Company Income	This equals Gross Taxable Income plus: • the value of any fringe benefits (as provided for in the Income Tax Act) awarded to the employee, • retirement fund contributions made by the life insured's employer, • the cost of any other benefits paid for by the insured life's employer, and • any dividends received by the life insured due to shareholding or member's interest held in the employer (where the employer is a company or close corporation).

Gross Professional Income (professionals only)	For professionals that charge a fee for services, this equals the sum of the professional fees and the revenue less cost of sales from trading activities, after deducting business overheads expenses.

Net income refers to gross income less income tax payable on this income (determined by applying the relevant year of assessment's income tax tables).

Momentum will use the income definition that results in the highest net income when calculating loss of income or benefit reductions.

Pre-disability net income will be increased by inflation from the date of the claim event to the date on which the loss of income is calculated.

Benefit reductions

The claim amount will be reduced if:

- The benefit amount exceeds 100% of the insured life's pre-disability net income or
- The policyholder is receiving a disability income from another insurance policy contract as a result of the insured life's disability

Benefit amount exceeds 100% of the pre-disability net income

The benefit amount will be reduced to ensure that it does not exceed 100% of the insured life's pre-disability net income.

Income from other income disability policy contracts

The claim amount will be reduced to ensure that the total of the claim amount payment and the income from the other policy contract does not exceed 100% of the insured life's pre-disability net income.

General

Pre-disability net income will be calculated as the insured life's net income (as defined under Definition of income) averaged over the period of 12 months immediately preceding the date of the disability.

Any Functional Protector or Complete Functional Protector claim amount paid to the policyholder will not be considered in the benefit reduction calculations.

Payments for lump sum disability benefits are specifically excluded from the benefit reduction calculation.

Removal of annual claim increases

If a claim arises as a direct or indirect result of any of the following conditions, the insured life will not qualify for any annual benefit claim increases for a period of up to five years following the first claim anniversary:

- Any mental illness or psychiatric disorder which includes but is not limited to depression, dysthymia, post-traumatic stress disorder, and somatic symptom disorders
- Chronic pain syndrome (or any synonym thereof)
- Chronic fatigue syndrome (or any synonym thereof)
- Fibromyalgia
- Back or neck pain

- Any orthopaedic condition which is based on pain, discomfort, loss of sensation, loss of range of motion, or any combination thereof
- Any decline in cognitive functioning which does not meet the requirements for Activities of Daily Living (ADL's) stipulated under our functional impairment definitions
- Any injury, illness, complication, or treatment complications that arise as a result of any of the conditions listed above.

The removal of annual claim increases will not apply if:

- The insured life is receiving an income of less than 75% of his pre-disability net income (adjusted for inflation).
- The insured life qualifies for a claim amount payment under one of the 100% functional impairment events.

Waiting period

The policyholder may choose one of the following waiting periods:

- Seven days (only applicable to self-employed individuals)
- 14 days
- One month
- Three months
- Six months
- 12 months
- 24 months.

Premiums are payable during the waiting period.

If the insured life dies within the waiting period, a claim will not be paid.

The first monthly claim amount payment will be made only after the insured life has been disabled for the waiting period that he chose.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

Claim amount payments for functional impairment, critical illness or fracture, and hospitalisation will only be made after the waiting period has expired.

A waiting period will not apply this benefit for the functional impairment claim events after the benefit anniversary preceding the insured life's 70th birthday.

Seven-day waiting period

The premium due under this benefit will be waived after the insured life has been continuously disabled for more than 28 days.

The claim amount payments will be made every seven days after the waiting period has expired.

Claim payments will be made monthly in arrears after the insured life has been continuously disabled for 28 days.

The insured life may qualify for a retrospective payment from day one of benefits after the seven-day waiting period in respect of disability. The first payment will be made seven days after the claim event occurred.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

To qualify for a retrospective payment the insured life must be disabled for more than seven days and the insured life's disability must NOT be as a result of one of the following:

- Cosmetic surgery
- Influenza*
- Bronchitis*
- Mental or psychiatric disorders*
- Gastric influenza*
- Gastritis*
- Constipation*
- Diarrhea*
- Headaches*
- Migraines*
- Stress-related disorders
- Chronic fatigue syndrome
- Laryngitis, sinusitis, and pharyngitis
- Abortions
- Surgical procedures for infertility
- Back injury
- Fibromyalgia

*These conditions will be covered if they require hospitalisation for longer than 24 hours. No retrospective payments will be made where the insured life was hospitalised for less than 24 hours.

14-day waiting period

After the insured life has been continuously disabled for 28 days, claim payments will be made monthly in arrears.

The claim amount payments will be made every seven days after the waiting period has expired.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

Momentum will waive the premiums due under this benefit, after the insured life has been continuously disabled for more than 28 days. Following rehabilitation, the insured life will retain their cover (at the premium rates applicable at that time).

There are no retrospective payments under the 14-day waiting period.

Off period

An "off period" of three months applies.

This means that if the insured life is rehabilitated and claims again for the same cause within three months, the waiting period will be waived.

Seven-day and 14-day waiting period

The "off period" will only apply after the policyholder has been continuously disabled for more than 28 days.

Income tax

If the benefit is owned by a natural person, the premiums are not tax-deductible.

The claim amount payable in terms of this benefit will be tax-free.

Annual Income Commutation Option

The policyholder has the option to convert up to one year's monthly claim amount payments for this benefit and have it paid out as a lump sum if the insured life:

- is totally unable to perform the normal duties of his own occupation or
- satisfies the requirements for a 100% functional impairment claim event. The commutation feature may only be accessed after permanency has been established, but not before the second claim anniversary.

Every year on the claim anniversary, from the second claim anniversary onwards, the policyholder will have the option to convert either 0%, 25%, 50%, 75%, or 100% of one year's monthly claim amount payments for this benefit to a lump sum payment.

Momentum will notify the policyholder as soon as permanency has been established, of the option to convert. This feature must be exercised not later than two months before the subsequent claim anniversary.

Conversion of the full monthly payment

If the policyholder chooses to convert 100% of one year's monthly claim amount payments, it will be paid in the form of a single lump-sum amount.

This payment will be made on the next available payment date, following the subsequent claim anniversary.

Conversion of a portion of the monthly payment

If the policyholder chooses a lump sum conversion percentage that is less than 100%, the first payment following the subsequent claim anniversary will consist of one year's monthly accumulated claim payments that are calculated using the chosen percentage.

The monthly payments following the lump sum payment will also be calculated using the chosen conversion percentage.

The first payment will be made on the next available payment date, following the subsequent claim anniversary.

The current commutation factor is 11.5 for the lump sum calculations.

Guaranteed insurability

Momentum will allow the policyholder to increase the benefit amount without any medical underwriting after the benefit anniversary if the insured life's income increases at a rate that exceeds the maximum voluntary benefit amount increase percentage.

The total annual increase (annual voluntary benefit amount increase plus the guaranteed insurability increase) will be limited to twice the inflation rate used for increases by Momentum at that point, capped to 20%.

This additional benefit amount increase may not be exercised if any of the following apply:

- the insured life is over the age of 55
- voluntary benefit amount increases were not selected
- the insured life is already disabled or was disabled during the 12 months preceding the date of the benefit amount increase
- a health loading applies to the insured life

Momentum must receive a written request to increase the benefit amount within one month after the benefit anniversary.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- If the insured life met the requirements for a Permanent Disability Enhancer claim and the policyholder chose to convert the full regular income to a lump sum.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section for the documents required for assessing a claim under this benefit.

Factors affecting monthly benefit payments

The benefit payments end if:

- the insured life no longer qualifies for a claim amount payment
- the benefit ends
- the insured life is not receiving or is refusing the medical treatment he/she could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

Ongoing assessment

Once a claim has been admitted and Momentum has started paying the monthly claim amount, the insured life's health will be assessed from time to time. If the insured life fails to undergo the reassessment within three months of Momentum's notification, the claim payments may be cancelled.

These assessments will determine whether the insured life still qualifies for a claim and has been receiving such medical treatment as is appropriate for his condition. The benefit payments will end if the insured life no longer qualifies for a claim and the applicable premium must be paid.

Momentum will cover the cost of the reassessment by a doctor chosen by Momentum.

The ongoing assessment may be waived for the impairment or illness claim events.

Following rehabilitation, the monthly benefit amount will start at the level of the last benefit payment and will increase on every benefit anniversary.

The insured life will need to go for a re-assessment at the benefit anniversary preceding the insured life's 70th birthday to establish whether they meet the specific post-retirement functional impairment requirements.

Following the insured life's rehabilitation any time before the benefit anniversary preceding the insured life's 70th birthday, if voluntary income amount increases were chosen, the monthly benefit amount will start at the level of the last benefit payment and will increase on every benefit anniversary.

Permanent Disability Enhancer

Description

The policyholder has the option to convert all or part of the monthly payments under the Complete Income Protector to a lump sum amount if:

- The insured life has been disabled for a period longer than the chosen waiting period and
- The insured life:
  - is totally and permanently unable to perform the normal duties of his own occupation as a result of a bodily injury or illness, OR
  - meets the requirements for a functional impairment claim event under the Complete Income Protector to which the Permanent Disability Enhancer benefit is attached.

Special conditions

This benefit is only available as an ancillary benefit on a Complete Income Protector.

The insured life can be any one of the following:

- a natural person
- a trust with natural persons as beneficiaries
- a sole proprietor

This benefit is not available on a Complete Income Protector:

- with no voluntary benefit increases.
- with a Longevity Protector® attached to it.

This benefit may not be added to any business assurance packages.

Type of benefit

Ancillary

Eligible lives

All lives are eligible subject to age limits and underwriting.

Age limits

Chosen expiry age (next birthday)	Maximum entry age (next birthday)			
	Level	LifeStage	5% Compulsory	6% or 7% Compulsory
To age 55	50	50	50	50
To age 60	55	55	55	55
To age 65	60	55	55	55
To age 70	60	55	55	55
Whole life term*	60	55	55	55

*The benefit term will be to age 70 for the whole life term.

Benefit term

To the chosen retirement age (age 70 next birthday when added to a Complete Income Protector with a whole of life term)

Additional features

The following additional features are available free of charge:

- Free Cover
- LifeReturns®

Ancillary benefits

Not applicable

Beneficiaries and cessions

The policyholder may nominate beneficiaries at application stage or during the duration of the benefit and when the benefit is in claim.

Cessions are allowed when the benefit is ceded to the insured life of this benefit.

Rules for converting the monthly income payment

The option to convert all the monthly payments, up to benefit expiry to a lump sum is only available until the benefit anniversary immediately preceding the insured life's 70th birthday if the Permanent Disability Enhancer is added to a Complete Income Protector with a whole of life term.

The policyholder has the choice to convert the full monthly payment or a portion of the monthly payment. If a portion of the monthly payment is converted, the insured life will continue to receive the remaining portion as a regular monthly income

If the policyholder does not convert the full income amount and chooses to continue receiving a monthly income amount:

- the remaining monthly income amount will be converted to a lump sum amount in the event of the insured life’s death and paid as a final claim amount. There will be no payout on death if the insured life has not met the requirements for a claim on the Permanent Disability Enhancer.
- the amount will not be reduced if the insured life starts earning an income from performing an alternative occupation.

Provided the insured life meets the requirements, the option to convert the monthly income payment to a lump sum payment can be exercised at any time, before the benefit expiry. Once the full monthly income amount has been converted, no further options to convert will be available.

Momentum will require one month’s notice before converting a monthly income amount into a lump sum payment.

Claim event

To qualify for the benefits of the Permanent Disability Enhancer the insured life must have been disabled for a period longer than the chosen waiting period and

The insured life must either:

- be deemed to be totally and permanently unable to perform the normal duties of his own occupation as a result of a bodily injury or illness, OR
- must meet the requirements for a functional impairment claim event under the Complete Income Protector to which the Permanent Disability Enhancer is attached.

Claim amount

The monthly income amount that can be converted will be the highest of:

- The monthly amount being received at the time the insured life is deemed to be totally and permanently unable to perform the main duties of his own occupation.
- The percentage of the benefit amount the policyholder is entitled to after the insured meets the requirements for a functional impairment claim event.

The converted lump sum value will be calculated by multiplying the following:

- The monthly amount the policyholder selects to convert;
- The outstanding term (in months) until the benefit expiry date;
- The corresponding commutation factor* below.

Outstanding term (in years) to Complete Income Protector benefit expiry date	Commutation Factor
50	57%
49	57%
48	58%
47	58%
46	59%
45	60%
44	60%

7	91%
6	92%
5	93%
4	94%
3	100%
2	100%
1	100%

*The commutation factor is a mechanism to convert the regular payment into a lump sum version by taking into account the effect of interest using real returns.

To calculate the commutation factor, fractions of a year will be rounded up in calculating the outstanding term.

Momentum reserves the right to adjust the commutation factors above after the end of the guaranteed term if real yields have changed by more than 25% since the start of the benefit.

Functional Impairment

If the Complete Income Protector to which the Permanent Disability Enhancer is attached does not have a whole life term, then the functional impairment payment period of the 25% and 50% severity will be enhanced.

Functional impairment		
Severity level	Payment percentage	Payment period
25%	25%	Benefit expiry
50%	50%	Benefit expiry
75%	75%	Benefit expiry
100%	100%	Benefit expiry

Retirement Booster

The Permanent Disability Enhancer and the Complete Income Protector to which this ancillary is attached will receive an enhanced Retirement Booster allocation of 4.5%.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The end of the Complete Income Protector to which this benefit is attached.
- If the insured life met the requirements for a Permanent Disability Enhancer claim and the policyholder chose to convert the full regular income to a lump sum.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Temporary Income Protector

Description

Momentum will pay a monthly claim amount if:

- the insured life is temporarily or permanently disabled as a result of a bodily injury or illness to such an extent that they are continuously unable to perform the main duties of their own occupation on a total or partial basis
  OR
- the insured life meets the requirements of one of the defined impairment or illness claim events.

Special conditions

The claim amount is paid monthly in arrears.

The policyholder and the insured life must be the same person if a natural person owns the benefit.

The policyholder must be the sole owner of the policy.

Only one Temporary Income Protector is allowed per policy.

Annual premiums are not allowed on the Temporary Income Protector.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible subject to age limits and underwriting.

Age limits

Minimum entry age 15 next birthday

Chosen expiry age (next birthday)	Maximum entry age (next birthday)		
	Level	LifeStage	5%, 6% or 7% Compulsory
To age 55	50	50	50
To age 60	55	55	55
To age 65	60	55	55
To age 70	60	55	55

Benefit term

The policyholder may choose one of the following benefit terms:

- To the chosen expiry age.
- Term – Minimum 5 years

Note: The policyholder may not claim under the benefit after the policy anniversary immediately preceding the insured life's chosen benefit term.

Benefit limits

Minimum per month	Maximum per month
R2 000	R150 000
	R200 000 (professionals)

The monthly benefit amount is limited to 100% of the insured life's net monthly income.

The monthly benefit amount is limited to the maximum of the benefit payment period.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Compulsory (5%, 6% or 7%)

Premium guarantee

Momentum will calculate the premium guarantee term.

Increase options

Premium pattern	Premium increases	Benefit amount increases
Level	None	0%, 5%, 7.5%, 10%, CPI
LifeStage	Age related increases only	0%, 5%, 7.5%, 10%, CPI
Compulsory (5%, 6%, 7%)	None	0%, 5%, 7.5%, 10%, CPI

If the policyholder chose to have voluntary benefit amount increases:

- the monthly pre-claim benefit amount will increase on every benefit anniversary date, and
- the monthly post-claim benefit amount will increase on the claim anniversary date, at the chosen benefit increase percentage limited to a maximum of the general increase in the CPI.

If the policyholder chooses the CPI increase option, then pre-claim increases will be limited to 15% per year and post-claim increases will be limited to 10% per year.

Claim Increase Booster for young professionals

In addition to the above increase, the monthly post-claim benefit amount will increase by an additional percentage for professional occupations (as defined by Momentum).

This additional increase will be based on the insured life's age next birthday on the claim anniversary.

Age next birthday	Percentage increase
26 and younger	15%
27	12%
28	9%
29	6%
30	3%
31 and older	0%

Once the insured life turns 31 next birthday, only the monthly post-claim benefit amount increase will apply.

The insured life must have selected benefit amount increase to qualify for the Claim Increase Booster.

The post-claim benefit amount increase is calculated as:

- Minimum (benefit amount increase and CPI) plus
- Additional increase percentage as shown in the table above

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Income Enhancer – Temporary Income Protector
- Complete Family Protector– Temporary Income Protector

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Cessions are not allowed.

Note: An alternative solution is available for collateral cessions on credit life policies.

Benefit payment period

The policyholder may choose any of the following benefit payment periods:

- Six months
- 12 months
- 24 months.

The benefit payments will cease after the specified number of monthly payments have been made.

If Momentum has paid for a specific cause for the benefit payment period, no further claims for that cause will be paid. If Momentum has paid for a specific cause for less than the benefit payment period and the insured life recovers, future claims resulting from the same cause will be paid for the balance of the benefit payment period.

Claim event

The insured life can qualify for a claim under either:

- occupational disability or
- impairment or illness.

Occupational disability

An occupational disability is a temporary or permanent disability caused by a bodily injury or an illness to such an extent that the insured life is continuously unable to perform the main duties of his own occupation on a total or partial basis.

A claim amount will only be paid if the insured life cannot perform at least 25% of the main duties of his own occupation. The claim amount payment will end once the insured life has recovered to the extent that he can perform more than 75% of the main duties of his own occupation.

The claim amount will be calculated according to the loss of income or the severity of disability criteria.

The insured life will not qualify for a claim under the occupational disability criteria if they are not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Impairment or illness

The insured life can qualify for a claim under:

- functional impairment or
- critical illness or
- fracture and hospitalisation

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment or illness claim events.

If the insured life still qualifies for a functional impairment claim after a critical illness, fracture or hospitalisation claim has been paid, we will continue to pay the defined payment for the balance of the payment period.

Functional impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim amount is based on the severity of a medical impairment that occurs after the starting date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life will not be able to claim under functional impairment after the chosen expiry age.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future.

The insured life will not be required to undergo reasonable optimal treatment if a specialist, that Momentum has approved, has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with his treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment events.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

Critical illness

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined critical illnesses claim events.

Momentum will not pay for a subsequent critical illness claim event that occurs while the insured life is receiving a critical illness claim amount payment.

Refer to Appendix 2 and Appendix 3 in the technical guide for the critical illness claim events.

Fracture and hospitalisation

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined fracture and hospitalisation claim events.

Momentum will pay for the event with the longest payment period if the insured life qualifies for a payment under more than one of the defined fracture or hospitalisation claim events.

Momentum will not pay for a subsequent claim event for fracture or hospitalisation that occurs while the insured life is receiving a fracture and hospitalisation claim amount payment.

Refer to Appendix 6 in the technical guide for the fracture and hospitalisation claim events.

Claim amount

Momentum will use the following assessment criteria to determine the monthly claim amount and will use the criteria resulting in the highest claim amount:

- Loss of income
- Severity of disability
- Severity of impairment or illness

Loss of income

Momentum will pay the actual loss of income up to the maximum of the benefit amount.

Actual loss of income is calculated as the difference between the insured life's net pre-disability income and any income the insured life earns during the period of disability.

Net income refers to gross income less income tax payable on this income (determined by applying the relevant year of assessment's income tax tables).

Severity of disability

The claim amount will be between 25% and 100% of the benefit amount, depending on the extent to which the insured life is unable to perform the main duties of his own occupation.

The severity of disability assessment criteria, including the Partial Claim Upgrade, will only apply during the first year after the claim event. For professional occupations, these criteria will apply for the first two years after the claim event.

Partial Claim Upgrade

- If the full benefit amount has been paid for a continuous period of three months, the insured life will qualify for a Partial Claim Upgrade.
- Momentum will continue to pay the full benefit amount after the three months, provided that the insured life is partially disabled
- The full benefit amount will only be paid while the severity of disability assessment criteria applies (the first year after the claim event or the first two years after the claim event for professionals).

Severity of impairment or illness

Momentum will pay a percentage of the benefit amount for a specified payment period if the insured life meets any of the requirements for functional impairment, critical illness or fracture and hospitalisation claim events.

Refer to Appendix 6 in the technical guide for payout levels and payment periods for severity of impairment and illness claim events.

General

The claim amount is paid monthly in arrears.

The daily claim amount will be calculated as 1/30 of the monthly benefit amount.

A proportionate payment will be made in respect of any part of a month should the insured life be rehabilitated before the payment date. Following rehabilitation, the insured life will retain his cover.

The premium will be waived for this benefit while a claim is being paid.

Any outstanding debt will be deducted from the claim amount.

Premium waiver during a claim

The premium will be waived for this benefit while a claim is being paid.

No proportionate premiums can be paid; therefore, premiums are waived from the next financial month after the expiry of the waiting period.

If the claim amount is less than the full benefit amount, the whole premium will still be waived.

For a seven-day waiting period, premiums will be waived after the insured life has been continuously disabled for more than 28 days.

If Momentum collected premiums for a period not applicable for premium payment, it will be refunded to the policyholder as an advance on the policy. This (advance) amount will be deducted from the next premium payment.

If this benefit is the only benefit on the policy, the policy fee will be waived while a claim is being paid.

Definition of income

Income is defined as one of the following:

Gross taxable income	The total sum of all taxable income payable or benefits receivable on account of the insured life's employment, or any services rendered by the insured life.

Cost to company income	This equals Gross Taxable Income plus: • the value of any fringe benefits (as provided for in the Income Tax Act) awarded to the employee, • retirement fund contributions made by the life insured's employer, • the cost of any other benefits paid for by the insured life's employer, and • any dividends received by the life insured due to shareholding or member's interest held in the employer (where the employer is a company or close corporation).
Gross professional income (professionals only)	For professionals that charge a fee for services this equals the sum of the professional fees and the net income from trading activities, after deducting business overheads expenses.

Net income refers to gross income less income tax payable on this income (determined by applying the relevant year of assessment's income tax tables).

Momentum will use the income definition that results in the highest net income when calculating loss of income or benefit reductions.

Pre-disability net income will be increased by inflation from the date of the claim event to the date on which the loss of income is calculated.

Benefit reductions

Section 11(w)(ii) does not apply	Section 11(w)(ii) applies
The claim amount will be reduced if: • the benefit amount exceeds 100% of the insured life's pre-disability **net** income or • the policyholder is receiving a disability income from another insurance policy contract as a result of the insured life's disability.	The claim amount will be reduced if: • the benefit amount exceeds 100% of the insured life's pre-disability income or • the policyholder is receiving a disability income from another insurance policy contract as a result of the insured life's disability.
Benefit amount exceeds 100% of the pre-disability net income The benefit amount will be reduced to ensure that it does not exceed 100% of the insured life's pre-disability **net** income.	**Benefit amount exceeds 100% of the pre-disability income** The benefit amount will be reduced to ensure that it does not exceed 100% of the insured life's pre-disability income.
Income from other income disability policy contracts The claim amount will be reduced to ensure that the total of the claim amount payment and the income from the other policy contract does not exceed 100% of the insured life's pre-disability **net** income.	**Income from other income disability policy contracts** The claim amount will be reduced to ensure that the total of the claim amount payment and the income from the other policy contract does not exceed 100% of the insured life's pre-disability income.
Pre-disability net income will be calculated as the insured life's **net** income (as defined under Definition of income) averaged over the period of 12 months immediately preceding the date of disability.	Pre-disability income will be calculated as the insured life's income (as defined under Definition of income) averaged over the period of 12 months immediately preceding the date of disability.

Any Functional Protector or Complete Functional Protector claim amount paid to the policyholder will not be considered in the benefit reduction calculations.

Payments for lump sum disability benefits are specifically excluded for the benefit reduction calculation.

Successive claims

Total payments throughout the benefit term will be limited to the benefit payment period for claims due to the same bodily injury or related causes or illness.

This limit will be waived for subsequent occupational disability claims if such related claims are separated by 24 months during which the insured life has fully resumed his nominated occupation.

The limit will not be waived for subsequent impairment or illness claims.

Waiting period

The policyholder may choose one of the following waiting periods:

- Seven days (only applicable to self-employed individuals)
- 14 days
- One month
- Three months

Premiums are payable during the waiting period.

If the insured life dies within the waiting period, a disability claim will not be paid.

The first monthly claim amount payment will be made only after the insured life has been disabled for the waiting period that he chose.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

Claim amount payments for functional impairment, critical illness or fracture and hospitalisation will only be made after the waiting period has expired.

Seven-day waiting period

The premium due under this benefit will be waived after the insured life has been continuously disabled for more than 28 days.

The claim amount payments will be made every seven days after the waiting period has expired.

Claim payments will be made monthly in arrears after the insured life has been continuously disabled for 28 days.

The insured life may qualify for a retrospective payment from day one of benefits after the seven-day waiting period in respect of disability. The first payment will be made seven days after the claim event occurred.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

To qualify for a retrospective payment, the insured life must be disabled for more than seven days and the insured life's disability must NOT be as a result of one of the following:

- Cosmetic surgery
- Influenza*
- Upper or lower respiratory tract infections including SARS Cov-2/Covid-19/ Coronavirus*
- Bronchitis*
- Mental or psychiatric disorders*

- Gastric influenza*
- Gastritis*
- Constipation*
- Diarrhoea*
- Headaches*
- Migraines*
- Stress-related disorders
- Chronic fatigue syndrome
- Laryngitis, sinusitis and pharyngitis
- Abortions
- Surgical procedures for infertility
- Back injury
- Fibromyalgia

*These conditions will be covered if they require hospitalisation for longer than 24 hours. No retrospective payments will be made where the insured life was hospitalised for less than 24 hours.

14-day waiting period

After the insured life has been continuously disabled for 28 days, claim payments will be made monthly in arrears.

The claim amount payments will be made every seven days after the waiting period has expired.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

Momentum will waive the premiums due under this benefit, after the insured life has been continuously disabled for more than 28 days. Following rehabilitation, the insured life will retain their cover (at the premium rates applicable at that time).

There are no retrospective payments under the 14-day waiting period.

Off period

An "off period" of three months applies.

This means that if the insured life is rehabilitated and claims again for the same cause within the three months, the waiting period will be waived.

Seven-day and 14-day waiting period

The "off period" will only apply after the policyholder has been continuously disabled for at least 28 days.

Income tax

If the benefit is owned by a natural person, the premiums are not tax-deductible.

The claim amount payable in terms of this benefit will be tax-free.

Guaranteed insurability

Momentum will allow policyholder to increase the benefit amount without any medical underwriting after the benefit anniversary if the insured life's income increases at a rate that exceeds the maximum voluntary benefit amount increase percentage.

The total annual increase (annual voluntary benefit amount increase plus the guaranteed insurability increase) will be limited to twice the inflation rate used for increases by Momentum at that point, capped to 20%.

This additional benefit amount increase may not be exercised if any of the following apply:

- the insured life is over the age of 55
- voluntary benefit amount increases were not selected
- The insured life is already disabled or was disabled during the 12 months preceding the date of the benefit amount increase
- a health loading applies to the insured life

Momentum must receive a written request to increase the benefit amount within one month after the benefit anniversary.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Factors affecting monthly benefit payments

The benefit payments end if:

- the insured life is no longer qualifies for a claim amount payment
- the benefit ends
- the aggregate benefit payment period for a single cause ends
- The benefit payment period ends
- the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

Ongoing assessments

Once a claim has been admitted and Momentum has started paying the monthly claim amount, the insured life's health will be assessed from time to time. If the insured life fails to undergo the reassessment within three months of Momentum's notification, the claim payments may be cancelled.

These assessments will determine whether the insured life still qualifies for a claim and has been receiving such medical treatment as is appropriate for his condition. The benefit payments will end if the insured life no longer qualifies for a claim and the applicable premium must be paid.

Momentum will cover the cost of the reassessment by a doctor chosen by Momentum.

The ongoing assessment may be waived for the impairment or illness claim events.

Following rehabilitation, the monthly benefit amount will start at the level of the last benefit payment and will increase on every benefit anniversary.

Business Protector (Self Employed)

Description

Momentum will pay a monthly claim amount if:

- the insured life is temporarily or permanently disabled as a result of a bodily injury or illness to such an extent that they are continuously unable to perform the main duties of their own occupation on a total or partial basis
  OR
- the insured life meets the requirements of one of the defined impairment or illness claim events.

Special conditions

The claim amount is paid monthly in arrears.

This benefit is only available to self-employed individuals.

The insured life's disability must cause a significantly reduced income for the business

The insured life must be involved in the business on a full-time basis.

The insured life's participation in the day-to-day running of the business is essential.

The insured life is a single business owner. In other words, the insured life can be any one of the following:

- an individual who works entirely for himself and has no partners (sole proprietor)
- the only owner of a private company
- the only member of a Closed Corporation (CC).

The owner and the business are the same legal entity.

A Business Protector (Self Employed) and a Business Overheads Protector on the same insured life may not be added together on one policy

The Business Protector (Self Employed) may only be combined with a Complete Income Protector with a 12-month or 24-month waiting period, depending on the benefit payment period chosen at the start of the policy.

The policyholder may add the Business Protector (Self Employed) to a policy together with any stand-alone or ancillary benefits.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible subject to age limits and underwriting.

Age limits

Minimum entry age 15 next birthday

Chosen expiry age (next birthday)	Maximum entry age (next birthday)			
	Level	LifeStage	5% Compulsory	6% or 7% Compulsory
To age 55	50	50	50	50
To age 60	55	55	55	55

Chosen expiry age (next birthday)	Maximum entry age (next birthday)			
	Level	LifeStage	5% Compulsory	6% or 7% Compulsory
To age 65	60	55	60	55
To age 70	60	55	60	55

Benefit term

The policyholder may choose one of the following benefit terms:

- To the chosen expiry age.
- Term – Minimum 5 years

Note: The policyholder may not claim under the benefit after the policy anniversary immediately preceding the insured life's chosen benefit term.

Benefit limits

Minimum per month	Maximum per month
R2 000	R150 000

The monthly benefit amount is limited to the income generated for a business by an insured life.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Compulsory (5%, 6% or 7%)

Premium guarantee

Momentum will calculate the premium guarantee term.

Increase options

Premium pattern	Premium increases	Benefit amount increases
Level	None	0%, 5%, 7.5%, 10%, CPI
LifeStage	Age related increases only	0%, 5%, 7.5%, 10%, CPI
Compulsory (5%, 6%, 7%)	None	0%, 5%, 7.5%, 10%, CPI

If the policyholder chose to have voluntary benefit amount increases:

- the monthly pre-claim benefit amount will increase on every benefit anniversary date, and
- the monthly post-claim benefit amount will increase on the claim anniversary date at the chosen benefit increase percentage, limited to a maximum of the general increase in the CPI.

If the policyholder chose the CPI increase option, then pre-claim increases will be limited to 15% per year and post-claim increases will be limited to 10% per year.

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Income Enhancer – Business Protector (Self Employed)
- Complete Family Protector– Business Protector (Self Employed)

Beneficiaries and cessions

The policyholder may nominate beneficiaries.

Cessions are not allowed.

Benefit payment period

The policyholder may choose any of the following benefit payment periods:

- 12 months
- 24 months.

The benefit payments will cease after the specified number of monthly payments have been made.

If Momentum has paid for a specific cause for the benefit payment period, no further claims for that cause will be paid. If Momentum has paid for a specific cause for less than the benefit payment period and the insured life recovers, future claims resulting from the same cause will be paid for the balance of the benefit payment period.

Claim event

The insured life can qualify for a claim under either:

- occupational disability or
- impairment or illness.

Occupational disability

An occupational disability is a temporary or permanent disability caused by a bodily injury or an illness to such an extent that the insured life is continuously unable to perform the main duties of his own occupation on a total or partial basis.

A claim amount will only be paid if the insured life is unable to perform at least 25% of the main duties of his own occupation. The claim amount payment will end once the insured life has recovered to the extent that he can perform more than 75% of the main duties of his own occupation.

The claim amount will be calculated according to the loss of income or the severity of disability criteria.

The insured life will not qualify for a claim under the occupational disability criteria if the insured life is not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Impairment or illness

The insured life can qualify for a claim under:

- functional impairment or
- critical illness or
- fracture and hospitalisation

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment or illness claim events.

If the insured life still qualifies for a functional impairment claim after a critical illness, fracture or hospitalisation claim has been paid, we will continue to pay the defined payment for the balance of the payment period.

Functional impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim amount is based on the severity of a medical impairment that occurs after the starting date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life will not be able to claim under functional impairment after the chosen expiry age.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future. The insured life will not be required to undergo reasonable optimal treatment if a specialist, that Momentum has approved, has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with their treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment events.

Refer to Appendix 1 in the technical guide for functional impairment claim events

Critical illness

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined critical illnesses claim events.

Momentum will not pay for a subsequent critical illness claim event while the insured life is receiving a critical illness claim amount payment.

Refer to Appendix 2 and Appendix 3 in the technical guide for critical illness claim events

Fracture and hospitalisation

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined fracture and hospitalisation claim events.

Momentum will pay for the event with the longest payment period if the insured life qualifies for a payment under more than one of the defined fracture or hospitalisation claim events.

Momentum will not pay for a subsequent claim event for fracture or hospitalisation that occurs while the insured life is receiving a fracture and hospitalisation claim amount payment.

Refer to Appendix 6 in the technical guide for fracture and hospitalisation claim events.

Claim amount

Momentum will use the following assessment criteria to determine the monthly claim amount and will use the criteria resulting in the highest claim amount:

- Loss of income
- Severity of disability
- Severity of impairment or illness

Loss of income

Momentum will pay the actual loss of income up to the maximum of the benefit amount.

The actual loss of income is calculated as the difference between the insured life's pre-disability income and any income that the insured life earns during the period of disability.

Severity of disability

The claim amount will be between 25% and 100% of the benefit amount, depending on the extent to which the insured life is unable to perform the main duties of his own occupation.

The severity of disability assessment criteria, including the Partial claim Upgrade, will only apply during the first year after the claim event. For professional occupations, these criteria will apply for the first two years after the claim event.

Partial Claim Upgrade

- If the full benefit amount has been paid for a continuous period of three months, the insured life will qualify for a Partial Claim Upgrade.
- Momentum will continue to pay the full benefit amount after the three months, provided that the insured life is partially disabled.

- The full benefit amount will only be paid while the severity of disability assessment criteria applies.

Severity of impairment or illness

Momentum will pay a percentage of the benefit amount for a specified payment period if the insured life meets any of the requirements for functional impairment, critical illness or fracture and hospitalisation claim events.

Refer to Appendix 6 in the technical guide for payout levels and payment periods for severity of impairment and illness claim events.

General

The claim amount is paid monthly in arrears.

The daily claim amount will be calculated as 1/30 of the monthly benefit amount.

A proportionate payment will be made in respect of any part of a month should the insured life be rehabilitated before the payment date. Following rehabilitation, the insured life will retain his cover.

Any outstanding debt will be deducted from the claim amount.

Premium waiver during a claim

The premium will be waived for this benefit while a claim is being paid.

No proportionate premiums can be paid; therefore, premiums are waived from the next financial month after the expiry of the waiting period.

If the claim amount is less than the full benefit amount, the whole premium will still be waived.

For a seven-day waiting period, premiums will be waived after the insured life has been continuously disabled for more than 28 days.

If Momentum collected premiums for a period not applicable for premium payment, it will be refunded to the policyholder as an advance on the policy. This (advance) amount will be deducted from the next premium payment.

If this benefit is the only benefit on the policy, the policy fee will be waived while a claim is being paid.

Definition of income

Income is defined as the gross profit of the business:

Gross profit	The gross profit of the business is defined as Revenue (also known as Turnover) less the Cost of sales.
Turnover	Turnover is defined as the total amount generated by the business from its normal business activities.
Cost of sales	Cost of Sales is defined as the cost to a business to buy or make the product that is sold to the consumer. Cost of Sales would not apply to a business that only generates its business by rendering a service.

Benefit reductions

The claim amount will be reduced if the benefit amount exceeds the pre-disability income earned by the insured life.

Benefit amount exceeds the pre-disability income

The benefit amount will be reduced to ensure that it does not exceed the insured life's pre-disability income (increased with inflation).

If the policy is owned by a sole proprietor, a partner in a partnership, a company or a Closed Corporation (CC), the pre-disability income is calculated as:

Section 11(w)(ii) of the Income Tax Act	
Does **NOT** apply	Applies
85% of the gross profit of the business, averaged over the period of 12 months immediately preceding the date of the disability.	100% of the gross profit of the business, averaged over the period of 12 months immediately preceding the date of the disability.

Any claim amount paid to the policyholder in respect of the Functional Protector or Complete Functional Protector will not be considered in the benefit reduction calculations.

Payments for lump sum disability benefits are specifically excluded from the benefit reduction calculation.

Successive claims

Total payments throughout the benefit term will be limited to the benefit payment period for claims due to the same bodily injury or related causes or illness.

This limit will be waived for subsequent occupational disability claims if such related claims are separated by 24 months during which the insured life has fully resumed his nominated occupation.

The limit will not be waived for subsequent impairment or illness claims.

Waiting period

The policyholder may choose one of the following waiting periods:

- Seven days
- One-month

Premiums are payable during the waiting period.

A claim will not be paid if the insured life dies within the waiting period.

The first monthly claim amount payment will be made only after the insured life has been disabled for the waiting period he chose.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

The insured life will receive a retrospective payment at the end of the one month waiting period.

Claim amount payments for functional impairment, critical illness or fracture and hospitalisation will only be made after the waiting period has expired.

Seven-day waiting period

The premium due under this benefit will be waived after the insured life has been continuously disabled for more than 28 days.

The claim amount payments will be made every seven days after the waiting period has expired.

Claim payments will be made monthly in arrears after the insured life has been continuously disabled for 28 days.

The insured life will qualify for a retrospective payment from day one of benefits after the seven-day waiting period in respect of disability. The first payment will be made seven days after the claim event occurred.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

To qualify for a retrospective payment the insured life must be disabled for more than seven days and the insured life's disability must NOT be as a result of one of the following:

- Cosmetic surgery
- Influenza*
- Upper or lower respiratory tract infections including SARS Cov-2/Covid-19/ Coronavirus*
- Bronchitis*
- Mental or psychiatric disorders*
- Gastric influenza*
- Gastritis*
- Constipation*
- Diarrhoea*
- Headaches*
- Migraines*
- Stress-related disorders
- Chronic fatigue syndrome
- Laryngitis, sinusitis and pharyngitis
- Abortions
- Surgical procedures for infertility
- Back injury
- Fibromyalgia

*These conditions will be covered if they are chronic and require hospitalisation for longer than 24 hours. No retrospective payments will be made where the insured life was hospitalised for less than 24 hours.

Off period

An "off period" of three months applies.

This means that if the insured life is rehabilitated and claims again for the same cause within three months, the waiting period will be waived.

Seven-day waiting period

The "off period" will only apply after the policyholder has been continuously disabled for more than 28 days.

Commuted value

In the event of the insured life becoming totally and permanently disabled or if the insured life qualifies for a 100% functional impairment claim, Momentum will commute the remaining monthly payments and pay this as a lump sum.

The commuted value will be calculated as the sum of the remaining payments, taking post-claim benefit increases into account.

The commuted value will only be available after Momentum has made three monthly payments under this benefit.

Guaranteed insurability

Momentum will allow the policyholder to increase the benefit amount without any medical underwriting after the benefit anniversary if the insured life's business overhead increases at a rate that exceeds the maximum voluntary benefit amount increase percentage.

The total annual increase (annual voluntary benefit amount increase plus the guaranteed insurability increase) will be limited to twice the inflation rate used for increases by Momentum at that point, capped to 20%.

This additional benefit amount increase may not be exercised if any of the following apply:

- the insured life is over the age of 55
- voluntary benefit amount increases were not selected
- the insured life is already disabled or was disabled during the 12 months preceding the date of the benefit amount increase
- a health loading applies to the insured life

Momentum must receive a written request to increase the benefit amount within one month after the benefit anniversary.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The business ceases to exist.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Factors affecting monthly benefit payments

The benefit payments end if:

- the insured life no longer qualifies for a claim amount payment
- the benefit ends
- the aggregate benefit payment period for a single cause ends.
- the benefit payment period ends
- the insured life is not receiving or is refusing the medical treatment he/she could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

Ongoing assessments

Once a claim has been admitted and Momentum has started paying the monthly claim amount, the insured life's health will be assessed from time to time. If the insured life fails to undergo the reassessment within three months of Momentum's notification, the claim payments may be cancelled.

These assessments will determine whether the insured life still qualifies for a claim and has been receiving such medical treatment as is appropriate for his condition.

The benefit payments will end if the insured life no longer qualifies for a claim and the applicable premium must be paid.

Momentum will cover the cost of the reassessment by a doctor chosen by Momentum.

The ongoing assessment may be waived for the impairment or illness claim events.

Following rehabilitation, the monthly benefit amount will start at the level of the last benefit payment and will increase on every benefit anniversary.

Business Protector (Professional)

Description

Momentum will pay a monthly claim amount if:

- the insured life is temporarily or permanently disabled as a result of a bodily injury or illness to such an extent that they are continuously unable to perform the main duties of their own occupation on a total or partial basis
  OR
- the insured life meets the requirements of one of the defined impairment or illness claim events.

Special conditions

The claim amount is paid monthly in arrears.

This benefit is only available to self-employed professionals.

The owner and the business must be the same legal entity.

A Business Protector (Professional) and a Business Overheads Protector on the same insured life may not be added together on one policy.

The Business Protector (Professional) may only be combined with a Complete Income Protector with a 12-month waiting period or a 24-month waiting period, depending on the benefit payment period chosen at the start date of the policy.

The policyholder may add the Business Protector (Professional) to a policy along with any stand-alone or ancillary benefits.

A self-employed natural person, a sole proprietor, the only partner in a partnership, the only owner of a company or the only member of a Closed Corporation (CC) can own the policy.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

Minimum entry age 15 next birthday

Chosen expiry age (next birthday)	Maximum entry age (next birthday)			
	Level	LifeStage	5% Compulsory	6% or 7% Compulsory
To age 55	50	50	50	50
To age 60	55	55	55	55
To age 65	60	55	60	55
To age 70	60	55	60	55

Benefit term

The policyholder may choose one of the following benefit terms:

- To the chosen expiry age.
- Term – Minimum 5 years

Note: The policyholder may not claim under the benefit after the policy anniversary immediately preceding the insured life's chosen benefit term.

Benefit limits

Minimum per month	Maximum per month
R2 000	R300 000

The monthly benefit amount is limited to the income generated for a business by an insured life. If the policy is owned by a sole proprietor, a partner in a partnership, a company or a CC this may not exceed:

Section 11(w)(ii) applies	Section 11(w)(ii) does not apply
The total fees charged plus The net income from trading activities	85% of the total fees charged plus The net income from trading activities

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Compulsory (5%, 6% or 7%)

Premium guarantee

Momentum will calculate the premium guarantee term.

Increase options

Premium pattern	Premium increases	Benefit amount increases
Level	None	0%, 5%, 7.5%, 10%, CPI
LifeStage	Age related increases only	0%, 5%, 7.5%, 10%, CPI
Compulsory (5%, 6%, 7%)	None	0%, 5%, 7.5%, 10%, CPI

If the policyholder chose to have voluntary benefit amount increases:

- the monthly pre-claim benefit amount will increase on every benefit anniversary date, and
- the monthly post-claim benefit amount will increase on the claim anniversary date at the chosen benefit increase percentage limited to a maximum of the general increase in the CPI.

If the policyholder selected the CPI increase option, then pre-claim increases will be limited to 15% per year, and post-claim increases will be limited to 10% per year.

Claim Increase Booster for young professionals

In addition to the above increase, the monthly post-claim benefit amount will increase by an additional percentage for professional occupations (as defined by Momentum).

This additional increase will be based on the insured life's age next birthday on the claim anniversary.

Age next birthday	Percentage increase
26 and younger	15%
27	12%

Age next birthday	Percentage increase
28	9%
29	6%
30	3%
31 and older	0%

Once the insured life turns 31 next birthday, only the monthly post-claim benefit amount increase will apply.

The insured life must have selected a benefit amount increase to qualify for the Claim Increase Booster.

The post-claim benefit amount increase is calculated as:

- Minimum (benefit amount increase and CPI) plus
- Additional increase percentage as shown in the table above

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Income Enhancer – Business Protector (Professional)
- Complete Family Protector– Business Protector (Professional)

Beneficiaries and cessions

The policyholder may nominate beneficiaries.

Cessions are not allowed.

Benefit payment period

The policyholder may choose any of the following benefit payment periods:

- 12 months
- 24 months.

The benefit payments will cease after the specified number of monthly payments have been made.

If Momentum has paid for a specific cause for the benefit payment period, no further claims for that cause will be paid. If Momentum has paid for a specific cause for less than the benefit payment period and the insured life recovers, future claims resulting from the same cause will be paid for the balance of the benefit payment period.

Claim event

The insured life can qualify for a claim under either:

- occupational disability or
- impairment or illness.

Occupational disability

An occupational disability is a temporary or permanent disability caused by a bodily injury or an illness to such an extent that the insured life is continuously unable to perform the main duties of his own occupation on a total or partial basis.

A claim amount will only be paid if the insured life is unable to perform at least 25% of the main duties of his own occupation. The claim amount payment will end once the insured life has recovered to the extent that he can perform more than 75% of the main duties of his own occupation.

The claim amount will be calculated according to the loss of income or the severity of disability criteria.

The insured life will not qualify for a claim under the occupational disability criteria if the insured life is not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Impairment or illness

The insured life can qualify for a claim under:

- functional impairment or
- critical illness or
- fracture and hospitalisation

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment or illness claim events.

If the insured life still qualifies for a functional impairment claim after a critical illness, fracture or hospitalisation claim has been paid; we will continue to pay the defined payment for the balance of the payment period.

Functional impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim amount is based on the severity of a medical impairment that occurs after the starting date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life will not be able to claim under functional impairment after the chosen expiry age.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future. The insured life will not be required to undergo reasonable optimal treatment if a specialist that Momentum has approved has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with his treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment events.

Refer to Appendix 1 in the technical guide for functional impairment claim events

Critical illness

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined critical illnesses claim events.

Momentum will not pay for a subsequent critical illness claim event while the insured life is receiving a critical illness claim amount payment.

Refer to Appendix 2 and Appendix 3 in the technical guide for critical illness claim events

Fracture and hospitalisation

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined fracture and hospitalisation claim events.

Momentum will pay for the event with the longest payment period if the insured life qualifies for a payment under more than one of the defined fracture or hospitalisation claim events.

Momentum will not pay for a subsequent claim event for fracture or hospitalisation that occurs while the insured life is receiving a fracture and hospitalisation claim amount payment.

Refer to Appendix 6 in the technical guide for fracture and hospitalisation claim events.

Claim amount

Momentum will use the following assessment criteria to determine the monthly claim amount and will use the criteria resulting in the highest claim amount:

- Loss of income
- Severity of disability
- Severity of impairment or illness

Loss of income

Momentum will pay the actual loss of income up to the maximum of the benefit amount.

The actual loss of income is calculated as the difference between the insured life's net pre-disability income and any net income that the insured life earns during the period of disability.

Severity of disability

The claim amount will be between 25% and 100% of the benefit amount, depending on the extent to which the insured life is unable to perform the main duties of his own occupation.

The severity of disability assessment criteria, including the Partial Claim Upgrade, will only apply during the first year after the claim event. For professional occupations, these criteria will apply for the first two years after the claim event.

Partial Claim Upgrade

- If the full benefit amount has been paid for a continuous period of three months, the insured life will qualify for a Partial Claim Upgrade.
- Momentum will continue to pay the full benefit amount after the three months, provided that the insured life is partially disabled.
- The full benefit amount will only be paid while the severity of disability assessment criteria applies.

Severity of impairment or illness

Momentum will pay a percentage of the benefit amount for a specified payment period if the insured life meets any of the requirements for functional impairment, critical illness or fracture and hospitalisation claim events.

Refer to Appendix 6 in the technical guide in the technical guide for payout levels and payment periods for severity of impairment and illness claim events.

General

The claim amount is paid monthly in arrears.

The daily claim amount will be calculated as 1/30 of the monthly benefit amount.

A proportionate payment will be made in respect of any part of a month should the insured life be rehabilitated before the payment date. Following rehabilitation, the insured life will retain his cover.

The premium will be waived for this benefit while a claim is being paid.

Any outstanding debt will be deducted from the claim amount.

Premium waiver during a claim

The premium will be waived for this benefit while a claim is being paid.

No proportionate premiums can be paid; therefore, premiums are waived from the next financial month after the expiry of the waiting period.

If the claim amount is less than the full benefit amount, the whole premium will still be waived.

For a seven-day waiting period, premiums will be waived after the insured life has been continuously disabled for more than 28 days.

If Momentum collected premiums for a period not applicable for premium payment, it will be refunded to the policyholder as an advance on the policy. This (advance) amount will be deducted from the next premium payment.

If this benefit is the only benefit on the policy, the policy fee will be waived while a claim is being paid.

Definition of income

Income is defined as the sum of the professional fees and the net income from trading activities.

Pre-disability net income will be increased by inflation from the date of the claim event to the date on which the loss of income is calculated.

Benefit reductions

The claim amount will be reduced if the benefit amount exceeds the pre-disability income earned by the insured life.

Benefit amount exceeds the pre-disability income

The benefit amount will be reduced to ensure that it does not exceed the insured life's pre-disability income (increased with inflation).

If the policy is owned by a sole proprietor, a partner in a partnership, a company or a Closed Corporation, the pre-disability income is calculated as:

Section 11(w)(ii) of the Income Tax Act	
Does **NOT** apply	Applies
85% of the insured life's income averaged over the period of 12 months immediately preceding the date of the disability.	The insured life's income averaged over the period of 12 months immediately preceding the date of the disability.

Any claim amount paid to the policyholder in respect of the Functional Protector or Complete Functional Protector will not be considered in the benefit reduction calculations.

Payments for lump sum disability benefits are specifically excluded from the benefit reduction calculation.

Successive claims

Total payments throughout the benefit term will be limited to the benefit payment period for claims due to the same bodily injury or related causes or illness.

This limit will be waived for subsequent occupational disability claims if such related claims are separated by 24 months during which the insured life has fully resumed his nominated occupation.

The limit will not be waived for subsequent impairment or illness claims.

Waiting period

The policyholder may choose one of the following waiting periods:

- Seven days
- One month

Premiums are payable during the waiting period.

If the insured life dies within the waiting period, a disability claim will not be paid.

The first monthly claim amount payment will be made only after the insured life has been disabled for the waiting period he chose.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

The insured life will receive a retrospective payment at the end of the one month waiting period.

Claim amount payments for functional impairment, critical illness or fracture and hospitalisation will only be made after the waiting period has expired.

Seven-day waiting period

The premium due under this benefit will be waived, after the insured life has been continuously disabled for more than 28 days.

The claim amount payments will be made every seven days after the waiting period has expired.

Claim payments will be made monthly in arrears after the insured life has been continuously disabled for 28 days.

The insured life will qualify for a retrospective payment from day one of benefits after the seven-day waiting period in respect of disability. The first payment will be made seven days after the claim event occurred.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

To qualify for a retrospective payment, the insured life must be disabled for more than seven days and the insured life's disability must NOT be as a result of one of the following:

- Cosmetic surgery
- Influenza*
- Upper or lower respiratory tract infections including SARS Cov-2/Covid-19/Coronavirus*
- Bronchitis*
- Mental or psychiatric disorders*
- Gastric influenza*
- Gastritis*
- Constipation*
- Diarrhoea*
- Headaches*
- Migraines*
- Stress-related disorders
- Chronic fatigue syndrome
- Laryngitis, sinusitis and pharyngitis
- Abortions
- Surgical procedures for infertility
- Back injury
- Fibromyalgia

*These conditions will be covered if they are chronic and require hospitalisation for longer than 24 hours. No retrospective payments will be made where the insured life was hospitalised for less than 24 hours.

Off period

An "off period" of three months applies.

This means that if the insured life is rehabilitated and claims again for the same cause within three months, the waiting period will be waived.

Seven-day waiting period

The "off period" will only apply after the policyholder has been continuously disabled for more than 28 days.

Commuted value

In the event of the insured life becoming totally and permanently disabled or if the insured life qualifies for a 100% functional impairment claim, Momentum will commute the remaining monthly payments and pay this as a lump sum.

The commuted value will be calculated as the sum of the remaining payments, taking post-claim benefit increases into account.

The commuted value will only be available after Momentum has made three monthly payments under this benefit.

Guaranteed insurability

Momentum will allow the policyholder to increase the benefit amount without any medical underwriting after the benefit anniversary if the insured life's business overhead increases at a rate that exceeds the maximum voluntary benefit amount increase percentage.

The total annual increase (annual voluntary benefit amount increase plus the guaranteed insurability increase) will be limited to twice the inflation rate used for increases by Momentum at that point, capped to 20%.

This additional benefit amount increase may not be exercised if any of the following apply:

- the insured life is over the age of 55
- voluntary benefit amount increases were not selected
- the insured life is already disabled or was disabled during the 12 months preceding the date of the benefit amount increase
- a health loading applies to the insured life

Momentum must receive a written request to increase the benefit amount within one month after the benefit anniversary.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term (if applicable).
- The business ceases to exist.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Factors affecting monthly benefit payments

The benefit payments end if:

- the insured life no longer qualifies for a claim amount payment
- the benefit ends

- the insured life is not receiving or is refusing the medical treatment he/she could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.
- the aggregate benefit payment period for a single cause ends.
- The benefit payment period ends.

Ongoing assessments

Once a claim has been admitted and Momentum has started paying the monthly claim amount, the insured life's health will be assessed from time to time. If the insured life fails to undergo the reassessment within three months of Momentum's notification, the claim payments may be cancelled.

These assessments will determine whether the insured life still qualifies for a claim and has been receiving such medical treatment as is appropriate for his condition. The benefit payments will end if the insured life no longer qualifies for a claim and the applicable premium must be paid.

Momentum will cover the cost of the reassessment by a doctor chosen by Momentum.

The ongoing assessment may be waived for the impairment or illness claim events.

Following rehabilitation, the monthly benefit amount will start at the level of the last benefit payment and will increase on every benefit anniversary.

Business Overheads Protector

Description

Momentum will pay a monthly claim amount if:

- the insured life is temporarily or permanently disabled as a result of a bodily injury or illness to such an extent that they are continuously unable to perform the main duties of their own occupation on a total or partial basis
  OR
- the insured life meets the requirements of one of the defined impairment or illness claim events.

Special conditions

If a seven-day waiting period is selected the claim amount payments during the first month after the claim event, is paid in arrears. After the first month, claim payments are made in advance.

Annual premiums are not allowed on the Business Overheads Protector.

The insured life's disability must cause a significantly reduced income for the business.

The insured life must be involved in the business on a full-time basis

These benefits may not be added on one policy if the insured life is the same:

- Business Overheads Protector and Business Protector (Self Employed)
- Business Overheads Protector and Business Protector (Professional)

The insured life can be any one of the following:

- An individual who works entirely for himself and has no partners
- A partner in a partnership with a maximum of four partners and who has at least a 25% share in the partnership and whose participation in the day-to-day running of the business is essential
- An owner or an employee of a business with no more than four owners and no more than 10 employees (including the owners). Employees include all persons employed by the business.

If the individual operates the business from a home address, evidence is required that he has converted a portion of the premises to business premises.

If sales goods generate more than 20% of business turnover, the primary test is whether the insured life must be present on the premises on a full-time basis to provide a service that the employees cannot provide.

In the case of professionals in private practice:

- the insured life must be a highly skilled professional
- the other employees must not be able to provide the service
- the profession must be recognised by South African law
- the insured life's participation in the day-to-day running of the business must be essential.

The policy can only be owned by sole proprietors, a partner in a partnership, a company or a Closed Corporation (CC).

The owner and the business must be the same legal entity.

Examples:

- Professionals in private practice: Accountant (CA), Attorney (BA LLB/B Iuris), Medical practitioner (MB ChB)
- Other business owners who qualify: Pharmacists, Insurance brokers, Physiotherapists, Quantity surveyors, Advertising agents, Commercial artists.
- Occupations in non-specified retail business do not qualify for the Business Overheads Protector. Examples: Bottle store owner, Café proprietor, Locksmith, Restaurateur, Jeweller.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible subject to age limits and underwriting.

Age limits

Minimum entry age 15 next birthday

Chosen expiry age (next birthday)	Maximum entry age (next birthday)			
	Level	LifeStage	5% Compulsory	6% or 7% Compulsory
To age 55	50	50	50	50
To age 60	55	55	55	55
To age 65	60	55	60	55
To age 70	60	55	60	55

Benefit term

The policyholder may choose one of the following benefit terms:

- To the chosen expiry age.
- Term – Minimum 5 years

Note: The policyholder may not claim under the benefit after the policy anniversary immediately preceding the insured life's chosen benefit term.

Benefit limits

Minimum per month	Maximum per month
R2 000	R150 000

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Compulsory (5%, 6% or 7%)

Premium guarantee

Momentum will calculate the premium guarantee term.

Increase options

Premium pattern	Premium increases	Benefit amount increases
Level	None	0%, 5%, 7.5%, 10%, CPI
LifeStage	Age related increases only	0%, 5%, 7.5%, 10%, CPI
Compulsory (5%, 6%, 7%)	None	0%, 5%, 7.5%, 10%, CPI

If the policyholder chose to have voluntary benefit amount increases:

- the monthly pre-claim benefit amount will increase on every benefit anniversary date, and
- the monthly post-claim benefit amount will increase on the claim anniversary date, at the chosen benefit increase percentage limited to a maximum of the general increase in the CPI.

If the policyholder chose the CPI increase option, then pre-claim increases will be limited to 15% per year and post-claim increases will be limited to 10% per year.

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

Not available

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Cessions are not allowed.

Benefit payment period

The monthly benefit amount for a single cause (including dependent causes) is limited to 24 months.

The benefit payments will cease after the specified number of monthly payments have been made.

If an amount has been paid for a specific cause for 24 months, no further claims will be paid in respect of that cause. However, if an amount has been paid for a specific cause for less than 24 months and the insured life recovers future claims resulting from the same cause will be paid for the balance of the 24 months.

Claim event

The insured life can qualify for a claim under either:

- occupational disability or
- impairment or illness.

Occupational disability

An occupational disability is a temporary or permanent disability caused by a bodily injury or an illness to such an extent that the insured life is continuously unable to perform the main duties of their own occupation on a total or partial basis.

The insured life will not qualify for a claim under the occupational disability criteria if the insured life is not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Impairment or illness

The insured life can qualify for a claim under:

- functional impairment or
- critical illness or
- fracture and hospitalisation

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment or illness claim events.

If the insured life still qualifies for a functional impairment claim after a critical illness, fracture or hospitalisation claim has been paid, we will continue to pay the defined payment for the balance of the payment period.

Functional impairment

The claim events are not linked to the insured life's ability to perform their occupational activities.

The claim amount is based on the severity of a medical impairment which occurs after the starting date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future.

The insured life will not be required to undergo reasonable optimal treatment if a specialist, that Momentum has approved, has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with their treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment events.

The insured life will not be able to claim under functional impairment after the chosen expiry age.

Refer to Appendix 1 in the technical guide for functional impairment claim events

Critical illness

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined critical illnesses claim events.

Momentum will not pay for a subsequent critical illness claim event that occurs while the insured life is receiving a critical illness claim amount payment.

Refer to Appendix 2 and Appendix 3 in the technical guide for critical illness claim events

Fracture and hospitalisation

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined fracture and hospitalisation claim events.

Momentum will pay for the event with the longest payment period if the insured life qualifies for a payment under more than one of the defined fracture or hospitalisation claim events.

Momentum will not pay for a subsequent claim event for fracture or hospitalisation that occurs while the insured life is receiving a fracture and hospitalisation claim amount payment.

Refer to Appendix 6 in the technical guide for fracture and hospitalisation claim events.

Claim amount

Momentum will use the following assessment criteria to determine the monthly claim amount and will use the criteria resulting in the highest claim amount:

- Severity of disability
- Severity of impairment or illness

Severity of disability

The claim amount will depend on the extent to which the insured life is unable to perform the main duties of his own occupation.

A claim amount will only be paid if the insured life is unable to perform at least 25% of the main duties of his own occupation. The claim amount payment will end once the insured life has recovered to the extent that he can perform more than 75% of the main duties of his own occupation.

Severity of impairment or illness

Momentum will pay a percentage of the benefit amount for a specified payment period if the insured life meets any of the requirements for functional impairment, critical illness or fracture and hospitalisation claim events.

Refer to Appendix 6 in the technical guide for payout levels and payment periods for severity of impairment and illness claim events.

General

If a seven-day waiting period is selected the claim amount payments during the first month after the claim event, are paid in arrears. After the first month, claim payments will be made in advance.

The claim amount is paid monthly in advance for all other waiting periods.

A proportionate payment will be made in respect of any part of a month should the insured life be rehabilitated before the payment date. Following rehabilitation, the insured life will retain his cover.

Any outstanding debt will be deducted from the claim amount.

Premium waiver during a claim

The premium will be waived for this benefit while a claim is being paid.

No proportionate premiums can be paid; therefore, premiums are waived from the next financial month after the expiry of the waiting period.

If the claim amount is less than the full benefit amount, the whole premium will still be waived.

For a seven-day waiting period, premiums will be waived after the insured life has been continuously disabled for more than 28 days.

If Momentum collected premiums for a period not applicable for premium payment, it will be refunded to the policyholder as an advance on the policy. This (advance) amount will be deducted from the next premium payment.

If this benefit is the only benefit on the policy, the policy fee will be waived while a claim is being paid.

Benefit reductions

The claim amount will be reduced if:

- the benefit amount exceeds the insured life's pre-disability share of business overheads expenses or
- the policyholder is receiving a disability income from another business overheads expense policy contract as a result of the insured life's disability.

Pre-disability share of overheads expenses will be calculated as the insured life's share of business overheads expenses averaged over the 12 months immediately preceding the date of the disability. Payments for lump sum disability benefits are specifically excluded.

Benefit amount exceeds the insured life's pre-disability share of business overheads expenses

The benefit amount will be reduced to ensure that it does not exceed the insured life's pre-disability share of business overheads expenses (increased with inflation).

Income from other business overheads expenses policy contracts

The claim amount will be reduced to ensure that the total of the claim amount payment and the income received from the other overheads expense contract does not exceed 100% of the insured life's pre-disability share of business overheads expenses (increased with inflation).

Business expenses

Included	Excluded
Rent or mortgage bond interest Property taxes Electricity, water, telephone Regular maintenance services Equipment leasing costs Insurance premiums Accounting fees Salaries of staff not engaged in the same profession. Any other normal and necessary fixed expenses that Momentum agrees to include.	Depreciation The salary or other income of the insured life, members of his family, any person performing the duties of the insured life in his absence, or business associates. The cost of goods or merchandise or additions to inventory. The cost of furniture and equipment. Capital repayments on any outstanding debt. Fees on current accounts.

Waiting period

The policyholder may choose one of the following waiting periods:

- Seven days
- One month
- Three months

Premiums are payable during the waiting period.

If the insured life dies within the waiting period, a claim will not be paid.

The first monthly claim amount payment will be made only after the insured life has been disabled for the waiting period he chose.

Claim amount payments for functional impairment, critical illness or fracture and hospitalisation will only be made after the waiting period has expired.

Seven-day waiting period

The premium due under this benefit will be waived after the insured life has been continuously disabled for more than 28 days.

The claim amount payments will be made every seven days after the waiting period has expired.

The insured life may qualify for a retrospective payment from day one of benefits after the seven-day waiting period in respect of disability. The first payment will be made seven days after the claim event occurred.

Claim payments will be made monthly in arrears after the insured life has been continuously disabled for 28 days.

A proportionate payment will be made in respect of any part of a month that the insured life is rehabilitated before the payment date.

To qualify for a retrospective payment, the insured life must be disabled for more than seven days, and the insured life's disability must NOT be as a result of one of the following:

- Cosmetic surgery
- Influenza*
- Upper or lower respiratory tract infections including SARS Cov-2/Covid-19/Coronavirus*
- Bronchitis*
- Mental or psychiatric disorders*
- Gastric influenza*
- Gastritis*
- Constipation*
- Diarrhoea*
- Headaches*
- Migraines*
- Stress-related disorders
- Chronic fatigue syndrome
- Laryngitis, sinusitis and pharyngitis
- Abortions
- Surgical procedures for infertility
- Back injury
- Fibromyalgia

*These conditions will be covered if they are chronic and require hospitalisation for longer than 24 hours. No retrospective payments will be made where the insured life was hospitalised for less than 24 hours.

Off period

An "off period" of three months applies.

This means that if the insured life is rehabilitated and claims again for the same cause within three months, the waiting period will be waived.

Seven-day waiting period

The "off period" will only apply after the policyholder has been continuously disabled for more than 28 days.

Guaranteed insurability

Momentum will allow the policyholder to increase the benefit amount without any medical underwriting after the benefit anniversary if the insured life's income increases at a rate that exceeds the maximum voluntary benefit amount increase percentage.

The total annual increase (annual voluntary benefit amount increase plus the guaranteed insurability increase) will be limited to twice the inflation rate used for increases by Momentum at that point, capped to 20%.

This additional benefit amount increase may not be exercised if any of the following apply:

- the insured life is over the age of 55
- voluntary benefit amount increases were not selected
- The insured life is already disabled or was disabled during the 12 months preceding the date of the benefit amount increase
- a health loading applies to the insured life

Momentum must receive a written request to increase the benefit amount within one month after the benefit anniversary.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The business ceases to exist.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Factors affecting monthly benefit payments

The benefit payments end if:

- the insured life no longer qualifies for a claim amount payment
- the benefit ends
- the insured life is not receiving or is refusing the medical treatment he/she could reasonably be expected to undergo according to current best practice medical protocols, and which could substantially improve or remove the condition being claimed for.
- the aggregate 24-month period for a single cause ends.

Ongoing assessments

Once a claim has been admitted and Momentum has started paying the monthly claim amount, the insured life's health will be assessed from time to time. If the insured life fails to undergo the reassessment within three months of Momentum's notification, the benefit payments may be cancelled.

These assessments will determine whether the insured life still qualifies for a claim and has been receiving such medical treatment as is appropriate for his condition. The benefit payments will end if the insured life no longer qualifies for a claim and the applicable premium must be paid. Momentum will cover the cost of the reassessments by a doctor that Momentum has chosen.

The ongoing assessment may be waived for the severity of impairment or illness claim events.

Following rehabilitation, the monthly benefit amount will start at the level of the last benefit payment and will increase on every benefit anniversary.

Group Income Top-up Benefit

Description

Momentum will pay a monthly claim amount if:

- the insured life is temporarily or permanently disabled as a result of a bodily injury or illness to such an extent that they are continuously unable to perform the main duties of their own occupation on a total or partial basis
  OR
- the insured life meets the requirements of one of the defined impairment or illness claim events.

Special conditions

The claim amount is paid monthly in arrears.

The policyholder and the insured life must be the same person.

This benefit is only available to employed individuals with income disability protection (PHI/TTD) as part of their employee benefits.

Only one Group Income Top-up Benefit is allowed per policy.

A Group Income Top-up Benefit and a Complete Income Protector on the same insured life may not be added together on one policy.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

Minimum entry age 15 next birthday

Chosen expiry age (next birthday)	Maximum entry age (next birthday)			
	Level	LifeStage	5% Compulsory	6% or 7% Compulsory
To age 55	50	50	50	50
To age 60	55	55	55	55
To age 65	60	55	55	55
To age 70	60	55	55	55

Benefit term

The policyholder may choose one of the following benefit terms:

- To the chosen expiry age.
- Term – Minimum 5 years

Note: The policyholder may not claim under the benefit after the policy anniversary immediately preceding the insured life's chosen benefit term.

Benefit limits

Minimum per month	Maximum per month
R2 000	R110 000
	R150 000 (professionals)

The monthly benefit amount is limited to 75% of the insured life's net monthly income.

The combined insured amount under the Group Income Top-up Benefit and Temporary Group Income Top-up Benefit will be limited to ensure that the insured life will not receive a benefit exceeding 100% of income in a given month.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Compulsory (5%, 6% or 7%)

Premium guarantee

Momentum will calculate the premium guarantee term.

Increase options

Premium pattern	Premium increases	Benefit amount increases
Level	None	0%, 5%, 7.5%, 10%, CPI
LifeStage	Age related increases only	0%, 5%, 7.5%, 10%, CPI
Compulsory (5%, 6%, 7%)	None	0%, 5%, 7.5%, 10%, CPI

If the policyholder chose to have voluntary benefit amount increases:

- the monthly pre-claim benefit amount will increase on every benefit anniversary date, and
- the monthly post-claim benefit amount will increase on the claim anniversary date, at the chosen benefit increase percentage limited to a maximum of the general increase in the CPI.

If the policyholder selected the CPI increase option then pre-claim increases will be limited to 15% per year and post-claim increases will be limited to 10% per year.

Claim Increase Booster for young professionals

In addition to the above increase, the monthly post-claim benefit amount will increase by an additional percentage for professional occupations (as defined by Momentum).

This additional increase will be based on the insured life's age next birthday on the claim anniversary.

Age next birthday	Percentage increase
26 and younger	15%
27	12%
28	9%
29	6%
30	3%
31 and older	0%

Once the insured life turns 31 next birthday, only the monthly post-claim benefit amount increase will apply.

The insured life must have selected benefit amount increase to qualify for the Claim Increase Booster.

The post-claim benefit amount increase is calculated as:

- Minimum (benefit amount increase and CPI) plus
- Additional increase percentage as shown in the table above

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefit:

- Longevity Protector® – Group Income Top-up Benefit

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Cessions are not allowed.

Claim event

The insured life can qualify for a claim under either:

- occupational disability or
- impairment or illness.

Occupational disability

An occupational disability is a temporary or permanent disability caused by a bodily injury or an illness to such an extent that the insured life is continuously unable to perform the main duties of his own occupation on a total or partial basis.

A claim amount will only be paid if the insured life is unable to perform at least 25% of the main duties of his own occupation. The claim amount payment will end once the insured life has recovered to the extent that he can perform more than 75% of the main duties of his own occupation.

The claim amount will be calculated according to the loss of income or the severity of disability criteria.

The insured life will not qualify for a claim under the occupational disability criteria if the insured life is not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Impairment or illness

The insured life can qualify for a claim under:

- functional impairment or
- critical illness or
- fracture and hospitalisation

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment or illness claim events.

If the insured life still qualifies for a functional impairment claim after a critical illness, fracture or hospitalisation claim has been paid, Momentum will continue to pay the defined payment for the balance of the payment period.

Functional impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim amount is based on the severity of a medical impairment that occurs after the starting date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life will not be able to claim under functional impairment after the chosen expiry age.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future.

The insured life will not be required to undergo reasonable optimal treatment if a specialist, that Momentum has approved, has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with his treatment routine..
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the events.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

Critical illness

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined critical illnesses claim events.

Momentum will not pay for a subsequent critical illness claim event while the insured life is receiving a critical illness claim amount payment.

Refer to Appendix 2 and Appendix 3 in the technical guide for the critical illness claim events.

Fracture and hospitalisation

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined fracture and hospitalisation claim events.

Momentum will pay for the event with the longest payment period if the insured life qualifies for a payment under more than one of the defined fracture or hospitalisation claim events.

Momentum will not pay for a subsequent claim event for fracture or hospitalisation that occurs while the insured life is receiving a fracture and hospitalisation claim amount payment.

Refer to Appendix 6 in the technical guide for the fracture and hospitalisation claim events.

Claim amount

Momentum will use the following assessment criteria to determine the monthly claim amount and will use the criteria resulting in the highest claim amount:

- Loss of income
- Severity of disability
- Severity of impairment or illness

Loss of income

Momentum will pay the actual loss of income up to the maximum of the benefit amount.

Actual loss of income is calculated as the difference between the insured life's net pre-disability income and any net income that the insured life earns during the period of disability.

Two years after the claim event the actual loss of income is calculated as the difference between 75% of the insured life's net pre-disability income and any net income that the insured life earns during disability.

Net income refers to gross income less income tax payable on this income (determined by applying the relevant year of assessment's income tax tables).

Severity of disability

The claim amount will be between 25% and 100% of the benefit amount, depending on the extent to which the insured life is unable to perform the main duties of his own occupation.

The severity of disability assessment criteria, including the partial claim upgrade, will only apply during the first year after the claim event. For professional occupations these criteria will apply for the first two years after the claim event.

Partial Claim Upgrade

- If the full benefit amount has been paid for a continuous period of three months, the insured life will qualify for a Partial Claim Upgrade.
- Momentum will continue to pay the full benefit amount after the three months, provided that the insured life is partially disabled
- The full benefit amount will only be paid while the severity of disability assessment criteria applies (the first year after the claim event or the first two years after the claim event for professionals).

Severity of impairment or illness

Momentum will pay a percentage of the benefit amount for a specified payment period if the insured life meets any of the requirements for functional impairment, critical illness or fracture and hospitalisation claim events.

Refer to Appendix 6 in the technical guide for payout levels and payment periods for severity of impairment and illness claim events.

General

The claim amount is paid monthly in arrears.

The daily claim amount will be calculated as 1/30 of the monthly benefit amount.

A proportionate payment will be made in respect of any part of a month should the insured life be rehabilitated before the payment date. Following rehabilitation, the insured life will retain his cover.

Any outstanding debt will be deducted from the claim amount.

Premium waiver during a claim

The premium will be waived for this benefit while a claim is being paid.

No proportionate premiums can be paid; therefore, premiums are waived from the next financial month after the expiry of the waiting period.

If the claim amount is less than the full benefit amount, the whole premium will still be waived.

For a seven-day waiting period, premiums will be waived after the insured life has been continuously disabled for more than 28 days.

If Momentum collected premiums for a period not applicable for premium payment, it will be refunded to the policyholder as an advance on the policy. This (advance) amount will be deducted from the next premium payment.

If this benefit is the only benefit on the policy, the policy fee will be waived while a claim is being paid.

Definition of income

Income is defined as one of the following:

Total Cost to Company	The total sum of all taxable income payable or benefits receivable on account of the insured life's employment, or any services rendered by the insured life, plus • the value of any fringe benefits (as provided for in the Income Tax Act) awarded to the employee • retirement fund contributions made by the life insured's employer, • the cost of any other benefits paid for by the insured life's employer, and • any dividends received by the life insured due to shareholding or member's interest held in the employer (where the employer is a company or close corporation).

Net income refers to Total Cost to Company (as defined above) less income tax payable on this Income (determined by applying the relevant year of assessment's income tax tables).

Pre-disability income will be increased by inflation from the date of the claim event to the date on which the loss of income is calculated.

Benefit reductions

The claim amount will be reduced if:

- the benefit amount exceeds 75% of the insured life's pre-disability net income or
- the policyholder is receiving a disability income from another insurance policy contract as a result of the insured life's disability.

Benefit amount exceeds 75% of the pre-disability net income

The benefit amount will be reduced to ensure that it does not exceed 75% of the insured life's pre-disability net income.

Income from other income disability policy contracts

The claim amount will be reduced to ensure that the total of the claim amount payment and the income from the other policy contract do not exceed 75% of the insured life's pre-disability net income.

General

Pre-disability net income will be calculated as the insured life's net income (as defined under definition of income) averaged over the period of 12 months immediately preceding the date of disability.

Any Functional Protector or Complete Functional Protector claim amount paid to the policyholder will not be considered in the benefit reduction calculations.

Payments for lump sum disability benefits are excluded for the benefit reduction calculation.

Additional benefit reductions

The following additional benefit reduction rules apply:

- Six months after a claim, the claim amount will be reduced if the insured life is not covered under a group disability income policy contract or
- the insured life is covered under a group disability income policy contract but is not receiving a disability income payment under the group disability income policy contract the claim amount will be reduced after the waiting period under the group disability income policy contract has been reached.

In both instances, the reduction will be calculated as 70% of the claim amount. In other words, the claim amount will be reduced by 70%.

Waiting period

A one month waiting period is available.

Premiums are payable during the waiting period.

If the insured life dies within the waiting period, a claim will not be paid.

The first monthly claim amount payment will be made only after the insured life has been disabled for the waiting period he chose.

Claim amount payments for functional impairment, critical illness or fracture and hospitalisation will only be made after the waiting period has expired.

Off period

An "off period" of three months applies.

This means that if the insured life is rehabilitated and claims again for the same cause within the three months, the waiting period will be waived.

Guaranteed insurability

Momentum will allow policyholder to increase the benefit amount without any medical underwriting after the benefit anniversary if the insured life's income increases at a rate that exceeds the maximum voluntary benefit amount increase percentage.

The total annual increase (annual voluntary benefit amount increase plus the guaranteed insurability increase) will be limited to twice the inflation rate used for increases by Momentum at that point, capped to 20%.

This additional benefit amount increase may not be exercised if any of the following apply:

- the insured life is over the age of 55
- voluntary benefit amount increases were not selected
- the insured life is already disabled or was disabled during the 12 months preceding the date of the benefit amount increase
- a health loading applies to the insured life

Momentum must receive a written request to increase the benefit amount within one month after the benefit anniversary.

Conversion Option

The policyholder has the option to convert this benefit to one of the following benefits:

- Functional Protector
- Complete Functional Protector

These benefits pay a monthly claim amount for the remainder of the insured's life if he is permanently impaired.

The benefit amount being converted is subject to the maximum benefit limit for the chosen benefit at the time of the conversion.

Medical underwriting will be required if:

- any specific exclusion applies to this benefit, or
- a health or occupational loading applies to this benefit.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- Conversion to a Functional Protector or Complete Functional Protector
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Factors affecting monthly benefit payments

The benefit payments end if:

- the insured life is no longer qualifies for a claim amount payment
- the benefit ends
- the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

Ongoing assessments

Once a claim has been admitted and Momentum has started paying the monthly claim amount, the insured life's health will be assessed from time to time.

Momentum will cover the cost of the reassessment by a doctor chosen by Momentum.

The ongoing assessment may be waived for the impairment or illness claim events.

These assessments will determine whether the insured life still qualifies for a claim and has been receiving such medical treatment as is appropriate for his condition. The benefit payments will end if the insured life no longer qualifies for a claim. The insured life will then need to start paying the applicable premium again.

If the insured life fails to undergo the reassessment within three months of Momentum's notification, the claim payments may be cancelled

Following rehabilitation, the monthly benefit amount will start at the level of the last benefit payment and will increase on every benefit anniversary.

Temporary Group Income Top-up Benefit

Description

Momentum will pay a monthly claim amount if:

- the insured life is temporarily or permanently disabled as a result of a bodily injury or illness to such an extent that they are continuously unable to perform the main duties of their own occupation on a total or partial basis.
  OR
- the insured life meets the requirements of one of the defined impairment or illness claim events.

Special conditions

The claim amount is paid monthly in arrears.

The policyholder and the insured life must be the same person.

This benefit is only available to employed individuals with income disability protection (PHI/TTD) as part of their employee benefits.

Only one Temporary Group Income Top-up Benefit is allowed per policy.

A Temporary Group Income Top-up and a Temporary Income Protector may not be added to the same policy.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

Minimum entry age 15 next birthday

Chosen expiry age (next birthday)	Maximum entry age (next birthday)			
	Level	LifeStage	5% Compulsory	6% or 7% Compulsory
To age 55	50	50	50	50
To age 60	55	55	55	55
To age 65	60	55	55	55
To age 70	60	55	55	55

Benefit term

The policyholder may choose one of the following benefit terms:

- To the chosen expiry age.
- Term – Minimum 5 years

Note: The policyholder may not claim under the benefit after the policy anniversary immediately preceding the insured life's chosen benefit term.

Benefit limits

Minimum per month	Maximum per month
R2 000 per month	R150 000
	R200 000 (professionals)

The monthly benefit amount is limited to 100% of the insured life's net monthly income.

The combined insured amount under the Group Income Top-up Benefit and Temporary Group Income Top-up Benefit will be limited to ensure that the insured life will not receive a benefit exceeding 100% of income in a given month.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Compulsory (5%, 6% or 7%)

Premium guarantee

Momentum will calculate the premium guarantee term.

Increase options

Premium pattern	Premium increases	Benefit amount increases
Level	None	0%, 5%, 7.5%, 10%, CPI
LifeStage	Age related increases only	0%, 5%, 7.5%, 10%, CPI
Compulsory (5%, 6%, 7%)	None	0%, 5%, 7.5%, 10%, CPI

If the policyholder chose to have voluntary benefit amount increases:

- the monthly pre-claim benefit amount will increase on every benefit anniversary date, and
- the monthly post-claim benefit amount will increase on the claim anniversary date, at the chosen benefit increase percentage limited to a maximum of the general increase in the CPI.

If the policyholder chose the CPI increase option, then pre-claim increases will be limited to 15% per year, and post-claim increases will be limited to 10% per year.

Claim Increase Booster for young professionals

In addition to the above increase, the monthly post-claim benefit amount will increase by an additional percentage for professional occupations (as defined by Momentum). This additional increase will be based on the insured life's age next birthday on the claim anniversary.

Age next birthday	Percentage increase
26 and younger	15%
27	12%
28	9%
29	6%
30	3%
31 and older	0%

Once the insured life turns 31 next birthday, only the monthly post-claim benefit amount increase will apply.

The insured life must have selected benefit amount increase to qualify for the Claim Increase Booster.

The post-claim benefit amount increase is calculated as:

- Minimum (benefit amount increase and CPI) plus
- Additional increase percentage as shown in the table above

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

Not applicable

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Cessions are not allowed.

Benefit payment period

The policyholder may choose any of the following benefit payment periods:

- 12 months
- 24 months.

The benefit payments will cease after the specified number of monthly payments have been made.

If Momentum has paid for a specific cause for the benefit payment period, no further claims for that cause will be paid. If Momentum has paid for a specific cause for less than the benefit payment period and the insured life recovers, future claims resulting from the same cause will be paid for the balance of the benefit payment period.

Claim event

The insured life can qualify for a claim under either:

- occupational disability or
- impairment or illness.

Occupational disability

An occupational disability is a temporary or permanent disability caused by a bodily injury or an illness to such an extent that the insured life is continuously unable to perform the main duties of his own occupation on a total or partial basis.

A claim amount will only be paid if the insured life cannot perform at least 25% of the main duties of his own occupation. The claim amount payment will end once the insured life has recovered to the extent that he can perform more than 75% of the main duties of his own occupation.

The claim amount will be calculated according to the loss of income or the severity of disability criteria.

The insured life will not qualify for a claim under the occupational disability criteria if they are not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Impairment or illness

The insured life can qualify for a claim under:

- functional impairment or
- critical illness or
- fracture and hospitalisation

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment or illness claim events.

If the insured life still qualifies for a functional impairment claim after a critical illness, fracture or hospitalisation claim has been paid, Momentum will continue to pay the defined payment for the balance of the payment period.

Functional impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim amount is based on the severity of a medical impairment that occurs after the starting date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future.

The insured life will not be required to undergo reasonable optimal treatment if a specialist, that Momentum has approved, has established that the functional impairment is permanent and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with his treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Momentum will pay for the event that provides the highest payout if the insured life qualifies for a claim amount payment under more than one of the impairment events.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

Critical illness

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined critical illnesses claim events.

Momentum will not pay for a subsequent critical illness claim event that occurs while the insured life is receiving a critical illness claim amount payment.

Refer to Appendix 2 and Appendix 3 in the technical guide for the critical illness claim events.

Fracture and hospitalisation

Momentum will pay a percentage of the benefit amount if the insured life meets the requirements of one of the defined fracture and hospitalisation claim events.

Momentum will pay for the event with the longest payment period if the insured life qualifies for a payment under more than one of the defined fracture or hospitalisation claim events.

Momentum will not pay for a subsequent claim event for fracture or hospitalisation that occurs while the insured life is receiving a fracture and hospitalisation claim amount payment.

Refer to Appendix 6 in the technical guide for the fracture and hospitalisation claim events.

Claim amount

Momentum will use the following assessment criteria to determine the monthly claim amount and will use the criteria resulting in the highest claim amount:

- Loss of income
- Severity of disability
- Severity of impairment or illness

Loss of income

Momentum will pay the actual loss of income up to the maximum of the benefit amount.

Actual loss of income is calculated as the difference between the insured life's net pre-disability income and any net income the insured life earns during the period of disability.

Net income refers to gross income less income tax payable on this income (determined by applying the relevant year of assessment's income tax tables).

Severity of disability

The claim amount will be between 25% and 100% of the benefit amount, depending on the extent to which the insured life is unable to perform the main duties of his own occupation.

The severity of disability assessment criteria, including the partial claim upgrade, will only apply during the first year after the claim event. For professional occupations these criteria will apply for the first two years after the claim event.

Partial Claim Upgrade

- If the full benefit amount has been paid for a continuous period of three months, the insured life will qualify for a Partial Claim Upgrade.
- Momentum will continue to pay the full benefit amount after the three months, provided that the insured life is partially disabled.
- The full benefit amount will only be paid while the severity of disability assessment criteria applies (first year after the claim event or first two years after the claim event for professionals).

Severity of impairment or illness

Momentum will pay a percentage of the benefit amount for a specified payment period if the insured life meets any of the requirements for functional impairment, critical illness or fracture and hospitalisation claim events.

Refer to Appendix 6 in the technical guide for payout levels and payment periods for severity of impairment and illness claim events.

General

The claim amount is paid monthly in arrears.

The daily claim amount will be calculated as 1/30 of the monthly benefit amount.

A proportionate payment will be made in respect of any part of a month should the insured life be rehabilitated before the payment date. Following rehabilitation, the insured life will retain his cover.

The premium will be waived for this benefit while a claim is being paid.

Any outstanding debt will be deducted from the claim amount.

Premium waiver during a claim

The premium will be waived for this benefit while a claim is being paid.

No proportionate premiums can be paid; therefore, premiums are waived from the next financial month after the expiry of the waiting period.

If the claim amount is less than the full benefit amount, the whole premium will still be waived.

For a seven-day waiting period, premiums will be waived after the insured life has been continuously disabled for more than 28 days.

If Momentum collected premiums for a period not applicable for premium payment, it will be refunded to the policyholder as an advance on the policy. This (advance) amount will be deducted from the next premium payment.

If this benefit is the only benefit on the policy, the policy fee will be waived while a claim is being paid.

Definition of income

Income is defined as one of the following:

Total Cost to Company	The total sum of all taxable income payable or benefits receivable on account of the insured life's employment, or any services rendered by the insured life, plus • the value of any fringe benefits (as provided for in the Income Tax Act) awarded to the employee, • retirement fund contributions made by the life insured's employer, • the cost of any other benefits paid for by the insured life's employer, and • any dividends received by the life insured due to shareholding or member's interest held in the employer (where the employer is a company or close corporation).

Net income refers to Total Cost to Company (as defined above) less income tax payable on this Income (determined by applying the relevant year of assessment's income tax tables).

Pre-disability net income will be increased by inflation from the date of the claim event to the date on which the loss of income is calculated.

Benefit reductions

The claim amount will be reduced if:

- the benefit amount exceeds 100% of the insured life's pre-disability net income or
- the policyholder is receiving a disability income from another insurance policy contract as a result of the insured life's disability.

Benefit amount exceeds 100% of the pre-disability net income

The benefit amount will be reduced to ensure that it does not exceed 100% of the insured life's pre-disability net income.

Income from other income disability policy contracts

The claim amount will be reduced to ensure that the total of the claim amount payment and the income from the other policy contract does not exceed 100% of the insured life's pre-disability net income.

General

Pre-disability net income will be calculated as the insured life's net income averaged over the period of 12 months immediately preceding the date of the disability.

Any Functional Protector or Complete Functional Protector claim amount paid to the policyholder will not be considered in the benefit reduction calculations.

Payments for lump sum disability benefits are specifically excluded from the benefit reduction calculation.

Additional benefit reductions

The following additional benefit reduction rules apply:

- Six months after a claim, the claim amount will be reduced if the insured life is not covered under a group disability income policy contract or
- the insured life is covered under a group disability income policy contract but is not receiving a disability income payment under the group disability income policy contract the claim amount will be reduced after the waiting period under the group disability income policy contract has been reached.

In both instances, the reduction will be calculated as 70% of the claim amount. In other words, the claim amount will be reduced by 70%.

Successive claims

The following benefit payment periods are available:

- 12-month benefit payment period
- 24-month benefit payment period

Total payments throughout the benefit term will be limited to the chosen benefit payment period for claims due to the same bodily injury or related causes or illness.

This limit will be waived for subsequent occupational disability claims if such related claims are separated by the chosen benefit payment period during which the insured life has fully resumed his nominated occupation.

The limit will not be waived for subsequent impairment or illness claims.

Waiting period

A one month waiting period is available.

Premiums are payable during the waiting period.

If the insured life dies within the waiting period, a claim will not be paid.

The first monthly claim amount payment will be made only after the insured life has been disabled for the waiting period that he chose.

Claim amount payments for functional impairment, critical illness or fracture and hospitalisation will only be made after the waiting period has expired.

Off period

An "off period" of three months applies.

This means that if the insured life is rehabilitated and claims again for the same cause within three months, the waiting period will be waived.

Guaranteed insurability

Momentum will allow policyholder to increase the benefit amount without any medical underwriting after the benefit anniversary if the insured life's income increases at a rate that exceeds the maximum voluntary benefit amount increase percentage.

The total annual increase (annual voluntary benefit amount increase plus the guaranteed insurability increase) will be limited to twice the inflation rate used for increases by Momentum at that point, capped to 20%.

This additional benefit amount increase may not be exercised if any of the following apply:

- the insured life is over the age of 55
- voluntary benefit amount increases were not selected
- the insured life is already disabled or was disabled during the 12 months preceding the date of the benefit amount increase
- a health loading applies to the insured life

Momentum must receive a written request to increase the benefit amount within one month after the benefit anniversary.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Factors affecting monthly benefit payments

The benefit payments end if:

- the insured life is no longer qualifies for a claim amount payment
- the benefit ends
- the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

Ongoing assessments

Once a claim has been admitted and Momentum has started paying the monthly claim amount, the insured life's health will be assessed from time to time. If the insured life fails to undergo the reassessment within three months of Momentum's notification, the claim payments may be cancelled.

These assessments will determine whether the insured life still qualifies for a claim and has been receiving such medical treatment as is appropriate for his condition. The benefit payments will end if the insured life no longer qualifies for a claim and the applicable premium must be paid.

Momentum will cover the cost of the reassessment by a doctor chosen by Momentum.

The ongoing assessment may be waived for the impairment or illness claim events.

Following rehabilitation, the monthly benefit amount will start at the level of the last benefit payment and will increase on every benefit anniversary.

Functional Protector

Description

Momentum will pay a monthly claim amount if the insured life is permanently functionally impaired and meets the requirements of one of the defined functional impairment claim events with 100% payout.

Special conditions

The claim amount is paid monthly in advance.

A benefit may not be converted if a claim has been submitted under a lump sum benefit or if a claim is in payment under an income benefit.

Once Momentum admits a claim, no more premiums are payable for this benefit.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

	Age next birthday		
	Level	LifeStage	Compulsory (5%, 6% or 7%)
Minimum entry age	15	15	15
Maximum entry age	70	70	70

Benefit term

Whole life

Benefit limits

Minimum monthly benefit	Maximum monthly benefit
R2 000	R40 000

The combined benefit amount for the Functional Protector and the Complete Functional Protector will be limited so that the insured life does not receive a monthly benefit amount exceeding the maximum monthly benefit amount available under the Functional Protector.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Compulsory (5%, 6% or 7%)

Premium guarantee

10 years

Increase options

Premium pattern	Premium increases	Benefit amount increases
Level	None	0%, 5%, 7.5%, 10%, CPI

Premium pattern	Premium increases	Benefit amount increases
LifeStage	Age related increases only	0%, 5%, 7.5%, 10%, CPI
Compulsory (5%, 6%, 7%)	None	0%, 5%, 7.5%, 10%, CPI

If the policyholder chose to have voluntary benefit amount increases:

- The monthly pre-claim benefit amount will increase on every benefit anniversary date.
- The monthly post-claim benefit amount will increase on the claim anniversary date, at the chosen benefit increase percentage limited to a maximum of the general increase in the CPI plus 2%.

If the policyholder selected the CPI increase option, then pre-claim increases will be limited to 15% per year, and post-claim increases will be limited to 10% per year.

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment.
- Premium Waiver - Retrenchment.

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Cessions are not allowed.

Claim event

The claim events are not in any way linked to the insured life's ability to perform occupational activities.

The claim event is based on a medical impairment that occurs after the start date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future. The insured life will be required to undergo reasonable optimal treatment if a specialist that Momentum has approved has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with his treatment routine.

- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Momentum may require the insured life to undergo a reassessment to verify that the insured life still qualifies for a claim according to the claim event definitions.

A claim will not be paid if this benefit was converted from an existing disability or impairment benefit and the claim event occurred before the conversion.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

The following functional impairment claim events are excluded:

- Hearing
- Speech
- Facial disorders and/or disfigurement
- Cranial nerve VII (facial nerve)

Claim amount

In the event of a valid claim, the monthly claim amount will be paid if the insured life meets the requirements of one of the defined claim events

Any outstanding debt will be deducted from the claim amount.

Conversion Option

Conversion of lump sum disability and impairment benefits

The following benefits (stand-alone and ancillary) may convert to a Functional Protector:

- Comprehensive Disability Benefit
- Own Occupation Disability Benefit
- Comprehensive ADW Disability Benefit
- ADW Disability Benefit
- Functional Impairment Benefit

If tapering was not selected on any of the abovementioned benefits:

The monthly income for the benefit that is issued under this conversion option is limited to 1% of the benefit amount at the time of the conversion, limited to the current maximum new business limit.

If tapering was selected on any of the abovementioned benefits:

The monthly income for the benefit that is issued under this conversion option is limited to 1% of the benefit amount, limited to the current maximum new business limit:

- at the time of the conversion if tapering has not started, or
- before the tapering started

Conversion of Complete Income Protector

The policyholder has the option to convert a Complete Income Protector to this benefit, which pays a monthly claim amount for the remainder of the insured's life if he is permanently impaired.

The benefit amount being converted is subject to the maximum benefit limit for this benefit at the time of the conversion.

General

Medical underwriting will be required if any of the abovementioned benefits:

- any specific exclusion, or
- include a health or occupational loading.

The benefit may not be converted if:

- a claim has been submitted for any of the benefits listed above or
- a claim is in payment under a Complete Income Protector and Group Income Top-up Benefit.

This benefit will not pay out if the claim event for any of the abovementioned benefits occurred before the conversion.

A partial conversion will not be allowed.

The policyholder may choose any increase option and premium pattern for this benefit subject to the new business rules.

If there is a premium waiver benefit attached to the benefit being converted to a Functional Protector/Complete Functional Protector, then at conversion the policyholder has the option to add a new premium waiver benefit to the Functional Protector/Complete Functional Protector. If the new premium waiver is the same type of waiver that existed on the benefit being converted, only a declaration of health will be required to add this new premium waiver to the Functional Protector/ Complete Functional Protector. The policyholder can select any increase option on the premium waiver (increasing or level). The new premium waiver will be subject to the new business entry age and benefit limits.

A new policy contract will be issued on conversion.

The conversion will be an add and remove alteration. If this benefit is added without the removal of the benefit being converted, normal underwriting will apply.

If the benefit being converted is removed or it is within three months of the expiry, special underwriting conditions will apply.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Ongoing assessments

Momentum will require proof annually, that the insured life is still alive to continue payment of the claim.

Momentum will send the insured life a certificate of existence that will need to be sent back within the required period, as stated on the certificate.

If the certificate of existence is not received within the required period, all benefit payments will terminate.

Momentum may require the insured life to undergo a reassessment to verify that he still qualifies for a claim according to the claim event definitions.

Student Package

Refer to Packages for special conversion options offered as part of the Student Package.

Complete Functional Protector

Description

Momentum will pay a monthly claim amount if the insured life is permanently functionally impaired and meets the requirements of one of the defined functional impairment claim events.

Special conditions

The claim amount is paid monthly in advance.

A benefit may not be converted if a claim has been submitted under a lump sum benefit or if a claim is in payment under an income benefit.

Once Momentum admits a claim, no more premiums are payable for this benefit.

The Complete Functional Protector will be the default option for the conversion from a Complete Income Protector at the expiry of the Complete Income Protector.

Type of benefit

Stand-alone

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

	Age next birthday		
	Level	LifeStage	Compulsory (5%, 6% or 7%)
Minimum entry age	15	15	15
Maximum entry age	70	70	70

Benefit term

Whole life

Benefit limits

Minimum monthly benefit	Maximum monthly benefit
R2 000	R40 000

The combined benefit amount for the Complete Functional Protector and the Functional Protector will be limited so that the insured life does not receive a monthly benefit amount exceeding the maximum monthly benefit amount available under the Complete Functional Protector.

Premium patterns

The policyholder may choose one of the following premium patterns:

- Level
- LifeStage
- Compulsory (5%, 6% or 7%)

Premium guarantee

10 years

Increase options

Premium pattern	Premium increases	Benefit amount increases
Level	None	0%, 5%, 7.5%, 10%, CPI
LifeStage	Age related increases only	0%, 5%, 7.5%, 10%, CPI
Compulsory (5%, 6%, 7%)	None	0%, 5%, 7.5%, 10%, CPI

If the policyholder chose to have voluntary benefit amount increases:

- The monthly pre-claim benefit amount will increase on every benefit anniversary date.
- The monthly post-claim benefit amount will increase on the claim anniversary date, at the chosen benefit increase percentage limited to a maximum of the general increase in the CPI plus 2%.

If the policyholder selected the CPI increase option, then pre-claim increases will be limited to 15% per year and post-claim increases will be limited to 10% per year.

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment.
- Premium Waiver - Retrenchment.

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Cessions are not allowed.

Claim event

The claim events are not in linked to the insured life's ability to perform occupational activities.

The claim event is based on a medical impairment that occurs after the start date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage, a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future. The insured life will be required to undergo reasonable optimal treatment if a specialist that Momentum has approved has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with his treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment, they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will only be admitted if the claim event is a permanent condition.

Momentum may require the insured life to undergo a reassessment to verify that the insured life still qualifies for a claim according to the claim event definitions.

If the insured life qualifies for a claim amount payment under more than one of the impairment events we will pay for the event that provides the highest payout.

A claim will not be paid if this benefit was converted from an existing disability or impairment benefit and if the claim event occurred before the conversion.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

The following functional impairment claim events are excluded:

- Hearing
- Speech
- Facial disorders and/or disfigurement
- Cranial nerve VII (facial nerve)

Claim amount

In the event of a valid claim, the monthly claim amount will be paid if the insured life meets the requirements of one of the defined claim events.

Severity level	Payment percentage	Payment period	Cover period
25%	25%	Until death	Up to 70 anb
50%	50%	Until death	Until death
75%	75%	Until death	Until death
100%	100%	Until death	Until death

The functional impairment claim events are divided into categories.

The claim amount is paid monthly in advance.

Benefits will not be reduced by income received from other sources.

Any outstanding debt will be deducted from the claim amount.

Conversion of lump sum disability and impairment benefits

The following benefits (stand-alone and ancillary) may convert to a Functional Protector:

- Comprehensive Disability Benefit
- Own Occupation Disability Benefit
- Comprehensive ADW Disability Benefit
- ADW Disability Benefit
- Functional Impairment Benefit

If tapering was not selected on any of the abovementioned benefits:

The monthly income for the benefit that is issued under this conversion option is limited to 1% of the benefit amount at the time of the conversion, subject to the current maximum new business limit.

If tapering was selected on any of the abovementioned benefits:

The monthly income for the benefit that is issued under this conversion option is limited to 1% of the benefit amount subject to the current maximum new business limit:

- at the time of the conversion, if tapering has not started, or
- before the tapering started

Conversion of Complete Income Protector

The policyholder has the option to convert a Complete Income Protector to this benefit, which pays a monthly claim amount for the remainder of the insured's life if he is permanently impaired.

The benefit amount being converted is subject to the maximum benefit limit for this benefit at the time of the conversion.

General

Medical underwriting will be required if any of the abovementioned benefits:

- any specific exclusion, or
- include a health or occupational loading.

The benefit may not be converted if:

- a claim has been submitted for any of the benefits listed above, or
- a claim is in payment under a Complete Income Protector and Group Income Top-up Benefit.

This benefit will not pay out if the claim event for any of the abovementioned benefits occurred before the conversion.

A partial conversion will not be allowed.

The policyholder may choose any increase option and premium pattern for this benefit subject to the new business rules.

A new policy contract will be issued on conversion.

The conversion will be an add and remove alteration. If this benefit is added without the removal of the benefit being converted, normal underwriting will apply.

If there is a premium waiver benefit attached to the benefit being converted to a Functional Protector/Complete Functional Protector, then at conversion the policyholder has the option to add a new premium waiver benefit to the Functional Protector/Complete Functional Protector. If the new premium waiver is the same type of waiver that existed on the benefit being converted, only a declaration of health will be required to add this new premium waiver to the Functional Protector/ Complete Functional Protector. The policyholder can select any increase option on the premium waiver (increasing or level). The new premium waiver will be subject to the new business entry age and benefit limits.

If the benefit being converted is removed or it is within three months of the expiry, special underwriting conditions will apply.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Ongoing assessments

Momentum will require proof annually, that the insured life is still alive in order to continue payment of the claim.

Momentum will send the insured life a certificate of existence that will need to be sent back within the required period, as stated on the certificate.

If the certificate of existence is not received within the required period, all benefit payments will terminate.

Momentum may require the insured life to undergo a reassessment to verify that he still qualifies for a claim according to the claim event definitions.

Student Package

Refer to Packages for special conversion options offered as part of the Student Package.

Complete Family Protector

Benefits

Momentum offers four Complete Family Protector benefits:

- Complete Family Protector – Complete Income Protector
- Complete Family Protector – Temporary Income Protector
- Complete Family Protector – Business Protector (Professional)
- Complete Family Protector – Business Protector (Self Employed)

Description

Momentum will pay the claim amount as a lump sum if the main insured life, main insured life's spouse or the main insured life's biological or legally adopted children meets the defined requirements.

Special conditions

This benefit is only available as an ancillary benefit on the corresponding income protection benefit with any waiting period.

This benefit is only available if the policyholder is a:

- Natural person
- Sole Proprietor.

Only one Complete Family Protector is allowed per insured life across all policies.

Definition of spouse

A spouse is any person who the main insured life regards as a spouse and where this person and the main insured life are legally, ethnically or traditionally married.

Definition of child

A child is the main insured life's biological or legally adopted child from birth to 18 (19 next birthday) who is a permanent resident of the Republic of South Africa.

Type of benefit

Ancillary

Eligible lives

All lives are eligible subject to age limits and underwriting.

Age limits

Minimum entry age 15 next birthday

Chosen expiry age (next birthday)	Maximum entry age (next birthday)			
	Level	LifeStage	5% Compulsory	6% or 7% Compulsory
To age 55	50	50	50	50
To age 60	55	55	55	55
To age 65	60	55	55*/60**	55
To age 70	60	55	55*/60**	55
Whole Life	60	55	55	55

- Age 55* applies to Complete Family Protector – Complete Income Protector and Complete Family Protector – Temporary Income Protector.
- Age 60** applies to all other Complete Family Protector benefits.
- The Whole Life term only applies to Complete Family Protector – Complete Income Protector. The benefit term for the Whole Life term will be to age 70.
- Age restrictions for a spouse will be the same as the main insured life.

Benefit term

To the chosen expiry age. The expiry age for the Complete Family Protector – Complete Income Protector (Whole Life), is age 70 next birthday.

Minimum term: 5 years

Benefit limits

Complete Family Protector attached to a:	Minimum	Maximum
Complete Income Protector	R2 000	R150 000 R200 000 (Professionals)
Temporary Income Protector		R150 000 R200 000 (Professionals)
Business Protector (Professional)		R300 000
Business Protector (Self Employed)		R150 000

Premium patterns

The premium pattern will follow the stand-alone benefit to which this benefit is attached.

Premium guarantee

The premium guarantee will follow the stand-alone benefit to which this benefit is attached.

Increase options

The increase options will follow the stand-alone benefit to which this benefit is attached.

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

Not applicable

Beneficiaries and cessions

The policyholder must nominate beneficiaries for proceeds.

Cessions are not allowed.

Claim event

Death

The death of the main insured life, the main insured life's spouse or the main insured life's biological or legally adopted children.

Critical Illness

The diagnosis of the main life's spouse or the main insured life's biological or legally adopted children with one of the defined critical illnesses.

A maximum of one claim for the spouse and one claim per child will be admitted for this category. An overall maximum of four claims will be admitted for this category.

Momentum will not pay for a subsequent critical illness claim event that occurs while the insured life is receiving a critical illness claim amount payment.

Hospitalisation

The main insured life, the main insured life's spouse or the main insured life's biological or legally adopted children are admitted to the hospital for a period exceeding seven days.

Multiple claims will be admitted per insured life for this category. An overall maximum of four claims will be admitted for this category.

Momentum will not pay a second claim amount if an insured life is hospitalised again for the same reason within ten days of discharge. We will treat it as being related to the event that led to the previous hospital admission.

If the readmission to the hospital is due to an unrelated event, the normal waiting period will apply.

If this benefit is attached to a stand-alone benefit with a seven-day waiting period, the stand-alone benefit will pay out if the main insured life is admitted to the hospital for a period exceeding seven days. The main insured life will therefore only be covered under the hospitalisation benefit if the stand-alone benefit's waiting period is more than seven days.

Any claim submitted within the first 30 days of the start date of the benefit will not be paid.

Any claim resulting from any physical defects, illnesses or diseases that the insured life suffered from, was aware of, or received medical advice or treatment in the three years before the start date of this benefit, is excluded for the first three years of the benefit. When restarting the benefit, a new three-year period will apply.

Pre-existing exclusion

The pre-existing exclusion applies to all claim events mentioned above for non-underwritten insured lives.

Any claims resulting from any physical defects, illnesses or diseases that the insured life suffered from, was aware of, or received medical advice or treatment in the three years before the start date of this benefit, are excluded for the first three years.

When restarting the benefit, or increasing the benefit amount, a new three-year period will apply.

Claim amount

Death of the main insured life

The claim amount is a lump sum equal to three monthly claim amount payments under the stand-alone to which this benefit is attached.

Death of the main insured life's spouse

The claim amount is a lump sum equal to three monthly claim amount payments under the stand-alone to which this benefit is attached.

The maximum lump sum payment will be limited to R100 000.

Death of the main insured life's biological or legally adopted children

The claim amount is a lump sum equal to three monthly claim amount payments under the stand-alone to which this benefit is attached.

The maximum lump sum payment will be limited to:

- R10 000 for children younger than age six next birthday and
- R30 000 for children between age seven and 18 (19 next birthday).

Critical Illness

The claim amount is a lump sum equal to three monthly claim amount payments under the stand-alone to which this benefit is attached.

The maximum lump sum payment will be limited to R100 000.

Hospitalisation

The claim amount is a lump sum equal to 50% of the monthly claim amount payments under the stand-alone to which this benefit is attached.

The maximum lump sum payment will be limited to R75 000.

Waiting period

The claim amount for hospitalisation will only be paid after an insured life has been admitted to the hospital for a period exceeding seven days (the waiting period).

Survival period

There is no explicit survival period.

A claim will only be admitted if the main insured life, the main insured life's spouse or the main insured life's biological or legally adopted children meets the requirements of the defined claim event, prior to their death.

No medical test or examination concluded after the insured life's death will be considered when evaluating a claim.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the stand-alone to which this benefit is attached.
- The end of the benefit term.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Income Enhancer

Benefits

Momentum offers four Income Enhancer benefits:

- Income Enhancer – Complete Income Protector
- Income Enhancer – Temporary Income Protector
- Income Enhancer – Business Protector (Professional)
- Income Enhancer – Business Protector (Self Employed)

Description

Momentum will pay up to a maximum of three monthly claim amount payments if the insured life meets the defined requirements.

Special conditions

This benefit is only available as an ancillary on a:

- Complete Income Protector with a seven-day, 14-day or one month waiting period.
- Temporary Income Protector, Business Protector (Professional) or Business Protector (Self Employed) with a seven-day or one month waiting period

Only a one month waiting period is available on this benefit.

This benefit is only available if the policyholder is one of the following:

- Natural person
- Trust with natural persons as beneficiaries
- Sole Proprietor.

Type of benefit

Ancillary

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

Minimum entry age 15 next birthday

Chosen expiry age (next birthday)	Maximum entry age (next birthday)			
	Level	LifeStage	5% Compulsory	6% or 7% Compulsory
To age 55	50	50	50	50
To age 60	55	55	55	55
To age 65	60	55	55*/60**	55
To age 70	60	55	55*/60**	55
Whole Life	60	55	55	55

- Age 55* applies to Income Enhancer – Complete Income Protector and Income Enhancer – Temporary Income Protector.
- Age 60** applies to all other Income Enhancer benefits.
- The Whole Life term only applies to Income Enhancer – Complete Income Protector. The benefit term for the Whole Life term will be to age 70.

Benefit term

The policyholder may choose one of the following benefit terms:

- To the chosen expiry age. The expiry age for the Income Enhancer – Complete Income Protector (Whole Life) is age 70 next birthday.
- Term – Minimum 5 years

Benefit limits

Income Enhancer attached to a:	Minimum	Maximum
Complete Income Protector	R1 000	R75 000 R100 000 (Professionals)
Temporary Income Protector		R75 000 R100 000 (Professionals)
Business Protector (Professional)		R150 000
Business Protector (Self Employed)		R75 000

Premium patterns

The premium pattern will follow the stand-alone benefit to which this benefit is attached.

Premium guarantee

The premium guarantee will follow the stand-alone benefit to which this benefit is attached.

Increase options

The increase option will follow the stand-alone benefit to which this benefit is attached.

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®

Ancillary benefits

Not applicable

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Cessions are not allowed.

Claim event

The insured life must qualify for a monthly claim amount payment under the stand-alone to which this benefit is attached.

Claim amount

Momentum will pay 50% of the monthly benefit claim amount paid under the stand-alone to which this benefit is attached.

The benefit payments will end on the earlier of:

- three benefit payments or
- the benefit payments under the stand-alone benefit to which this benefit is attached, ends.

A monthly claim amount will not be paid after the end of the benefit term.

The claim amount is paid monthly in arrears.

Waiting period

The first monthly claim amount will only be paid after the insured life has been disabled for one month.

Premiums are payable during the waiting period.

A disability claim will not be paid if the insured life dies within the waiting period.

Off period

An "off period" of three months applies.

The waiting period will be waived if the insured life is rehabilitated and claims again for the same cause within the three months.

Momentum will make a maximum of three payments for the same cause.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the stand-alone to which this benefit is attached.
- The end of the benefit term.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claims requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Complete Critical Illness Benefit

Description

Momentum will pay:

- a percentage of the benefit amount as a lump sum if the insured life meets the requirements of one of the defined critical illnesses.
  OR
- 10% of the insured life's benefit amount up to a maximum of R250 000 if the insured life's biological or legally adopted child meets the requirements of one of the defined critical illnesses.

Special conditions

Critical illness benefits automatically include critical illness cover for children.

All stand-alone critical illness benefits automatically include reinstatement.

A Specified Claim Event Enhancer may be added and increases the payout percentage on certain qualifying claim events to 100%.

Type of benefit

Stand-alone or ancillary

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

Whole life	Level	LifeStage	Aggressive LifeStage	Compulsory %							
				3	4	5	6	7	8	9	10
Minimum entry age (stand-alone)	15	15	40	15	15	15	15	30	32	34	36

Whole life or To age 65	Level; Compulsory; LifeStage; Aggressive LifeStage	Standard or Extended
Student Package	Level; Compulsory; LifeStage	Standard
Term	The premium is guaranteed for the term of the benefit.	

Increase options

The policyholder may choose either voluntary premium or benefit amount increases. Voluntary premium increases are not available on LifeStage premium patterns.

Premium pattern	Premium increases	Benefit amount increases
Level	0%, 3 — 20%, CPI	0%, 3 — 10%, CPI, RDI
LifeStage	Age related increases only	0%, 3 — 10%, CPI, RDI
Aggressive LifeStage	Age related increases only	0%, 3 — 10%, CPI, RDI
Compulsory	3 — 20%	0%, 3 — 10%, CPI, RDI

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®
- Reinstatement (only applicable to stand-alone benefits)

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver – Retrenchment
- Longevity Protector® – Critical Illness
- Specified Claim Event Enhancer

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Collateral cessions are allowed on the stand-alone benefit.

Claim event

The insured life or the insured life's biological or legally adopted child meets the requirements of one of the defined critical illness claim events.

Claim event categories

Claim events are divided into claim categories. For each category, the payout percentages are based on the severity of the critical illness event.

Claims for the Early cancer category will be limited to a maximum of R100 000 per claim event.

Claims under the Additional claim events for children category will be limited to a maximum benefit amount of R250 000.

Refer to Appendix 2 and Appendix 3 in the technical guide for the claim events.

Claim amount for ancillary benefits

Each severity level has an associated “percentage payout”.

If more than one claim event occurs as a result of the same cause, a claim will be admitted for the claim event resulting in the highest payout.

Momentum will pay the balance of the benefit amount for claims with a percentage payout of 100%.

All cardiac events that occur within 30 days of each other will be considered a single claim event.

Any outstanding debt will be deducted from the claim amount.

Determining the claim amount

For the first claim, the claim amount is calculated as the percentage payout multiplied by the benefit amount. The benefit amount is reduced by the amount of any claim.

For a subsequent claim in a different category, the claim amount is calculated by multiplying the percentage payout by the reduced benefit amount. This amount is paid irrespective of the relative severity of the new claim and the original claim.

A subsequent claim in the same category will be paid only if the claim event is more severe than previous claims in the same category. The amount that is paid is based on the difference between the percentage payout for the new claim and the total percentage paid for that category (the "additional percentage payout"). In this case, the claim amount is calculated as the "additional percentage payout" multiplied by the benefit amount (only adjusted for claims in other categories).

Any claim under the stand-alone benefit to which this benefit is attached will reduce the benefit amount by the same proportion in which the benefit amount of the stand-alone benefit reduces.

Any claim under this benefit will reduce the benefit amount under the stand-alone benefit to which this benefit is attached by the claim amount for the ancillary benefit. The benefit amount under any other ancillary benefit attached to the same stand-alone benefit will remain unchanged if the benefit amount of this other ancillary is less than the reduced stand-alone benefit amount. The benefit amount of the other ancillary will be reduced to the same level as the reduced stand-alone benefit amount of the other ancillary if the amount is greater than the reduced stand-alone benefit amount.

Momentum will reduce the contract benefit premium if this benefit is cancelled due to a claim for the full benefit amount.

The benefit premium will not reduce in the event of a partial claim.

Related claims

A related claim is a claim where the claim event progressed from a previous claim event.

Momentum will treat a claim related to any previous claim in a different category as if it is in the same category as the claim it progressed from.

Claim amount for stand-alone benefits

The benefit automatically reinstates for unrelated claims.

The benefit premium will not reduce in the event of a partial claim.

All cardiac events that occur within 30 days of each other will be considered a single claim event.

Any outstanding debt will be deducted from the claim amount.

Determining the claim amount

The claim amount is calculated as the percentage payout multiplied by the benefit amount.

The benefit amount will not be reduced by the claim amount.

If more than one claim event occurs due to the same cause, a claim will be admitted for the claim event resulting in the highest payout.

Unrelated claims

An unrelated claim is a claim where the claim event did not progress from a previous claim event and/or previous condition which gave rise to the claim event.

Subsequent unrelated claims will be paid for all claim event categories. In this case, the claim amount is calculated as the percentage payout, multiplied by the benefit amount.

Related claims

A related claim is a claim where the claim event progressed from a previous claim event.

A claim that is related to any previous claim in a different category will be treated as if it is in the same category as the claim it progressed from.

A subsequent related claim will only be paid if the claim event is more severe than the previous claim. The claim amount that we pay is based on the difference between the percentage payout for the new claim and the total percentage paid for the previous claim/s (the "additional percentage payout"). In this case, the claim amount is calculated as the additional percentage payout, multiplied by the benefit amount.

Critical Illness Cover for Children

Momentum will only admit claims in respect of the insured life's biological or legally adopted child from their date of birth to age 18 (19 next birthday) who is a permanent resident of the Republic of South Africa.

The benefit amount under the Critical Illness Cover for Children is the lesser of:

- 10% of the benefit amount under the insured life's benefit at the time of the claim and
- R250 000

The claim amount is calculated as the percentage payout multiplied by the benefit amount.

Child-related claims

A related claim is a claim where the claim event progressed from a previous claim event. Momentum will treat a claim related to any previous claim in a different category, as if it is in the same category as the claim it progressed from.

If a child qualifies for a claim event as specified under the Additional claim events for children category, they will not be able to claim for this event under any of the other adult categories.

A claim will not be admitted if any condition that existed before the child became eligible for this benefit, directly brought about or accelerated the claim event. This includes all symptoms for an illness or condition experienced by the child that could have allowed for the illness or condition to be diagnosed and was present before the start date of the policy. Congenital birth defects will be considered pre-existing conditions. They will not be covered, except where the benefit was in force for the entire duration of the pregnancy, or 12 months prior to the legal adoption of children.

There is no limitation on the number of children covered on a parent’s benefit.

Each child will be treated as a separate life on the policy and claims will be treated separately for each child.

The number of claims per child is not limited to a specific number of claims. Claims within the congenital anomaly repair event definition are limited to three per child for unrelated events.

A claim under the Critical Illness Cover for Children will not reduce the benefit amount on this benefit or any other benefit on the policy.

Critical Illness Cover for Children claim example

Mike Myriad has a Complete Critical Illness Benefit of R2 610 253. His son develops bacterial meningitis and qualifies for a 10% payout.

The benefit amount under the Critical Illness Cover for Children is the lesser of:

- 10% of the benefit amount under the insured life's benefit at the time of the claim and
- R250 000

(1) 10% of R2 610 253.00 = R261 025.30
(2) The lesser of R261 025.30 and R250 000 = R250 000
(3) The claim payment will be (10% of R250 000) = R25 000

Survival period

There is no explicit survival period.

A claim will only be admitted if the insured life meets the requirements of the defined claim event, prior to their death.

No medical test or examination concluded after the insured life's death will be considered when evaluating a claim.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount. (Applicable to ancillary benefits only).
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Complete Enhanced Critical Illness Benefit

Description

Momentum will pay:

- a percentage of the benefit amount as a lump sum if the insured life meets the requirements of one of the defined critical illnesses.

  OR

- 10% of the insured life's benefit amount up to a maximum of R250 000 if the insured life's biological or legally adopted child meets the requirements of one of the defined critical illnesses.

Special conditions

Critical illness benefits automatically include critical illness cover for children.

All stand-alone critical illness benefits automatically include reinstatement.

The benefit pays out 100% for all events in the SCIDEP grid. Momentum will pay 100% of the claim amount for all other events that only pays 50% or 75% on the Complete Critical Illness Benefit.

Type of benefit

Stand-alone or ancillary

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

Whole life	Level	LifeStage	Aggressive LifeStage	Compulsory %

Additional features

The following additional features are available free of charge:

- Free Cover
- Retirement Booster
- LifeReturns®
- Reinstatement Option (only applicable to stand-alone benefits)

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver – Retrenchment
- Longevity Protector® – Critical illness

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Collateral cessions are allowed on the stand-alone benefit.

Claim event

The insured life or the insured life's biological or legally adopted child meets the requirements of one of the defined critical illness claim events.

Claim event categories

Claim events are divided into claim categories. For each category, the payout percentages are based on the severity of the critical illness event.

Claims for the Early cancer category will be limited to a maximum of R100 000 per claim event.

Claims under the Additional claim events for children category will be limited to a maximum benefit amount of R250 000.

Refer to Appendix 2 and Appendix 3 in the technical guide for the claim events.

Claim amount for ancillary benefits

Each severity level has an associated “percentage payout”.

If more than one claim event occurs as a result of the same cause, a claim will be admitted for the claim event resulting in the highest payout.

Momentum will pay the balance of the benefit amount for claims with a percentage payout of 100%.

All cardiac events that occur within 30 days of each other will be considered a single claim event.

Any outstanding debt will be deducted from the claim amount.

Determining the claim amount

For the first claim, the claim amount is calculated as the percentage payout multiplied by the benefit amount. The benefit amount is reduced by the amount of any claim.

For a subsequent claim in a different category, the claim amount is calculated by multiplying the percentage payout by the reduced benefit amount. This amount is paid irrespective of the relative severity of the new claim and the original claim.

A subsequent claim in the same category will be paid only if the claim event is more severe than previous claims in the same category. The amount that is paid is based on the difference between the percentage payout for the new claim and the total percentage paid for that category (the "additional percentage payout"). In this case the claim amount is calculated as the "additional percentage payout" multiplied by the benefit amount (only adjusted for claims in other categories).

Any claim under the stand-alone benefit to which this benefit is attached, will reduce the benefit amount by the same proportion in which the benefit amount of the stand-alone benefit reduces.

Any claim under this benefit will reduce the benefit amount under the stand-alone benefit to which this benefit is attached, by the claim amount for the ancillary benefit. The benefit amount under any other ancillary benefit attached to the same stand-alone benefit will remain unchanged if the benefit amount of this other ancillary is less than the reduced stand-alone benefit amount. The benefit amount of the other ancillary will be reduced to the same level as the reduced stand-alone benefit amount of the other ancillary if the amount is greater than the reduced stand-alone benefit amount.

Momentum will reduce the contract benefit premium if this benefit is cancelled due to a claim for the full benefit amount.

The benefit premium will not reduce in the event of a partial claim.

Related claims

A related claim is a claim where the claim event progressed from a previous claim event.

Momentum will treat a claim related to any previous claim in a different category, as if it is in the same category as the claim it progressed from.

Claim amount for stand-alone benefits

The benefit automatically reinstates for unrelated claims.

All cardiac events that occur within 30 days of each other will be considered a single claim event. The benefit premium will not reduce in the event of a partial claim.

Any outstanding debt will be deducted from the claim amount.

Determining the claim amount

The claim amount is calculated as the percentage payout multiplied by the benefit amount.

The benefit amount will not be reduced by the claim amount.

If more than one claim event occurs due to the same cause, a claim will be admitted for the claim event resulting in the highest payout.

Unrelated claims

An unrelated claim is a claim where the claim event did not progress from a previous claim event and/or previous condition which gave rise to the claim event.

Subsequent unrelated claims will be paid for all claim event categories.

In this case, the claim amount is calculated as the percentage payout, multiplied by the benefit amount.

Related claims

A related claim is a claim where the claim event progressed from a previous claim event.

A claim that is related to any previous claim in a different category, will be treated as if it is in the same category as the claim it progressed from.

A subsequent related claim will only be paid if the claim event is more severe than the previous claim. The claim amount that we pay is based on the difference between the percentage payout for the new claim and the total percentage paid for the previous claim/s (the "additional percentage payout"). In this case, the claim amount is calculated as the additional percentage payout, multiplied by the benefit amount.

Critical Illness Cover for Children

Momentum will only admit claims in respect of the insured life's biological or legally adopted child from their date of birth to age 18 (19 next birthday) who is a permanent resident of the Republic of South Africa.

The benefit amount under the Critical Illness Cover for Children is the lesser of:

- 10% of the benefit amount under the insured life's benefit at the time of the claim and
- R250 000.

The claim amount is calculated as the percentage payout multiplied by the benefit amount.

Child related claims

A related claim is a claim where the claim event progressed from a previous claim event. Momentum will treat a claim that is related to any previous claim in a different category, as if it is in the same category as the claim it progressed from.

If a child qualifies for a claim event as specified under the Additional claim events for children category, they will not be able to claim for this event under any of the other adult categories.

A claim will not be admitted if any condition that existed before the child became eligible for this benefit directly brought about or accelerated the claim event. This includes all symptoms for an illness or condition experienced by the child that could have allowed for the illness or condition to be diagnosed and was present before the start date of the policy. Congenital birth defects will be considered pre-existing conditions. They will not be covered, except where the benefit was in force for the entire duration of the pregnancy, or 12 months prior to the legal adoption of children.

There is no limitation on the number of children covered on a parent’s benefit.

Each child will be treated as a separate life on the policy and claims will be treated separately for each child.

The number of claims per child is not limited to a specific number of claims. Claims within the congenital anomaly repair event definition are limited to three per child for unrelated events.

A claim under the Critical Illness Cover for Children will not reduce the benefit amount on this benefit or any other benefit on the policy.

Critical Illness Cover for Children claim example

Mike Myriad has a Complete Critical Illness Benefit of R2 610 253. His son develops bacterial meningitis and qualifies for a 10% payout.

The benefit amount under the Critical Illness Cover for Children is the lesser of:

- 10% of the benefit amount under the insured life's benefit at the time of the claim and
- R250 000

(1) 10% of R2 610 253.00 = R261 025.30
(2) The lesser of R261 025.30 and R250 000 = R250 000
(3) The claim payment will be (10% of R250 000) = R25 000

Survival period

There is no explicit survival period.

A claim will only be admitted if the insured life meets the requirements of the defined claim event, prior to their death.

No medical test or examination concluded after the insured life's death will be considered when evaluating a claim.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount. (applicable to ancillary benefits only).
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

- Free Cover
- LifeReturns®

Ancillary benefits

Not applicable

Beneficiaries and cessions

Not applicable

Claim event

The insured life or the insured life's biological or legally adopted child meets the requirements of one of the defined SCIDEP critical illnesses to enhance the payment of 25%, 50% and 75% claim events to a 100% claim.

Claim amount

Claim events under this benefit depend on the conditions covered by SCIDEP and depend on the severity level. If the severity level results in a payment of below 100% on the Complete Critical Illness Benefit for a SCIDEP event, this benefit will pay the difference to enhance it to a 100% payment.

SCIDEP requires that every critical illness benefit be benchmarked against a set of ASISA definitions for the most common critical illnesses. The percentage payout for these illnesses is shown in the table below.

Payout percentage	Severity level			
	A	B	C	D
Heart attack	100%	100%	100%	100%
Coronary Artery By-pass Graft (CABG)	100%	100%	100%	100%
Stroke	100%	100%	100%	100%
Cancer	100%	100%	100%	100%

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.

- The payment of the full benefit amount if this benefit is linked to an ancillary Complete Critical Illness Benefit.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Description 2
Special conditions 2
Type of benefit 2
Packages 2

Breadth of Cover Upgrade Package

Description

The Breadth of Cover Upgrade Package is an optional ancillary package that upgrades the comprehensive critical illness benefit range to provide complete breadth of cover and additional features.

The comprehensive critical illness benefit range refers to the:

- Comprehensive Critical Illness Benefit
- Comprehensive Critical Illness Plus Benefit
- Elevated Comprehensive Critical Illness Benefit
- Elevated Comprehensive Critical Illness Plus Benefit.

Special conditions

The Breadth of Cover Upgrade Package is only available on the comprehensive critical illness range.

These features are automatically included in the complete critical illness range of benefits.

Type of benefit

Ancillary

Packages

Comprehensive Critical Illness Benefit or Elevated Comprehensive Critical Illness Benefit

If the package is added to one of these benefits, it will enhance the existing benefit by the following:

- Five additional claim event categories:
  - Breadth of Cover Guarantee®
  - Early Cancer
  - Additional claim events for children
  - Trauma
  - Endocrine and metabolic diseases
- Additional claim events with payout percentages of 5%, 10% or 15% on the diagnosis of the insured life (or the insured life's biological or legally adopted child) with one of the following critical illnesses or a critical illness that affects any of the following:
  - Cardiac and arterial system; cancer; nervous system, connective tissue diseases; musculoskeletal system; gastrointestinal system; urinary tract; respiratory system; ear, nose and throat system; visual; HIV/aids; terminal illness, severe aplastic anaemia; major burns and catch-all
  - The maximum benefit amount for Critical Illness Cover for Children increased to R250 000.
  - All the claim event categories will automatically reinstate (for stand-alone benefits).

Comprehensive Critical Illness Plus Benefit or Elevated Comprehensive Critical Illness Plus Benefit

If the package is added to one of these benefits, it will enhance the existing benefit by the following:

- Three additional claim event categories:
  - Breadth of Cover Guarantee®
  - Early cancer
  - Additional claim events for children
- All the claim event categories will automatically reinstate for stand-alone benefits.
- The cardiac and arterial claim category includes up to 3 stent payouts, provided the procedure is at least 30 days apart.
- The criteria for Whole Person Impairment (WPI) under the Catch-all benefit category lowered from 50% to 35%
- The claim events definitions for lower severity events (5%; 10% and 15% claim events) is enhanced.
- The payout level for loss of hearing in one ear increased from 15% to 25%.
- The maximum benefit amount for Critical Illness Cover for Children increased to R250 000.

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Collateral cessions are not allowed.

Claim event

Infection by any Human Immunodeficiency Virus (HIV) or being diagnosed as having Acquired Immuno-deficiency Syndrome (Aids), if the insured life can prove to the satisfaction of Momentum that the infection is due to:

- The transfusion of infected blood or blood products from a South African blood transfusion service that Momentum recognises, after the starting date of this policy, or
- Executing his professional duties as a medical or dental practitioner registered with the Health Professions Council of South Africa (HPCSA) or a nurse registered with the SA Nursing Council, or
- Receiving a transplanted organ that was previously infected with HIV, or
- Any other medical or dental procedure that the HPCSA recognises and that a medical or dental practitioner registered with the HPCSA, or a nurse registered with the SA Nursing Council has performed on the insured life, or
- Involvement in a road traffic accident, or
- Involvement in a violent crime, or
- Involvement in rape or an indecent assault crime.

Momentum will consider a claim if the following requirements were followed:

- Where HIV results from the transfusion of blood or blood products or a transplanted organ, the transfusion or organ donor service must accept liability for the incident.
- In the event of an accident, violent crime, rape, indecent assault or infection in the execution of professional duties:
  - An identified HIV test must be performed within 24 hours to confirm an HIV-negative status before the event.
  - Proof that the insured life has started the prescribed treatment, a course of antiretroviral drugs, and the treatment course have been completed in full.

In the event of an accident, violent crime, rape or indecent assault:

- Momentum must receive notification within 14 days of an event where there is suspicion of HIV infection.
- An identified HIV test must be performed within six months of the event to confirm an HIV-positive status.
- If there was no suspicion of HIV infection and it can be proven that the insured life contracted HIV as a result of transfusion of infected blood or blood products or receiving a transplanted organ, Momentum must receive notification within six months of the insured life having tested HIV-positive.

Momentum reserves the right to obtain independent diagnostic blood testing of the insured life (with proper identification, counselling and informed consent).

If a cure for HIV/AIDS is found, cover under this benefit will no longer be available.

Claim amount

The claim amount is the lump sum benefit amount.

Any outstanding debt will be deducted from the claim amount.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The payment of the full benefit amount.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section for the documents required for assessing a claim under this benefit.

Comprehensive Living Benefit

Description

Momentum will pay:

- the full benefit amount as a lump sum if the insured life suffers a disability caused by a bodily injury or illness to such an extent that they are totally and permanently unable to perform the normal duties of their own occupation (up to the policy anniversary before the insured life's 65th birthday)
  OR
- a percentage of the benefit amount as a lump sum if the insured life meets the requirements of one of the defined functional impairment claim events (up to the policy anniversary before the insured life's 70th birthday)
  OR
- a percentage of the benefit amount as a lump sum if the insured life meets the requirements of one of the defined critical illnesses
  OR
- 10% of the insured life’s benefit amount up to a maximum of R125 000 as a lump sum if the insured life's biological or legally adopted child meets the requirements of one of the defined critical illnesses

Special conditions

Once the Comprehensive Living Benefit is added as an ancillary benefit, no other critical illness, disability or impairment ancillary benefits can be added.

Critical illness automatically includes Critical Illness Cover for Children.

Critical illness automatically reinstates after a claim for the stand-alone benefit.

Type of benefit

Stand-alone or ancillary

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

Whole life and To age 65	Level	LifeStage	Aggressive LifeStage	Compulsory %							
				3	4	5	6	7	8	9	10

- LifeStage
- Aggressive LifeStage
- Compulsory

Premium guarantee

The premium guarantee depends on the chosen premium pattern:

Term	Premium pattern	Premium guarantee
Whole life or To age 65	Level; Compulsory; LifeStage; Aggressive LifeStage	Standard or Extended
Term	The premium is guaranteed for the term of the benefit.	

Increase options

The policyholder may choose either voluntary premium or benefit amount increases. Voluntary premium increases are not available on LifeStage premium patterns.

Premium pattern	Premium increases	Benefit amount increases
Level	0%, 3 — 20%, CPI	0%, 3 — 10%, CPI, RDI
LifeStage	Age related increases only	0%, 3 — 10%, CPI, RDI
Aggressive LifeStage	Age related increases only	0%, 3 —10%, CPI, RDI
Compulsory	3 — 20%	0%, 3 — 10%, CPI, RDI

Additional features

The following additional features are available free of charge:

- Free Cover
- LifeReturns®
- Retirement Booster
- Reinstatement Option (only applicable to stand-alone benefits)

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver – Retrenchment

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Collateral cessions are allowed on the stand-alone benefit.

Claim event

The insured life can qualify for a claim under either:

- Occupational disability or
- Functional impairment or
- Critical illness

Occupational disability

An occupational disability is a disability caused by a bodily injury or illness to such an extent that the insured life is totally and permanently unable to perform the normal duties of their own occupation (up to the policy anniversary before the insured life's 65th birthday). The percentage payout for the occupational disability is 100% of the benefit amount.

The insured life will not qualify for a claim under the occupational disability criteria if the insured life is not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

Functional impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim event is based on the severity of a medical impairment that occurs after the starting date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage a specialist that Momentum have approved must declare the functional impairment total, permanent and continuous for the foreseeable future.

The insured life will not be required to undergo reasonable optimal treatment if a specialist, that Momentum has approved, has established that the functional impairment is permanent and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with their treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Refer to Appendix 4 in the technical guide for the functional impairment claim events

Critical Illness

The insured life or the insured life's biological or legally adopted child meets the requirements of one of the defined critical illness claim events.

Refer to Appendix 4 in the technical guide for the critical illness claim events.

Claim amount

Claim events are divided into the following categories:

Claim category	Claim events
1	Cardiac and arterial system
2	Cancer
3	Nervous system
4	Connective tissue disease
5	Musculoskeletal system
6	Gastrointestinal system
7	Urinary tract
8	Respiratory system
9	ENT system
10	Visual
11	Accidental HIV/Aids – Critical illness
12	Terminal illness
13	Red blood cell disorders
14	White blood cell disorders
15	Clotting disorders
16	Endocrine system
17	Major burns
18	Catch-all
19	Activities of Daily Living (ADL)
20	Occupational disability

For certain categories, the claim payments are divided into severity levels, depending on the severity of the claim event.

Each level has an associated “percentage payout”.

Refer to Appendix 4 in the technical guide for the claim events

Claim amount for ancillary benefits

For the first claim, the claim amount is calculated as the percentage payout multiplied by the benefit amount. The benefit amount for this benefit will be reduced by the claim amount.

The claim amount for a subsequent claim in a different category is calculated by multiplying the percentage payout by the reduced benefit amount. This amount is paid irrespective of the relative severity of the new claim and the original claim.

A subsequent claim in the same category will be paid if the claim event is more severe than previous claims in the same category. The claim amount paid is based on the difference between the percentage payout for the new claim and the total percentage paid for that category (the "additional percentage payout"). The claim amount is calculated as the "additional percentage payout" multiplied by the benefit amount (adjusted for claims in other categories).

Any claim under the stand-alone benefit to which this benefit is attached, will reduce the benefit amount by the same proportion the benefit amount of the stand-alone benefit reduces.

Any claim under this benefit will reduce the benefit amount under the stand-alone benefit to which this benefit is attached, by the claim amount for the ancillary benefit.

The benefit amount under any other ancillary benefit attached to the same stand-alone benefit will remain unchanged if the benefit amount of this other ancillary is less than the reduced stand-alone benefit amount.

The benefit amount of the other ancillary will be reduced to the same level as the reduced stand-alone benefit amount of the other ancillary if the amount is greater than the reduced stand-alone benefit amount.

Claim amount for stand-alone benefits

The benefit automatically reinstates for unrelated claims.

An unrelated claim is a claim where the claim event did not progress from a previous claim event.

Subsequent unrelated claims in the following categories will be paid regardless of the severity of the previous unrelated claim:

- Cancer
- Nervous system
- Connective tissue diseases
- Muskuloskeletal system
- Gastrointestinal system
- Urinary tract
- Respiratory system
- ENT system
- Visual
- HIV/aids
- Terminal Illness
- Severe aplastic anaemia
- Major burns
- Endocrine and metabolic diseases

In this case, the claim amount is calculated as the percentage payout multiplied by the benefit amount.

A subsequent claim in the same category will only be paid if the claim event is more severe than previous claims in the same category. The amount paid will be based on the difference between the percentage payout for the new claim and the total percentage paid for that category (the "additional percentage payout"). In this case, the claim amount is calculated as the additional percentage payout multiplied by the benefit amount.

Related claims

A related claim is where the claim event progressed from a previous claim event. Momentum will treat a claim that is related to any previous claim in a different category as if it is in the same category as the claim it progressed from.

General

If more than one claim event occurs as a result of the same cause, a claim will be admitted for the claim event resulting in the highest payment.

Any outstanding debt will be deducted from the claim amount.

Momentum will reduce the contract benefit premium if this is an ancillary benefit and is cancelled as a result of a claim.

Momentum will always pay the balance of the benefit amount for claims with a percentage payout of 100%.

Waiting period

There is no explicit waiting period.

A claim will only be admitted once we have established the permanency of the disability according to our definition.

No claim will be admitted if the insured life dies before permanency is established.

Survival period

There is no explicit survival period.

A claim will only be admitted if the insured life meets the requirements of the defined claim event, prior to their death.

No medical test or examination concluded after the insured life’s death will be considered when evaluating a claim.

Critical Illness Cover for Children

Only children who are permanent residents of the Republic of South Africa qualify.

All the insured life's biological or legally adopted children from their first to their 18th birthday (19 next birthday) qualify for the Critical Illness Cover for Children.

Momentum will not admit a claim under the critical illness benefit if any condition existed prior to the child becoming eligible for this benefit directly or indirectly brought about or accelerated the claim event. This includes all symptoms experienced by the child that could have disclosed the illness or condition prior to eligibility.

If both parents own a critical illness benefit, the child will qualify for a claim under both these benefits

The child critical illness benefit will not apply within the first twelve months following the birth or adoption of a child.

The benefit amount under the Critical Illness Cover for Children is the lesser of:

- 10% of the insured life's benefit amount at the time of a claim and
- R125 000.

A subsequent claim will be paid in the same category only if the claim event is more severe than previous claims in the same category. The amount that is paid will be based on the difference between the percentage payout for the new claim and the total percentage paid for that category (the "additional percentage payout"). In this case, the claim amount is calculated as the additional percentage payout, multiplied by the benefit amount.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount. (for ancillary benefits only).
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Homeloan Protector

Description

Momentum will:

- pay the full benefit amount as a lump sum if the insured life:
  - suffers a disability caused by a bodily injury or illness to such an extent that he is totally and permanently unable to perform the normal duties of his own occupation (up to the policy anniversary before the insured life's 65th birthday)
  - OR
  - meets the requirements of one of the defined functional impairment claim events (up to the policy anniversary before the insured life's 70th birthday)
  - OR
  - meets the requirements of one of the defined critical illnesses
    OR
- pay 10% of the insured life's benefit amount up to a maximum of R125 000 if the insured life's biological or legally adopted child meets the requirements of one of the defined critical illnesses
- make a lump payment after every three months of continuous unemployment as the result of the insured life being retrenched (up to the policy anniversary immediately preceding the insured life's 65th birthday), limited to a maximum of three payments. Each payment will be equal to 4% of the benefit amount

Special conditions

The Homeloan Protector is available on the Homeloan Package.

The benefit amount must be the same as the Death Benefit to which it is attached, subject to the maximum benefit amount limits

Once this benefit is added, no other disability or impairment, ancillary benefits may be attached to the stand-alone benefit to which this benefit is attached.

Type of benefit

Ancillary

Eligible lives

Lives are subject to age limits and underwriting.

Lives with an income of less than R6000 per month are not eligible for this benefit.

Ancillary benefits

Not applicable

Beneficiaries and cessions

The policyholder may not nominate beneficiaries.

Collateral cessions are not allowed.

Claim event

Occupational disability

An occupational disability is a disability caused by a bodily injury or illness to such an extent that the insured life is totally and permanently unable to perform the normal

duties of their own occupation (up to the policy anniversary before the insured life's 65th birthday).

The insured life will not qualify for a claim under the occupational disability criteria if the insured life is not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

Functional impairment

The claim events are not in any way linked to the insured life's ability to perform occupational activities.

The claim event is based on a medical impairment that occurs after the start date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment, and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage a specialist that Momentum have approved must declare the functional impairment total, permanent and continuous for the foreseeable future.

The insured life will not be required to undergo reasonable optimal treatment if a specialist that Momentum has approved has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with their treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Refer to Appendix 5 in the technical guide for the functional impairment claim events.

Critical Illness

The insured life or the insured life's biological or legally adopted child meets the requirements of one of the defined critical illness claim events.

Refer to Appendix 5 in the technical guide for the critical illness claim events.

Retrenchment

Retrenchment is the termination of employment by the insured life's employer as a result of "operational requirements". Operational requirements in this context means requirements based on the economic, technological, structural, or similar needs of an employer.

Termination of employment for the following reasons shall not be considered as retrenchment:

- Retirement (early, normal or ill-health)
- Resignation or voluntary retrenchment
- Dismissal
- A fixed term employment contract coming to an end
- Nervous breakdown, stress, burnout, disability or illness
- Retrenchment resulting from government action
- (The examples above should not be regarded as the only possible reason for termination of employment which would not be considered as retrenchment)

Momentum will admit:

- a maximum of two claims for retrenchment under this benefit.
- a claim if the insured life has been continuously employed in a permanent full-time occupation for at least two years of which one year must have been with the current employer. Self-employed individuals do not qualify for retrenchment cover.
- a retrenchment claim from the official date of retrenchment or the date on which the insured life received their last salary-payment, whichever date occurs last. The first payment will only be made after the waiting period has expired.

Claim amount

Momentum will:

- pay the full benefit amount as a lump sum if the insured life:
  - suffers a disability caused by a bodily injury or illness to such an extent that he is totally and permanently unable to perform the normal duties of his own occupation (up to the policy anniversary before the insured life's 65th birthday)
  - OR
  - meets the requirements of one of the defined functional impairment claim events (up to the policy anniversary before the insured life's 70th birthday)
  - OR
  - meets the requirements of one of the defined critical illnesses

  OR
- pay 10% of the insured life's benefit amount up to a maximum of R125 000 if the insured life's biological or legally adopted child meets the requirements of one of the defined critical illnesses or functional impairment claim events
- make a lump payment after every three months of continuous unemployment as the result of the insured life being retrenched (up to the policy anniversary immediately preceding the insured life's 65th birthday), limited to a maximum of three payments. Each payment will be equal to 4% of the benefit amount.

A retrenchment claim will not reduce the benefit amount on this benefit or any other benefit on the policy.

Any outstanding debt will be deducted from the claim amount.

Retrenchment benefit payments

Momentum will make a lump sum payment after every three months of continuous unemployment as the result of the insured life being retrenched (up to the policy anniversary before the insured life's 65th birthday), limited to a maximum of three payments. Each payment will be equal to 4% of the benefit amount.

This means that the retrenchment benefit payments will be made as follows (per retrenchment claim):

- 4% of the benefit amount as a lump sum after 3 months of continuous unemployment; plus
- 4% of the benefit amount as a lump sum after 6 months of continuous unemployment; plus
- 4% of the benefit amount as a lump sum after 9 months of continuous unemployment

The retrenchment benefit payments will end if:

- The insured life finds new employment before the next payment is due.
- The insured life stop providing proof of unemployment on a quarterly basis (through registration as an unemployed individual with the unemployment insurance fund).
- The Homeloan Protector benefit ends
- The final payment under the Retrenchment category has been made

Waiting period (occupational disability)

There is no explicit waiting period.

A claim will only be admitted once we have established the permanency of the disability according to our definition.

No claim will be admitted if the insured life dies before permanency is established.

Waiting period (retrenchment)

The lump sum claim amount under retrenchment will only be paid after the insured life has been continuously unemployed for at least three months.

No-claim period (retrenchment)

No claim will be paid if a claim arises from retrenchment or notification of retrenchment within three months from the starting date of the benefit.

When restarting the benefit, a new three-month period will apply.

Any outstanding debt will be deducted from the claim amount.

Critical Illness Cover for Children

Only children who are permanent residents of the Republic of South Africa qualify.

All the insured life's biological or legally adopted children from their first to their 18th birthday (19 next birthday) qualify for the Critical Illness Cover for Children.

Momentum will not admit a claim under the critical illness benefit if any condition that existed prior to the child becoming eligible for this benefit directly or indirectly brought about or accelerated the claim event. This includes all symptoms experienced by the child that could have disclosed the illness or condition prior to eligibility.

If both parents own a critical illness benefit, the child will qualify for a claim under both these benefits.

The child critical illness benefit will not apply within the first twelve months following the birth or adoption of a child.

The benefit amount under the Critical Illness Cover for Children is the lesser of:

- 10% of the insured life's benefit amount at the time of a claim and
- R125 000.

Only one claim per category will be paid.

A related claim is a claim where the claim event progressed from a previous claim event. We will treat a claim that is related to any previous claim in a different category, as if it is in the same category as the claim it progressed from.

A claim under the Critical Illness Cover for Children will not reduce the benefit amount on this benefit or any other benefit on the policy.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The payment of the full benefit amount.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Longevity Protector®– Disability

Description

Momentum will make longevity payments if the insured life meets the defined requirements. No payments will be made after the end of the benefit term.

Special conditions

This benefit is only available as an ancillary benefit on the following stand-alone benefits:

- Own Occupation Disability Benefit
- Comprehensive Disability Benefit
- ADW Disability Benefit
- Comprehensive ADW Disability Benefit
- Death Benefit (The Longevity Protector® may only be attached to Death Benefit if one of the disability benefits listed above are also attached as an ancillary).

If the disability benefit is removed the Longevity Protector® must also be removed.

This benefit is not available on term benefits.

This benefit is only available if the policyholder is one of the following:

- Natural person
- Trust with natural persons as beneficiaries
- Sole Proprietors.

This benefit cannot be added to disability benefits that taper or to business assurance policies.

The benefit payments are tax-free in terms of Momentum's current interpretation of prevailing law and practice.

Type of benefit

Ancillary

Eligible lives

All lives are eligible, subject to age limits and underwriting.

Age limits

	Level	LifeStage	Aggressive LifeStage	Compulsory %							
				3	4	5	6	7	8	9	10
Minimum entry age	15	15	40	15	15	15	27	30	32	35	38
Maximum entry age	55										
Expiry age	65										

Benefit term

The policyholder may choose one of the following benefit terms:

- Minimum term - 10 years
- To age 65

Benefit limits

Not applicable

Premium patterns

Will follow the main benefit to which it is attached.

Premium guarantee

Will follow the main benefit to which it is attached.

Additional features

The following additional features are available free of charge:

- Free Cover
- LifeReturns®

Ancillary benefits

Not applicable

Beneficiaries and cessions

Not applicable

Claim event

If attached to a stand-alone disability benefit:

The insured life must qualify for payment of the full benefit amount under the stand alone disability benefit to which this ancillary is attached.

For the conditions listed below, the insured life must satisfy the requirements for a 100% functional impairment claim event under the disability benefit to which this ancillary benefit is attached.

If attached to a Death Benefit (with ancillary disability benefit)**:**

The insured life must qualify for payment of the full benefit amount under the ancillary disability benefit that is also attached to the death benefit.

For the conditions listed below, the insured life must satisfy the requirements for a 100% functional impairment claim event under the disability benefit that is also attached to the Death Benefit.

Conditions

- Conditions of the spinal column: Any disorder or condition of the spinal column (ranging from the neck to the coccyx.
- Mental disorders: Any mental health disorder defined by the current version of the Diagnostic and Statistical Manual of Mental Disorders or equivalent diagnostic tool.
- Chronic Fatigue Syndrome or similar conditions: Similar conditions include (but are not limited to) encephalomyalgia, chronic fatigue immune dysfunction syndrome (CFIDS), myalgic encephalitis, postural orthostatic tachycardia syndrome (POTS), chronic tiredness, yuppie flu and fibromyalgia.

Claim amount

Momentum will pay 10% of the benefit amount paid under:

- the stand-alone disability benefit to which this ancillary is attached or
- the ancillary disability benefit attached to a Death Benefit.

General

Payments will be made every five years. The first payment will be five years after the insured life has met the defined requirements.

Payments will increase by the general increase in the South African consumer price index (CPI), capped at 15% per year, between the date of the disability claim payment and the date of longevity payment.

Claim payments will not reduce the life cover amount.

Once a claim is admitted, the policyholder will no longer have to pay the premium for the benefit and will not be allowed to make another claim under this benefit.

Waiting period

Not applicable

Longevity Enhancer

Momentum will pay a lump sum when the insured life reaches age 80. This payment will equal 20% of the final benefit amount under the disability benefit to which this ancillary is linked.

This payment will be made if:

- The insured life never submits a claim under the disability benefit to which this ancillary is linked.
- The disability benefit is converted to the maximum Functional Protector or Complete Functional Protector benefit amount allowed under the conversion option.
- The disability benefit must be converted to a Functional Protector or Complete Functional Protector before the end of the grace period.
- If the disability benefit is converted to a lesser amount, the payment is reduced proportionately. Functional Protector or Complete Functional Protector benefits taken out before the conversion date will be considered when determining whether the insured life has converted to the maximum Functional Protector or Complete Functional Protector benefit amount. *Refer to the relevant disability benefit to which this ancillary is linked for more information on the conversion option.*
- The insured life never submits a claim under the Functional Protector or Complete Functional Protector.
- The Functional Protector or Complete Functional Protector is kept in force until the insured life reaches age 80. The payment will be reduced proportionately if the Functional Protector benefit amount is reduced after the conversion. If the Functional Protector or Complete Functional Protector is cancelled before the insured life reaches age 80 no payment will be made.

Grace period: The grace period will end six months after the end of the benefit term of the disability benefit to which this ancillary is linked.

Final benefit amount refers to the benefit amount at the earlier of:

- the date of conversion to a Functional Protector or Complete Functional Protector
  OR
- the end of the benefit term of the disability benefit to which this ancillary is linked.

Retirement Booster

The allocation on the Longevity Protector® will be enhanced from 1.5% to 4.5%.

The allocation on the disability benefit to which this benefit is linked will receive an enhanced allocation of 4.5%.

If attached to a Death Benefit, the Death Benefit will not receive an enhanced allocation.

End of benefit

If the insured life qualifies for benefit payments these payments will end on the earliest of:

- the death of the insured life
- the end of the benefit term

This benefit ends on the earliest of:

- The death of the insured life.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.
- The end of the disability benefit to which this benefit is linked.

Ongoing assessments

To continue the payment of this claim, Momentum will require proof that the insured life is still alive every five years. Momentum will send the insured life a certificate of existence that must be sent back within the required time period, as stated on the certificate.

If the certificate of existence is not received within the required time period, benefit payments will be terminated.

Longevity Protector® – Critical Illness

Description

Momentum will make longevity payments if the insured life meets the defined requirements.

Special conditions

This benefit is only available as an ancillary benefit on the following stand-alone benefits:

- Complete Critical Illness Benefit
- Complete Enhanced Critical Illness Benefit

If the critical illness benefit is removed the Longevity Protector® will also be removed.

This benefit is only available if the policyholder is one of the following:

- Natural person
- Trust with natural persons as beneficiaries
- Sole Proprietors

This benefit can only be added to the whole of life benefits. It is not available on To age 65 or term benefits.

This benefit cannot be added to business assurance policies.

The benefit payments are tax-free in terms of Momentum's current interpretation of prevailing law and practice.

Ancillary benefits

Not applicable

Beneficiaries and cessions

Not applicable

Claim event

The insured life meets the requirements of one of the defined critical illness claim events.

Once a claim is admitted, no further premiums will be payable and no further claims will be allowed under this benefit.

Refer to Appendix 2 and Appendix 3 for the defined claim events.

Claim amount

Momentum will pay 10% of the benefit amount of the critical illness benefit to which this ancillary benefit is attached.

Payments are made every five years and the first payment will be five years after the insured life meets the defined requirements.

Payments are based on the benefit amount of the critical illness benefit at the time of payment. This means that claim payments will increase if the critical illness benefit amount increases due to voluntary premium or cover growth.

Claim payments will not reduce the benefit amount of the critical illness benefit to which this ancillary benefit is attached.

Survival period

Not applicable

Longevity Enhancer

Insured lives who reach the age of 80 without ever submitting a claim under the critical illness benefit to which this ancillary is attached will receive a payment equal to 20% of the critical illness benefit amount. This will be paid as a lump sum on survival to age 80.

This payment will not reduce the benefit amount of the critical illness benefit to which this ancillary benefit is attached.

Retirement Booster

The allocation on the Longevity Protector® will be enhanced from 1.5% to 4.5%.

The allocation on the critical illness benefit to which this benefit is attached will be enhanced from 1.5% to 4.5%.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the stand-alone benefit to which this benefit is attached.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Ongoing assessments

Momentum will require proof every five years that the insured life is still alive to continue the payment of the claim.

Momentum will send the insured life a certificate of existence that he will need to send back within the required period, as stated on the certificate.

All benefit payments will be terminated if Momentum does not receive the certificate of existence within the required period.

After five payments have been made under this benefit Momentum may require the insured life to undergo a reassessment to verify that the insured life still qualifies for a claim according to the claim event definitions. Payments According to the claim event definitions, payments will cease if the insured life no longer qualifies for a claim.

Claim event

The insured life must qualify for a full benefit amount payment under the Group Income Top-up Benefit to which this ancillary benefit is attached.

The insured life must be totally unable to perform the normal duties of his own occupation or satisfy the requirements for a 100% functional impairment claim event under the Group Income Top-up Benefit to which this ancillary benefit is attached.

For the following conditions, the insured life must satisfy the requirements for a 100% functional impairment claim event under the Group Income Top-up Benefit to which this ancillary benefit is attached:

- **Conditions of the spinal column:** Any disorder or condition of the spinal column (ranging from the neck to the coccyx).
- **Mental disorders:** Any mental health disorder defined by the current version of the Diagnostic and Statistical Manual of Mental Disorders or equivalent diagnostic tool.
- **Chronic Fatigue Syndrome or similar conditions:** Similar conditions include (but are not limited to) encephalomyalgia, chronic fatigue immune dysfunction syndrome (CFIDS), myalgic encephalitis, postural orthostatic tachycardia syndrome (POTS), chronic tiredness, yuppie flu and fibromyalgia.

The insured life must continue to receive a full benefit payment for at least five years (without interruption) to receive a first payment and every five years thereafter to receive additional payments.

Claim amount

Momentum will pay 50% of the sum of the full monthly benefit amounts under the Group Income Top-up Benefit during the preceding five-year period, with allowance for post-claim benefit amount increases.

Waiting period

Not applicable

Off period

Not applicable

Monthly Longevity Pay-out Option

The policyholder can choose to receive the longevity payments every month instead of every five years, provided that a full benefit payment has been made for at least two years (without interruption) under the Group Income Top-up Benefit to which this ancillary benefit is attached

Monthly payments will equal 50% of the full monthly benefit amount under the Group Income Top-up Benefit to which this ancillary benefit is attached.

Monthly payments will end on the date the last five yearly payments would have been made had this option not been selected.

Longevity payments will not be available every five years once the Monthly Longevity Pay-out option has been selected.

Longevity Enhancer

Momentum will pay a lump sum when the insured life reaches age 80. This payment will equal 36 times the final monthly benefit amount under the Group Income Top-up Benefit to which this ancillary is attached.

This payment will be made if:

- The insured life never submits a claim for two consecutive years or more under the Group Income Top-up Benefit to which this ancillary is attached
- The Group Income Top-up Benefit is converted to the maximum Functional Protector or Complete Functional Protector benefit amount allowed under the conversion option. The Group Income Top-up Benefit must be converted to a Functional Protector or Complete Functional Protector before the end of the grace period. If the Group Income Top-up Benefit is converted to a lesser amount, the payment will be reduced proportionately. Functional Protector or Complete Functional Protector benefits taken out before the conversion date will be considered when determining whether the insured life has converted to the maximum Functional Protector or Complete Functional Protector benefit amount. Refer to the Group Income Top-up Benefit for more information on the conversion option. The Functional Protector or Complete Functional Protector is kept in force until the insured life reaches age 80. The payment will be reduced proportionately if the Functional Protector benefit amount is reduced after the conversion. If the Functional Protector or Complete Functional Protector is cancelled before the insured life reaches age 80 no payment will be made.
- The insured life never submits a claim under the Functional Protector or Complete Functional Protector.

Grace period: The grace period will end six months after the selected retirement age under the Group Income Top-up Benefit to which this ancillary is attached.

Final monthly benefit amount refers to the monthly benefit amount at the earlier of:

- the date of conversion to a Functional Protector or Complete Functional Protector
  OR
- the end of the benefit term of the Group Income Top-up Benefit to which this ancillary is attached.

Retirement Booster

The allocation on the Longevity Protector® will be enhanced from 1.5% to 4.5%.

The allocation on the Group Income Top-up Benefit to which this benefit is attached, will be enhanced from 1.5% to 4.5%.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the stand-alone benefit to which this benefit is attached.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Ongoing assessments

To continue the payment of this claim, Momentum will require proof every five years, that the insured life is still alive. Momentum will send the insured life a certificate of existence that must be sent back within the required period, as stated on the certificate.

If the certificate of existence is not received within the required period, benefit payments will be terminated.

Future Cover - Death

Description

The benefit will give the policyholder the option to purchase life cover without proof of the insured life's insurability or health, except for a negative HIV test.

Special conditions

The policyholder must purchase a new stand-alone benefit when this option is exercised. (Subject to the minimum requirements).

A negative HIV test result is required when the policyholder exercises this benefit.

The policyholder may exercise this benefit on any existing stand-alone or ancillary benefit except for benefits where:

- a premium waiver claim is being paid
- a claim has been submitted.

The benefit amount increases applied and/or benefits issued under this option will be subject to the standard rates and standard terms and conditions applicable to the member's age, occupation, education, smoking status and pursuits at the time.

Ancillary benefits

The policyholder may add the following ancillary benefits:

- Premium Waiver (increasing or level) - Death
- Premium Waiver (increasing or level) - Comprehensive Disability
- Premium Waiver (increasing or level) - Functional Impairment
- Premium Waiver - Retrenchment

Options

The event must have occurred after the benefit's starting date.

The application to exercise future cover must be submitted within 60 days from the date the event occurred.

The maximum future cover amount that can be exercised on any event is the initial benefit amount multiplied by the option percentage.

The future cover amount that can be exercised is subject to the specified limits for certain events.

There is no minimum future cover amount that has to be exercised.

The total future cover exercised over all events cannot exceed the initial benefit amount.

Refer to Appendix 7 for the option events, percentages and required documentation.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- The full benefit amount is exercised.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Future Cover – Death and Disability

Description

The benefit will give the policyholder the option to purchase disability without proof of the insured life's insurability or health, except for a negative HIV test.

Special conditions

The policyholder must purchase a new stand-alone benefit or an ancillary benefit when this option is exercised.

A negative HIV test result is required when the policyholder exercises this option.

This benefit allows the policyholder to purchase a Death Benefit, Comprehensive Disability Benefit, Own Occupation Disability Benefit, Comprehensive ADW Disability Benefit, Functional Impairment Benefit or ADW Disability Benefit (provided the insured life qualifies for the chosen benefit).

If the policyholder exercises an option under an ancillary benefit, this amount will not count towards the total future cover amount exercised.

The policyholder may not exercise any options under this benefit to purchase additional disability or impairment cover if a disability or impairment claim for the insured life has been submitted with Momentum or any other life insurance company.

The policyholder may exercise this option on any existing stand-alone or ancillary benefit except for benefits where:

- a premium waiver claim is being paid
- a claim has been submitted.
- The benefit amount increases applied and/or benefits issued under this option will be subject to the standard rates and standard terms and conditions applicable to the member's age, occupation, education, smoking status and pursuits at the time.

Premium Waiver - Death

Description

Momentum will pay the premium of the stand-alone benefit and attached ancillary benefits while they are still in force on the death of the premium waiver insured life.

Type of benefit

Ancillary

Eligible lives

All lives are eligible subject to underwriting and age limits.

The Premium Waiver - Death will always be for a life other than the insured life of the stand-alone benefit.

Age limits

Age next birthday	
Minimum entry age	15 next birthday
Maximum entry age	65 next birthday
Maximum expiry age	75 next birthday

Benefit term

Benefit term	
Minimum	5 years if attached to a Term , “To age 65” or “To age 70” benefit
	10 years if attached to a Whole Life benefit
Maximum	20 years if attached to Term benefit
	50 years if attached to "To age 65" benefit
	55 years if attached to a “To age 70” benefit
	60 years if attached to a Whole Life benefit

If the term of the stand-alone benefit to which this premium waiver is attached, is longer than that of the premium waiver and a claim is admitted under the premium waiver benefit, Momentum will pay the premiums of the stand-alone benefit until the stand-alone benefit ends, provided that the benefit is still in force.

Claim event

The death of the premium waiver insured life.

Claim amount

Not applicable

Waiver in payment

If this benefit is attached to a stand-alone benefit that does not have a fixed term:

- If it necessary to increase the contract premium (after the guarantee term has expired) to cover the cost of the benefit(s), the waiver will not cover the additional premium to maintain the benefit(s) at the current level, if a waiver claim is being paid.
- The benefit amount(s) will be reduced accordingly.

Premium Waiver (level):

A Premium Waiver (level) is not available if a compulsory premium pattern is selected.

A level premium equal to the premium payable will be paid at the time of the waiver claim.

Any voluntary increases will end in the event of a valid claim.

Premium Waiver (increasing):

The initial premium that will be waived will equal the premium payable at the time of a waiver claim.

The premium that will be waived will cover any premium increases, but the increases will be limited to the minimum of the general increase in the CPI and 15% per annum. The premium increases will never be less than the chosen percentage for the Compulsory premium pattern.

A Premium Waiver (increasing) is not available if an increase option is not selected with a Level or LifeStage premium pattern.

End of benefit

This benefit ends on the earliest of:

- The death of the premium waiver insured life.
- The end of the stand-alone benefit to which this benefit is attached.
- The end of the benefit term.
- The admission of a claim under any other waiver benefit attached to the same stand-alone benefit.

- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Premium Waiver - Comprehensive Disability

Description

Momentum will pay the premium of the stand-alone benefit and attached ancillary benefits, while they are still in force, if the insured life covered under the premium waiver:

- suffers a disability caused by a bodily injury or illness to such an extent that they are totally and permanently unable to perform the normal duties of their own occupation (up to the policy anniversary before the insured life's 65th birthday)

  OR

- meets the requirements of one of the defined functional impairment claim events with a 100% payout.

Special conditions

The policyholder may only choose one of the following benefits per insured life as an ancillary on a stand-alone benefit:

- Premium Waiver - Comprehensive Disability
- Premium Waiver - Functional Impairment.

Type of benefit

Ancillary

Eligible lives

All lives are eligible subject to underwriting and age limits.

The Premium Waiver - Comprehensive Disability will always be for a life other than the insured life of the stand-alone benefit if the stand-alone benefit is a disability or an impairment benefit.

Age limits

Age next birthday	
Minimum entry age	15 next birthday
Maximum entry age	60 next birthday
Maximum expiry age	70 next birthday

Benefit term

Benefit term	
Minimum	5 years if attached to a Term, “To age 65” or “To age 70” benefit
	10 years if attached to a Whole Life benefit
Maximum	20 years if attached to Term benefit
	55 years if attached to a “To age 65” benefit
	60 years if attached to a “To age 70” or to a Whole Life benefit

If the term of the stand-alone benefit to which this premium waiver is attached, is longer than that of the premium waiver and a claim is admitted under the premium waiver benefit, Momentum will pay the premiums of the stand-alone benefit until the stand-alone benefit ends, provided that the benefit is still in force.

Benefit limits

Not applicable

Claim event

The insured life can qualify for a claim under either:

- Occupational disability or
- Functional impairment

Occupational disability

Occupational disability is a disability caused by a bodily injury or illness to such an extent that the insured life is totally and permanently unable to perform the normal duties of their own occupation.

The insured life will not qualify for a claim under the occupational disability criteria if the insured life is not gainfully employed at the time of the claim event occurring. Such a claim will be assessed against the impairment and illness criteria.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

Functional impairment

The claim events are not linked to the insured life's ability to perform occupational activities.

The claim event is based on a medical impairment that occurs after the start date of the benefit as diagnosed by an appropriate specialist (registered with the Health Professions Council of South Africa (HPCSA) and resulting in the specified functional restrictions defined below.

The insured life must undergo reasonable optimal treatment and their functional impairment will be determined after they have reached (reasonable) Maximal Medical Improvement (MMI). At this stage a specialist approved by Momentum must declare the functional impairment total, permanent and continuous for the foreseeable future.

The insured life will not be required to undergo reasonable optimal treatment if a specialist, that Momentum has approved, has established that the functional impairment is permanent, and that further treatment will not lessen the severity of the condition.

- Reasonable optimal treatment: This is the treatment that Momentum may reasonably expect the insured life to undergo according to the guidelines for the specific condition under the generally accepted medical practice at claim stage. The insured life is expected to comply with their treatment routine.
- Maximal Medical Improvement (MMI): A condition or state that is well stabilised and unlikely to change substantially in the next year with or without medical treatment. There may be some change over time, but further recovery is not expected. A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

Momentum will not pay a claim if the insured life is not receiving or is refusing the medical treatment they could reasonably be expected to undergo according to current best practice medical protocols and which could substantially improve or remove the condition being claimed for.

A panel of accredited medical specialists will determine how many Activities of Daily Living (ADL) the insured life can perform.

A claim will be admitted only if the claim event is a permanent condition.

Refer to Appendix 1 in the technical guide for the functional impairment claim events.

Claim amount

Not applicable

Waiver in payment

If this benefit is attached to a stand-alone benefit that does not have a fixed term:

- If it necessary to increase the contract premium (after the guarantee term has expired) to cover the cost of the benefit(s), the waiver will not cover the additional premium to maintain the benefit(s) at the current level, if a waiver claim is being paid.
- The benefit amount(s) will be reduced accordingly.

Premium Waiver (level):

A Premium Waiver (level) is not available if a compulsory or LifeStage premium pattern is selected.

A level premium equal to the premium payable will be paid at the time of the waiver claim.

Any voluntary increases will end in the event of a valid claim.

Premium Waiver (increasing):

The initial premium that will be waived will equal the premium payable at the time of a waiver claim.

The premium that will be waived will cover any premium increases, but the increases will be limited to the minimum of the general increase in the CPI and 15% per annum. The premium increases will never be less than the chosen percentage for the compulsory premium pattern.

A Premium Waiver (increasing) is not available if an increase option is not selected with a Level or LifeStage premium pattern.

Waiting period (occupational disability)

There is no explicit waiting period.

A claim will only be admitted once we have established the permanency of the disability according to our definition.

No claim will be admitted if the insured life dies before permanency is established.

Survival period (functional impairment)

There is no explicit survival period.

A claim will only be admitted if the insured life meets the requirements of the defined claim event, prior to their death.

No medical test or examination concluded after the insured life's death will be considered when evaluating a claim.

End of benefit

This benefit ends on the earliest of:

- The death of the premium waiver insured life.
- The end of the stand-alone benefit to which this benefit is attached.
- The end of the benefit term.
- The admission of a claim under any other waiver benefit attached to the same stand-alone benefit.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Waiver in payment

If this benefit is attached to a stand-alone benefit that does not have a fixed term:

- If it necessary to increase the contract premium (after the guarantee term has expired) to cover the cost of the benefit(s), the waiver will not cover the additional premium to maintain the benefit(s) at the current level, if a waiver claim is being paid.
- The benefit amount(s) will be reduced accordingly.

Premium Waiver (level):

A Premium Waiver (level) is not available if a compulsory or LifeStage premium pattern is selected.

A level premium equal to the premium payable will be paid at the time of the waiver claim.

Any voluntary increases will end in the event of a valid claim.

Premium Waiver (increasing):

The initial premium that will be waived will equal the premium payable at the time of a waiver claim.

The premium that will be waived will cover any premium increases, but the increases will be limited to the minimum of the general increase in the CPI and 15% per annum. The premium increases will never be less than the chosen percentage for the Compulsory premium pattern.

A Premium Waiver (increasing) is not available if an increase option is not selected with a Level or LifeStage premium pattern.

Survival period

There is no explicit survival period.

A claim will only be admitted if the insured life meets the requirements of the defined claim event, prior to their death.

No medical test or examination concluded after the insured life's death will be considered when evaluating a claim.

End of benefit

This benefit ends on the earliest of:

- The death of the premium waiver insured life.
- The end of the stand-alone benefit to which this benefit is attached.
- The end of the benefit term.
- The admission of a claim under any other waiver benefit attached to the same stand-alone benefit.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Premium Waiver – Retrenchment

Description

Momentum will pay the premium of the stand-alone benefit and attached ancillary benefits, for a fixed period of 12 months, if the premium waiver insured life is retrenched and meets the requirements of the retrenchment premium waiver.

Type of benefit

Ancillary

Eligible lives

This benefit is only available if the insured life has been continuously employed in a permanent full-time job for at least two years, of which at least one year must have been with his current employer.

This benefit is not available to the following individuals:

- Self-employed
- Individuals employed in a family business (including being a partner or director in a family business)
- Contract workers, seasonal workers, part-time workers (<25 hours per five day work week), temporary workers or casual workers
- Unemployed / home executives / students
- Professional sportspeople
- A director of a company
- A business owner

Beneficiaries and cessions

Not applicable

Claim event

Retrenchment is the termination of employment by the insured life's employer due to "operational requirements". Operational requirements in this context mean requirements based on the economic, technological, structural or similar needs of an employer.

Termination of employment for the following reasons shall not be considered retrenchment:

- Retirement (early, normal or ill-health)
- Resignation or voluntary retrenchment
- Dismissal
- A fixed-term employment contract coming to an end
- Nervous breakdown, stress, burnout, disability or illness.
- (The specific examples above should not be regarded as the only possible reason for termination of employment which would not be considered retrenchment)

Momentum will only admit a claim for this benefit if the insured life has been continuously employed in a permanent full-time job for at least two years, of which at least one year must have been with his current employer.

A claim under the Premium Waiver - Retrenchment benefit will have no impact on the other premium waiver benefits.

Momentum will admit a retrenchment claim from the official date of retrenchment or the date on which the insured life received their last salary-payment, whichever date occurs last. The first payment will only be made after the waiting period has expired.

Waiver in payment

The initial premium that will be waived will equal the premium payable at the time of a waiver claim.

The premium that will be waived will cover any premium increases, but the increases will be limited to the minimum of the general increase in the CPI and 15% per annum. The premium increases will never be less than the chosen percentage for the Compulsory premium pattern.

Payment period

Premiums will be waived for 12 months regardless of whether the insured life returns to gainful employment or not.

Waiting period

Momentum will waive the premium only after the insured life under the premium waiver has been retrenched for one month.

No-claim period for retrenchment

This benefit will not be paid if the insured life is retrenched or notified of retrenchment within six months from the start date of the benefit.

A new six-month period will apply when:

- restarting a benefit
- making an ad-hoc increase to the premium of the stand-alone benefit to which the premium waiver is attached. The new six-month period will only apply to the ad-hoc increase portion.

End of benefit

This benefit ends on the earliest of:

- The death of the premium waiver insured life.
- The end of the stand-alone benefit to which this benefit is attached.
- The end of the benefit term.
- The admission of a claim under any other waiver benefit attached to the same stand-alone benefit.
- The admission of a third retrenchment claim under this benefit
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Claim requirements

Refer to the Claim requirements section of this technical guide for information on the documents required to assess a claim under this benefit.

Professional Package 2

Description 2

Definition of a professional 2

Definition of a professional student 2

Myriad benefits 3

Claim Increase Booster for young professionals 3

Professional Package

Description

Momentum offers a special package to:

- Professionals
- Professional students.

Key features of the package include:

- Competitive premium rates
- Special benefit limits on selected benefits
- Use of Gross Professional Income (GPI) as a definition of income.

Definition of a professional

The following occupations/professions are allowed, subject to membership of the applicable statutory professional organisation and a qualification equivalent to at least a 4-year university degree:

- Doctor registered with the Health Professional Council of South Africa.
- Dentist registered with the Health Professional Council of South Africa.
- Psychologist registered with the Health Professional Council of South Africa.
- Pharmacist registered with the South African Pharmacy Council.
- Attorney, advocate or judge registered with the Law Society of South Africa or any societies for advocates.
- Chartered accountant or auditor registered with the Public Accountants and Auditors Board.
- Actuary registered with any global statutory actuarial societies (eg Institute of Actuaries/Faculty of Actuaries/Society of Actuaries).
- Certified Financial Planner (CFP) registered with the Financial Planning Institute.
- Architect registered with the South African Council for Architectural profession.
- Engineer registered as a professional engineer with the Engineering Council of South Africa.
- Veterinarian registered with the South African Veterinary Council.
- Optometrist registered with the Health Professional Council of South Africa.
- Physiotherapist registered with the Health Professional Council of South Africa
- Marine Biologist registered with the South African Association for Marine Biological Research (SAAMBR).
- Occupational Therapist registered with the Health Professional Council of South Africa
- Chiropractor registered with the Health Professional Council of South Africa.
- Biomedical Engineer registered as a professional engineer with the Engineering Council of South Africa.
- Construction Engineer registered as a professional engineer with the Engineering Council of South Africa.

The insured life must be practising one of the above occupations to qualify as a professional.

The insured life may be in private practice or employed.

Momentum may review this list from time to time.

Definition of a professional student

The insured life must be a full-time or part-time student that is expected to qualify for any of the abovementioned occupations/professions within 12 months.

Professional students will be rated as professionals.

A professional student has the option to apply for a Professional Package or a Student Package.

Myriad benefits

All Myriad benefits are available to professionals.

Certain benefits provide increased benefit limits for professionals. All other benefits have the same benefit amount limits as a normal Myriad offering.

Benefit	Maximum benefit amount
Complete Income Protector	R200 000
Group Income Top-up Benefit	R150 000
Income Enhancer - Complete Income Protector	R100 000
Complete Family Protector – Complete Income Protector	R200 000
Temporary Income Protector	R200 000
Temporary Group Income Top-up Benefit	R200 000
Income Enhancer – Temporary Income Protector	R100 000
Complete Family Protector – Temporary Income Protector	R200 000
Business Protector (Professional)	R300 000
Income Enhancer - Business Protector (Professional)	R150 000
Complete Family Protector – Business Protector (Professional)	R300 000
Critical illness benefits	R5 500 000
Comprehensive Living Benefit	R5 500 000
Homeloan Protector	R5 500 000

Claim Increase Booster for young professionals

In addition to the normal increase options, the monthly benefit amount will increase by an additional percentage for professional occupations (as defined by Momentum).

This additional increase will be based on the age next birthday of the insured life at the claim anniversary.

Age next birthday	Percentage increase
26 and younger	15%
27	12%
28	9%
29	6%
30	3%
31 and older	0%

Student Package

Description

Momentum offers a special package to the following students:

- Tertiary students
- Professional students.

Key features of the package include:

- Unique competitive premium rates
- Special conversion options
- Reduced minimum contract premiums.

Special conditions

The special conversion options and the reduced minimum contract premiums are only available as part of the Student Package.

The Student Package must be a separate Myriad policy.

The student will be the policyholder and the insured life.

The premium payer may be someone other than the student. There can only be one premium payer.

There may only be one insured life per policy.

Only students who qualify according to the definition (as specified) will qualify for the package.

Myriad benefits

The following benefits are available on the Student Package:

- Death Benefit
- Functional Impairment Benefit*
- Functional Protector
- Complete Functional Protector
- Complete Critical Illness Benefit*
- Accidental HIV Benefit
- Future Cover – Death & Disability

* These benefits can also be taken as ancillary benefits.

Definition of a tertiary student

Tertiary students may be either full-time or part-time students who meet the following requirements:

- Full-time students
  - The minimum qualification is matric (Grade 12).
  - Enrolled for at least a 3-year* undergraduate university degree, a 4-year* diploma or a postgraduate degree at any of the institutions registered with the Department of Education in the higher education and training band, which includes:
    - Universities
    - Technikons
    - Certain private higher education institutions.

  * This is the minimum time in which the qualification can be attained.

- Part-time students
  - The minimum qualification is a 3-year university degree.

- Studying towards any of the following occupations/professions:
  - Doctor registered with the Health Professional Council of South Africa
  - Dentist registered with the Health Professional Council of South Africa
  - Psychologist registered with the Health Professional Council of South Africa
  - Pharmacist registered with the South African Pharmacy Council
  - Attorney, advocate or judge registered with the Law Society of South Africa or any of the Societies for advocates
  - Chartered accountant or auditor registered with the Public Accountants and Auditors Board
  - Actuary registered with any of the global statutory actuarial societies (e.g. Institute of Actuaries/Faculty of Actuaries/Society of Actuaries)
  - Architect registered with the South African Council for the Architectural Profession
  - Engineer registered as a professional engineer with the Engineering Council of South Africa
  - Veterinarian registered with the South African Veterinary Council.
  - Optometrist registered with the Health Professional Council of South Africa.
  - Physiotherapist registered with the Health Professional Council of South Africa

Definition of a professional student

A full-time or part-time student that is expected to qualify for any of the following occupations/ professions within 12 months:

- Doctor registered with the Health Professional Council of South Africa
- Dentist registered with the Health Professional Council of South Africa
- Psychologist registered with the Health Professional Council of South Africa
- Pharmacist registered with the South African Pharmacy Council
- Attorney, advocate or judge registered with the Law Society of South Africa or any of the Societies for advocates
- Chartered accountant or auditor registered with the Public Accountants and Auditors Board
- Actuary registered with any of the global statutory actuarial societies (e.g. Institute of Actuaries/Faculty of Actuaries/Society of Actuaries)
- Certified Financial Planner (CFP) registered with the Financial Planning Institute
- Architect registered with the South African Council for the Architectural Profession
- Engineer registered as a professional engineer with the Engineering Council of South Africa
- Veterinarian registered with the South African Veterinary Council.
- Optometrist registered with the Health Professional Council of South Africa.
- Physiotherapist registered with the Health Professional Council of South Africa

Professional students will be rated as professionals.

A professional student may elect to apply for either a Professional Package or a Student Package.

Migration of tertiary student to professional student

When a student reaches his final academic year of study and qualifies as a professional student, Momentum will:

- re-calculate the premiums for students that qualify for the Professional Package using the professional rating and the student's age at the timeor

- increase the benefit amount to the maximum benefit amount that can be bought with the current premium, using the professional rating, subject to benefit limits. No additional underwriting is required.

Myriad benefits

Benefit	Maximum benefit amount
Death Benefit	R1 000 000
Functional Impairment Benefit*	R1 000 000
Functional Protector	R40 000
Complete Functional Protector	R40 000
Complete Critical Illness Benefit*	R1 000 000
Accidental HIV Benefit	R500 000
Future Cover – Death & Disability	R5 000 000

* These benefits can also be taken as ancillary benefits.

The student may add the Premium Waiver (increasing or level) - Functional Impairment as an ancillary benefit

Information on the abovementioned benefits may be found in the benefits section.

Age limitations

The entry ages are subject to the age limitations in the benefits section.

Premium guarantee

Standard

Increase options

- The student may choose either premium or benefit amount increases.
- Increase options will depend on the chosen Myriad benefit.

Additional features

LifeReturns®

Conversion Option for Functional Impairment Benefit

The student has the option to convert this benefit to:

- Comprehensive Disability Benefit, or
- Own Occupation Disability Benefit, or
- Complete Income Protector, or
- Temporary Income Protector
- (subject to the normal qualification criteria) without proof of insurability or health (except for a negative HIV test result).

The Conversion Option may only be exercised within three months after the start date of the student's first full-time employment in his chosen field of study.

If this benefit is converted to a Comprehensive Disability Benefit or Own Occupation Disability Benefit, a benefit amount of up to R2 000 000, subject to financial underwriting, can be purchased.

If this benefit is converted to a Complete Income Protector or Temporary Income Protector:

- The total benefit amount under the Complete Income Protector or Temporary Income Protector issued under this Conversion Option may never be more than the lesser of:
  - R20 000 per month and
  - 75% of the student's net income at the time of the increase.
- The following increase options are available:
  - the benefit amount may be increased by up to 100% within three months after the first anniversary of the student's first full-time employment in his chosen field of study
  - the benefit amount may be increased by the same amount as on the first anniversary within three months after the second anniversary of the student's first full-time employment in his chosen field of study.

- If the Functional Impairment Benefit is an ancillary benefit:
  - The student has the option to convert this benefit to the ancillary Comprehensive Disability Benefit or Own Occupation Disability Benefit (subject to the normal qualification criteria) without proof of insurability or health (except for a negative HIV test result).
  - This Conversion Option can only be exercised within three months after the start date of first full-time employment in his chosen field of study.

General rules

This Conversion Option is only available to students that were accepted at standard rates and without any exclusion.

Written notice of the student's intention to exercise this Conversion Option must be received by Momentum within three months after the start date of the first full-time employment in his chosen field of study.

If a disability or impairment claim has been submitted for the student with Momentum or any other life insurance company, the student may not exercise any of the options under this benefit.

Only claims in respect of events that happened after the conversion/ increase date will be admitted under the benefit and/or any increase in benefit amount issued under this Conversion Option.

The benefit and/or any increase in benefit amount issued under this option will be subject to the standard rates and standard terms and conditions applicable to the student's age, occupation, education, smoking status and pursuits at the time.

The benefit and/or any increase in benefit amount issued under this option will be subject to financial underwriting.

A seven-day or 14-day waiting period under the Complete Income Protector or Temporary Income Protector may only be selected if, at the time of the conversion, the student has not suffered from or does not suffer from any disease, disorder or impairment that requires frequent hospitalisation or treatment, time off work, confinement to a bed/home, including (but not limited to) for example bronchitis, gout, depression, back pain, migraine and asthma.

Only claims in respect of events that happened after the conversion/ increase date will be admitted under the benefit and/or any increase in benefit amount issued under this Conversion Option.

Conversion Option for Functional Protector or Complete Functional Protector

The student has the option to:

- convert this benefit to the Complete Income Protector or Temporary Income Protector with a benefit amount of up to 3 times the benefit amount under this benefit, or
- purchase the Complete Income Protector or Temporary Income Protector in addition to this benefit with a benefit amount of up two times the benefit amount under this benefit (subject to the normal qualification criteria) without giving Momentum proof of insurability or health (except for a negative HIV test result). The Conversion Option may only be exercised within three months after the start date of the student's first full-time employment in his chosen field of study.
- If the student does not exercise the full benefit amount that is available on the conversion date, the balance may be applied as follows:
  - the benefit amount under the Complete Income Protector or Temporary Income Protector may be increased by up to 100% within three months after the first anniversary of first full-time employment in his chosen field of study
  - the benefit amount under the Complete Income Protector or Temporary Income Protector may again be increased by the same amount as on the first anniversary within three months after the second anniversary of first full-time employment in his chosen field of study.
- The total benefit amount under the Complete Income Protector or Temporary Income Protector may never be more than the lesser of:
  - the benefit amount that was available to the student on the conversion date and
  - R20 000 per month and
  - 75% of the student's net income at the time of the increase.

General rules

This Conversion Option is only available to students that were accepted at standard rates and without any exclusions.

Written notice of the student's intention to exercise this Conversion Option must be received by Momentum within three months after the start date of the first full-time employment in his chosen field of study.

If a disability or impairment claim has been submitted for the student with Momentum or any other life insurance company, the student may not exercise any of the options under this benefit.

Only claims in respect of events that happened after the conversion/ increase date will be admitted under the benefit and/or any increase in benefit amount issued under this Conversion Option.

The benefit and/or any increase in benefit amount issued under this option will be subject to the standard rates and standard terms and conditions applicable to the student's age, occupation, education, smoking status and pursuits at the time.

The benefit and/or any increase in benefit amount issued under this option will be subject to financial underwriting.

A seven-day or 14-day waiting period under the Complete Income Protector or Temporary Income Protector may only be selected if, at the time of the conversion, the student has not suffered from or does not suffer from any disease, disorder or impairment that requires frequent hospitalisation or treatment, time off work, confinement to a bed/home, including (but not limited to) for example bronchitis, gout, depression, back pain, migraine and asthma.

Only claims in respect of events that happened after the conversion/ increase date will be admitted under the benefit and/or any increase in benefit amount issued under this Conversion Option.

Homeloan Package

Description

Momentum offers a special package to lives who have recently applied for a new mortgage bond or increased their existing mortgage bond.

Additional features

The following features are available free of charge on the Homeloan Package:

- Immediate Cover (Death Benefit only)
- Terminal Illness (Death Benefit only)
- Instant Cash (Death Benefit only)
- Free Cover
- LifeReturns®
- Homeloan Free Cover (Only applicable to the Death Benefit if a Homeloan Protector benefit has been attached)
  - If the policyholder specifies a future starting date on the policy and the policy contains a Homeloan Protector, Momentum will pay the full benefit amount, limited to a maximum of R3 million, only under the Homeloan Protector or the Death Benefit to which it is attached.
  - The selected starting date may only be up to 3 months from the start date.

Myriad benefits

The following stand-alone benefits are available on the Homeloan Package:

- Death Benefit
- Modified Death Benefit
- Temporary Income Protector (all waiting periods and payment period allowed)

The following ancillary benefits may be included on the Death Benefit:

- Own Occupation Disability Benefit
- ADW Disability Benefit
- Homeloan Protector
- Future Cover - Homeloan (only available on the Homeloan Package)
- Premium Waiver - Death
- Premium Waiver - Comprehensive Disability
- Premium Waiver - Functional Impairment
- Premium Waiver - Retrenchment

The benefit amount of a stand-alone benefit and any ancillary benefits must be the same, subject to the maximum benefit amount limits.

The Own Occupation Disability Benefit may not be added to the Death Benefit as an ancillary if the Homeloan Protector has been added.

Benefit limits

Benefit	Maximum benefit amount
Death Benefit	None, subject to financial underwriting
Modified Death Benefit	R5 000 000
Temporary Income Protector	R150 000 / R200 000 (professionals)
Own Occupation Disability Benefit	R25 000 000
ADW Disability Benefit	R25 000 000

Benefit	Maximum benefit amount
Homeloan Protector	R5 000 000/ R5 500 000 (professionals)
Future Cover - Homeloan	R 5000 000

Refer to the individual benefit sections for more information on each benefit.

Future Cover – Homeloan

Description

This benefit will give the policyholder the option to increase the benefit amount under the existing Death Benefit to which this benefit is attached and any ancillary benefits attached to it, without evidence of insurability or health, except for a negative HIV test.

Special conditions

Future Cover - Homeloan is only available on the Homeloan Package.

When the policyholder exercises this option, a negative HIV test result is required.

The policyholder may increase the benefit amount of the Death Benefit to which it is attached and the ancillary benefits attached to it except for benefits on which a premium waiver claim is being paid.

The policyholder may not exercise any of the options under this benefit to purchase additional disability, impairment cover or critical illness cover if a disability, impairment or critical illness claim for the insured life has been submitted with Momentum or any other life insurance company.

If the existing Death Benefit has a disability, impairment or critical illness ancillary benefit attached to it, the ancillary benefit amount will increase by the same amount as the stand-alone benefit amount. The ancillary benefit amount increase will not count towards the total future cover amount exercised.

The benefit amount increases applied under this benefit are subject to the maximum benefit amount limits that apply at the time.

The benefit amount increases applied and/or benefits issued under this option will be subject to the standard rates, and standard terms and conditions applicable to the insured life's age, occupation, education, smoking status and pursuits at the time.

Type of benefit

Ancillary

Eligible lives

All lives accepted without loadings are eligible subject to underwriting and age limits.

Age limits

Age next birthday	
Minimum entry age	15 next birthday
Maximum entry age	55 next birthday
Maximum expiry age	65 next birthday

Benefit term

Benefit term	
Minimum	5 years
Maximum	10 years

Benefit limits

R250 000	R5 000 000

Premium patterns

Level

Premium guarantee

The premium is guaranteed for the term of the benefit.

Increase options

Not available

Additional features

LifeReturns®

Ancillary benefits

Not applicable

Options

The application to exercise future cover can be made on the registration of a new or an increase in the existing mortgage bond.

The registration of or increase in the mortgage bond must have occurred after the starting date of the benefit.

The application to exercise future cover must be made within five days from the date of the registration of the mortgage bond.

The maximum future cover amount that can be exercised is limited to the mortgage bond amount. There is no minimum future cover amount that has to be exercised.

The total future cover exercised cannot exceed the initial option amount.

Requirements for exercising an option

Proof of registration of a new mortgage bond or increase in the mortgage bond is required to exercise future cover.

Additional information may be required.

End of benefit

This benefit ends on the earliest of:

- The death of the insured life.
- The end of the benefit term.
- the exercising of the full option amount.
- The cancellation of the policy or benefit as a result of:
  - any event covered in the policy contract
  - notification from the policyholder.

Appendix 1 - Functional impairment claim events

The claim amount is dependent on the severity of the permanent impairment:

- Claims criteria for impairment benefits
- The impairment must be moderate or severe (based on the specific definitions).
- The impairment must be permanent.
- No loss of income is required.
- The claim events are not in any way linked to the insured life's ability to perform occupational activities.
- Impairments include medical and physical impairment definitions, and Activities of Daily Living criteria (ADL).

25%, 50%, 75% and 100% benefit amount payouts:

The tiered approach covers both severe and moderate impairments. The severity of the permanent impairment determines the level of claim payable.

- Functional Impairment
- Comprehensive ADW Disability Benefit
- Comprehensive Disability Benefit
- Complete Income Protector**
- Temporary Income Protector
- Business Overheads Protector
- Business Protector (Self Employed)
- Business Protector (Professional)
- Group Income Top-up Benefit
- Temporary Group Income Top-up Benefit
- Complete Functional Protector*
- Comprehensive Living Benefit

Note: The policyholder may not claim under the benefit after the policy anniversary immediately preceding the insured life's chosen benefit term.

100% benefit amount payout

The full benefit (100% of the benefit amount) is paid in the event of a severe impairment.

- Own Occupation Disability Benefit
- ADW Disability Benefit
- Education Protector - Death and Disability
- Education Protector - Death and Impairment
- Premium Waiver - Comprehensive Disability
- Premium Waiver - Functional Impairment
- Functional Protector*
- Homeloan Protector

Complete Functional Protector and Functional Protector*

The following claim events excluded for Complete Functional Protector and Functional Protector:

- Hearing
- Speech
- Facial disorders and/or disfigurement
- Cranial nerve VII (facial nerve)

The insured life will not be able to submit a claim for any of the 25% functional impairment events if that event occurs after the benefit anniversary immediately preceding the insured life's 70th birthday.

If the insured life met the requirements for a 25% functional impairment severity before the stipulated benefit anniversary (other than for Hearing) and received a payout or a series of payouts and after undergoing a reassessment at age 70 still qualifies for a payout, the payment will continue until death.

All claim events in the following categories will not qualify for a claim payment after the stipulated benefit anniversary, even in instances where the insured life qualified for a claim before the benefit anniversary (preceding the insured life's 70th birthday):

- Hearing
- Speech
- Facial disorders and/or disfigurement
- Cranial nerve VII (facial nerve)
- Peripheral venous disease

Refer to the benefit section for details on the claim event payments for Complete Income Protector (Whole Life)

• FEV1 stands for "Forced expiratory volume in 1 second". • FVC stands for "Forced vital capacity". • DCO stands for "Diffusing capacity for carbon monoxide". A pulmonologist must perform the above tests and 3 readings should be recorded over a period of 3 months. Pulmonary function tests, performed on standardised equipment with validated administration techniques, provide the framework for evaluation of respiratory system impairment. Spirometric testing equipment and administration techniques must conform to the guidelines of the 1994 ATS (American thoracic society) Statement on Standardisation of Spirometry.										
Gastro-intestinal tract and liver and biliary disease										
• 15% weight loss below desirable weight due to organic disease of the gastro-intestinal tract as confirmed by a gastroenterologist or other specialist (refer to tables in AMA Guide) OR • Progressive chronic liver disease with at least 2 of the following: – S-bilirubin in the range of 34-51 micromol/L – S-albumin in the range of 30-35 g/L – Prothrombin time: 4-6 sec prolonged / INR: 1.7-2.3 – Ascites easily controlled with medical therapy. OR • Partial faecal incontinence unresponsive or not amenable to therapy with medical evidence of organic disease. Permanent irreversible skin disorders that is systemic in nature and on continuous treatment for at least three months.	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%
Activities of Daily Living (ADL)										
Score of 4 or more on the Activities of Daily Living (ADL) scale.	×	50%	×	50%	50%	50%	×	×	×	50%
Score of 6 or more on the Activities of Daily Living (ADL) scale.	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%
• This category caters for any diseases and disorders that may not fall into any of the Schedule of Definitions as listed above, but might still incapacitate the insured life enough to warrant an impairment benefit. • An insured life with a combination of symptoms and signs that do not qualify for a benefit under any one system listed in the Schedule of Definitions above will be assessed under the Activities of Daily Living (ADL) category. • These Activities of Daily Living (ADL) will be used to determine the level of impairment.										

* Note the claim events not covered by Functional Protector or Complete Functional Protector

** Refer to the benefit section or front page of this schedule for details on the claim event payments for Complete Income Protector (Whole Life)

Activities of Daily Living

- The Activities of Daily Living Scale works on a points system. Only one item in each of the seven categories may be checked before the total score is calculated.
- The level of benefit that we pay depends on the score achieved:

Percentage of benefit	Score
50%	Score of 4 or more
100%	Score of 6 or more.

- The insured life must be totally and continually unable to perform the specified Activity of Daily Living, with no possibility of improvement in the future (i.e. Maximum Medical Improvement must have been reached). Suitable treatment and/or rehabilitation options must be followed before the benefit is paid.
- The scales are used to assess the insured life's current ability to perform the following activities, with the use of the appropriate assistive aids and appliances where necessary. Where an assistive device is available but the insured life's chooses not to make use of it, the criteria will be assessed based on the ability to perform the task with the use of the assistive device. Note that one and only one criterion may be selected in each category.

Activity	Definitions		
1. Washing	Level 1:	The insured life is able to wash without physical assistance or supervision and may enter and exit the bath or shower without the assistance of another person.	0
	Level 2:	The insured life needs some supervision with bathing or showering and needs the assistance of another person when entering and exiting the bath.	1
	Level 3:	The insured life relies entirely on the assistance of another person to wash, bath or shower.	2
2. Dressing	Level 1:	The insured life can independently put on or take off all garments usually worn, including securing and unfastening garments, and if appropriate, any braces, artificial limbs or other surgical appliances	0
	Level 2:	The insured life always requires the assistance of another person in fastening garments and, if appropriate, any braces, artificial limbs or other surgical appliances usually worn, but can dress himself.	1
	Level 3:	The insured life cannot dress himself at all and needs the assistance of another person in the selection and application of all garments, including all braces, artificial limbs or other surgical appliances.	2
3. Eating and feeding	Level 1:	The insured life is able to eat independently once the food has been prepared and made available.	0
	Level 2:	The insured life is able to feed himself, but some assistance is always required (e.g. in cutting food).	1
	Level 3:	The insured life must always be fed by another person due to his physical inability to feed himself.	2
4. Toileting	Level 1:	The insured life has full control over bladder and bowel functions or possibly experiences infrequent incontinence but takes his own precautionary measures so that physical assistance is not required.	0
	Level 2:	The insured life experiences periodic occurrences of incontinence despite having taken precautionary measures such as the use of protective undergarments or surgical appliances.	1

Activity	Definitions		
	Level 3:	The insured life has total incontinence of bladder or bowel, or provision of a permanent catheter or colostomy is required.	2
5. Physical activity	Level 1:	The insured life is able to move independently between indoor rooms on a level surface with at most the aid of a walking cane or other assistive device (including a wheelchair).	0
	Level 2:	The insured life requires partial physical assistance from another person, even with the use of support apparatus and a walking cane or other assistive device (including a wheelchair), in order to move between rooms on a level surface.	1
	Level 3:	The insured life requires constant physical assistance from another person for mobility between indoor rooms, despite the use of appropriate support apparatus, walking cane or wheelchair.	2
6. Transferring	Level 1:	The insured life moves independently of the assistance of another person, and may transfer from bed to chair independently with, at most, the assistance of a walking cane or other ambulatory device.	0
	Level 2:	The insured life moves independently of physical assistance but uses support apparatus and transfers from bed to chair can be achieved with, at most, the assistance of a walking cane or other ambulatory device.	1
	Level 3:	The insured life relies partially on the assistance of another person to move. Transfers between bed and chair can only be achieved with the assistance of another person.	2
	Level 4:	The insured life is bedridden and relies entirely on the assistance of another person for transfers.	4
7. Cognitive Impairment	Level 1:	The insured life's cognitive ability is unimpaired regardless of any presence of irreversible cognitive deterioration or damage that is organic in nature.	0
	Level 2:	The insured life medically requires periodic assistance or direct supervision to perform activities of daily living, due to deterioration in or damage to cognitive ability, which is irreversible and organic in origin. This must be measured by clinical evidence and standardised neuropsychological testing that a neurologist or psychiatrist has confirmed.	2
	Level 3:	The insured life medically requires constant assistance to perform the above activities of daily living, due to deterioration in or damage to cognitive ability that is irreversible and organic in nature. This must be measured by clinical evidence and standardised neuropsychological testing that a neurologist or psychiatrist has confirmed.	6

Clinical Dementia Rating (CDR)

	Impairment level and CDR Score				
	None - 0	Question - 0.5	Mild - 1.0	Moderate - 2.0	Severe - 3.0
Memory (M)	No memory loss or sight inconsistent forgetfulness	Consistent sight forgetfulness; partial recollection of events; "benign" forgetfulness	Moderate memory loss; more marked for recent events; defect interferes with everyday activities	Severe memory loss; only highly learned material retained; new material rapidly lost	Severe memory loss; only fragments remain
Orientation (O)	Fully oriented	Fully oriented except for slight difficulty with time relationships	Moderate difficulty with time relationships; oriented for place at examination; may have geographic disorientation elsewhere	Severe difficulty with time relationships; usually disoriented to time, often to place	Oriented to person only
Judgement and problem solving (JPS)	Solves everyday problems and handles business and financial affairs well; judgement good in relations to past performances	Slight impairment in solving problems, similarities and differences	Moderate difficulty coping with problems, similarities and differences; social judgement usually in place.	Severely impaired in handling problems, similarities and differences; social judgement usually impaired	Unable to make judgements or solve problems
Community Affairs (CA)	Independent function at usual level in job, shopping, volunteer and social groups	Slight impairment in these activities	Unable to function independently at these activities, although may still be engaged in some; appears normal to casual inspection	No pretence of independent function outside home Appears well enough to be taken to functions outside a family home	No pretence of independent function outside home Appears too ill to be taken to functions outside a family home
Home and Hobbies (HH)	Life at home, hobbies, and intellectual interests well maintained	Life at home, hobbies and intellectual interests slightly impaired	Mild but definite impairment of function at home; more difficult chores abandoned; more complicated hobbies and interests abandoned	Only simple chores preserved; very restricted interests, poorly maintained.	No significant function in home
Personal Care (PC)	Fully capable of self-care	Fully capable of self-care	Needs prompting	Requires assistance in dressing, hygiene, keeping of	Requires much help with personal care;

Cardiac and arterial system	Moderate heart attack of specified severity	50%	100%	100%		Yes
Cardiac and arterial system	Heart attack with permanent mild impairment in function	75%	100%	100%	Yes	Yes
Cardiac and arterial system	Heart attack with permanent severe impairment in function	100%	100%	100%	Yes	Yes
Catch-all	Any disease, where the severity of the disease that has resulted in a Whole Person Impairment (WPI) > 35% and the percentage is dependent on the system or systems that are affected. It will be assessed according to the criteria stipulated in AMA Guidelines 6th Edition.	100%	100%	100%	Yes	Yes
	Any Whole Person Impairment as a result of traumatic injury or mental and behavioural disorders will not be covered by this category. WPI scores are determined when the condition is permanent at optimal treatment. A payment will only be made under this category if the condition suffered from does not qualify for a claim payment under any of the other categories listed above.					
Connective tissue diseases	Definite diagnosis of one of the listed Connective Tissue Disease (below), and failed response to disease-modifying regimens, including biologic disease-modifying anti-rheumatic drugs for a minimal period of 6 months. Only the connective tissue are listed below covered under this definition: • Progressive systemic sclerosis (scleroderma) • Rheumatoid arthritis • Systemic lupus erythematosis • Sarcoidosis • Polyarteritis nodosa • Giant cell arteritis • Wegener's granulomatosis	50%	50%	100%

- ** This applies to the following benefits: Complete Income Protector; Temporary Income Protector; Business Protector (Professional); Business Protector (Self Employed); Business Overheads Protector; Group Income Top-up Benefit; Temporary Group Income Top-up Benefit

Appendix 3 - Critical illness claim events

	Critical illness	Longevity protection	Income protection
Cancer			
Cancer develops when cells in the body begin to grow out of control. Normal cells grow, divide, and die. Instead of dying, cancer cells continue to grow and form new abnormal cells. Cancer cells often travel to other body parts where they grow and replace normal tissue. The diagnosis must be confirmed with histology and supported by appropriate specialist reports with disease staging and relevant oncology treatment.			
All in -situ cancers (that are specifically listed) must be supported by the appropriate histological and imaging (i.e. CT and/or MRI) findings All Grade I brain tumours (WHO classification) will be considered under the benign brain tumour category. Histological confirmation is required for Brain tumours (WHO grade II to IV) and there is no requirement to undergo treatment for these. The following are specifically excluded, unless defined as a claim event: • all skin cancers, (except invasive malignant melanoma's and lentigo melanoma's that have progressed to at least TNM classification of T1aN0M0). • all conditions which are histologically described as pre-malignant or cancer in situ unless specifically listed as a claim event.	✓	✓	✓
Early cancer			
• Histological confirmation of a malignant tumour which is characterised by the growth of malignant cells without the invasion of surrounding tissue. The tumour must be classified as tumour in situ (Tis) according to the TNM classification system unless otherwise specified. The diagnosis must be confirmed with histology and supported by appropriate specialist reports with/and relevant oncology treatment. The claim event qualify for a 15% payout of the benefit amount to a maximum of R100 000.			
• Carcinoma in situ of one or both ovaries for which an oophorectomy has been performed. • Carcinoma in situ of the larynx for which a total laryngectomy has been performed. • Carcinoma in situ of the stomach defined as intraepithelial tumour without invasion of the lamina propria for which a partial or total gastrectomy has been performed. • Carcinoma in situ of the vagina or vulva for which a hysterectomy has been performed or for which other surgery defined as a skin flap or skin graft has been performed. • A neuroendocrine tumour of low malignant potential for which surgery has been performed. • Carcinoma in situ of the oesophagus for which surgery to remove the tumour has been performed. This excludes treatment by any other method and also any treatment for Barrett's oesophagus. • Carcinoma in situ of the urinary bladder as confirmed histologically. This excludes non-invasive papillary carcinoma and Stage Ta bladder. • Lobular carcinoma in situ or ductal carcinoma in situ of the breast resulting in chemotherapy, lumpectomy or breast conserving. • Carcinoma in situ of the cervix uteri or cervical intraepithelial neoplasia grade 3 (CIN 3) for which a hysterectomy has been performed. This excludes all other forms of treatment including trachelectomy (removal of the cervix), loop excision, laser surgery, conisation and cryosurgery.	✓		

	Critical illness	Longevity protection	Income protection
Cardiac and arterial system			
The cardiac and arterial system combined is known as the cardiovascular system. The cardiovascular system circulates blood throughout the body, includes the heart, veins, and arteries. Its main function is to transport oxygen and nutrients to all areas of the body and removes carbon dioxide and other wastes. All cardiac events that occur within 30 days of each other will be considered as a single claim event. The number of payments for coronary artery stenting will be limited to 3 payments. **Heart attack** Myocardial infarction (MI) / heart attack is the irreversible death of heart muscle secondary to prolonged ischemia. This usually results from an imbalance between oxygen supply and demand. The appearance of raised cardiac enzymes in the circulation generally indicates death of heart muscle. Acute myocardial infarction (MI) refers to the spectrum of clinical presentations ranging from ST-segment elevation heart attacks (STEMI) to non–ST-segment elevation heart attacks (NSTEMI). A full cardiologist's or cardiac specialist's report confirming that the signs and symptoms equate to the diagnosis; with raised cardiac enzymes and relevant ECG findings should be compatible with diagnosis of myocardial infarction. The evidence must show a definite acute myocardial infarction. Other acute coronary syndromes, including but not limited to angina, are not covered by this definition.			
Level D: Mild heart attack of specified severity Evidence by no ECG changes and the following criteria: 1. Compatible clinical symptoms 2. Raised cardiac biomarkers defined as any one of the following Troponin or Non-Troponin Markers: • Trop T > 0.5 ng/ml (500ng/L) < 1.0ng/ml (1000 ng/L) or • Trop I > 0.25ng/ml (250 ng/L) < 0.5 ng/ml (500ng/L), or • Raised CK-MB mass (defined below), or > above the upper limit of normal laboratory reference range but below 2 times the upper limit of normal laboratory reference range in acute presentation phase > Raised above the upper limit of normal laboratory reference range but below 4 times the upper limit of normal laboratory reference range post intervention • Total CPK elevation (defined below) > Raised above the upper limit of normal laboratory reference range but below 2 times the upper limit of normal laboratory reference range in acute presentation phase, with at least 6% being CK-MB	✓		

	Critical illness	Longevity protection	Income protection
Level C: Moderate heart attack of specified severity This is defined as the death of heart muscle, due to inadequate blood supply, as evidenced by any of the following combinations of criteria: • Compatible clinical symptoms AND raised cardiac biomarkers OR • Compatible clinical symptoms AND new pathological Q-waves on ECG as defined in the ASISA definitions. OR • New pathological Q-waves on ECG as defined in Annexure A (b) AND raised cardiac biomarkers OR • ST-segment and T-wave changes on ECG indicative of myocardial injury as defined in the ASISA definitions AND raised cardiac biomarkers Where raised cardiac biomarkers are referenced above, they are defined as any one of the following Troponin or Non-Troponin Markers: • Trop T > 1.0ng/ml (1000 ng/L) or • Trop I > 0.5 ng/ml (500ng/L), or • Raised CK-MB mass (defined below), or – Raised 2 times or more above the upper limit of normal laboratory reference range in acute presentation phase – Raised 4 times or more above the upper limit of normal laboratory reference range post intervention • Total CPK elevation (defined below) – Raised 2 times or more the upper limit of normal laboratory reference range in acute presentation phase, with at least 6% being CK-MB Please refer to the ASISA claim event definitions (at the end of the critical illness definitions) for details on reference ranges, including Sensitive Troponin Markers)	✓	✓	✓
Level B: Heart attack with mild permanent impairment in function A heart attack that meets the criteria as defined under Moderate Heart Attack of specified severity, with permanent impairment in one or more of the following functional criteria, as measured 6 weeks post-infarction: Criterion: Value METS: 2-7 LVEF: 30% - 50% LVEDD: 59 - 72 Ultrasound FS in %: 16% - 25%	✓	✓	
Level A: Heart attack with severe permanent impairment in function A Heart attack that meets the criteria as defined under Moderate Heart Attack of specified severity, with permanent impairment in one or more of the following functional criteria, as measured 6 weeks post-infarction: Criterion: Value NYHA classification: Class 4 METS: 1 or less LVEF: < 30% LVEDD: > 72 Ultrasound FS in %: < 16%			

	Critical illness	Longevity protection	Income protection
If more than one functional criterion is impaired, but their values do not conform to one severity level (for example one impaired value is Level A and another Level B), the final severity level should be determined by giving preference to the more objective criteria, i.e. in the following order: i. LVEF ii. LVEDD iii. Ultrasound FS iv. METS v. NYHA	✓		
Cardioversion and defibrillation Electrical cardioversion therapy. Medical cardioversion is specifically excluded from this definition	✓		
Percutaneous Transluminal Coronary Angioplasty (PTCA) and Coronary Artery Bypass Grafting (CABG). Severe ischaemic heart disease for which a cardio-thoracic surgeon performs a balloon angioplasty with/without stent, laser treatment, rotablation, atherectomy or bypass surgery with vascular grafts. Keyhole techniques are included.	✓		✓
Narrowing of a carotid artery Narrowing of either one or both of the carotid arteries, proven by an arteriogram, and the narrowing being at least 70% or of such a severity that it requires surgical repair by carotid artery bypass grafting, endarterectomy or the insertion of a stent.	✓		✓
Conditions of the aorta A aortic aneurysm threatening to rupture, and of sufficient severity that it requires bypass surgery by a surgeon to repair the aneurysm. Keyhole bypass surgery techniques are included. Momentum specifically excludes surgery to the branches of the aorta.	✓		✓
Cardiac valvular disease The heart valves control the blood flow through the heart. The valves may be abnormal at birth or become diseased due to rheumatic fever and certain infectious diseases. Depending on the severity of the valve lesion, it requires open-heart surgery for the repair (valvotomy and valvuloplasty) or a valve replacement by an artificial valve. Keyhole techniques are included.	✓		✓
Irreversible heart failure Permanent, irreversible physical impairment of the heart function as defined by the New York Heart Association or ejection fraction as confirmed by a cardiologist. If the insured life dies as a result of heart failure, after the expiry of the relevant survival period, but before the one month ejection fraction reading could be obtained, Momentum will pay the full claim amount.	✓	✓	✓
Cardiomyopathy This means impaired ventricular function of variable aetiology, due to primary disease of the heart muscle, and includes secondary disease such as ischaemic or hypertensive heart muscle damage. If the insured life dies as a result of cardiomyopathy, after the expiry of the relevant survival period, but before the one month ejection fraction reading could be obtained, Momentum will pay the full claim amount.	✓	✓	✓
Peripheral artery disease Disease of the blood vessels characterized by narrowing and hardening of the arteries that supply the legs and feet. This causes a decrease in blood flow that can injure nerves and other tissues. This must be confirmed by Doppler ultrasound or angioplasty or MRI scan and confirmed by report from a specialist or vascular surgeon.	✓		✓

	Critical illness	Longevity protection	Income protection
Primary pulmonary hypertension Established primary pulmonary hypertension is the pathological increase of pulmonary pressure due to structural, functional or circulatory disturbances of the lung leading to right ventricular enlargement. The disease must result in permanent irreversible physical impairment to the degree of at least Class IV of the New York Heart Association (NYHA) classification of cardiac impairment. There must be proof that pulmonary pressure has remained above 30mm Hg for a period of at least six months.	✓	✓	✓
Definition of ejection fraction A clinically used measure of systolic heart function is the "ejection fraction" (EF), i.e. the percentage of blood the heart is able to eject during one beat. Echocardiography, radionuclide angiography and left ventriculography are commonly used to measure the EF. A normal EF is greater than 55%; EF's of 40% to 50% indicate mild systolic dysfunction; ≤ 40% indicate moderate to severe systolic dysfunction.	✓	✓	✓
New York Heart Association (NYHA) Class III The insured life has cardiac disease resulting in marked limitation of physical activity; is comfortable at rest; ordinary physical activity results in fatigue, palpitation, dyspnoea, or angina pain.	✓	✓	
New York Heart Association (NYHA) Class IV The insured life has cardiac disease resulting in inability to carry on any physical activity without discomfort; symptoms of inadequate cardiac output, pulmonary congestion, systemic congestion, or angina syndrome may be present, even at rest; if any physical activity is undertaken, discomfort increased.	✓		✓
Connective tissue disease			
An unequivocal diagnosis of an Auto-immune or immune complex diseases as per the appropriate international guidelines/criteria (American College of Rheumatology Criteria where applicable). An appropriate consultant specialist must diagnose the disease. The relevant blood test and tissue biopsies must support such diagnosis and appropriate disease modifying medication must have been tried for a minimum continuous period of six months. Only conditions specifically listed in the claim events will be covered by this definition.	✓	✓	✓
Endocrine and metabolic diseases			
Diagnosis or disease process resulting in permanent dysfunction of the thyroid, pituitary, pancreas or adrenal glands where such function cannot be medically controlled. The diagnosis must be confirmed by an appropriate consultant specialist and supported by relevant blood or other diagnostic tests as appropriate to the condition.	✓		
ENT system			
This relates to diagnoses and/- or interventions relating to the ears, including the inner and middle ear, the nose, paranasal sinuses and throat. The diagnosis must be supported by an ENT specialist report and accompanied by supporting objective diagnostic investigations including blood tests or X-rays and CT or MRI scans.	✓	✓	✓

	Critical illness	Longevity protection	Income protection
Gastrointestinal system			
This system includes the liver, biliary system, pancreas and gastrointestinal tract from the oesophagus to the stomach through to the rectum. Diseases or interventions must be related to primary organic pathology of the gastrointestinal system, must not be related to drug or alcohol abuse and be diagnosed by an appropriate consultant specialist supported by objective and relevant investigations including blood tests, X-rays, scans and scopes as necessary. **Classification systems for cirrhosis.** The Child-Pugh-Turcotte (CPT) classification system is widely used and validated way to estimate prognosis in those with cirrhosis.3			

Child-Pugh (Child-Pugh-Turcotte) Classification			
Criterion	1 point	2 points	3 points
Serum albumin g/L	>35	28-35	<28
Serum bilirubin (total)[3]	<34 µmo\L <2mg\dL)	34-50 µmo\L (2-3 mg\dL)	>50 µmo\L (>3 mg\dL)
International Normalized Ratio (INR)	<1.7	1.7-2.2	> 2.2
Ascites	Absent	Controlled medically	Poorly controlled
Encephalopathy	Absent	Controlled medically	Poorly controlled

A score of 5-6 is class A (life expectancy 15-20 years); a score of 7-9 is class B (life expectancy 4-14 years); a score of 10-15 is class C (life expectancy 1-3 years). This aligns with perioperative mortality (for abdominal surgery) of 10%, 30% and 80% respectively.

Inflammatory bowel disease • Crohn's disease – Crohn's disease is a chronic granulomatous inflammatory disease. The disease must result in complications, must be unresponsive to medical therapy and require surgical intervention. The characteristic colonoscopy and histopathalogical features must be present to confirm the diagnosis. • Ulcerative colitis – For the purposes of this policy, ulcerative colitis shall be covered when the disease results in complications and is not responsive to medical therapy and requires surgical intervention. Diagnosis for this policy must be based on colonoscopy and histopathalogical features.	✓	✓	✓
End-stage liver failure End-stage liver failure or liver transplant as confirmed by a gastroenterologist due to cirrhosis and resulting in permanent jaundice and one of the following: • Ascites • Encephalopathy • Portal hypertension.	✓	✓	✓

	Critical illness	Longevity protection	Income protection
HIV/Aids			
Infection by any Human Immunodeficiency Virus (HIV) or being diagnosed as having Acquired Immuno-deficiency Syndrome (Aids), if the insured life can prove to the satisfaction of Momentum that the infection is due to: • The transfusion of infected blood or blood products from a South African blood transfusion service that Momentum recognises, after the starting date of this policy, or • Executing his professional duties as a medical or dental practitioner registered with the Health Professions Council of South Africa (HPCSA) or a nurse registered with the SA Nursing Council, or • Receiving a transplanted organ that was previously infected with HIV, or • Any other medical or dental procedure that the HPCSA recognises and that a medical or dental practitioner registered with the HPCSA or a nurse registered with the SA Nursing Council, has performed on the insured life, or • Involvement in a road traffic accident, or • Involvement in a violent crime, or • Involvement in a rape or an indecent assault crime Momentum will consider a claim if the following requirements were followed: • Where the HIV is a result of the transfusion of blood or blood products or a transplanted organ, the transfusion or organ donor service must accept liability for the incident.	✓		✓
• In the event of an accident, violent crime, rape, indecent assault or infection in the execution of professional duties: – An identified HIV test needs to be performed within 24 hours to confirm an HIV-negative status before the event. – Proof that the insured life has started the prescribed treatment, a course of anti-retroviral drugs, and that the treatment course has been completed in full. • In the event of an accident, violent crime, rape or indecent assault: – The event must have been reported to the SAPS and a case number issued and/or criminal case opened. – A medical examination of the victim needs to have been performed directly after the event. – Medically documented proof of acute trauma and HIV infection suspicion must have been submitted. • Where the accidental HIV is a result of emergency assistance at the scene of a road traffic accident or violent crime, an SAPS or eyewitness affidavit to prove assistance must have been submitted. • Momentum must receive notification within 14 days of the occurrence of an event, where there is suspicion of HIV infection. • An identified HIV test needs to be performed within 6 months of the event to confirm an HIV positive status. If there was no suspicion of HIV infection and it can be proven that the insured life contracted HIV as a result of transfusion of infected blood or blood products or receiving a transplanted organ, Momentum must receive notification within 6 months of the insured life being tested positive for HIV.			

	Critical illness	Longevity protection	Income protection
Momentum reserves the right to obtain independent diagnostic blood testing of the insured life (with proper identification, counselling and informed consent). **Aids** The following must support the clinical manifestation of aids (the Acquired Immunodeficiency Syndrome): • the results of a positive HIV (Human Immunodeficiency Virus) antibody test or other recognised test for the presence of aids (provided that, in all cases, Momentum accepts the type of test), • the insured life must have a CD4 cell count of less than 200 • and one of the following criteria must be met: – the existence of at least three conditions of stage 3 according to the current WHO Clinical Classification System OR – the diagnosis of at least one of the aids-defining diseases according to the current WHO Clinical Classification System.			
Major burns			
Third-degree burns covering a specified percentage of the body surface area according to the Lund and Bowder body surface chart.	✓	✓	✓
Musculoskeletal system			
Confined to diseases, disorders or interventions of muscle, bone, joints and any directly associated nerve supply. An orthopaedic or neurosurgeon must make the diagnosis and diagnostic X-rays and CT or MRI scans must support it.			
Diplegia The total and permanent loss of function of both sides of the body, due to an injury or a disease of the spinal cord that affects the legs more than the arms as a neurologist/neurosurgeon confirmed. **Hemiplegia** The total and permanent loss of function of only one side of the body due to brain injury or disease as a neurologist/neurosurgeon confirmed. **Paraplegia** The total and permanent loss of function of both legs due to injury or disease of the spinal cord as a neurologist/neurosurgeon confirmed. **Quadriplegia** The total and permanent loss of function of both upper and both lower limbs due to injury or disease of the spinal cord as a neurologist/neurosurgeon confirmed.	✓	✓	✓

	Critical illness	Longevity protection	Income protection
Nervous system			
The nervous system comprises the central and peripheral nervous systems. The central nervous system includes the brain, brainstem and spinal cord. The peripheral nervous system contains the body's other nerves. Made of billions of interconnected nerve cells. the nervous system is a vast communication network linking all body parts and allowing us to interact with our environment. Only central nervous system conditions as defined are covered. A neurologist or neurosurgeon must confirm the diagnosis or intervention and the deficit must be of a permanent nature and objective investigations including blood tests, X-rays and CT or MRI-scans must support it. The clinical symptoms and signs must be compatible with the diagnosis and any neurological deficit must be anatomically compatible with the primary lesion.			
Stroke Death of brain tissue due to inadequate blood supply or haemorrhage within the brain tissue resulting in neurological deficit. A neurologist must confirm the diagnosis and objective neuro-imaging investigations including CT or MRI-scans must support it. Any deficit must be of a permanent nature. The clinical symptoms and signs must be compatible with the diagnosis and any neurological deficit must be anatomically compatible with the primary lesion. Severity levels will be assessed by a full neurological examination by a specialist neurologist or neuropsychologist after 3 months. The neurological domains to be assessed include motor, speech, visual, sensory, language and cognition. WPI figures are calculated as per the American Medical Association Guides to the Evaluation of Permanent Impairment 6th edition. Where we make reference to ADLs it is specifically the ASISA Stroke ADL list as below: **Basic activities of Daily Living** • Bathing – the ability to was/bathe oneself independently • Transferring – the ability to move oneself from a bed to a chair or from a bed to a toilet independently • Dressing – the ability to take off and put on ones clothes independently • Eating - the ability to feed oneself independently. This does not include the making of food • Toileting – the ability to use a toilet and cleanse oneself thereafter, independently • Locomotion on a level surface – the ability to walk on a flat surface, independently • Locomotion on an incline – the ability to walk up a gentle slope, or a flight of steps independently. **Advanced activities of Daily Living** • Driving a car – the ability to open a car door, change gears or use a steering wheel • Medical care: the ability to prepare and take the correct medication • Money management – the ability to do one's own banking and to make rational financial decisions • Communicative activities: - the ability to communicate either verbally or written • Shopping: - the ability to choose and lift groceries from shelves as well as carry them in bags • Food preparation – the ability to prepare food for cooking as well as using kitchen utensils • Housework – the ability to clean a house or iron clothing	✓	✓	✓

	Critical illness	Longevity protection	Income protection
• Community ambulation with or without assistive device, but not requiring a mobility device – the ability to walk around in public places using only a walking stick if necessary • Moderate activities:-activities like moving a table, pushing a vacuum cleaner, bowling, golf • Vigorous activities: - able to partake in running, heavy lifting, sports **For above definition, the following are not covered:** 1. Transient ischaemic attack/reversible ischaemic neurological deficit (as defined below) • A Transient Ischaemic Attack (TIA) occurs when the blood supply is momentarily interrupted, but restored before any permanent damage can occur. It usually results in one of more of the following symptoms: – a loss of sensation – dizziness – lameness of a limb – loss of speech • The symptoms only occur for a few minutes to hours and recovery is quick and spontaneous with no evidence of infarction or haemorrhaging that exists on objective neuro-imaging investigations including CT or MRI-scans. 2. Vascular disease affecting the eye or optic nerve. 3. Cerebral symptoms due to migraine.			
Benign brain tumour A life-threatening, non-cancerous tumour of the brain as confirmed by a neurologist or neurosurgeon, giving rise to characteristic signs of increased intracranial pressure such as papilloedema, mental symptoms, seizures and motor or sensory impairment. The presence of the tumour must be confirmed by imaging studies such as a CT scan or MRI scan. Momentum specifically excludes benign micro adenomas of the pituitary gland.	✓	✓	✓
Muscular dystrophy The diagnosis of muscular dystrophy confirmed by a consulting neurologist, and based on a combination of all of the following: • Clinical presentation including absence of sensory disturbance, normal cerebro-spinal fluid and mild tendon reflex reduction • Characteristic electromyogram • Clinical suspicion confirmed by muscle biopsy	✓	✓	✓
Myasthenia gravis Myasthenia gravis is an autoimmune disease that gradually causes muscles to lose their strength and function. Antibodies are made against receptors in the neuromuscular junction (the area where nerve transmission makes a muscle do its work) and presents with weakness in muscles groups. Unequivocal diagnosis of myasthenia gravis as confirmed by a specialist or neurologist. The symptoms should be present despite optimal treatment.	✓	✓	✓
Alzheimer's disease This means the deterioration or loss of intellectual capacity, due to irreversible failure of brain functioning. There must be a reduction in the executive functions of abstract thinking, judgement and problem solving. The diagnosis must be confirmed by a neurologist and based on clinical and radiological evidence and standardised tests and questionnaires for Alzheimer's disease.	✓	✓	✓

	Critical illness	Longevity protection	Income protection
Dementia This means the deterioration or loss of intellectual capacity, due to irreversible global failure of brain functioning. There must be a reduction in the executive functions of abstract thinking, judgement and problem solving. The diagnosis must be confirmed by a neurologist and based on clinical and radiological evidence and standardised tests and questionnaires for Dementia.	✓	✓	✓
Motor neuron disease Motor neuron disease of unknown aetiology is characterised by progressive degeneration of corticospinal tracts and anterior horn cells or bulbar efferent neurones; these include spinal muscular atrophy, progressive bulbar palsy, amyotrophic lateral sclerosis and primary lateral sclerosis. Claims will only be admitted if the condition is confirmed by a neurologist as progressive and resulting in symptoms as a result of irreversible damage to the nervous system.	✓	✓	✓
Parkinson's disease Slowly progressive degenerative disease of the brain that leads to shaking (tremors), difficulty with walking, movement, and coordination. The diagnosis must be confirmed by a consultant neurologist. The symptoms should be persistent despite optimal treatment with various treatment regimes, which have been used for a period of at least 6 months.	✓	✓	✓
Multiple sclerosis The unequivocal diagnosis of multiple sclerosis confirmed by reliable history and clinical findings from a neurologist and CT or MRI scans where demyelination in the brain and spinal cord characterises the condition. More than one episode of well-defined neurological symptoms and signs involving any combination of deficit in the optic nerves, brain stem, spinal cord, co-ordination or sensory function that are persistent or progressive must characterise the disease. The policy does not cover a single episode of multiple sclerosis from which remission has occurred.	✓	✓	✓
Cerebral malaria Diffuse symmetrical encephalopathy, i.e. unarousable coma accompanied by vital organ dysfunction, requiring ICU admission. A specialist physician must confirm the diagnosis.	✓	✓	✓
Total aphasia A total and permanent loss of the ability to express himself by speech, writing, or signs, or to comprehend spoken or written language, due to injury or disease of the brain as confirmed by a specialist or neurologist. There must be permanent deficits in the formal aspects of language such as naming, word choice, comprehension, spelling and syntax.	✓	✓	✓
Respiratory system			
Disease involving the lungs resulting in airway dysfunction and reduced lung functions. Treatment must be appropriate and maximal for the diagnosis. A pulmonologist or physician specialist must make the diagnosis and appropriate objective diagnostic tests including simple and advanced lung function tests where necessary, must support it.	✓	✓	✓
Pulmonary function test Pulmonary function test measure how well the lungs take in and exhale air and how efficiently they transfer oxygen into the blood. Spirometry measures how well the lungs exhale. The information gathered during this test is useful in diagnosing certain types of lung disorders, but is most useful when assessing for obstructive lung diseases (especially asthma and chronic obstructive pulmonary disease, COPD).			

	Critical illness	Longevity protection	Income protection
End-stage respiratory failure End-stage respiratory failure or lung transplant as confirmed by a registered pulmonologist as demonstrated by: • FEV1 < 1 litre for obstructive lung disease or FVC < 1 litre for restrictive lung disease with clinical signs and symptoms, • FEV1 < 40% predicted or FVC < 40% predicted • Severe irreversible changes in pulmonary function tests with permanent DCO 41-45% (obstructive and/or restrictive). • FEV1 test results consistently less than 1 litre with 3 x FVL at least one month apart and one of the following: – Requiring permanent supplementary oxygen therapy for hypoxaemia – Arterial blood gas analyses with partial oxygen pressures of 55mmHg or less (PaO2 < 55mmHg) – Dyspnoea at rest.	✓		✓
Severe aplastic anaemia			
Chronic persistent bone marrow failure which results in anaemia, neutropenia and thrombocytopenia requiring treatment with at least one of the following: • Blood product transfusion • Marrow stimulating agents • Immunosuppressive agents • Bone marrow transplantation. The diagnosis must be confirmed by a haematologist.	✓	✓	✓
Trauma			
ICU admission as a result of an accident for more than 5 days with assisted mechanical ventilation for more than 4 days.	✓		
Terminal illness			
The insured life must be suffering from a disease which in the opinion of an appropriate consultant, and supported by Momentum's Medical Officer, is likely to lead to death within 12 months from the date of notification.	✓		✓
Urinary tract			
This includes the urinary tract from the kidneys through the bladder to the urethral opening. The disease must cause renal dysfunction requiring ongoing therapy or surgical intervention. An appropriate consultant specialist must make the diagnosis and must be supported by blood tests for renal function, urine testing and clearance testing as necessary and other scans or urinary tract X-rays as appropriate. Heamodialysis and peritoneal dialysis are covered.	✓	✓	✓
Visual			
This includes the retina, optic nerve, anterior and posterior chamber of the globe, cornea, lens. The diagnosis or disease must be permanent or chronic and require ongoing specialist treatment. An ophthalmologist must confirm the diagnosis and objective test should confirm the diagnosis and severity of any visual defect.	✓	✓	✓

	Critical illness	Longevity protection	Income protection
Catch-all			
Any disease, where the severity of the disease that has resulted in a Whole Person Impairment (WPI) > 35% and the percentage is dependent on the system or systems that are affected. It will be assessed according to the criteria stipulated in AMA Guidelines 6th Edition. Any Whole Person Impairment as a result of traumatic injury or mental and behavioural disorders will not be covered by this category. WPI scores are determined when the condition is permanent at optimal treatment. A payment will only be made under this category if the condition suffered from does not qualify for a claim payment under any of the other categories listed above.	✓	✓	✓
Endocrine and metabolic diseases			
Diagnosis or disease process resulting in permanent dysfunction of the thyroid, pituitary, pancreas or adrenal glands where such function cannot be medically controlled. The diagnosis must be confirmed by an appropriate consultant specialist and supported by relevant blood or other diagnostic tests as appropriate to the condition.	✓		
Additional claim events for children			
The Critical Illness Cover for Children (child benefit) benefit amount is 10% of the critical illness benefit amount for the parent.	✓		
Breadth of Cover Guarantee™			
Momentum guarantees that the policyholder will receive a payout if: • the claim event does not meet the requirements for a claim payout under the critical illness benefit but does meet the requirements for a claim payout under a competitor's qualifying critical illness benefit. The percentage payout will be the lesser of: • the percentage payout under the competitors' qualifying critical illness benefit; and • 20% The claim amount is calculated as the percentage payout multiplied by the benefit amount. The insured life does not need to have a critical illness benefit in force with any competitor to qualify for this benefit; the qualifying benefit need only be available in the market from the competitors. **Qualifying competitor critical illness benefit** For a benefit to be classified as a qualifying critical illness benefit, the benefit must: • be open to new business in South Africa; and • be available on an individual life policy contract; and • provide a claim payout for all claim events and severity levels as currently defined by ASISA's SCIDEP; and • be underwritten by an ASISA member office	✓		

	Critical illness	Longevity protection	Income protection
Exclusions • The following conditions are specifically excluded as they are not considered to be critical illness claim events. This list will be reviewed from time to time: – All mental health disorders including but not limited to major depression and schizophrenia. – Fibromyalgia (or conditions similar thereto) and chronic fatigue syndrome (or conditions similar thereto). – Chronic pain disorders. – Influenza • We will not admit a claim under the Breadth of Cover Guarantee™ for any condition that existed prior to the start date of this guarantee which directly brought about or accelerated the claim event. This includes: – All symptoms for an illness or condition experienced by the insured life or – Any illness or condition the insured life sought medical advice for or – Any illness or condition that was diagnosed prior to the start of the policy, – Any condition excluded due to a medical exclusion and/or deferment applied on the insured life will not be covered under the Breadth of Cover Guarantee™. Any optional features or add-on benefits will not be considered as part of the qualifying critical illness benefit. Ex gratia or business decisions on claims from competitors will not be considered. Any and/or all the Exclusions and/or Special Conditions applicable on the Myriad critical illness benefit will also apply to the Breath of Cover Guarantee™. **Survival period** There is no explicit survival period. A claim will only be admitted if the insured life meets the requirements of the defined claim event, prior to their death. No medical test or examination concluded after the insured life's death will be considered in evaluating a claim.	✓		

ASISA standard on disclosures for critical illness products

Introduction

The FSB and the Competition Commission gave South African life insurers the go-ahead to standardise certain disclosures to consumers of when critical illness products will pay out. This takes the form of a "disclosure grid" underpinned by standard medical definitions to which companies will have to refer when they make the required disclosures and when a claim is assessed. The grid and the definitions were developed by members of the Standardised Critical illness Definitions Project (SCIDEP) committee.

SCIDEP disclosure grid

SCIDEP requires that every critical illness benefit is benchmarked against a set of ASISA definitions for the four most common critical illnesses and the percentage payout for these four illnesses are shown in the table below. The definitions cover four severity tiers (A, B, C and D), with A being the most severe and D being the least severe.

Complete Critical Illness Benefit

	Severity level			
	A	B	C	D
Heart attack	100%	75%	50%	25%
Coronary Artery By-pass Graft (CABG)	100%	75%	50%	50%
Stroke	100%	75%	50%	25%
Cancer	100%	100%	50%	25%

Complete Enhanced Critical Illness Benefit

	Severity level			
	A	B	C	D
Heart attack	100%	100%	100%	100%
Coronary Artery By-pass Graft (CABG)	100%	100%	100%	100%
Stroke	100%	100%	100%	100%
Cancer	100%	100%	100%	100%

Complete Critical Illness Benefit with a Specified Claim Event Enhancer

	Severity level			
	A	B	C	D
Heart attack	100%	100%	100%	100%
Coronary Artery By-pass Graft (CABG)	100%	100%	100%	100%
Stroke	100%	100%	100%	100%
Cancer	100%	100%	100%	100%

Appendix 4 - Claim events for Comprehensive Living Benefit

Momentum requires proof that all the definitions in this document have been met according to the general accepted medical practice. Please use this section in conjunction with Appendix 3.

<table>
<tr><th colspan="4">Cardiac and arterial system</th></tr>
<tr><th></th><th>Critical illness</th><th>Functional impairment</th><th></th></tr>
<tr><td></td><td>(A cardiac event or chronic condition must initiate the diagnosis for claim to be valid)</td><td>(Examples of diseases and disorders that fall in this category: Myocardial infarction, ischaemic heart disease, and cardiomyopathy)</td><td></td></tr>
<tr><td rowspan="2">25%</td><td rowspan="2">Angioplasty to one or more vessel disease with/without stent and/or necessitating PTCA Pericardiectomy
Ileofemoral aneurysm requiring repair
Arrhythmia requiring pacemaker or pathway ablation performed by a cardiologist
Valvotomy
Narrowing of one or two carotid arteries requiring stent insertion only</td><td>Hypertension:
Uncontrolled, treatment-resistant hypertension, with end organ damage will also be assessed under this category.</td><td rowspan="2">25%</td></tr>
<tr><td>Diabetes mellitus (Type 1 and 2):

OR
Ejection fraction (EF) <45%</td><td rowspan="3">50%</td></tr>
<tr><td>Arrhythmia:
Recurrent symptoms that require medical attention despite the use of dietary therapy or drugs and of an artificial pacemaker, and a cardiac arrhythmia is documented with an ECG
OR
The insured life has recovered from surgery, a catheter procedure, or implantable cardioverter
defibrilator placement to treat arrhythmia and meets above criteria for impairment
WITH
The insured life is able to lead an active life and symptoms due to arrhythmia are limited to infrequent palpitations and/or episodes of light-headedness, presyncope, or temporary inadequate cardiac output.</td></tr>
<tr><td>Peripheral arterial disease:
Abnormal Doppler readings, cold leg, dependent rubor and pain on exercise as confirmed by a vascular surgeon.</td></tr>
</table>

Cardiac and arterial system			
	Critical illness	Functional impairment	
		Peripheral venous disease: Severe deep and widespread vascular ulceration with evidence of venoocclusive disease as confirmed by a vascular surgeon.	
75%	• Valvuloplasty. • Narrowing of one carotid artery requiring either bypass grafting or endarterectomy. • Cardiomyopathy: resulting in permanent and irreversible physical impairment to the degree of at least class III of the New York Heart Association classification of cardiac impairment or an ejection fraction between 40% to 50% measured one month after the event. • Irreversible heart failure with NYHA III or an ejection fraction between 40% to 50% measured one month after the event.		75%
100%	• Moderate heart attack of specified severity as per definition • CABG involving three or more coronary arteries • Heart valve replacement • Narrowing of both carotid arteries requiring either bypass grafting or endarterectomy • Primary pulmonary hypertension • Irreversible heart failure with NYHA IV or an ejection fraction < 40% • Heart transplant • Cardiomyopathy resulting in permanent and irreversible physical impairment to the degree of at least class IV of the New York Heart Association classification of cardiac impairment or an ejection fraction < 40%. • Surgery to the aorta: Major surgery to dissect and surgically graft an aneurysm • Peripheral artery disease with gangrene or loss of limb	• New York Heart Association (NYHA) Class IV OR • Ejection fraction (EF) <40% *** Regurgitant valve dysfunction and all cardiac diseases will be assessed on the basis of heart function with NYHA OR LVEF after the insured life has reached the stage of "Maximum Medical Improvement" (MMI).* **Arrhythmia:** • Symptoms due to documented cardiac arrhythmia that is constant AND that interfere with ordinary daily activities (functional class III or IV of the New York Heart Association or ejection fraction (EF) < 45%). OR • The insured life has recovered from surgery, a catheter procedure, or implantable cardioverter defibrilator placement to treat arrhythmia and continues to have symptoms that cause the impairment outlined above. WITH • The insured life continues to have episodes of syncope that are either due to, or have a high probability of being related to, arrhythmia. To fit into this category of impairment, symptoms must be present despite	100%

Cardiac and arterial system			
	Critical illness	Functional impairment	
		use of dietary therapy, drugs, or artificial pacemakers.	
		Peripheral arterial disease: No palpable pulses, confirmed by absent Doppler readings, or severe vascular ulceration, or gangrene as confirmed by a vascular surgeon.	

Cancer			
	Critical illness	Functional impairment	
25%	• Carcinoma in situ of one or both breasts requiring a mastectomy or a prophylactic mastectomy. • Marrow aplasia.		25%
50%	• Invasive carcinoma confined to the organ of origin (stage I) • Ductal carcinoma in situ of the breast with micro invasion • Female cancers stage I, example include breast cancer, cervical, endometrial, Fallopian tube, gestational trophoblastic, ovarian, uterine, vulvular • Invasive malignant melanomas with T1aN0M0 • Lentigo melanoma's with T1aN0M0 • Prostate cancer T2N0M0		50%
100%	• Carcinoma within organ and extension outside organ of origin with or without regional lymph node involvement and/or distant metastasis (stage II , III or stage IV) • Female cancers stage II or III or stage IV, example include breast cancer, cervical, endometrial, Fallopian tube, gestational trophoblastic, ovarian, uterine, vulvular • Chronic Lymphocytic Leukaemia (CLL) • Hodgkin's disease • Non-Hodgkin's disease • Invasive malignant melanomas with stage II, III or IV • Lentigo melanoma's with stage II , III or IV • Malignant brain tumour • Acute Myeloblastic Leukaemia (AML) • Chronic Myeloblastic Leukaemia (CML) • Acute Lymphocytic Leukaemia (ALL) • Bone marrow transplant • Prostate cancer stage III or IV • Multiple myeloma • Hairy cell leukemia	• Scoring 40 on the Karnofsky Performance Index. OR • At least a stage III cancer, defined as carcinoma within organ and extension outside organ of origin with or without regional lymph node involvement and/or distant metastasis after MMI.	100%

Nervous system			
	Critical illness	Functional impairment	
		Hypertension: *Uncontrolled, treatment-resistant hypertension, with end organ damage will also be assessed under this category. Please refer to aphasia, cranial nerves and hemiplegia.*	
25%	• Stroke: A stroke confirmed on clinical grounds with neurological deficit lasting more than 24 hours and with MRI scan proof of anatomically appropriate brain infarction, full recovery. • Hydrocephalus requiring a shunt. We limit claims to one procedure • An episode of status epilepticus causing permanent neurological sequelae as proved by a neurological or neuropsychological assessment • Posterior fossa arteriovenous abnormality requiring repair • Guillain-Barré syndrome with permanent neurological deficit not requiring any ambulatory aids.		25%
50%	• Stroke: A confirmed stroke with signs appropriate to the area of brain damage should be present, eg motor, parietal, visual, cerebellar, speech, lasting more than 24 hours.Neurological deficit will be mild and localised, example motor deficit will result in a permanent motor deficit of at least 4/5 power. • Brain surgery with no permanent sequelae as proved by a neurosurgeon's assessment. Examples of such surgery are: pallidotomy, recognised surgery for epilepsy, cerebral arteriovenous fistula requiring repair, cerebral aneurysm requiring repair, benign brain tumours, endovascular procedures etc. (Pituitary micro adenomas are excluded.)	**Dementia:** Must fall into the CDR 1.0 rating (Refer to Clinical Dementia Rating table) **Psychiatric condition:** Scoring 4 or more on the Activities of Daily Living Scale. Diagnosis according to DSM lV classification and certification by a specialist psychiatrist. **Cranial Nerves lX, X, Xll:** Paralysis with moderately severe dysarthria or dysphagia with hoarseness, nasal regurgitation and aspiration of liquids or semi-solid foods. **Gait disorders** Rises and maintains standing position with difficulty and cannot walk without assistance. A gait disorder only refers to disorders of the cerebellum.	50%
75%	• A depressed skull fracture requiring removal of bone or reconstruction of the skull as proved by a neurosurgeon's assessment. • Guillain-Barré syndrome with permanent neurological deficit requiring ambulatory aids • Coma with full recovery: A state of unconsciousness not induced by sedation. There should be no reaction to external		75%

Nervous system			
	Critical illness	Functional impairment	
	stimuli or internal needs and it must be persisting continuously for more than 96 hours.		
100%	• Stroke: A confirmed stroke with signs appropriate to the area of brain damage should be present, eg motor, parietal, visual, cerebellar, speech, lasting more than 24 hours.Neurological deficit will be severe and generalised, example motor deficit will result in a permanent motor deficit of 3/5 power or less • Permanent moderate to severe impairment of intellectual capacity as a result of brain damage or disease (depression is excluded). • A permanent moderate to severe hemiparesis, paralysis or cranial nerve deficit that the insured life sustained in an accident or because of brain surgery or disease, as proved by a neurophysiological assessment (Bell's palsy is excluded). • Benign brain tumour including intracranial tumours causing damage to the brain that are non-removable or only partially removable by surgery and cause permanent neurological deficit. (Pituitary micro adenomas are excluded.) • Coma: A state of unconsciousness not induced by sedation. Glasgow Coma Scale reading of 10 or less with no reaction to external stimuli or internal needs and persisting continuously for more than 96 hours with the use of life support systems such as ventilators or intravenous nourishment • Alzheimer's disease • Dementia • Motor neuron disease • Parkinson's disease • Multiple sclerosis • Cerebral malaria • Muscular dystrophy • Myasthenia gravis • Acquired mental retardation due to systemic hypoxia	**Dementia:** Must fall into the CDR 2.0 rating (Refer to Clinical Dementia Rating table). **Epilepsy:** • Uncontrolled, treatment-resistant, generalised seizures or epilepsy as certified by a specialist or neurologist to verify reasonable treatment with loss of independent existence OR • Permanent neurological deficits of focal or generalised nature confirmed radiologically and clinically by a specialist or neurologist. **Facial disorders and/or disfigurement:** Total distortion of normal facial anatomy with disfigurement so severe that it precludes (prevents) social acceptance as confirmed by an ear, nose and throat specialist and/or neurosurgeon and/or maxillofacial specialist. **Psychiatric condition:** Scoring 6 or more on the Activities of Daily Living Scale. Diagnosis according to DSM IV classification and certification by a specialist psychiatrist. **Cranial nerve VII (Facial Nerve):** Severe unilateral facial paralysis with 75% loss of function as defined bya score of Grade V or VI according to the House-Brackman Facial Nerve Palsy Grading System which can be described as: A permanent condition with no or slight movement of one half of the face with asymmetry at rest and incomplete or no eyelid closure and slight or no movement of the mouth due to facial nerve impairment. **Cranial nerve VIII (Vestibulocochlear Nerve):** Nerve damage with moderately-severe disequilibrium scoring 6 or more on the Activities of Daily Living scale (ADL). **Cranial nerve IX, X, XII:** Paralysis with severe inability to swallow or handle oral secretions without choking, with need for assistance and suctioning where organic pathology has	100%

Nervous system			
	Critical illness	Functional impairment	
		been medically proven. **Neurological impairment of respiration:** The insured life has no capacity for spontaneous respiration where organic pathology has been medically proven. **Impairment of consciousness and awareness:** Irreversible unconsciousness/coma of an organic nature and not amenable to therapy. **Gait disorders** Cannot stand without help, mechanical support and/or an assistive device. A gait disorder only refers to disorders of the cerebellum.	

Connective Tissue Diseases			
	Critical illness	Functional impairment	
50%	• Wegener's granulomatosis • Diagnosis of systemic lupus erythematosis (SLE)		50%
75%	• Systemic lupus erythematosis (SLE) • Sarcoidosis • Giant cell arteritis or temporal arteritis		75%
100%	• Rheumatoid arthritis • Polyarteritis nodosa • Systemic sclerosis (scleroderma)		100%

Musculoskeletal system			
	Critical illness	Functional impairment	
		Chronic back and neck conditions List of five diagnosis used in the assessment of chronic back and neck conditions: 1. 50% or more compression of a vertebral body or multiple level compression fractures giving rise to kyphotic deformity. 2. Clinically significant radiculopathy (motor and sensory deficit or muscle atrophy and clinical signs of nerve tension (positive Laseque and Stretch signs) and radiological evidence at the same site as clinically found. NB – We will not accept radiological signs of nerve compression without clinical evidence of neurological involvement as proof of functional impairment. 3. Alteration of motion segment	

Musculoskeletal system			
	Critical illness	Functional impairment	
		integrity (instability) using flexion and extension radiographs (X-rays): translation instability of at least 5mm or more particularly with neurological deficit. 4. Multiple back or cervical operations (ie two or more on separate occasions within a period of 5 years) comprising laminectomy, discectomy or fusion, or a combination thereof. 5. Chronic pain syndrome due to • a chronic spinal condition as certified by an orthopaedic or neurosurgeon • duration of two years or more • evaluation and reasonable treatment by a multidisciplinary pain clinic. • The neck and lower back are part of the spine. **The spinal regions are:** 1. Cervical region (C1-C7) 2. Thoracic region (T1-T12) and 3. Lumbosacral region (L1-S1) The C7 to T1 joint will be classified in the cervical region, and the T12 to L1 joint in the thoracolumbar region.	
25%	• The total, permanent and irreversible loss of use of or loss of one leg below the knee or one arm below the elbow.	**Chronic back and neck conditions:** At least two of the five diagnoses listed above must be made by an orthopaedic- or neurosurgeon per region. Only one claim for spinal condition will be allowed per spinal region. **Locomotor system*:** Upper extremities**: 36% or more impairment of an upper limb Lower extremities***: 40% or more impairment of a lower limb	25%
50%		**Chronic back and neck conditions:** At least three of the five diagnoses listed above must be made by an orthopaedic- or neurosurgeon per region Only one claim for spinal condition will be allowed per spinal region. A maximum of two claims will be allowed. **Locomotor system*:** • Upper extremities**: 60% or more impairment of an upper limb • Lower extremities***: 60% or more impairment of a lower limb	50%

Musculoskeletal system			
	Critical illness	Functional impairment	
75%	• The total, permanent and irreversible loss of use of or loss of one leg above the knee or one arm above the elbow.	**Locomotor system*:** • Upper extremities**: 80% or more impairment of an upper limb • Lower extremities***: 80% or more impairment of a lower limb	75%
100%	• Paraplegia, hemiplegia, diplegia and quadriplegia • Total, permanent and irreversible loss of use of or loss of either both arms or both legs	**Chronic back and neck conditions:** • At least four of the five diagnoses listed above must be made by an ortopaedic- or neurosurgeon per region. A maximum of one claim will be allowed. OR • Confirmed diagnosis of Cauda equina	100%
		Paraplegia: The total and permanent loss of the functioning of both legs due to injury or disease of the spinal cord as confirmed by a neurologist or neurosurgeon. **Quadriplegia:** The total and permanent loss of the functioning of both upper and both lower limbs due to injury or disease of the spinal cord as confirmed by a neurologist or neurosurgeon. **Hemiplegia:** The total and permanent loss of the functioning of only one side of the body due to brain injury or disease as confirmed by a neurologist or neurosurgeon. **Diplegia:** The total and permanent loss of the functioning of both sides of the body, where the legs are affected more than the arms due to injury or disease of the spinal cord as confirmed by a neurologist or neurosurgeon.	
		Locomotor system*: • Upper extremities**: 80% or more impairment of both upper limbs • Lower extremities***: 70% or more impairment of both lower limbs • Combination: 80% or more impairment of both an upper and a lower limb. * We will assess the percentage of functional impairment according to: • Abnormal motion • Sensory loss or motor loss and • Amputation	

Musculoskeletal system			
	Critical illness	Functional impairment	
		As per the most current edition of the AMA guidelines for the Evaluation of Permanent Impairment. Also refer to paraplegia, quadriplegia, diplegia and hemiplegia. **Upper extremities examples: The total and permanent loss of: • one hand is a 90% impairment of an upper limb • one thumb is a 36% impairment of an upper limb • thumb, index and ring fingers are a 51% impairment of an upper limb. ***Lower extremities example: The total and permanent loss of a foot is a 45% impairment of a lower limb (toes are not included).	

Gastrointestinal system			
	Critical illness	Functional impairment	
25%	• Any disease or disorder requiring partial hepatectomy • Any disease or disorder requiring partial pancreatectomy		25%
50%	• Chronic pancreatitis with secondary complications, which must include at least pain and impaired glucose tolerance test result in association with other constitutional complications. • Portal hypertension • Chronic persistent hepatitis • Primary billiary cirrhosis confirmed by a consultant specialist and with appropriate confirmatory hepatic radiological or histological investigations	• 15% weight loss below desirable weight due to organic disease of the gastrointestinal tract as confirmed by a gastroenterologist or other specialist (refer to the desirable weight tables in the AMA-guide). OR • Progressive chronic liver disease with at least two of the following: • S-Bilirubin in the range of 34 - 51 micromol/L • S-albumin in the range of 30 - 35 g/L • Prothrombin time: 4-6sec prolonged / INR:1.7 - 2.3 • Ascites easily controlled with medical therapy • Partial faecal incontinence unresponsive or not amenable to therapy with medical evidence of organic disease. OR Irreducible hernia after failed surgical	50%

Gastrointestinal system			
	Critical illness	Functional impairment	
		repair for hernia with prior complications.Also, please refer to comments under Anorectal Impairment.	
75%	• Sclerosing cholangitis • Inflammatory bowel disease: Crohn's disease and ulcerative colitis		75%
100%	• Cirrhosis of the liver • Fulminant hepatic necrosis • Hepatectomy • Pancreatectomy • End-stage liver failure • Liver and pancreas transplant	**Anorectal Impairment:** • The insured life has no reflex regulation or voluntary control of the anus or rectum due to permanent impairment where medical evidence of organic pathology has been proven. (See gastro-intestinal tract) OR • Greater than 25% weight loss below the desirable weight due to organic disease of the gastro-intestinal tract as confirmed by a gastroenterologist or other specialist (refer to the desirable weight tables in the AMA guide) OR • Progressive chronic liver disease with at least two of the following: • S-bilirubin more than 51 micromol/L • S-albumin less than 30 g/L • Prothrombin time, more than 6 sec prolonged / INR > 2.3 • Poorly controlled ascites • Advanced hepatic encephalopathy OR • Irreparable biliary tract obstruction with cholangitis, persistent jaundice and progressive liver disease as certified by surgeon or gastroenterologist. OR • Complete faecal incontinence unresponsive or not amenable to therapy with medical evidence of organic disease. OR • Inability to swallow as confirmed physiological/neurological disorder where medical intervention has been indicated. OR • Irreparable hearnia with ongoing bowel dysfunction as evidenced by ongoing and recurrent diarrhea, bloody stool with or without stomach cramps	100%

Gastrointestinal system			
	Critical illness	Functional impairment	
		or constipation or recurrent bowel dysfunction.	

Urinary tract			
	Critical illness	Functional impairment	
		Hypertension: Uncontrolled, treatment-resistant hypertension, with end organ damage will also be assessed under this category. **Diabetes mellitus (Type 1 and 2):** Diabetes mellitus (Type 1 and 2) will also be assessed under this category if there is end organ damage.	
25%	• Any disease or disorder requiring a total nephrectomy. We exclude kidney donation and analgesic nephropathy • Vascular injury to the kidney • Partial cystectomy • Partial amputation of the penis • Chronic bilateral pyelonephritis confirmed by a urologist and with appropriate confirmatory renal radiological or histological investigations		25%
50%	• Acute renal disease requiring more than five treatments of haemodialysis • Total amputation of the penis • Any disease or disorder requiring complete cystectomy • Polycystic kidney disease, diagnosis must be confirmed by a consultant specialist and on ultrasound • Renal cortical necrosis confirmed by a urologist and with appropriate confirmatory renal radiological or histological investigations	**Renal system:** End-stage renal disease with a creatinine clearance of 28-42ml/min (40-60L/24h) as confirmed by an urologist or nephrologist.	50%
100%	• End-stage renal failure with dialysis as confirmed by a nephrologist. • Kidney transplant	**Impairment of the bladder** The insured life has no reflex regulation or voluntary control of the bladder due to permanent impairment where medical evidence of organic pathology has been proven. **Renal system:** • End-stage renal disease with a creatinine clearance below 28ml/min (40L/24h) OR • Renal function deterioration that requires permanent peritoneal dialysis	100%

Urinary tract			
	Critical illness	Functional impairment	
		or haemodialysis as confirmed by an urologist or nephrologist.	

Respiratory system			
	Critical illness	Functional impairment	
		FEV1 stands for "Forced expiratory volume in 1 second" FVC stands for "Forced vital capacity" DCO stands for "Diffusing capacity for carbon monoxide" A pulmonologist must perform the pulmonary function tests and three readings should be recorded over a period of three months. Pulmonary function tests, performed on standardised equipment with validated administration techniques, provide the framework for evaluation of respiratory system impairment. Spirometric testing equipment and administration techniques must conform to the guidelines of the 1994 ATS (American thoracic society) Statement on Standardisation of Spirometry.	
25%	• Removal of one lobe of a lung • Pulmonary embolism following deep-vein thrombosis. The diagnosis must be confirmed by a ventilation-perfusion (VQ) scan • Lung abscess • Empyema with drainage • Bronchopleural fistula		25%
50%	• Removal of a lung • Recurrent pulmonary emboli with venocaval filter inserted • Chronic irreversible lung disease with FEV1 of 40-50% (obstructive) or FVC of 40-50% predicted (restrictive) OR Severe irreversible changes in pulmonary function tests with permanent DCO <50% (obstructive and/or restrictive).	Impaired airflow with • FEV1 ≤50% OR • FVC ≤50% OR • DCO ≤50%	50%
75%	• Pulmonary venous occlusive disease		75%

Respiratory system			
	Critical illness	Functional impairment	
100%	• Presence of irreversible cor pulmonale. • Lung transplant. • Irreversible lung end stage respiratory failure (FEV1 < 1 litre for obstructive lung disease or FVC < 1 litre for restrictive lung disease with clinical signs and symptoms, or FEV1 < 40% predicted or FVC < 40% predicted OR Severe irreversible changes in pulmonary function tests with permanent DCO 41-45% (obstructive and/or restrictive).	Impaired airflow with • FEV1 ≤40% OR • FVC ≤40% OR • DCO ≤40%	100%

ENT system			
	Critical illness	Functional impairment	
25%	• Chronic mastoiditis requiring radical surgery • Acoustic neuroma	Total, permanent and irreversible loss of hearing in one ear, as confirmed by audiometry and an ear, nose and throat surgeon.	25%
50%	• Cavernous sinus thrombosis • The total, permanent and irreversible inability to speak	• 50% Speech impairment, as confirmed by an ear, nose and throat surgeon, neurologist or neurosurgeon. OR • 60% Binaural hearing loss measured by audiometry and interpretation of decibel sum of the hearing thresholds at 500, 1000, 2000 and 3000 Hz. An ear, nose and throat surgeon needs to confirm this.	50%
75%	• >75% binaural hearing loss		75%
100%	• Total aphasia • Total loss of hearing in both ears.	• Total, permanent and irreversible loss of the ability to speak due to injury or disease, as confirmed by an ear, nose and throat surgeon, neurologist or neurosurgeon. OR • Total, permanent and irreversible loss of hearing in both ears as confirmed by audiometry and an ear, nose and throat surgeon. **Aphasia:** A total and permanent loss of the ability to express himself by speech, writing, or signs, or to comprehend spoken or written language, due to injury or disease of the brain as confirmed by a specialist or neurologist. There must be permanent deficits in the formal aspects of language such as namimg, word choice, comprehension, spelling and syntax.	100%

Visual			
	Critical illness	Functional impairment	
		Diabetes mellitus (Type 1 and 2): Diabetes mellitus (Type 1 and 2) will also be assessed under this category if there is end organ damage.	
25%	• The total, permanent and irreversible loss of the sight in one eye • Retinitis pigmentosa • Enucleation of eye	Total, permanent and irreversible loss of sight of one eye as confirmed by an ophthalmologist.	25%
50%	• Optic nerve atrophy • Permanent hemianopia	• Bilateral visual impairment of 50%; that is a reading of 20/125 (or equivalent measure) in both eyes as confirmed by an ophthalmologist. OR • Diabetic retinopathy grade III. An ophthalmologist needs to confirm this. OR • Permanent Hemianopia. An ophthalmologist needs to confirm this. OR • Hypertensive retinopathy grade III. An ophthalmologist needs to confirm this.	50%
75%	• Visual acquity loss of both eyes with at least a Snellene quivalent rating 6/36 for best corrected vision.		75%
100%	• The total, permanent and irreversible loss of sight in both eyes.	• Bilateral visual impairment of 70% that is a reading of 20/200 in both eyes as confirmed by an ophthalmologist. OR • Diabetic retinopathy grade IV. An ophthalmologist needs to confirm this. OR • Hypertensive retinopathy grade IV. An ophthalmologist needs to confirm this.	100%

HIV / Aids			
	Critical illness	Functional impairment	
100%	• Accidental HIV • Aids		100%

Terminal illness			
	Critical illness	Functional impairment	
100%	• The insured life must be suffering from a disease which in the opinion of an appropriate consultant, and supported by Momentum's medical officer, is likely to lead to death within 12 months from the date of notification.		100%

Red blood cell disorders			
	Critical illness	Functional impairment	
50%		Hb 5-8g/dL and 2-3U transfusion every 4-6 weeks.	50%
100%	• Severe Aplastic Anaemia	Hb 5-8g/dL and 2-3U transfusion every 2 weeks.	100%

White blood cell disorders			
	Critical illness	Functional impairment	
		Scoring 4 or more on the Activities of Daily Living Scale (ADL)	50%
100%		Scoring 6 or more on the Activities of Daily Living Scale (ADL)	100%

Clotting disorders			
	Critical illness	Functional impairment	
		Scoring 4 or more on the Activities of Daily Living Scale (ADL)	50%
100%		Scoring 6 or more on the Activities of Daily Living Scale (ADL)	100%

Endocrine system			
	Critical illness	Functional impairment	
		E.g. Hypothalamic pituitary axis, hypoadrenalism, hyperadrenocorticism, phaeochromocytoma.	
		Scoring 4 or more on the Activities of Daily Living Scale (ADL)	50%
100%		Scoring 6 or more on the Activities of Daily Living Scale (ADL)	100%

Major burns			
	Critical illness	Functional impairment	
25%		At least 10% of total body surface	25%
50%	• At least 10% body surface area	**Major burns** At least 20% of total body surface **Skin disorders** Skin disorders affecting > 50% body surface area including hands	50%
75%	• At least 20% body surface area		75%
100%	• At least 30% body surface area	**Major burns** At least 30% of total body surface **Skin disorders** Permanent irreversible skin disorders that are systemic in nature and on continuous	100%

Major burns			
	Critical illness	Functional impairment	
		treatment for atleast 3 months.	

Catch all			
	Critical illness	Functional impairment	
100%	• Any disease, where the severity of the disease must result in a Whole Person Impairment (WPI) > 50% and the percentage is dependent on the system or systems that are affected. It will be assessed according to the criteria stipulated in AMA Guidelines 6th Edition. • Any Whole Person Impairment as a result of traumatic injury or mental and behavioural disorders will not be covered by this category. • WPI scores are determined when the condition is permanent at optimal treatment. A payment will only be made under this category if the condition suffered from does not qualify for a claim payment under any of the other categories listed above.		100%

Activities of Daily Living (ADL)			
	Critical illness	Functional impairment	
		This category caters for any diseases and disorders that may not fall into any of the schedule of definitions as listed above, but might still incapacitate the insured life enough to warrant an impairment benefit. A person with a combination of symptoms and signs that do not qualify for a benefit under any one system listed in the schedule of definitions above will be assessed under the "activities of daily living" category. These "activities of daily living" will be used to determine the level of impairment.	
		Scoring 4 or more on the Activities of Daily Living Scale (ADL)	50%
		Scoring 6 or more on the Activities of Daily Living Scale (ADL)	100%

Appendix 5 - Claim events for Homeloan Protector

Momentum requires proof that all the definitions in this document have been met according to the general accepted medical practice.

Please use this section in conjunction with the critical illness conditions and definitions at the end of this section.

<table>
<tr><th colspan="4">Cardiac and arterial system</th></tr>
<tr><th></th><th>Critical illness</th><th>Functional impairment</th><th></th></tr>
<tr><td rowspan="5">100%</td><td>(A cardiac event or chronic condition must initiate the diagnosis for claim to be valid)</td><td>(Examples of diseases and disorders: Myocardial infarction, ischaemic heart disease, and cardiomyopathy)</td><td rowspan="5">100%</td></tr>
<tr><td rowspan="2"></td><td>Hypertension:
Uncontrolled, treatment-resistant hypertension, with end organ damage will also be assessed under this category.</td></tr>
<tr><td>Diabetes mellitus (Type 1 and 2):
Diabetes mellitus (Type 1 and 2) will also be assessed under this category if there is end organ damage.</td></tr>
<tr><td>Heart transplant
Heart valve replacement
Major surgery to dissect and surgically graft an aneurysm
Peripheral artery disease with gangrene or loss of limb
Primary pulmonary hypertension
Moderate heart attack of specified severity
CABG: The undergoing of surgery to correct the narrowing of, or blockage to, three or more coronary arteries, by means of a by-pass graft.Heart valve replacement
Narrowing of two carotid arteries requiring either bypass grafting or endarterectomy
Irreversible heart failure with NYHA IV or an ejection fraction < 40%
Heart attack with permanent mild impairment in function
Heart attack with permanent severe impairment in function
Moderate heart attack of specified severity
Cardiomyopathy resulting in permanent and irreversible physical impairment to the degree of at least class IV of the NYHA classification of cardiac impairment or an ejection fraction < 40%.</td><td>New York Heart Association (NYHA) Class IV
OR
Ejection fraction (EF) <40%
** Regurgitant valve dysfunction and all cardiac diseases will be assessed on the basis of heart function with NYHA OR LVEF after the insured life has reached the stage of "Maximum Medical Improvement" (MMI).</td></tr>
<tr><td>Arrhythmia:
Symptoms due to documented cardiac arrhythmia that is constant AND that interfere with ordinary daily activities (functional class III or IV of the New York Heart Association or ejection fraction (EF) < 45%).
OR
The insured life has recovered from surgery, a catheter procedure, or implantable cardioverter defibrilator placement to treat arrhythmia and continues to have symptoms that cause the impairment outlined above.
WITH
The insured life continues to have episodes of syncope that are either due to, or have a high probability of being related to, arrhythmia. To fit into this category of impairment, symptoms must be present despite use of dietary therapy, drugs, or artificial pacemakers.</td></tr>
</table>

Cardiac and arterial system			
	Critical illness	Functional impairment	
		Peripheral arterial disease: No palpable pulses, confirmed by absent Doppler readings, or severe vascular ulceration, or gangrene as confirmed by a vascular surgeon.	

Cancer			
	Critical illness	Functional impairment	
100%	• Chronic Lymphocytic Leukaemia (CLL) (stage 0 or greater on the Rai classification) • Hairy cell leukemia • Hodgkin's disease (stage I or greater on the Ann Arbor classification system) • Non-Hodgkin's disease (Stage I or greater on the Ann Arbor classification system) • Brain tumour WHO (Grade II or greater) with neurological deficit • Chronic Myeloblastic Leukaemia (CML) (not requiring bone marrow transplant) • Invasive malignant melanomas with stage II or greater • Lentigo melanoma's with stage II or greater • Carcinoma within organ and extension outside organ of origin with or without regional lymph node involvement and/or distant metastasis (stage II or greater) • Female cancers (stage II or greater) example include breast cancer, cervical, endometrial, Fallopian tube, gestational trophoblastic, ovarian, uterine, vulvular • Acute Myeloid Leukaemia (AML) • Chronic Myeloblastic Leukaemia (CML) (requiring bone marrow transplant) • Acute Lymphocytic Leukaemia (ALL) (adults) • Bone marrow transplant • Prostate cancer stage III or greater • Multiple myeloma (stage I or greater on the Durie-Salmon Scale)	• Scoring 40 on the Karnofsky Performance Index. OR • At least a stage III cancer, defined as carcinoma within organ and extension outside organ of origin with or without regional lymph node involvement and/or distant metastasis after MMI.	100%

Nervous system			
	Critical illness	Functional impairment	
		Hypertension: *Uncontrolled, treatment-resistant hypertension, with end organ damage will also be assessed under this category. Please refer to aphasia, cranial nerves and hemiplegia.*	
100%	• Stroke: A confirmed stroke with signs appropriate to the area of brain damage should be present, eg motor, parietal, visual, cerebellar, speech, lasting more than 24 hours. Neurological deficit will be severe and generalised, example motor deficit will result in a permanent motor deficit of 3/5 power or less • Permanent moderate to severe impairment of intellectual capacity as a result of brain damage or disease (depression is excluded). • A permanent moderate to severe hemiparesis, paralysis or cranial nerve deficit that the insured life sustained in an accident or because of brain surgery or disease, as proved by a neurophysiological assessment (Bell's palsy is excluded). • Benign brain tumour including intracranial tumours causing damage to the brain that are non-removable or only partially removable by surgery and cause permanent neurological deficit. (Pituitary micro adenomas are excluded.) • Coma: A state of unconsciousness not induced by sedation. Glasgow Coma Scale reading of 10 or less with no reaction to external stimuli or internal needs and persisting continuously for more than 96 hours with the use of life support systems such as ventilators or intravenous nourishment • Alzheimer's disease • Dementia • Motor neuron disease • Parkinson's disease • Multiple sclerosis • Cerebral malaria • Muscular dystrophy • Myasthenia gravis • Acquired mental retardation due to systemic hypoxia	**Dementia:** Must fall into the CDR 2.0 rating (Refer to Clinical Dementia Rating table). **Epilepsy:** • Uncontrolled, treatment-resistant, generalised seizures or epilepsy as certified by a specialist or neurologist to verify reasonable treatment with loss of independent existence OR • Permanent neurological deficits of focal or generalised nature confirmed radiologically and clinically by a specialist or neurologist. **Facial disorders and/or disfigurement:** Total distortion of normal facial anatomy with disfigurement so severe that it precludes (prevents) social acceptance as confirmed by an ear, nose and throat specialist and/or neurosurgeon and/or maxillofacial specialist. **Psychiatric condition:** Scoring 6 or more on the Activities of Daily Living Scale. Diagnosis according to DSM IV classification and certification by a specialist psychiatrist. **Cranial nerve VII (Facial Nerve):** Severe unilateral facial paralysis with 75% loss of function as defined bya score of Grade V or VI according to the House-Brackman Facial Nerve Palsy Grading System which can be described as: A permanent condition with no or slight movement of one half of the face with asymmetry at rest and incomplete or no eyelid closure and slight or no movement of the mouth due to facial nerve impairment. **Cranial nerve VIII (Vestibulocochlear Nerve):** Nerve damage with moderately-severe disequilibrium scoring 6 or more on the Activities of Daily Living scale (ADL).	100%

Nervous system			
	Critical illness	Functional impairment	
		Cranial nerve IX, X, XII: Paralysis with severe inability to swallow or handle oral secretions without choking, with need for assistance and suctioning where organic pathology has been medically proven.	
		Neurological impairment of respiration: The insured life has no capacity for spontaneous respiration where organic pathology has been medically proven.	
		Impairment of consciousness and awareness: Irreversible unconsciousness/coma of an organic nature and not amenable to therapy.	
		Gait disorders Cannot stand without help, mechanical support and/or an assistive device. A gait disorder only refers to disorders of the cerebellum.	

Connective Tissue Diseases			
	Critical illness	Functional impairment	
100%	• Rheumatoid arthritis • Polyarteritis nodosa • Progressive systemic sclerosis (scleroderma)		100%

Musculoskeletal system			
	Critical illness	Functional impairment	
		Chronic back and neck conditions List of five diagnosis used in the assessment of chronic back and neck conditions: 1. 50% or more compression of a vertebral body or multiple level compression fractures giving rise to kyphotic deformity. 2. Clinically significant radiculopathy (motor and sensory deficit or muscle atrophy and clinical signs of nerve tension (positive Laseque and Stretch signs) and radiological evidence at the same site as clinically found. NB – We will not accept radiological signs of nerve compression without clinical evidence of neurological involvement as proof of functional impairment.	

Musculoskeletal system			
	Critical illness	Functional impairment	
		3. Alteration of motion segment integrity (instability) using flexion and extension radiographs (X-rays): translation instability of at least 5mm or more particularly with neurological deficit. 4. Multiple back or cervical operations (ie two or more on separate occasions within a period of 5 years) comprising laminectomy, discectomy or fusion, or a combination thereof. 5. Chronic pain syndrome due to • a chronic spinal condition as certified by an orthopaedic or neurosurgeon • duration of two years or more • evaluation and reasonable treatment by a multidisciplinary pain clinic. • The neck and lower back are part of the spine. **The spinal regions are** • Cervical region (C1-C7) • Thoracic region (T1-T12) and • Lumbosacral region (L1-S1) The C7 to T1 joint will be classified in the cervical region, and the T12 to L1 joint in the thoracolumbar region.	
100%	• Paraplegia, hemiplegia, diplegia and quadriplegia • Total, permanent and irreversible loss of use of or loss of either both arms or both legs	**Chronic back and neck conditions:** • At least four of the five diagnoses listed above must be made by an ortopaedic- or neurosurgeon per region. A maximum of one claim will be allowed. OR • Confirmed diagnosis of Cauda equina **Paraplegia:** The total and permanent loss of the functioning of both legs due to injury or disease of the spinal cord as confirmed by a neurologist or neurosurgeon. **Quadriplegia:** The total and permanent loss of the functioning of both upper and both lower limbs due to injury or disease of the spinal cord as confirmed by a neurologist or neurosurgeon. **Hemiplegia:**	100%

Musculoskeletal system			
	Critical illness	Functional impairment	
		The total and permanent loss of the functioning of only one side of the body due to brain injury or disease as confirmed by a neurologist or neurosurgeon. **Diplegia:** The total and permanent loss of the functioning of both sides of the body, where the legs are affected more than the arms due to injury or disease of the spinal cord as confirmed by a neurologist or neurosurgeon.	
		Locomotor system*: • Upper extremities**: 80% or more impairment of both upper limbs • Lower extremities***: 70% or more impairment of both lower limbs • Combination: 80% or more impairment of both an upper and a lower limb. * We will assess the percentage of functional impairment according to: • Abnormal motion • Sensory loss or motor loss and • Amputation *As per the most current edition of the AMA guidelines for the Evaluation of Permanent Impairment. Also refer to paraplegia, quadriplegia, diplegia and hemiplegia.* • **Upper extremities examples: The total and permanent loss of: • one hand is a 90% impairment of an upper limb • one thumb is a 36% impairment of an upper limb • thumb, index and ring fingers are a 51% impairment of an upper limb. ****Lower extremities example: The total and permanent loss of a foot is a 45% impairment of a lower limb (toes are not included).*	

Gastrointestinal system			
	Critical illness	Functional impairment	
100%	• Cirrhosis of the liver • Fulminant hepatic necrosis • Complete Hepatectomy • Complete Pancreatectomy • End-stage liver failure • Liver and pancreas transplant	**Anorectal Impairment:** • The insured life has no reflex regulation or voluntary control of the anus or rectum due to permanent impairment where medical evidence of organic pathology has been proven. (See gastro-intestinal tract) OR • Greater than 25% weight loss below the desirable weight due to organic disease of the gastro-intestinal tract as confirmed by a gastroenterologist or other specialist (refer to the desirable weight tables in the AMA guide) OR • Progressive chronic liver disease with at least two of the following: – S-bilirubin more than 51 micromol/L – S-albumin less than 30 g/L – Prothrombin time, more than 6 sec prolonged / INR > 2.3 – Poorly controlled ascites – Advanced hepatic encephalopathy OR • Irreparable biliary tract obstruction with cholangitis, persistent jaundice and progressive liver disease as certified by surgeon or gastroenterologist. OR • Complete faecal incontinence unresponsive or not amenable to therapy with medical evidence of organic disease. OR • Inability to swallow as confirmed physiological/neurological disorder where medical intervention has been indicated. OR • Irreparable hearnia with ongoing bowel dysfunction as evidenced by ongoing and recurrent diarrhea, bloody stool with or without stomach cramps or constipation or recurrent bowel dysfunction.	100%

Urinary tract			
	Critical illness	Functional impairment	
		Hypertension: Uncontrolled, treatment-resistant hypertension, with end organ damage will also be assessed under this category.	
		Diabetes mellitus (Type 1 and 2): Diabetes mellitus (Type 1 and 2) will also be assessed under this category if there is end organ damage.	
100%	• End-stage renal failure with dialysis as confirmed by a nephrologist. • Kidney transplant	**Impairment of the bladder** The insured life has no reflex regulation or voluntary control of the bladder due to permanent impairment where medical evidence of organic pathology has been proven.	100%
		Renal system: • End-stage renal disease with a creatinine clearance below 28ml/min (40L/24h) OR • Renal function deterioration that requires permanent peritoneal dialysis or haemodialysis as confirmed by an urologist or nephrologist.	

Respiratory system			
	Critical illness	Functional impairment	
		FEV1 stands for "Forced expiratory volume in 1 second" FVC stands for "Forced vital capacity" DCO stands for "Diffusing capacity for carbon monoxide" *A pulmonologist must perform the pulmonary function tests and three readings should be recorded over a period of three months. Pulmonary function tests, performed on standardised equipment with validated administration techniques, provide the framework for evaluation of respiratory system impairment. Spirometric testing equipment and administration techniques must conform to the guidelines of the 1994 ATS (American thoracic society) Statement on Standardisation of Spirometry.*	
100%	• Presence of irreversible cor pulmonale. • Lung transplant. • Irreversible lung end stage respiratory failure (FEV1 < 1 litre for obstructive lung disease or FVC < 1 litre for restrictive	• Impaired airflow with – FEV1 ≤40% OR – FVC ≤40% OR	100%

Respiratory system			
	Critical illness	Functional impairment	
	lung disease with clinical signs and symptoms, or FEV1 < 40% predicted or FVC < 40% predicted OR Severe irreversible changes in pulmonary function tests with permanent DCO 41-45% (obstructive and/or restrictive).	– DCO ≤40%	

ENT system			
	Critical illness	Functional impairment	
100%	• Total loss of hearing in both ears.	• Total, permanent and irreversible loss of the ability to speak due to injury or disease, as confirmed by an ear, nose and throat surgeon, neurologist or neurosurgeon. OR • Total, permanent and irreversible loss of hearing in both ears as confirmed by audiometry and an ear, nose and throat surgeon.	100%
		Aphasia: A total and permanent loss of the ability to express himself by speech, writing, or signs, or to comprehend spoken or written language, due to injury or disease of the brain as confirmed by a specialist or neurologist. There must be permanent deficits in the formal aspects of language such as namimg, word choice, comprehension, spelling and syntax.	

Visual			
	Critical illness	Functional impairment	
		Diabetes mellitus (Type 1 and 2): Diabetes mellitus (Type 1 and 2) will also be assessed under this category if there is end organ damage.	
100%	• The total, permanent and irreversible loss of sight in both eyes.	• Bilateral visual impairment of 70% that is a reading of 20/200 in both eyes as confirmed by an ophthalmologist. OR • Diabetic retinopathy grade IV. An ophthalmologist needs to confirm this. **OR** • Hypertensive retinopathy grade IV. An ophthalmologist needs to confirm this.	100%

HIV / Aids			
	Critical illness	Functional impairment	
100%	• Accidental HIV • Aids		100%

Terminal illness			
	Critical illness	Functional impairment	
100%	The insured life must be suffering from a disease which in the opinion of an appropriate consultant, and supported by Momentum's medical officer, is likely to lead to death within 12 months from the date of notification.		100%

Red blood cell disorders			
	Critical illness	Functional impairment	
100%	• Severe Aplastic Anaemia	• Hb 5-8g/dL and 2-3U transfusion every 2 weeks.	100%

White blood cell disorders			
	Critical illness	Functional impairment	
100%		• Scoring 6 or more on the Activities of Daily Living Scale (ADL)	100%

Clotting disorders			
	Critical illness	Functional impairment	
100%		• Scoring 6 or more on the Activities of Daily Living Scale (ADL)	100%

Endocrine system			
	Critical illness	Functional impairment	
		E.g. Hypothalamic pituitary axis, hypoadrenalism, hyperadrenocorticism, phaeochromocytoma.	
100%		• Scoring 6 or more on the Activities of Daily Living Scale (ADL)	100%

Major burns			
	Critical illness	Functional impairment	
100%	• At least 30% body surface area	**Major burns** • At least 30% of total body surface **Skin disorders** • Permanent irreversible skin disorders that are systemic in nature and on continuous treatment for at least 3 months.	100%

Catch all			
	Critical illness	Functional impairment	
100%	• Any disease, where the severity of the disease that resulted in a Whole Person Impairment > 35% and the percentage is dependent on the system or systems that are affected. • Any Whole Person Impairment as a result of traumatic injury or mental and behavioural disorders will not be covered by this category. • WPI scores are determined when the condition is permanent at optimal treatment. A payment will only be made under this category if the condition suffered from does not qualify for a claim payment under any of the other categories listed above.		100%

Activities of Daily Living (ADL)			
	Critical illness	Functional impairment	
		This category caters for any diseases and disorders that may not fall into any of the schedule of definitions as listed above, but might still incapacitate the insured life enough to warrant an impairment benefit. A person with a combination of symptoms and signs that do not qualify for a benefit under any one system listed in the schedule of definitions above will be assessed under the "activities of daily living" category. These "activities of daily living" will be used to determine the level of impairment.	
		• Scoring 6 or more on the Activities of Daily Living Scale (ADL)	100%

Appendix 6 – Income protection benefits

Payment periods for Severity of impairment and illness
The payment period depends on the waiting period the policyholder chose. Refer to the table below for the waiting periods available for each income protection benefit.

	Seven day waiting period	14-day waiting period	One-month waiting period	Three-month waiting period	Other waiting periods*
Complete Income Protector	✓	✓	✓	✓	✓
Temporary Income Protector	✓	✓	✓	✓	×
Business Protector (Self Employed)	✓	×	✓	×	×
Business Protector (Professional)	✓	×	✓	×	×
Business Overheads Protector	✓	×	✓	✓	×
Group Income Top-up Benefit	×	×	✓	×	×
Temporary Group Income Top-up Benefit	×	×	✓	×	×

*Other waiting periods include: 6, 12 and 24 months

Severity of impairment or illness: Functional impairment payment periods				
	Severity level			
	25%	50%	75%	100%
Complete Income Protector **With** Permanent Disability Enhancer	Until benefit expiry	Until benefit expiry	Until benefit expiry	Until benefit expiry
Complete Income Protector **Without** Permanent Disability Enhancer	Two years	Five years	Until benefit expiry	Until benefit expiry
Complete Income Protector (Whole Life) **before** age 70	Until death or up to age 70	Until death or up to age 70	Until death or up to age 70	Until death or up to age 70
Complete Income Protector (Whole Life) **after** age 70	Not applicable	Until death	Until death	Until death
Temporary Income Protector	Benefit payment period	Benefit payment period	Benefit payment period	Benefit payment period
Business Protector* 12 - month payment period	One year	One year	One year	One year

Fracture of the cervical, thoracic or lumbar spine	100%	Three months	Two months and two weeks	Two months	No payment	No payment

Note: Fracture and hospitalisation payments are not applicable to waiting periods longer than one month.

Future Cover option events

Event	Required documents	Option percentage
Benefit anniversary	To exercise an option on the benefit anniversary, the option must be exercised within 60 days of the benefit anniversary date.	10%
Marriage	A certified copy of the insured life's marriage certificate stating that the insured life is a party to the marriage. Unions recognised as a marriage in accordance with the tenets of any religion and customary unions as recognised in terms of the laws of the Republic of South Africa will also be considered as a marriage. An option under the marriage event can only be exercised once during the term of the future cover benefit. The event must not have occurred within six months of a divorce.	50%
Death of a spouse	A certified copy of the spouse's death certificate and marriage certificate.	25%
Divorce	A certified copy of the insured life's legal divorce papers stating that the insured life is a party to the divorce. An option under the divorce event can only be exercised once during the term of the future cover benefit. The event must not have occurred within six months of a marriage.	25%
New child dependant or legally adopted child	A certified copy of the birth certificate or legal adoption papers of a child where the insured life is the parent of the child.	25%
Dependent child suffering from a severe functional impairment requiring full time assistance.	A certified copy of the birth certificate or legal adoption papers of a child where the insured life is the parent of the child. Medical proof indicating the cause of the functional impairment must be provided.	25%
Mortgage bond registration or increase in existing mortgage bond	Proof of registration of a mortgage bond in respect of property owned by the insured life.	100% (limited to mortgage bond amount or increase in existing mortgage bond)

Event	Required documents	Option percentage
Purchase of vehicle	Proof of purchase of a vehicle.	100% (limited to loan amount)
Starting employment in a chosen field of study for the first time.	A certified copy of the insured life's letter of employment and proof of the insured life's qualification	50%
Starting a new business venture or obtaining a share in a business venture.	A copy of the Momentum financial needs analysis report, a letter from the bank and financial statements signed by the business owner.	100% (limited to increase in liability)
Enter into professional partnership	A copy of the Momentum financial needs analysis report, a letter from the bank and financial statements signed by the business owner.	100% (limited to interest in the partnership)
Salary increase > 10% for salaried insured lives only.	A certified copy of the increase letter from the insured life's employer or official salary slips.	25%

Example

Mike has a Future Cover – Death with a benefit amount of R5 million.

- Mike gets married and decides to exercise his Marriage option for 50% of his benefit amount to purchase a new Death Benefit.
- He is left with a benefit amount of R2 500 000 (R5 million less R2 500 000) for future options.
- Mike can now exercise any of the above options within 60 days after the event occurs (up to a maximum of R2 500 000) to buy new standalone Death Benefit.

Mike and his wife welcome a new baby girl and he opts to exercise his option of 25% for a new child dependant within the required 60 days of the birth.

- The maximum future cover amount for this event is R5 million x 25% = R1 250 000 million.
- He decides to exercise the full benefit amount of R1 250 000.

Mike has exercised R3 750 000 of his future cover benefit so far (R2 500 000 + 1 250 000).

He therefore has R1 250 000 left to be exercised (initial benefit amount of R5 million less R3 750 000 exercised to date).

Mike purchases a house, and he decides to exercise his option of 100% for Mortgage bond registration within the required 60 days of the registration.

- The maximum future cover amount for this event is R5 million x 100% = R5 million.
- However, the total future cover he exercises over all events cannot exceed his initial benefit amount of R5 million and there is only R1 250 000 left to be exercised.

If Mike opts to take the R1 250 000, his benefit will be cancelled as he has exercised the full initial benefit amount, he chose at new business.

Purpose of underwriting

Description

The purpose of underwriting is to correctly assess the risk associated with the life to be insured. Underwriters will use the occupational, avocational, medical and financial information provided to arrive at an appropriate rating.

Rating a client

Every person's lifestyle, occupation, medical and financial circumstances are considered. This enables Momentum to calculate the most appropriate premium for each application.

All applicants are evaluated for insurance on an individual basis to determine premium rates.

Momentum's approach is to categorise a client as accurately as possible.

Clients will not be placed in rate groups.

Momentum differentiates between males and females and also between smokers and non-smokers.

It is only possible to calculate a premium through a formal Momentum quotation.

Individual rating occurs automatically when the insured life's particulars are entered into the quote system.

Qualifications

The following are examples of a 4-year technikon qualification/diploma:

- T4, T5, T6 or National Higher Diploma (NHD), BTec, Mtec.
- The following are examples of a 3-year technikon qualification/diploma:
- T3 or National Diploma (ND), S4.

Technical College qualifications (NTS or N) are considered as follows for occupational selection:

- N1 and N2: equivalent to Grade 11 (Std 9)
- N3 and N5: equivalent to Grade 12 (Std 10)
- N6: equivalent to National Diploma (ND).

Grade 12/Standard 10

- For occupational underwriting Grade 12 (Std 10) is a Senior Certificate or equivalent qualification at a recognised educational institution.

Definition of income

Gross taxable income

- Taxable income payable or benefits receivable on account of the insured life's employment or any services rendered by the insured life.

Cost to company earnings

- This equals gross taxable income plus the value of the use of a motor vehicle, as well as the employer's contributions to a medical scheme and a pension fund and the cost of any other benefits paid for by the insured's employer.

Gross professional income (professionals only)

- For professionals that charge a fee for services, this equals the sum of the professional fee and the net income from trading activities after deducting business overheads expenses.

Married applicants

- For married applicants the more favourable combination of income and education of either life will be used. Each life insured will be underwritten individually.

Housewives

- The income of the spouse will be used to determine a rating classification.

Students

- The parent's income will be used to determine a rating classification, subject to a maximum of R10 000.

Change in risk factors

The information that the insured life gives Momentum in the application form or in any other documents that he provides in support of his application, forms the basis on which the policy is issued.

If the insured life's risk factors (e.g. health, occupation, avocation or country of residence) change, Momentum has to be informed before the policy's starting date.

If the insured life fails to inform Momentum of any of the above, Momentum may:

- cancel the policy with immediate effect and keep any premiums paid to Momentum as a penalty
- refuse to pay out any current or future claims
- apply altered terms and conditions.

General underwriting requirements

HIV testing

Underwriting at new business stage includes an HIV test. Cover will be declined if the test is positive.

Guideline for underwriting requirements

Underwriters may call for additional requirements based on medical and other information at their disposal. These additional requirements are based on the following risk factors:

- The age of the insured life,
- Body Mass Index (BMI)
- Family history
- The insured life's drinking and smoking habits
- Any other factors that may influence the risk assessment i.e. occupation, territory, socio-economic etc.

The following list is a quick guide to some of the more commonly disclosed medical conditions and/or risk factors. If an insured life discloses any medical condition that does not appear on the list, an executive underwriter will make the decision.

Medical condition	Requirements
Alcohol abuse	• Present or still drinking: POSTPONE • Otherwise – Liver functions: GGT, ALT, AST – Personal medical attendants report from treating doctor – Substance use questionnaire (UNDERW036)
Alcohol consumption	• Drinking four or more units per day: – Liver functions: GGT, AST, ALT
Aneurysm	• Personal medical attendants report from treating doctor
Asthma	• Full medical by general practitioner • Respiratory questionnaire
Anabolic steroids	• Personal medical attendants report from treating doctor • Liver functions: GGT, AST, ALT • Serum urea and creatinine (blood test) • Random cholesterol • Substance use questionnaire (UNDERW036)
Anaemia	• Declaration by insured life advising the type of anaemia • Full blood count
Anorexia Nervosa	• Anorexia nervosa at present: POSTPONE • Otherwise – Personal medical attendants report from treating psychologist – Personal wellbeing questionnaire by applicant
Arteriosclerosis / Coronary artery bypass / Heart attack / Stent / Ischaemic heart disease / Angina	• Medical by a general practitioner • Random Cholesterol • Rest and effort ECG • Cardiac and arterial system questionnaire (UNDERW045) (including follow up reports)
Anxiety	• Personal wellbeing questionnaire by client

Medical condition	Requirements
Arthritis (Osteo)	• If benefits applied for: Supplementary questionnaire
Arthritis (Rheumatoid)	• Short medical report • Supplementary questionnaire • Personal Medical attendant report from the treating doctor
Arthroscopy	• If the insured life is not fully recovered or residual symptoms and benefits are applied for: Supplementary questionnaire
Atrial fibrillation	• Medical by a general practitioner • Personal medical attendants report from treating physician • Rest and effort ECG
Back pain / operation	• If benefits applied for: Neck and back pain questionnaire
Bells palsy	• Within past six months or not 100% recovered: • Personal medical attendants report from treating doctor • Supplementary questionnaire
Bilharzia	• Within past six months or still on treatment or not 100% recovered: • Microscopical and chemical urinalysis
Bladder cancer	• Bladder cancer at present or still on treatment: POSTPONE • Otherwise – Microscopical and chemical urinalysis – Serum creatinine (blood test) – Personal medical attendants report from treating Urologist (including histology reports and follow up reports)
Bipolar disorder	• Personal wellbeing questionnaire by applicant • Personal medical attendants report from treating Psychologist/Psychiatrist
Body Mass Index (BMI) BMI Calculation Weight (in kilograms) divided by height [(in metres) squared]	**BMI of 15 or less** • Short medical report • Full blood count **BMI between 36 and 40** • 40 years or younger: – Short medical report • Older than 40 years: – Medical by a general practitioner – Rest and effort ECG **BMI greater than 40** • 40 years or younger: – Short medical report – Random blood sugar • Older than 40 years: – Medical by a general practitioner – Rest and effort ECG – Random blood sugar
Bronchitis	• Only chronic bronchitis sufferers: • Personal medical attendants report from treating doctor • Lung function test • Respiratory questionnaire
Blood pressure (high)	• Short medical report • In lives older than 40 or with other risk factors: – Medical by a general practitioner – Rest and effort ECG
Blood pressure (low)	• No additional requirements
Cataract	• If benefits applied for: Supplementary questionnaire

Medical condition	Requirements
Cancer	• Benign growths, whether current, on treatment, or history of: Declaration from the client • Cancer, current or still on treatment: POSTPONE • Cancer, no longer on treatment, history of: – Prostate cancer: > Prostate-specific antigen test (PSA) > Microscopical and chemical urinalysis > Cancer, tumours or growths questionnaire (UDWERW046) (including original histology and all follow reports.) – Breast cancer: > Cancer, tumours or growths questionnaire (UNDERW046) (including original histology an all follow up reports) – Bladder cancer: > Microscopical and chemical urinalysis > Serum creatinine (blood test) > Cancer, tumours or growths questionnaire (UNDERW046) (including original histology an all follow up reports) – Skin Cancer: > Cancer, tumours or growths questionnaire (UNDERW046) (including original histology an all follow up reports) – Leukemia: > Cancer, tumours or growths questionnaire (UNDERW046) (including original histology an all follow up reports) > Full blood count
Chest pain	• Chest pain questionnaire • Cardiac and arterial system questionnaire (UNDERW045)
Cholesterol (high)	• Short medical report • Random cholesterol • In lives older than 40 or other risk factors, – Medical by general practitioner – Rest and Effort ECG – Random cholesterol
Chronic obstructive airways disease / Emphysema	• Personal medical attendants report from treating doctor • Lung function test • Respiratory questionnaire
Dagga	• History of or present use: – Full declaration from client re use (frequency and when last used) – Urine cannabis test – Urine cocaine test
Depression	• Personal wellbeing questionnaire by applicant • Personal medical attendants report from treating doctor (may be requested if benefits applied for)
Deafness	• If benefits are applied for we will require a declaration by the client stating: – What percentage hearing loss – Whether hearing loss in 1 or both ears – Cause of hearing loss – Whether hearing loss is progressive or not
Dermatitis	• Supplementary questionnaire
Diabetes Insipidus	• Personal medical attendants report from treating doctor

Medical condition	Requirements
Diabetes Mellitus	• Medical by a general practitioner • Rest and effort ECG (for clients older than 40years) • Diabetes questionnaire by client • HBA1C blood test
Deep vein thrombosis	• Less than three years ago or not fully recovered: Personal medical attendants report from treating doctor
Drug abuse	• Substance use questionnaire
ECG abnormality	• Personal medical attendants report from treating doctor/Cardiologist
Pulmonary embolism	• Personal medical attendants report from treating doctor/Cardiologist • Medical by a general practitioner (heart)
Emphysema / Chronic obstructive airways disease	• Personal medical attendants report from treating doctor • Lung function test • Respiratory questionnaire
Epilepsy	• Epilepsy questionnaire by client • Depending on the information disclosed & the nature of benefits applied for • Personal medical attendants report from treating doctor (including follow up reports)
Family history	• If there is a family history of two or more family members with heart failure, kidney failure or death from natural causes under the age of 65 or a family history of one or more family members with heart failure, kidney failure or death from natural causes before age 55 AND • The client is 30 years or older – Random cholesterol – Random blood sugar
Fractures	• If not fully recovered or if residual problems exist and if benefits applied for: Supplementary questionnaire
Genetic testing	• Result of genetic test
Gilbert syndrome	• Short medical report • Liver functions: GGT, ALT, AST
Glandular fever	• If not fully recovered or still on treatment and benefits applied for: – Personal medical attendants report from treating doctor – Supplementary questionnaire
Glomerulonephritis	• Short medical report • Personal medical attendants report from the treating doctor (with sight of all reports including follow up's) • Microscopical and chemical urinalysis • Serum urea and creatinine (blood test)
Gout	• If the symptoms are severe or frequent (more than 3x per week) and affect any of the following joints: - ankles, knees, hips, shoulders, elbows or wrists and benefits applied for – Supplementary questionnaire – Personal medical attendants report from treating doctor
Hiatus hernia	• Gastrointestinal questionnaire
Hip replacement	• If benefits applied for: Supplementary questionnaire
Heart murmur	• Special heart report by Specialist Physician • Cardiac and arterial system questionnaire (UNDERW045)

Medical condition	Requirements
Heart disease/ Heart attack	• Medical by a general practitioner • Random cholesterol • Rest and Effort ECG • Cardiac and arterial system questionnaire (UNDERW045) (including follow up reports)
Heart valve replacement	• Medical by General practitioner • Rest and effort ECG • Cardiac and arterial system questionnaire (UNDERW045) (including follow up reports)
Hepatitis	**Hepatitis A** • If present, not fully recovered or still on treatment: POSTPONE – Otherwise: No additional requirements **Hepatitis B or C** • If present, still on treatment or within six months from full recovery: POSTPONE • Otherwise – Liver functions: GGT, ALT, AST – Personal medical attendants report from treating doctor
Haematuria (blood in the urine)	• Refer to Urine Abnormalities
Hydrocephalus	• Personal medical attendants report from treating neurologist (with sight of all follow-up reports)
Hodgkin's disease	• Full medical report by general practitioner • Cancer, Tumours or growths Questionnaire (UNDERW046) (including original histology an all follow up reports
Headache	• If benefits applied for: Supplementary questionnaire
HIV positive	• Momentum offer cover to HIV positive clients • Must be on treatment for at least 6 months • HIV questionnaire • Medical report by treating doctor
Huntington's chorea	• DECLINE
Insulin resistance	• Short medical report • Random blood sugar
Insomnia	• If benefits applied for: Personal wellbeing questionnaire
Kidney stones	• Less than three months ago or not fully recovered or still on treatment: – Microscopical and chemical urinalysis • If more than one episode also obtain – Personal medical attendants report from treating doctor (with sight of all reports including follow up's)
Kidney disease	• Short medical report • Personal medical attendants report from treating doctor (with sight of all reports including follow up's) • Microscopical and chemical urinalysis • Serum urea and creatinine (blood test)
Kidney removal or donation	• Short medical report • Personal medical attendants report from treating doctor (with sight of reports)

Medical condition	Requirements
Leukemia	• Cancer, Tumours or growths Questionnaire (UNDERW046) (including original histology an all follow up reports • Full medical by general practitioner
Liver disease	• Short medical report • Personal medical attendants report from treating doctor • Liver functions: GGT, AST, ALT
Lobectomy (removal/ partial removal of lung)	• Personal medical attendants report from treating doctor • Lung function test
Malaria	• Single episode if present or not fully recovered or still on treatment: POSTPONE • Otherwise: No additional requirements • **More than one episode** – Personal medical attendants report from treating doctor (with sight of all reports including follow up's)
Marfan's syndrome	• Medical by a general practitioner • Personal medical attendants report from treating doctor
Memory loss	• Personal medical attendants report by treating doctor
Meningitis	• Within past six months or not fully recovered or still on treatment: POSTPONE • Otherwise: No additional requirements
Melanoma/Mole removed/Skin cancer	• Cancer, Tumours or growths Questionnaire (UNDERW046) (including original histology an all follow up reports
Multiple Sclerosis	• Supplementary questionnaire • Personal medical attendants report from treating doctor.
Muscular dystrophy	• Personal medical attendants report from treating doctor • Supplementary questionnaire
Narcolepsy	• Personal medical attendants report from treating doctor • Supplementary questionnaire
Nephritis	**Acute nephritis** • If less than two years ago, or not fully recovered or still on treatment: – Short medical report – Personal medical attendants report from treating doctor (including sight of reports and results of follow-ups – Microscopical and chemical urinalysis – Serum urea and creatinine (blood test) • Otherwise – No additional requirements **Chronic Nephritis** • Short medical report • Personal medical attendants report from treating doctor (including sight of reports and results of follow-ups • Microscopical and chemical urinalysis • Serum urea and creatinine (blood test)
Nose polyps	**Benign nose polyp** • No additional requirements; however, the client must declare the type of polyp, date of treatment, etc. on the application form. **Malignant nose polyp** • If present, not fully recovered or still on treatment: POSTPONE • Otherwise: Cancer, Tumours or growths Questionnaire (UNDERW046) (including original histology an all follow up reports

Medical condition	Requirements
Orchidectomy	• Removed due to cancer: • Cancer, Tumours or growths Questionnaire (UNDERW046) (including original histology an all follow up reports • Due to a diagnosed medical condition: – Personal medical attendants report from treating doctor with copies of all reports on file • Trauma – No additional requirements
Overweight	• Refer to BMI guidelines
Palpitations	• Medical by a general practitioner • Rest and effort ECG
Prostatitis	• Personal medical attendants report from treating doctor • Prostate-specific antigen test (PSA)
Pulmonary embolism	• Supplementary questionnaire
Pancreatitis	• Personal medical attendants report from treating the doctor with copies of reports • Short medical report • Liver functions: GGT, AST, ALT • HBA1C
Paralysis Paraplegia Quadriplegia	• Medical by General Practitioner • Declaration from life assured advising cause of paralysis • Personal medical attendants report from treating doctor • Microscopical and chemical urinalysis • Serum urea and creatinine (blood test)
Pregnancy	• No complications with current or any previous pregnancies: – No additional requirements • Otherwise – Short medical report – Declaration from life assured advising nature of complications.
Parkinson's disease	• Personal medical attendants report by treating specialist
Pneumoconiosis	• Lung function test • Medical by a general practitioner • Respiratory questionnaire
Pneumonia	• If not fully recovered or still on treatment: POSTPONE • Otherwise: No additional requirements
Polio	• Medical by General Practitioner
Porphyria	• Declaration from client advising the type of porphyria suffered, whether they have ever suffered any complications and whether they wear a medic alert bracelet.
Rheumatic fever	• Special heart report by specialist physician
Sarcoidosis	• Respiratory questionnaire • Lung function test • Personal medical attendants report from the treating doctor with reports
Scoliosis	• If benefits applied for: Neck and back pain questionnaire
Sleep Apnoea	• Personal medical attendants report from treating doctor • Supplementary questionnaire

Medical condition	Requirements
Stroke	• Medical by a general practitioner • Personal medical attendants report from treating doctor • Rest and effort ECG
Stomach ulcer	• Gastro-intestinal questionnaire
Sugar	• Low blood sugar • No additional requirements • High blood sugar refers to diabetes guideline
Skin cancer	• Refer to Cancer Guidelines
Shunt	• Personal medical attendants report from treating neurologist (with sight of follow up reports)
Smoking	• 40 years or older, smoking 30 or more cigarettes per day: • Lung function test • Medical by General Practitioner
Thyroid (hyper and hypo thyroidism)	• Personal medical attendants report from treating doctor
Tuberculosis	• If within six months or not fully recovered or still on treatment: – POSTPONE • If Pulmonary TB more than six months ago: – Declaration by client advising whether the treatment has been completed and whether they are fully recovered. • If Extra Pulmonary TB more than 6 months ago – Declaration by client advising whether the treatment has been completed and whether they are fully recovered. • Personal Medical attendants report from treating doctor – Medical by General practitioner
Ulcers	• Gastro intestinal questionnaire
Urine abnormalities:	• Haematuria (blood in urine): – Microscopical and chemical urinalysis – Personal medical attendants report from treating doctor with a final diagnosis – Prostate specific antigen test (PSA) – for male clients older than 50 years • Proteinuria: – Microscopical and chemical urinalysis – Serum urea and creatinine (blood test) – Short medical report • Glucose (sugar in urine): – Refer to Diabetes Guidelines
Varicose Veins	• Declaration by client stating: – Nature of treatment – Complications (if any)
Visual Impairment (not refractive errors)	• If benefits are applied for we will require a declaration by the client stating: – What percentage of Visual loss or nature of impairment – Whether visual loss in 1 or both eyes – Cause of visual loss – Whether the visual loss is progressive or not
Whiplash	• Back/neck pain questionnaire

Standard ratebook requirements

Mortality and lump sum disability/impairment benefits

Benefit amount	Age			
	<46	46 - 60	61 - 70	71 +
R0 – R500 000	HIV	HIV	HIV; Short Medical Report; Cholesterol; Gamma GT; Hba1c	HIV; Cholesterol; Gamma GT; GP Medical; Hba1c; PMA report from GP

Future Cover – Business	Ancillary	40% of the benefit amount	Add to death
Future Cover – Students	Ancillary	40% of the benefit amount	Add to death

Financial underwriting

Objective

The objective of financial underwriting is to:

- establish whether there is a valid insurable interest
- determine whether the applicant will be able to pay the premiums
- ensure that the purpose of the policy is to maintain the lifestyle of the beneficiary and not to improve it
- determine whether the amount applied for meets the applicant's need.

Initial risk

Insured amounts for financial aggregation must include the following:

- the new insured amount, plus
- any concurrent applications negotiated with Momentum and/or any other life insurance company, plus
- accidental death cover, plus
- all cover in force with Momentum and any other life insurance company.

All information available is required when doing financial underwriting. Please provide financial needs analysis and/or financial statements and balance sheets and/or broker calculation sheets for a reason for cover, with completed Financial Questionnaires.

Financial questionnaire

Unless otherwise indicated, the applicant must fill in Momentum's Financial Questionnaire in all cases where one insured life exceeds the current financial limit of R7 million.

The applicant must fill in the 'Personal Insurance Financial Questionnaire' for personal cover and the 'Business Insurance Financial Questionnaire' for applications for business insurance.

Financial statements may also be required.

Financial restrictions may apply at underwriting stage, e.g. to students.

Financial underwriting grid

The table below reflects anticipated financial requirements based on the total benefit amount that the policyholder will have accumulated in the market per reason for assurance/insurable interest. Momentum reserves the right to request financial evidence in addition to that reflected.

Reason for cover/ Insurable interest	Benefit amount	Financial requirements
Personal cover	<R10 000 000	May not be required.
	≥R10 000 000 but <R20 000 000	• FNA and/or • Financial Questionnaire for Personal Assurance.
	≥R20 000 000	• FNA and/or • Financial Questionnaire for Personal Assurance. • Personal Income Statement and balance sheet by accountant. • Proof of personal liabilities (if applicable)

Reason for cover/ Insurable interest	Benefit amount	Financial requirements
Complete Income Protector Temporary Income Protector Business Protector	<R50 000 per month	• Financial evidence may not be required.
	≥R50 000 per month	• Proof of income as per tax return
Business Overheads Protector	<R50 000 per month	• Schedule of overheads expenses signed by the policyholder.
	≥R50 000 per month	• Financial Statements reflecting expenses signed by the policyholder.
Contingent Liability	<R10 000 000	• Fulcrum Executive Summary
	≥R10 000 000	• Fulcrum Executive Summary • Proof of Loan • Financial statements of business
Keyperson Insurance*	<R5 000 000	• Fulcrum Executive Summary
	≥R5 000 000	• Fulcrum Executive Summary and • Audited financial statements of business
Buy-and-sell Cover	<R30 000 000	• Fulcrum Executive Summary
	≥R30 000 000	• Audited financial statements of business and • Audited financial statements of business

Personal insurance

Family protection

The main objective of family protection is to replace the income that will be lost upon the death of the insured life.

The following broad guidelines may be used to determine the appropriate level of cover:

Age	Multiple of gross annual income	
	Married	Unmarried
To 25	20	15
26 — 50	25	20
51 — 59	18	15
60 — 65	10	8

Every application is dealt with on its own merits.

Security for loans

If application is made for insurance which is to be offered as security for a loan, full particulars of the loan as well as the reason for the loan (for example mortgage bond) must be supplied.

A letter of confirmation from the bank or financial institution is needed for loan applications to determine the level of cover that may be allowed.

Estate duty

Currently estate duty is only payable on that portion of your estate that exceeds the Section 4 (A) abatement of R3.5 million, i.e. the taxable amount. If you had a spouse (as defined in the Estate Duty Act) who predeceased you, your R3.5 million abatement may be increased with the unutilised portion of that spouse's own R3,5 million abatement, depending on the number of spouses involved.

When one considers that the estate includes the assets and may also include insurance and group cover, then it is possible that the R3.5 million (plus roll-over, if applicable) threshold may be exceeded. After the total value of the assets have been determined, the next step is to deduct any liabilities such as outstanding debts and taxes.

Liabilities also include funeral expenses, master's fees and executor's fees, referred to as allowable deductions. Executor's fees are currently 3,5% of the gross value of the assets and VAT may in certain instances be charged on this fee, in which case the executors' fees amount to 4.03% (3.5% + 15% VAT) of the gross estate value. The balance remaining after allowable deductions are taken into account is the net asset value of the estate. The allowable R3.5 million (plus roll-over, if applicable) rebate is deducted from this amount.

The residue is taxed at a fixed rate of 20%. When insurance is required to provide for estate duty, the estimated estate duty calculation must accompany the application.

Business insurance

Key person insurance

In most businesses, there are usually one or two individuals who are considered to be key persons by virtue of their training, experience, marketing ability, etc.

In the event of their early death or disability, the company would be put in a rather difficult situation to replace such individuals from both a financial and a convenience point of view.

Please provide full details and motivation for the cover amount requested and reasons for key person insurance.

Buy-and-Sell insurance

An insurable interest exists between partners when the partnership agreement stipulates that the surviving partners are obligated to purchase the deceased partner's share in the partnership.

The method by which the partnership has been valued and a copy of the partnership agreement are required.

Momentum has the right to request financial statements if the amount of cover appears to be excessive.

Contingent liability insurance

The requirements for business loans are similar to the requirements for personal loans. The type of policy, policy terms and insured amount should correspond as much as possible with the particulars of the loans. (Refer to Personal Insurance, Security for Loans section.)

Unnatural Death Benefits are not available on Business Insurance.

Insolvent estates

According to law, an insolvent has no contractual capacity and may, therefore, not enter into an insurance contract without the permission of the trustee of the insolvent estate.

Momentum realises that an insolvent also requires life cover for his family in the event of his death and are prepared to underwrite him, subject to individual consideration, limited life cover, and the trustee's consent.

The trustees of the insolvent estate are required to fill in the necessary section on the Insolvency Questionnaire, thus giving their approval to the insolvent entering into such a contract. The Insolvency Questionnaire must accompany the application form.

Automatic rehabilitation occurs after 10 years of final date of sequestration and no Insolvency Questionnaire will then be required.

Occupational underwriting

Description

Momentum's quotation system will determine occupational classes and certain loadings.

To ensure that a client is rated accurately and fairly, it is important to choose the occupation that best describes the occupational duties of the client. If, for example, the client is the Managing Director and the Accountant of the business, the occupation should be captured as Accountant and not Managing Director.

Where necessary, the underwriters may request an Occupational Questionnaire.

All occupations are subject to underwriting.

Definition of Classes A, B, C and D

This is a broad guideline for occupation classes. Please refer to the quotation system for the latest updates.

A	Professional, executive, managerial, commercial and clerical persons whose work is exclusively administrative. Persons who are involved in site visits or field-work, or who travel extensively, are therefore excluded. Examples: Accountant, actuary, advocate, attorney, auditor, doctor, ophthalmologist, psychiatrist, surgeon.
B	Professional, executive, managerial and clerical persons, trades people (management and supervisory), with a limited amount of travel, field-work and technical skills, whose responsibilities include at least 80% administrative work. Examples: Botanist, computer technician, metallurgist, building contractor.
C	Master artisans and craftsmen (management and supervisory), shop assistants, skilled workers (light manual labour in non-hazardous areas), whose duties are at least 50% administrative. Examples: Plumber, toolmaker, building inspector, cabinet maker.
D	Skilled and semi-skilled workers who do manual labour, craftsmen (nonsupervisory) . Examples: Glazier, millwright and occupations that involve extraordinary risks and unskilled heavy manual labourers. Examples: Crane driver, fireman, spraypainter, panelbeater.

Medical occupations for the Accidental HIV Benefit

The following medical occupations qualify for higher maximum benefit amount limits under the Accidental HIV Benefit:

Medical occupations	
Anaesthetist	Orthodontist
Cardiologist	Orthopaedic Specialist
Clinical Psychologist	Orthopaedic Surgeon
Dental Surgeon	Osteopath
Dentist	Paediatrician
Dermatologist	Pathologist
Gastro-Enterologist	Periodontist
Geneticist	Physician Specialist

Medical occupations	
Gynaecologist	Physiotherapist
Haematologist	Prosthodontist
Industrial Psychologist	Plastic Surgeon
Medical Doctor/General Practitioner	Prosthodontist
Medical Specialist	Psychiatrist
Neurologist	Psychologist
Neurosurgeon	Radiologist
Occupational Psychologist	Radiotherapist
Oncologist	Surgeon
Ophthalmologist	Urologist

Occupations that qualify for the Professional Package

The following medical occupations qualify for higher maximum benefit amount limits under the Professional Package:

Professional occupations	
Actuary	Marine Biologist
Advocate	Metallurgical engineer
Aeronautical engineer	Mine engineer
Agricultural engineer	Neurologist
Anaesthetist	Neurosurgeon
Architect	Occupational psychologist
Attorney	Occupational Therapist
Auditor	Oncologist
Bacteriologist	Ophthalmologist
Biomedical Engineer	Optometrist
Broker (CFP)	Orthodontist
Cardiologist	Orthopaedic specialist
Chartered accountant	Orthopaedic surgeon
Chemical engineer	Osteopath
Chemist (Other)	Paediatrician
Chemist (Pharmaceutical)	Pathologist
Chiropractor	Periodontist
Civil engineer	Pharmacist
Clinical psychologist	Physician specialist
Construction Engineer	Physiotherapist
Dental surgeon	Plastic surgeon
Dentist	Prosthodontist
Dermatologist	Psychiatrist

Professional occupations	
Electrical engineer	Psychologist
Financial adviser (CFP)	Radiologist
Gastro-enterologist	Radiotherapist
Geneticist	State advocate
Gynaecologist	State attorney
Haematologist	Student - Professional
Industrial engineer	Surgeon
Industrial psychologist	Urologist
Judge	Veterinarian
Mechanical engineer	Veterinary surgeon
Medical doctor/General practitioner	

Avocational underwriting

Avocational and medical loadings will be determined at underwriting stage.

If the insured life pursues a hazardous pursuit at the policy's starting date, he has to inform Momentum.

Where an insured life pursues a hazardous pursuit, he must fill in the relevant questionnaire.

Once the underwriter receives this, the relevant rating will be determined. Please note: That the avocation ratings listed in this guide are only guidelines and the final decision may differ from the ratings listed.

Mineworkers

The following rules will apply once a Mining Questionnaire, filled in by the insured life, has been received:

- There is no extra premium for surface workers and persons who work underground for less than 10 hours a week.
- The following extra premium per R10 000 of the insured amount will be levied for mining persons who work underground for more than 10 hours a week, depending on the type of occupation (see attached list):

Age next birthday	Low risk occupation	High risk occupation
	Rate/R10 000/Month	Rate/R10 000/Month
15 - 50	1.75	3.50
51 - 55	2.00	4.00
56+	2.00	4.00

The actual extra premium may be greater than these amounts due to expense charges taken into account on the quotation system.

Low risk occupations	High risk occupations
Boilermaker	Blaster
Diamond Miner	Handyman — Mine
Electrician - Mine	Learner Officer - Mine
Fitter - Mine	Mine Contractor
Fitter & Turner - Mine	Mine Inspector
Foreman - Mine	Miner
Geologist - Mine	Mine Master Sinker
Mine Captain	Mine Reclaimer
Mine Developer	Mine Scraperman
Mine Engineer	Mine Shaft Sinker
Mine Manager	Mine Stoper
Mine Official	Mine Timberman
Mine Planner	Mine Trammer
Mine Shift Boss	Ventilation Inspector - Mine
Mine Surveyor	

Low risk occupations	High risk occupations
Production Manager — Mine	
Quality Controller — Mine	
Safety Officer — Mine	
Section Manager - Mine	
Storeman - Mine Structural	
Engineer - Mine	

The occupations above are the names used on the quotation system.

A fully completed questionnaire is required.

The diving loadings are divided into four sections:

- recreational scuba diving
- technical scuba diving
- commercial diving
- additional loadings for divers, depending on the type of risk involved.

The diving ratings listed in this guide are only guidelines and the final decision may differ from the ratings listed.

Recreational scuba diving

The insured life must have an appropriate diving certification with one of the following recognised organizations: NAUI, SAUU, BSAC, PADI, CMAS, etc., and:

- has dived within the past two years
- dives to a maximum depth of 60 meters
- always dives in a group or with a suitably qualified diving partner.

The insured life does not participate in:

- wreck penetration diving
- cave or pothole diving
- competitive diving
- record attempts
- any form of hazardous diving
- Heliox or Tri-Mix diving.
  (Refer to diving loadings in the table below.)

Technical scuba diving

Technical diving is a form of scuba diving that exceeds the scope of recreational diving:

- technical divers require advanced training, extensive experience, and specialised equipment
- technical diving often involves the use of special gas mixtures for breathing.
  (Refer to diving loadings in the table below.)

Commercial diving

Commercial diving is a branch of professional diving carried out by commercial organizations for purposes such as:

- civil engineer in harbours, water supply and drainage systems
- constructing, testing and maintaining equipment for the crude oil and offshore construction industries
- boat and ship inspection, cleaning and maintenance
- fishing, such as harvesting higher value animals like molluscs and crustaceans
- underwater salvaging, for example in sunken ships and aircraft
- mining activities, e.g. diamond mining.
  (Refer to diving loadings in the table below.)

Activities	Death Benefit/ Modified Death Benefit	Unnatural Death Benefit	Disability benefits	Income disability benefits	Critical Illness Benefits	Impairment benefits
Student diver	Exclude	Exclude	Exclude	Exclude	Exclude	Exclude
Recreational scuba diving	Standard Rates	Standard Rates	Standard Rates	I/C	Standard Rates	Standard Rates
Technical diving: < 60 metres	Standard Rates	Standard Rates	Standard Rates	I/C	Standard Rates	Standard Rates
Technical diving 61 - 80 metres	R2.50	At 100%	Exclude	I/C	At 50%	At 100%
Technical diving > 80 metres	Exclude	Exclude	Exclude	Decline	Exclude	Exclude
Commercial diving < 25 metres	R2.50	At 100%	Decline	Decline	At 50%	At 100%
Commercial diving 26 - 45 metres	R5.00	At 100%	Decline	Decline	At 50%	At 100%
Commercial diving 46 - 60 metres	R7.00	Decline	Decline	Decline	Decline	Decline
Commercial diving > 60 metres	R15.00	Decline	Decline	Decline	Decline	Decline
Wreck penetration for observation only	Rate according to recreational diving					
Wreck penetration for explorations and recovery	R1.75*	Decline	Decline	Decline	Decline	Decline
Working with explosives	R1.75*	Decline	Decline	Decline	Decline	Decline
Underwater salvage work, welding and/or surveying	R1.75*	Decline	Decline	Decline	Decline	Decline
Potholing; cave or sink hole diving	Exclude potholing; cave or sink hole diving					
Competitive diving or record attempts	Exclude diving					
Tri-Mix, Nitrox and other gas blending	Rate according to technical and commercial diving rates					
Working in foreign countries	Rate according to technical and commercial diving rates with territorial rate					
Ice diving	Decline	Decline	Decline	Decline	Decline	Decline
Diamond diving	Rate according to commercial diving					

Rate diving as per normal and then add this loading additional to the base rate.
** Add additional residency risk to dive loading.

Aviation

A fully completed questionnaire is required.

The Aviation ratings listed in this guide are only guidelines and that the final decision may differ from the ratings listed.

Motor sport

Please submit a fully completed questionnaire.

The following factors should be taken into account before arriving at a decision:

- the experience and ambitions of the individual driver/rider
- the accident record of the driver/rider
- the number of events entered each year
- the type of race event

All loadings are per R10 000 per month.

Acceptance of foreign business

Momentum will accept life business from South Africans who reside in countries where the risks, in the opinion of Momentum, are no greater than those to which they would have been exposed in South Africa. This is subject to the applicant meeting all the medical requirements as set in South Africa. Medicals need to be done by a medical doctor as prescribed in a letter issued by underwriting on request. The applicant must have a valid South African bank account.

Only claims where the claimant meets Momentum's standard claims requirements will be accepted. For example, if Momentum requires a medical practitioner's report at claim stage, a claim will not be admitted until the report has been received, irrespective of where the client lives. Momentum will pay the South African tariff rate for medical requirements and the policyholder must pay any other costs. The proceeds will be paid into a South African bank account.

New business by South Africans who live in, do contract work in, or are planning an extensive tour of two months or more to another country, where, in the opinion of Momentum, the risks are more severe than the corresponding risks in South Africa, will not be accepted until the applicants have permanently returned to South Africa.

(The above is subject to completion of a *Foreign travel and work questionnaire*that is available on VIA)

Foreign passport holders who live in South Africa will be accepted, subject to the following criteria:

- they must have been living in South Africa permanently for at least five years and must have a valid Permanent Residence Permit (proof must be submitted to Momentum)
- they must be in possession of a valid work permit where the expiry date is no less than twelve months hence (proof must be submitted to Momentum)
- they must own property in South Africa, and
- they must not travel more than twice a year to a country where, in the opinion of Momentum, the risks are more severe than the corresponding risks in South Africa.

Momentum will not accept insured lives with a refugee status.

The above is subject to completion of a *Foreign insured life questionnaire* that is available on VIA.

Underwriting exclusions

Momentum may apply three different kinds of exclusions to benefits, depending on the circumstances:

- medical exclusions on conditions that existed before the application, eg back conditions,
- avocational exclusions for part-time activities, eg risky aviation activities, and
- territorial exclusions where insured lives travel in the course of their occupations to other countries where the risk, according to Momentum, is more severe than in South Africa

Momentum applies exclusions:

- where it cannot load an additional premium on a benefit because the risk is just too great and no additional premium will cover the risk, or
- where the risk pool is too small, eg where the total number of applicants participating in potholing is very small and no loading would be sufficient.

Momentum will, in most instances, try to accommodate clients using loadings and will only apply exclusion clauses where absolutely necessary.

All exclusion clauses need to be read in conjunction with the wording following after the exclusion. This wording clearly explains Momentum's intent with regards to the practice at claim stage.

Replacements

A fully completed Replacement Advice Record must accompany all replacements. This could help to reduce underwriting requirements.

The Replacement Advice Record completed with the application form indicates that the benefit should replace an existing insurance policy or benefits(s).

The policyholder is responsible for cancelling the policy or benefits to be replaced.

Any amount payable under the policy will be subject to the cancellation of any policy or benefits that the new policy has to replace.

If the policyholder fails to cancel the policy or benefits that the new policy had to replace, Momentum reserves the right to:

- cancel the benefit/s and keep all premiums from the starting date of the benefits
- decline a claim
- adjust the premium or benefit amount from the starting date of the policy
- recover amounts that have already been paid for a claim and/or set them off against benefits payable
- apply altered terms and conditions
- use any other remedies available by law.

Disclosure

Consequences of nondisclosure/ misrepresentation

The information that the insured life gives Momentum in the application form or in any other documents provided in support of his application, forms the basis on which the policy is issued.

If the insured life fails to disclose any information, provides false information, or distorts information when applying for the policy, Momentum will have the right to suspend the cover from the policy's starting date. In addition, Momentum will also have the right to:

- refuse to pay out any current or future claims that relate to the misrepresentation or nondisclosure
- adjust the premium or benefit from the date of misrepresentation or nondisclosure
- recover money that has already been paid to the insured life for claims that relate to the misrepresentation or nondisclosure
- cancel the policy with immediate effect and keep any premiums paid to Momentum as a penalty.

Consent to disclosure

The insured life is required to give his consent to exchange information, including medical information, between Momentum and any medical practitioner whom the insured life has consulted, or any other life office.

The insured life gives Momentum permission to access this information on his behalf.

Factors which affect premiums paid

Momentum will have the right to review the premium, apply altered terms and conditions, impose additional requirements or cancel the benefit if any of the factors mentioned below change.

The insured life must notify Momentum if there is a change in his occupation or a change in smoking status. This rule applies to the following products:

- Mortality benefits
- Income disability and impairment benefits
- Income enhancer benefits
- Group income top-up benefits
- Complete family protector benefits
- Critical illness benefits
- Accidental HIV Benefit
- Living benefits
- Premium waiver benefits
- Future cover benefits
- Longevity Protector®

If the insured life fails to inform Momentum of any of the above changes, Momentum may:

- decline a claim related to the nondisclosure
- cancel the benefit/s and keep all premiums from the starting date of the benefits as a penalty
- adjust the premium or benefit amount/s from the date of nondisclosure
- recover amounts that have already been paid for a claim that is related to the nondisclosure
- apply altered terms and conditions
- use any other remedies available by law.

Smoking status

The insured life must have stopped smoking for at least six consecutive months when changing the smoking status.

In order to effect the change to non-smoker rates, the insured life must complete a non-smoker declaration.

A cotinine test may be requested at the discretion of the underwriters.

Validity period of medical information

Momentum will accept medical reports for two years and questionnaires and blood tests for six months if there were no medical abnormalities or previous history of medical problems and there has been no subsequent change in the insured life's health.

Medical

Short name	Validity period
Specialist medical	2 years
GP Medical	2 years

Claims

Introduction

All claims are processed in the same area at Momentum.

The documents required to facilitate claims processing are set out below.

Please note that these are initial requirements only and that further requirements may be set at a later stage.

As all claims are assessed on their merit, some claims may be repudiated.

The most common reasons for repudiation are as follows:

- nondisclosure of material information
- misrepresentation of facts
- failure to meet benefit definitions
- benefits are no longer in force
- insured life is not covered for the claim event.

Should such a situation arise, Momentum will act strictly under the provisions contained in the policy contract.

Claim amounts will only be paid within the borders of the Republic of South Africa in South African rand after any debt has been deducted.

Payment of a claim

If a valid death claim is admitted, the claim amount will be paid to the following people in the following order:

- The cessionary (if any)
- The beneficiary for proceeds (if any)
- The policyholder, if different to the insured life (in the absence of a beneficiary for proceeds)
- The deceased estate of the policyholder if the insured life and policyholder is the same person. (In the absence of a beneficiary for proceeds.)

If a valid claim is admitted other than a death claim, the claim amount will be paid to the following people in the following order:

- The cessionary (if any)
- The policyholder

The policyholder has the right to change the beneficiary nomination before an insured event takes place

If a premium waiver benefit is in force, Momentum will pay the premiums payable on the policy.

Requirements for admitting a claim

To assess a claim under these benefits, the documents listed are required. Additional information may be required. (Please refer to the Additional requirements section).

Death claims

Benefit	Requirement
Death Benefit Instant Cash Modified Death Benefit Unnatural Death Benefit Education Protector – Death Last Survivor Death Benefit Estate Provider Benefit Death Income Benefit	• A *Death claim form (CLAIM001E)* is completed and signed by the claimant or an authorised representative of the claimant. • A copy of the deceased insured life's identity document or unabridged birth certificate (if younger than 18 years). • A copy of the claimant (beneficiary's) identity document (if applicable). • A copy of the insured life's death certificate (BI-5). • A copy of the notification of death (DHA-1663) is obtainable from the doctor who declared the death. • If death is due to unnatural causes, the *Unnatural death claim form (CLAIM003E)* is also required and must be completed by the Investigating Police Officer. • A completed *Medical certificate for death claim form (CLAIM002E)* (only required if the benefit started less than 3 years from the claim event date). • A *POPIA Consent form (CLAIM026) is* completed and signed by the claimant or an authorised representative of the claimant. • Proof of banking details, in the name of the claimant (natural person, minor, deceased estate, legal entity), not older than three months on bank letterhead or that has a bank stamp on it. •

Terminal Illness claims

Benefit	Requirement
Terminal Illness	• A *Terminal Illness claim form (CLAIM027) is* completed by the treating specialist. • The *POPIA Consent form (CLAIM026)* is completed and signed by the claimant or an authorised representative of the claimant. • A copy of the insured life's identity document. • An up-to-date confidential medical report from the treating specialist, which must include the full diagnosis and prognosis. • Copies of all the relevant diagnostic tests and reports. • Proof of banking details, in the name of the claimant (natural person or legal entity), not older than three months on bank letterhead or that has a bank stamp on it.

Funeral claims

Benefit	Requirement
Funeral Benefit	• A *Funeral Claim form (CLAIM009) is* completed and signed by the claimant or authorised representative of the claimant. • A copy of the deceased's insured life's identity document or unabridged birth certificate (if younger than 18 years). • A copy of the notification of death/stillbirth (DHA-1663) is obtainable from the doctor who declared the death. • A copy of the insured life's death certificate (BI-5). • An *Unnatural death claim form (CLAIM003E)* is completed by the Investigating Police Officer if death is due to unnatural causes. • The *POPIA Consent form (CLAIM026) is* completed and signed by the claimant or authorised representative of the claimant (available on request). • Proof of banking details, in the name of the claimant (natural person, minor, deceased estate, legal entity), not older than three months on bank letterhead or that has a bank stamp on it.

Disability and impairment claims

Benefit

Income disability and impairment claims

Benefit	Requirements
Complete Income Protector Temporary Income Protector Business Overheads Protector Business Protector (Self Employed) Business Protector (Professional) Group Income Top-up Temporary Group Income Top-up Income Enhancer Complete Family Protector	• An *Income disability and impairment benefit claim for (CLAIM007)* signed by the policyholder or an authorised representative of the policyholder. • A *POPIA Consent form (CLAIM026)* completed and signed by the claimant or an authorised representative of the claimant (available on request). • A copy of the insured life's identity document. • Copies of all the relevant diagnostic tests and reports. • A copy of the radiology report(s) (in the event of a fracture claim). • A copy of the operation report(s) (if applicable). • A copy of the accident report from the police or the insured life's employer (only applicable if the claim event was caused by an accident). • Proof of the insured life's income for the last 12 months before the date on which they were diagnosed with the claim event. This may include salary slips, tax returns, bank statements and audited statements. • A copy of the medical certificate from a medical specialist confirming the injury or illness (the full diagnosis); and the exact period of sick leave (must include the start and end date of sick leave). • A copy of the hospital account must include the times and dates of admission and discharge (if applicable). • Proof of banking details, in the name of the claimant (natural person, minor, deceased estate, legal entity), not older than three months on bank letterhead or that has a bank stamp on it. • Curator bonis appointment if the claimant is not able to handle their own financial affairs (if applicable). • A copy of the official proof of the business' overhead expenses for the past 12 months (if applicable).

Critical illness benefit claims

Benefit	
Complete Critical Illness Benefit Complete Enhanced Critical Illness Benefit Comprehensive Living Benefit Homeloan Protector Accidental HIV Benefit	• A critical illness claim form is completed and signed by the policyholder or an authorised representative of the policyholder. – Critical illness claim form (Cardiac and arterial system, Cancer and Nervous system) – (CLAIM008) **or** – Critical illness claim form General) – (CLAIM015) • The *POPIA Consent form (CLAIM026)* is completed and signed by the claimant or an authorised representative of the claimant. • A copy of the insured life's identity document. • Copies of all the relevant diagnostic tests and reports. • An up-to-date confidential medical report from the treating specialist, which must include the full diagnosis, prognosis, treatment plan and response to treatment. A report from a general practitioner will not be accepted. • Proof of banking details, in the name of the claimant (natural person, minor, deceased estate, legal entity), not older than three months on bank letterhead or that has a bank stamp on it.

	• Curator bonis appointment if the claimant is not able to handle their own financial affairs (if applicable). • To assess a claim under the Critical Illness Cover for Children, the following documents are required: – If the legal guardian is a biological parent, a certified copy of an unabridged birth certificate, which reflects both parents' names. – If the legal guardian is not the biological parent, official proof of guardianship is issued by the Master of the High Court or Children's Court.

Retrenchment claims

Benefit	Requirement
Homeloan Protector Premium waiver - Retrenchment	• A copy of the insured life's identity document. • a copy of the certificate of service from the insured life's employer. • A copy of the official retrenchment documents. • Written confirmation from the insured life's employer as to the reasons for the termination of employment. • An affidavit from the client stating the effective date of retrenchment, and that he has not pursued any occupation since. • A copy of the application form for benefits from the Unemployment Insurance Fund (UIF). • A *Curator Bonis* or Administrator appointment if the claimant is not able to handle his own financial affairs.

Additional requirements (where applicable)

If the claimant is a natural person

- a copy of the claimant's identity document (green bar-coded, smart ID card, valid driver's licence or valid passport)

If the claimant is the deceased estate

- Verification documents - Executor (green bar-coded, smart ID card, valid driver's licence or valid passport)
- Verification of name and legal form - Letter of executorship or Article 18(3) letter of administration

If the claimant is a cessionary

- Verification documents - authorised representative (Green bar-coded, smart ID card, valid driver's licence or valid passport)
- A written instruction from the cessionary confirming the bank account to use for the claim payment as well as proof thereof in the form of a bank statement not older than three months on bank letterhead or that has a bank stamp on it
- *Payment to a bank or cessionary claim form (CLAIM029E)*

If the claimant is a minor

- A copy of the legal guardian's identity document
- If the legal guardian is a biological parent, a copy of the minor's unabridged birth certificate, which reflects both parent's names
- If the legal guardian is not the biological parent, official proof of guardianship as issued by the Master of the High Court or Children's Court and a copy of the minor's unabridged birth certificate

If the claimant is a Trust:

- Verification documents - trust beneficiary (green bar-coded, smart ID card, valid driver's licence or valid passport)
- Verification documents - all active trustees (green bar-coded, smart ID card, valid driver's licence or valid passport)
- Verification documents - founder of the trust (green bar-coded, smart ID card, valid driver's licence or valid passport)
- Trust deed or founding document
- A letter from the Master's Office confirming registration of the trust

If the claimant is a private company:

- Verification documents of managers (Chief Executive Officer/Managing Director), (green bar-coded, smart ID card, valid driver's licence or valid passport)
- Verification documents of all directors and all shareholders with at least 25% interest (green bar-coded, smart ID card, valid driver's licence or valid passport)
- Copy of the certificate of incorporation (private company documents)
- A copy of the shareholder's register or a certified copy of the organisational structure and explanation of ownership

If the claimant is a closed corporation:

- Verification documents of all active members (green bar-coded, smart ID card, valid driver's licence or valid passport)
- Copy of the certificate of incorporation (CK documents)
- A copy of the shareholder's register or a certified copy of the organisational structure and explanation of ownership.

If the claimant is a partnership:

- Verification of the identity of all partners in the partnership (green bar-coded, smart ID card, valid driver's licence or valid passport)
- Verification documents of persons who exercise executive control over partnership (green bar-coded, smart ID card, valid driver's licence or valid passport)
- Copy of the partnership agreement

If the claimant is a listed company:

- The (FICA010) checklist is to be completed and signed

If the claimant is a foreign company:

- Identity documents of managers responsible for its affairs in RSA (Chief Executive Officer/Managing Director) (valid passport, United Nations certified travel document/passport, valid travel document, refugee document (valid for 2 years only)) OR (green bar-coded, smart ID card, valid driver's licence or valid passport)
- Verification documents of all directors and shareholders with at least 25% interest (valid passport, United Nations certified travel document/passport, valid travel document, refugee document (valid for 2 years only)) OR (green bar-coded, smart ID card, valid driver's licence or valid passport)
- Copy of the certificate of incorporation (foreign company documents)
- A copy of the shareholder's register or a certified copy of the organisational structure and explanation of ownership

If the claimant (beneficiary) is a foreign national:

- Verification documents (United Nations certified travel document/passport, valid passport, valid travel document, refugee document (valid for 2 years only))
- A copy of the claimant's naturalisation certificate, if born in South Africa
- Written confirmation if the claimant never lived in South Africa and was not a South African resident
- Form MP336 (b) (an application to the South African Reserve Bank for foreign capital allowance) completed in full and signed by the claimant who has emigrated (CLAIM013E)
- Indemnity form completed by the foreign claimant (CLAIM025E)
- The name of the bank and branch where the claimant banked in South Africa before departure

Please note:

Premiums are payable until the claim has been admitted.

The policyholder must provide Momentum with written notice of a claim within six months of the claim event if the insured life is alive.

For income disability claims the insured life will have six months to provide proof of income after the claim event occurs. Claim payments will be made during this period (where applicable). If the benefit amount is reduced after receiving such proof, Momentum reserves the right to recoup any overpayments. For waiting periods longer than six months proof of income will be required before a claim is admitted.

Momentum reserves the right to have the insured life examined by a doctor of its choice before a claim is admitted. This medical examination is required to make sure that the insured life qualifies for a claim.

The policyholder is responsible for the cost associated with any medical examinations.

Momentum claims department

The Claims Department continuously strives to improve its service levels. As part of this process, this document communicates the specific procedure to be followed, with the relevant contact details. To ensure that claims are processed efficiently, the steps below need to be followed.

Contact details:

Step 1: Submit a claim to the Claims Department.

Telephone	
Sharecall (South Africa)	0860 441 111
International	011 505 1552
Email	
deathclaims@momentum.co.za	
lumpsumclaims@momentum.co.za *(For critical illness and lump sum disability claims)*	
incomeclaims@momentum.co.za	

The Claims Department will confirm that the claim was received and will then send the contact details of the claims assessor dealing with the claim.

Step 2:

Head of Claims

Nafeesa Gaida

Email: Nafeesa.gaida@momentum.co.za

Tel: 011 505 2026

Cell: 079 786 77711

Risk Claims Manager

Adele Dreyer

Email: adele.dreyer@momentum.co.za

Tel: 011 505 2288

Cell: 083 379 2595

Death Claims Manager

Sheila Mushwana

Email: sheila.mushwana@momentum.co.za

Tel: 011 505 2758

Cell: 073 222 2574

If a query requires escalation, it can be directed to the relevant manager.

Questions and Answers

Please note unless specifically stated, all questions relating to the payment of a Death Benefit. The below guidelines will remain subject to the specific wording of the Myriad policy contract.

1. **Who will receive the proceeds if the policyholder and insured life is the same person, and the insured life dies, and no beneficiary is nominated on the policy?**

   Momentum will pay the proceeds of the policy to the estate of the policyholder.

2. **What happens if a beneficiary is nominated on the policy but only for 50% of the proceeds?**

   Momentum will pay 50% of the proceeds to the nominated beneficiary. The remaining 50% of the proceeds will be paid to the estate of the policyholder.

3. **What happens if the nominated beneficiary is a minor?**

   Momentum will pay the proceeds to the minor's legal guardian or any other person or a fund authorised thereto.

4. **Can a testamentary trust be nominated as a beneficiary even though it is only created on the death of the insured life?**

   Yes, in this case, the proceeds will not be paid until the trust is registered and a bank account is opened for the trust. This may be a lengthy process.

5. **If the policyholder and insured life is not the same person, can the policyholder appoint a third party as a beneficiary for the death benefit payable under the policy?**

   Yes, in terms of the policy contract a duly appointed beneficiary will always be paid the benefits attached to the policy, unless predeceased.

6. **If the client signed a Beneficiary nomination form but did not submit it to Momentum before the claim event, will Momentum pay the old or new beneficiary?**

   Momentum will pay the existing beneficiary as reflected on Momentum's records. The only way to alter a beneficiary on a policy is to inform Momentum in writing of this change. This notification has to reach Momentum before the claim event takes place.

7. **What will happen if the beneficiary dies before the claim event takes place?**

   In terms of the policy contract, the beneficiary nomination will not apply, as the beneficiary must be alive at the time of the claim event taking place. Therefore, the proceeds will be payable to the policyholder (if the policyholder and life insured is not the same person) or to the policyholder's estate (where the life insured is also the policyholder).

   If the life insured and the beneficiary die simultaneously (in the case of husband and wife where they are beneficiaries on each other's policies) due to the same event and there is no evidence to prove who died first, both beneficiary

nominations will terminate, and the death benefit will be payable to the policyholder or the policyholder's estate.

8. **What impact does an outright cession have on the existing beneficiaries on the policy?**

   By doing an outright cession the policyholder transfers the full ownership of the policy to another person. The cession will result in the existing beneficiaries on the policy being cancelled. The new policyholder (cessionary) has to nominate new beneficiaries on the policy. If this is not done, the policy proceeds will be payable to the policyholder (cessionary) or his/her estate. The policy contract will specify what happens in a specific case.

9. **What impact does a collateral cession have on the existing beneficiaries on the policy?**

   In this case, the policyholder retains ownership of the policy but with limited rights. The cession results in the cessionary having a right to the policy proceeds in terms of an obligation the policyholder have towards the cessionary. The most common example will be where a policyholder cedes the policy to the bank as security for a loan. The bank will only be entitled to the proceeds insofar as it settles the outstanding debt.

   When a security cession is noted on the policy the existing beneficiary nomination is suspended in favour of the cessionary.

   When a claim is made, the cessionary will be paid. If the cessionary claims the full benefit amount, the balance (that the cessionary is not legally entitled to) must be recouped from the cessionary by the estate. The beneficiary that was suspended as a result of the cession being noted has no right to any proceeds.

   If the cessionary claims less than the full benefit amount (so they limit their claim to the amount owed to them by the cedent), Momentum will pay the balance to the beneficiary that was noted on the policy at the time of the cession being noted or the policyholder or his/her estate if no beneficiary is noted on the policy

   The contract will determine what happens in a specific case.

   If the security cession is cancelled before a claim, the existing beneficiaries will be reinstated in full or the policyholder can nominate new beneficiaries by informing Momentum in writing, before a claim event takes place.

   What if no beneficiary is noted on the policy?
   If the cessionary claims the full benefit amount, the balance must be recouped from the cessionary by the estate. If the cessionary claims less than the full benefit amount, Momentum will pay the balance to the policyholder or his/her estate.

10. **What happens if the policyholder's Will and the beneficiary nomination conflict with each other?**

    The only way to change the beneficiary on a policy is if the policyholder informs Momentum in writing before a claim event taking place. The contract also stipulates that no cancellation or change is possible by means of a Will or otherwise.

11. When will a beneficiary for ownership be used?

This is used if the policyholder and insured life is not the same person or where there are multiple insured lives under one policy. If the policyholder or one of the policyholders (in the case of multiple policyholders) die, that policyholder's ownership will be transferred to the beneficiary for ownership.

Note – where the policyholder was the premium payer, and he/she die, the premiums will not be paid on the policy unless a premium waiver was added. Momentum will communicate to the policyholder/the policyholder's estate/the beneficiary for ownership that the policy will lapse after two unpaid premiums, unless they inform Momentum urgently of their new banking details.

12. When will disability benefits, impairment benefits and critical illness benefits be paid to a party other than the insured life?

Even though the benefits are personal they will always be payable to the policyholder. Should a cessionary be noted on the policy, the proceeds will be payable to the cessionary. The policy contract will determine what happens in each case.

13. A Myriad policy is taken out and A is the policyholder with A and B as insured lives. A's benefits include a death benefit, a disability benefit and a critical illness benefit. B has a death benefit and a critical illness benefit. No beneficiaries are nominated on the policy.

Who is paid should A's disability or critical illness claim be admitted?

Policyholder A will be paid.

Who is paid should B's critical illness claim be admitted?

Policyholder A will be paid because the contractual liability is towards the policyholder.

Who is paid if A dies?

If A dies his/her estate will be paid the proceeds of the death claim.

Who is paid if B dies?

Policyholder A will be paid because the contractual liability is towards the policyholder.

What is the case if C is nominated as the beneficiary on the policy?

Only A, as policyholder, can appoint a beneficiary for proceeds and a beneficiary for ownership. If A appoints C as the beneficiary for ownership and A dies, the policy's ownership will transfer to C and C will be the policyholder. If A appoints C as the beneficiary for proceeds on both death benefits and either A or B dies, the death benefit will be payable to C. It is also possible that A only appoints C as a beneficiary for proceeds on the death benefit on his own life. In this case, A will receive the proceeds if B dies, and C will only receive the proceeds if A dies.

14. **A Myriad policy is taken out and A is the policyholder with A and B as insured lives. A's benefits include a death benefit, a disability benefit and a critical illness benefit. B has a death benefit and a critical illness benefit. No beneficiaries are nominated on the policy. A and B are joint owners of the policy?**

    Who is paid should A's disability or critical illness claim is admitted?

    Because A and B are equal owners on the policy, they are each paid 50% of the benefit amount.

    Who is paid should B's critical illness claim be admitted?

    Because A and B are equal owners on the policy, they are each paid 50% of the benefit amount.

    Who is paid if A dies?

    Because no beneficiary is noted on the policy, 50% of the proceeds that belong to A will be paid to his/her estate and the other 50% that belongs to B will be payable to B.

    Who is paid if B dies?

    Because no beneficiary is noted on the policy, 50% of the proceeds that belong to B will be paid to his/her estate and the other 50% that belongs to A will be payable to A.

    What happens if C is nominated as the beneficiary on the policy?

    If A and B appointed C as the beneficiary for proceeds on both their death benefits, C will receive 100% of the benefit should either one of them die.
